(2) If a person or public body requests a planning board to amend its official plan and the plan applies in whole or in part to territory without municipal organization, the planning board or council of the municipality having jurisdiction over the land to which the proposed amendment applies shall,

(a) forward a copy of the request and the information and material required under subsections (4) and (5), if any to the appropriate approval authority, whether or not the requested amendment is exempt from approval; and

(b) hold a public meeting under subsection 17 (15) or comply with the alternative measures set out in the official plan. 1996, c. 4, s. 13; 2004, c. 18, s. 4 (2); 2006, c. 23, s. 11 (2).

No open house or public meeting

(3) Despite subsections (1) and (2), the requirement to hold a public meeting under subsection 17 (15) does not apply if the council or the planning board refuses to adopt an amendment to its official plan requested by a person or public body. 2006, c. 23, s. 11 (3).

Consultation

(3.1) The council or planning board,

(a) shall permit applicants to consult with the municipality or planning board, as the case may be, before submitting requests under subsection (1) or (2); and

(b) may, by by-law, require applicants to consult with the municipality or planning board as described in clause (a). 2006, c. 23, s. 11 (3).

Prescribed information

(4) A person or public body that requests an amendment to the official plan of a municipality or planning board shall provide the prescribed information and material to the council or planning board. 1996, c. 4, s. 13.

Other information

(5) A council or a planning board may require that a person or public body that requests an amendment to its official plan provide any other information or material that the council or planning board considers it may need, but only if the official plan contains provisions relating to requirements under this subsection. 2006, c. 23, s. 11 (4).

Refusal and timing

(6) Until the council or planning board has received the information and material required under subsections (4) and (5), if any, and any fee under section 69,

(a) the council or planning board may refuse to accept or further consider the request for an amendment to its official plan; and

(b) the time periods referred to in paragraphs 1 and 2 of subsection (7.0.2) do not begin. 2006, c. 23, s. 11 (4).

Response re completeness of request

(6.1) Within 30 days after the person or public body that requests the amendment pays any fee under section 69, the council or planning board shall notify the person or public body that the information and material required under subsections (4) and (5), if any, have been provided, or that they have not been provided, as the case may be. 2006, c. 23, s. 11 (4).

Motion re dispute

(6.2) Within 30 days after a negative notice is given under subsection (6.1), the person or public body or the council or planning board may make a motion for directions to have the Municipal Board determine,

(a) whether the information and material have in fact been provided; or

(b) whether a requirement made under subsection (5) is reasonable. 2006, c. 23, s. 11 (4).

Same

(6.3) If the council or planning board does not give any notice under subsection (6.1), the person or public body may make a motion under subsection (6.2) at any time after the 30-day period described in subsection (6.1) has elapsed. 2006, c. 23, s. 11 (4).

Notice of particulars and public access

(6.4) Within 15 days after the council or planning board gives an affirmative notice under subsection (6.1), or within 15 days after the Municipal Board advises the clerk of its affirmative decision under subsection (6.2), as the case may be, the council or planning board shall,

(a) give the prescribed persons and public bodies, in the prescribed manner, notice of the request for amendment, accompanied by the prescribed information; and

(b) make the information and material provided under subsections (4) and (5) available to the public. 2006, c. 23, s. 11 (4).

Final determination

(6.5) The Municipal Board's determination under subsection (6.2) is not subject to appeal or review. 2006, c. 23, s. 11 (4).

Notice of refusal

(6.6) A council or planning board that refuses a request to amend its official plan shall, not later than 15 days after the day of the refusal, ensure that written notice of the refusal, containing the prescribed information, is given to,

(a) the person or public body that made the request;

(b) each person or public body that filed a written request to be notified of a refusal;

(c) the appropriate approval authority; and

(d) any prescribed person or public body. 2006, c. 23, s. 11 (4).

Appeal to O.M.B.

(7) When a person or public body requests an amendment to the official plan of a municipality or planning board, any of the following may appeal to the Municipal Board in respect of all or any part of the requested amendment, by filing a notice of appeal with the clerk of the municipality or the secretary-treasurer of the planning board, if one of the conditions set out in subsection (7.0.2) is met:

1. The person or public body that requested the amendment.

2. The Minister.

3. The appropriate approval authority. 2006, c. 23, s. 11 (5).

Consolidated Hearings Act

(7.0.1) Despite the *Consolidated Hearings Act*, the proponent of an undertaking shall not give notice to the Hearings Registrar under subsection 3 (1) of that Act in respect of an amendment requested under subsection (1) or (2) unless,

(a) one of the conditions set out in subsection (7.0.2) is met;

(b) if the plan is exempt from approval, the requested amendment has been adopted under subsection 17 (22);

(c) the approval authority makes a decision under subsection 17 (34); or

(d) the time period referred to in subsection 17 (40) has expired. 2006, c. 23, s. 11 (5).

Conditions

(7.0.2) The conditions referred to in subsections (7) and (7.0.1) are:

1. The council or the planning board fails to adopt the requested amendment within 180 days after the day the request is received.

2. A planning board recommends a requested amendment for adoption and the council or the majority of the councils fails to adopt the requested amendment within 180 days after the day the request is received.

3. A council, a majority of the councils or a planning board refuses to adopt the requested amendment.

4. A planning board refuses to approve a requested amendment under subsection 18 (1). 2006, c. 23, s. 11 (5).

Time for appeal

(7.0.3) A notice of appeal under paragraph 3 or 4 of subsection (7.0.2) shall be filed no later than 20 days after the day that the giving of notice under subsection (6.6) is completed. 2006, c. 23, s. 11 (5).

Appeals restricted re certain amendments

(7.1) Despite subsection (7) and subsections 17 (36) and (40), there is no appeal in respect of,

(a) a refusal or failure to adopt an amendment described in subsection (7.2); or

(b) a refusal or failure to approve an amendment described in subsection (7.2). 2006, c. 23, s. 11 (6).

Application of subs. (7.1)

(7.2) Subsection (7.1) applies in respect of amendments requested under subsection (1) or (2) that propose to,

(a) alter all or any part of the boundary of an area of settlement in a municipality;

(b) establish a new area of settlement in a municipality; or

(c) amend or revoke the policies described in subsection 16 (3), including, for greater certainty, any requirements or standards that are part of such policies. 2006, c. 23, s. 11 (6); 2011, c. 6, Sched. 2, s. 4.

Same

(7.3) If the official plan contains policies dealing with the removal of land from areas of employment, subsection (7.1) also applies in respect of amendments requested under subsection (1) or (2) that propose to remove any land from an area of employment, even if other land is proposed to be added. 2006, c. 23, s. 11 (6).

Exception

(7.4) Despite subsection (7.1), a person or public body may appeal to the Municipal Board in respect of all or any part of a requested amendment described in clause (7.2) (a) or (b) if the requested amendment,

(a) is in respect of the official plan of a lower-tier municipality; and

(b) conforms with the official plan of the upper-tier municipality. 2006, c. 23, s. 11 (6).

Contents

(8) A notice of appeal under subsection (7) shall,

(a) set out the specific part of the requested official plan amendment to which the appeal applies, if the notice of appeal does not apply to all of the requested amendment; and

(b) be accompanied by the fee prescribed under the *Ontario Municipal Board Act*. 1996, c. 4, s. 13.

Record and forwarding material

(9) The clerk of a municipality or the secretary-treasurer of a planning board who receives a notice of appeal under subsection (7) shall ensure that,

(a) a record is compiled which includes the prescribed information and material;

(b) the notice of appeal, the record and the fee are forwarded to the Municipal Board within 15 days after the notice is received;

(c) the notice of appeal and the record are forwarded to the appropriate approval authority within 15 days after the notice is received, whether or not the plan is exempt from approval, unless the approval authority has notified the municipality or the planning board that it does not wish to receive copies of the notices of appeal and the records; and

(d) such other information or material as the Municipal Board may require in respect of the appeal is forwarded to the Board. 1996, c. 4, s. 13; 1999, c. 12, Sched. M, s. 23 (1).

Exception

(9.1) Despite clause (9) (b), if all appeals under subsection (7) are withdrawn within 15 days after the notice of appeal is filed, the municipality or planning board is not required to forward the materials described under clauses (9) (b) and (d) to the Municipal Board or under clause (9) (c) to the appropriate approval authority. 1999, c. 12, Sched. M, s. 23 (2).

Appeals withdrawn, amendment

(9.2) If all appeals under subsection (7) brought in accordance with paragraph 1 or 2 of subsection (7.0.2) in respect of all or any part of the requested amendment are withdrawn within 15 days after the date that the most recent notice of appeal was filed, the council or planning board may, unless there are any outstanding appeals, proceed to give notice of the public meeting to be held under subsection 17 (15) or adopt or refuse to adopt the requested amendment, as the case may be. 2006, c. 23, s. 11 (7).

Decision final

(9.3) If all appeals under subsection (7) brought in accordance with paragraph 3 or 4 of subsection (7.0.2) in respect of all or any part of the requested amendment are withdrawn within 15 days after the last day for filing a notice of appeal, the decision of the council or planning board is final on the day that the last outstanding appeal has been withdrawn. 2006, c. 23, s. 11 (7).

Other information

(10) A person or public body that files a notice of appeal under subsection (7) shall provide to the Municipal Board the prescribed information or material and such other information as the Board may require. 1996, c. 4, s. 13.

Application

(11) Subsections 17 (44) to (44.7), (45), (45.1), (46), (46.1), (49), (50) and (50.1) apply with necessary modifications to a requested official plan amendment under this section, except that subsections 17 (44.1) to (44.7) and (45.1) do not apply to an appeal under subsection (7) of this section, brought in accordance with paragraph 1 or 2 of subsection (7.0.2). 2006, c. 23, s. 11 (8).

Matters of provincial interest

(11.1) Where an appeal is made to the Municipal Board under this section, the Minister, if he or she is of the opinion that a matter of provincial interest is, or is likely to be, adversely affected by the amendment or any part of the amendment in respect of which the appeal is made, may so advise the Board in writing not later than 30 days before the day fixed by the Board for the hearing of the appeal and the Minister shall identify,

(a) the provisions of the amendment or any part of the amendment by which the provincial interest is, or is likely to be, adversely affected; and

(b) the general basis for the opinion that a matter of provincial interest is, or is likely to be, adversely affected. 2004, c. 18, s. 4 (9).

No hearing or notice required

(11.2) The Minister is not required to give notice or to hold a hearing before taking any action under subsection (11.1). 2004, c. 18, s. 4 (9).

Confirmation by L.G. in C.

(11.3) If the Municipal Board has received notice from the Minister under subsection (11.1), the decision of the Board is not final and binding in respect of the provisions of the amendment or the provisions of any part of the amendment identified in the notice unless the Lieutenant Governor in Council has confirmed the decision in respect of those provisions. 2004, c. 18, s. 4 (9).

Action of L.G. in C.

(11.4) The Lieutenant Governor in Council may confirm, vary or rescind the decision of the Municipal Board in respect of the provisions of the amendment or the provisions of any part of the amendment identified in the notice and in doing so may direct the Minister to modify the amendment to the plan. 2004, c. 18, s. 4 (9).

Withdrawal of appeal

(12) If all appeals under subsection (7) brought in accordance with paragraph 1 or 2 of subsection (7.0.2) are dismissed by the Municipal Board without holding a hearing or are withdrawn, the secretary of the Board shall notify the council or the planning board and the council

or the planning board may proceed to give notice of the public meeting or adopt or refuse to adopt the requested amendment, as the case may be. 1996, c. 4, s. 13; 2004, c. 18, s. 4 (10); 2006, c. 23, s. 11 (9).

Same

(13) If all appeals under subsection (7) brought in accordance with paragraph 3 or 4 of subsection (7.0.2) are dismissed by the Municipal Board without holding a hearing or are withdrawn, the secretary of the Board shall notify the council or the planning board and the decision of the council or the planning board is final on the day that the last outstanding appeal has been withdrawn or dismissed. 1996, c. 4, s. 13; 2006, c. 23, s. 11 (10).

Request by Minister to amend plan

23. (1) Where the Minister is of the opinion that a matter of provincial interest as set out in a policy statement issued under section 3 is, or is likely to be, affected by an official plan, the Minister may request the council of a municipality to adopt such amendment as the Minister specifies to an official plan and, where the council refuses the request or fails to adopt the amendment within such time as is specified by the Minister in his or her request, the Minister may make the amendment. R.S.O. 1990, c. P.13, s. 23 (1).

Hearing by O.M.B.

(2) Where the Minister proposes to make an amendment to an official plan under subsection (1), the Minister may, and on the request of any person or municipality shall, request the Municipal Board to hold a hearing on the proposed amendment and the Board shall thereupon hold a hearing as to whether the amendment should be made. R.S.O. 1990, c. P.13, s. 23 (2).

Refusal to refer to O.M.B.

(3) Despite subsection (2), where the Minister is of the opinion that a request of any person or municipality made under subsection (2) is not made in good faith or is frivolous or vexatious or is made only for the purpose of delay, the Minister may refuse the request. R.S.O. 1990, c. P.13, s. 23 (3).

Notice

(4) Where the Minister has requested the Municipal Board to hold a hearing as provided for in subsection (2), notice of the hearing shall be given in such manner and to such persons as the Board may direct, and the Board shall hear any submissions that any person may desire to bring to the attention of the Board. R.S.O. 1990, c. P.13, s. 23 (4).

Decision of O.M.B.

(5) The Municipal Board, after the conclusion of the hearing, shall make a decision as to whether the proposed amendment, or an alternative form of amendment, should be made but the decision is not final and binding unless the Lieutenant Governor in Council has confirmed it. R.S.O. 1990, c. P.13, s. 23 (5); 1994, c. 23, s. 15 (1); 2004, c. 18, s. 5 (1).

Powers of L.G. in C.

(6) The Lieutenant Governor in Council may confirm, vary or rescind the decision of the Municipal Board made under subsection (5) and in doing so may direct the Minister to amend the plan in such manner as the Lieutenant Governor in Council may determine. 2004, c. 18, s. 5 (2).

Public works and by-laws to conform with plan

24. (1) Despite any other general or special Act, where an official plan is in effect, no public work shall be undertaken and, except as provided in subsections (2) and (4), no by-law shall be passed for any purpose that does not conform therewith. R.S.O. 1990, c. P.13, s. 24 (1); 1999, c. 12, Sched. M, s. 24.

Pending amendments

(2) If a council or a planning board has adopted an amendment to an official plan, the council of any municipality or the planning board of any planning area to which the plan or any part of the plan applies may, before the amendment to the official plan comes into effect, pass a by-law that does not conform with the official plan but will conform with it if the amendment comes into effect. 2006, c. 23, s. 12.

Same

(2.1) A by-law referred to in subsection (2),

(a) shall be conclusively deemed to have conformed with the official plan on and after the day the by-law was passed, if the amendment to the official plan comes into effect; and

(b) is of no force and effect, if the amendment to the official plan does not come into effect. 2006, c. 23, s. 12.

Preliminary steps that may be taken where proposed public work would not conform with official plan

(3) Despite subsections (1) and (2), the council of a municipality may take into consideration the undertaking of a public work that does not conform with the official plan and for that purpose the council may apply for any approval that may be required for the work, carry out any investigations, obtain any reports or take other preliminary steps incidental to and reasonably necessary for the undertaking of the work, but nothing in this subsection authorizes the actual undertaking of any public work that does not conform with an official plan. R.S.O. 1990, c. P.13, s. 24 (3).

Deemed conformity

(4) If a by-law is passed under section 34 by the council of a municipality or a planning board in a planning area in which an official plan is in effect and, within the time limited for appeal no appeal is taken or an appeal is taken and the appeal is withdrawn or dismissed or the by-law is amended by the Municipal Board or as directed by the Board, the by-law shall be conclusively deemed to be in conformity with the official plan, except, if the by-law is passed in the circumstances mentioned in subsection (2), the by-law shall be conclusively deemed to be in conformity with the official plan on and after the day the by-law was passed, if the amendment to the official plan comes into effect. 1994, c. 23, s. 16 (2); 1996, c. 4, s. 14 (2).

Acquisition of lands in accordance with provisions of plan

25. (1) If there is an official plan in effect in a municipality that includes provisions relating to the acquisition of land, which provisions have come into effect after the 28th day of June, 1974, the council may, in accordance with such provisions, acquire and hold land within the municipality for the purpose of developing any feature of the official plan, and any land so acquired or held may be sold, leased or otherwise disposed of when no longer required. R.S.O. 1990, c. P.13, s. 25 (1); 1994, c. 23, s. 17; 1996, c. 4, s. 15.

Contribution towards cost

(2) Any municipality may contribute towards the cost of acquiring land under this section. R.S.O. 1990, c. P.13, s. 25 (2).

Updating official plan

26. (1) If an official plan is in effect in a municipality, the council of the municipality that adopted the official plan shall, not less frequently than every five years after the plan comes into effect as an official plan or after that part of a plan comes into effect as a part of an official plan, if the only outstanding appeals relate to those parts of the plan that propose to specifically designate land uses,

(a) revise the official plan as required to ensure that it,

(i) conforms with provincial plans or does not conflict with them, as the case may be,

(ii) has regard to the matters of provincial interest listed in section 2, and

(iii) is consistent with policy statements issued under subsection 3 (1); and

(b) revise the official plan, if it contains policies dealing with areas of employment, including, without limitation, the designation of areas of employment in the official plan and policies dealing with the removal of land from areas of employment, to ensure that those policies are confirmed or amended. 2006, c. 23, s. 13.

Effect of provincial plan conformity exercise

(2) For greater certainty, the council revises the official plan under subsection (1) if it,

(a) amends the official plan, in accordance with another Act, to conform with a provincial plan; and

(b) in the course of making amendments under clause (a), complies with clauses (1) (a) and (b) and with all the procedural requirements of this section. 2006, c. 23, s. 13.

Consultation and special meeting

(3) Before revising the official plan under subsection (1), the council shall,

(a) consult with the approval authority and with the prescribed public bodies with respect to the revisions that may be required; and

(b) hold a special meeting of council, open to the public, to discuss the revisions that may be required. 2006, c. 23, s. 13.

Notice

(4) Notice of every special meeting to be held under clause (3) (b) shall be published at least once a week in each of two separate weeks, and the last publication shall take place at least 30 days before the date of the meeting. 2006, c. 23, s. 13.

Public participation

(5) The council shall have regard to any written submissions about what revisions may be required and shall give any person who attends the special meeting an opportunity to be heard on that subject. 2006, c. 23, s. 13.

No exemption from approval

(6) An order under subsection 17 (9) does not apply to an amendment made under subsection (1). 2006, c. 23, s. 13.

Declaration

(7) Each time it revises the official plan under subsection (1), the council shall, by resolution, declare to the approval authority that the official plan meets the requirements of subclauses (1) (a) (i), (ii) and (iii). 2006, c. 23, s. 13.

Direction by approval authority

(8) Despite subsection (1), the approval authority may, at any time, direct the council of a municipality to undertake a revision of all or part of any official plan in effect in the municipality and when so directed the council shall cause the revision to be undertaken without undue delay. 2006, c. 23, s. 13.

Updating zoning by-laws

(9) No later than three years after a revision under subsection (1) or (8) comes into effect, the council of the municipality shall amend all zoning by-laws that are in effect in the municipality to ensure that they conform with the official plan. 2006, c. 23, s. 13.

Minister may request amendment to zoning by-law

(10) The Minister may, if he or she is of the opinion that a zoning by-law in effect in the municipality does not conform with the official plan as revised under subsection (1) or (8), request the council of the municipality to pass an amendment to the zoning by-law to achieve conformity. 2006, c. 23, s. 13.

Amendments to conform to official plan

27. (1) The council of a lower-tier municipality shall amend every official plan and every by-law passed under section 34, or a predecessor of it, to conform with a plan that comes into effect as the official plan of the upper-tier municipality. 2002, c. 17, Sched. B, s. 7.

Failure to make amendments

(2) If the official plan of an upper-tier municipality comes into effect as mentioned in subsection (1) and any official plan or zoning by-law is not amended as required by that subsection within one year from the day the plan comes into effect as the official plan, the council of the upper-tier municipality may amend the official plan of the lower-tier municipality or zoning by-law, as the case may be, in the like manner and subject to the same requirements and procedures as the council that failed to make the amendment within the one-year period as required. 2002, c. 17, Sched. B, s. 7.

Deemed by-law

(3) An amending by-law passed under subsection (2) by the council of an upper-tier municipality shall be deemed for all purposes to be a by-law passed by the council of the municipality that passed the by-law that was amended. 2002, c. 17, Sched. B, s. 7.

Conflicts

(4) In the event of a conflict between the official plan of an upper-tier municipality and the official plan of a lower-tier municipality, the plan of the upper-tier municipality prevails to the extent of the conflict but in all other respects the official plan of the lower-tier municipality remains in effect. 2002, c. 17, Sched. B, s. 7.

PART IV
COMMUNITY IMPROVEMENT

Community improvement project area

28. (1) In this section,

"community improvement" means the planning or replanning, design or redesign, resubdivision, clearance, development or redevelopment, construction, reconstruction and rehabilitation, improvement of energy efficiency, or any of them, of a community improvement project area, and the provision of such residential, commercial, industrial, public, recreational, institutional, religious, charitable or other uses, buildings, structures, works, improvements or facilities, or spaces therefor, as may be appropriate or necessary; ("améliorations communautaires")

"community improvement plan" means a plan for the community improvement of a community improvement project area; ("plan d'améliorations communautaires")

"community improvement project area" means a municipality or an area within a municipality, the community improvement of which in the opinion of the council is desirable because of age, dilapidation, overcrowding, faulty arrangement, unsuitability of buildings or for any other environmental, social or community economic development reason. ("zone d'améliorations communautaires") R.S.O. 1990, c. P.13, s. 28 (1); 2001, c. 17, s. 7 (1, 2); 2006, c. 23, s. 14 (1).

Affordable housing

(1.1) Without limiting the generality of the definition of "community improvement" in subsection (1), for greater certainty, it includes the provision of affordable housing. 2006, c. 23, s. 14 (2).

Designation of community improvement project area

(2) Where there is an official plan in effect in a local municipality or in a prescribed upper-tier municipality that contains provisions relating to community improvement in the municipality, the council may, by by-law, designate the whole or any part of an area covered by such an official plan as a community improvement project area. R.S.O. 1990, c. P.13, s. 28 (2); 2006, c. 23, s. 14 (3).

Acquisition and clearance of land

(3) When a by-law has been passed under subsection (2), the municipality may,

(a) acquire land within the community improvement project area with the approval of the Minister if the land is acquired before a community improvement plan mentioned in subsection (4) comes into effect and without the approval of the Minister if the land is acquired after the community improvement plan comes into effect;

(b) hold land acquired before or after the passing of the by-law within the community improvement project area; and

(c) clear, grade or otherwise prepare the land for community improvement. R.S.O. 1990, c. P.13, s. 28 (3); 2001, c. 17, s. 7 (3).

Community improvement plan

(4) When a by-law has been passed under subsection (2), the council may provide for the preparation of a plan suitable for adoption as a community improvement plan for the community improvement project area and the plan may be adopted and come into effect in accordance with subsections (5) and (5.1). 2006, c. 32, Sched. C, s. 47 (1).

Restriction re upper-tier municipality

(4.0.1) The community improvement plan of an upper-tier municipality may deal only with prescribed matters. 2006, c. 23, s. 14 (4).

(4.1)-(4.4) REPEALED: 2006, c. 32, Sched. C, s. 47 (1).

Same

(5) Subsections 17 (15), (17), (19) to (19.3), (19.5) to (24), (25) to (30.1), (44) to (47) and (49) to (50.1) apply, with necessary modifications, in respect of a community improvement plan and any amendments to it. 2006, c. 32, Sched. C, s. 47 (1).

Same

(5.1) The Minister is deemed to be the approval authority for the purpose of subsection (5). 2006, c. 32, Sched. C, s. 47 (1).

Same

(5.2) Despite subsection (5), if an official plan contains provisions describing the alternative measures mentioned in subsection 17 (19.3), subsections 17 (15), (17) and (19) to (19.2) do not apply in respect of the community improvement plan and any amendments to it, if the measures are complied with. 2006, c. 32, Sched. C, s. 47 (1).

Powers of council re land

(6) For the purpose of carrying out a community improvement plan that has come into effect, the municipality may,

(a) construct, repair, rehabilitate or improve buildings on land acquired or held by it in the community improvement project area in conformity with the community improvement plan, and sell, lease or otherwise dispose of any such buildings and the land appurtenant thereto;

(b) sell, lease or otherwise dispose of any land acquired or held by it in the community improvement project area to any person or governmental authority for use in conformity with the community improvement plan. R.S.O. 1990, c. P.13, s. 28 (6); 2001, c. 17, s. 7 (6).

Grants or loans re eligible costs

(7) For the purpose of carrying out a municipality's community improvement plan that has come into effect, the municipality may make grants or loans, in conformity with the community improvement plan, to registered owners, assessed owners and tenants of lands and buildings within the community improvement project area, and to any person to whom such an owner or tenant has assigned the right to receive a grant or loan, to pay for the whole or any part of the eligible costs of the community improvement plan. 2006, c. 23, s. 14 (8).

Eligible costs

(7.1) For the purposes of subsection (7), the eligible costs of a community improvement plan may include costs related to environmental site assessment, environmental remediation, development, redevelopment, construction and reconstruction of lands and buildings for rehabilitation purposes or for the provision of energy efficient uses, buildings, structures, works, improvements or facilities. 2006, c. 23, s. 14 (8).

Grants or loans between upper and lower-tier municipalities

(7.2) The council of an upper-tier municipality may make grants or loans to the council of a lower-tier municipality and the council of a lower-tier municipality may make grants or loans to the council of the upper-tier municipality, for the purpose of carrying out a community improvement plan that has come into effect, on such terms as to security and otherwise as the council considers appropriate, but only if the official plan of the municipality making the grant or loan contains provisions relating to the making of such grants or loans. 2006, c. 23, s. 14 (8).

Maximum amount

(7.3) The total of the grants and loans made in respect of particular lands and buildings under subsections (7) and (7.2) and the tax assistance as defined in section 365.1 of the *Municipal Act, 2001* or section 333 of the *City of Toronto Act, 2006*, as the case may be, that is provided in respect of the lands and buildings shall not exceed the eligible cost of the community improvement plan with respect to those lands and buildings. 2006, c. 23, s. 14 (8); 2006, c. 32, Sched. C, s. 48 (3).

(8) REPEALED: 2006, c. 32, Sched. C, s. 47 (3).

Application of s. 32 (2, 3)

(9) Subsections 32 (2) and (3) apply with necessary modifications to any loan made under subsection (7) of this section. R.S.O. 1990, c. P.13, s. 28 (9).

Conditions of sale, etc.

(10) Until a by-law or amending by-law passed under section 34 after the adoption of the community improvement plan is in force in the community improvement project area, no land acquired, and no building constructed, by the municipality in the community improvement project area shall be sold, leased or otherwise disposed of unless the person or authority to whom it is disposed of enters into a written agreement with the municipality that the person or authority will keep and maintain the land and building and the use thereof in conformity with the community improvement plan until such a by-law or amending by-law is in force, but the municipality may, during the period of the development of the plan, lease any land or any building or part thereof in the area for any purpose, whether or not in conformity with the community improvement plan, for a term of not more than three years at any one time. R.S.O. 1990, c. P.13, s. 28 (10).

Registration of agreement

(11) An agreement concerning a grant or loan made under subsection (7) or an agreement entered into under subsection (10), may be registered against the land to which it applies and the municipality shall be entitled to enforce the provisions thereof against any party to the agreement and, subject to the provisions of the *Registry Act* and the *Land Titles Act*, against any and all subsequent owners or tenants of the land. R.S.O. 1990, c. P.13, s. 28 (11); 2006, c. 23, s. 14 (10).

Debentures

(12) Despite subsection 408 (3) of the *Municipal Act, 2001* or any regulation under section 256 of the *City of Toronto Act, 2006*, debentures issued by the municipality for the purpose of this section may be for such term of years as the debenture by-law, with the approval of the Municipal Board, provides. 2002, c. 17, Sched. B, s. 9; 2006, c. 32, Sched. C, s. 47 (4).

Dissolution of area

(13) When the council is satisfied that the community improvement plan has been carried out, the council may, by by-law, dissolve the community improvement project area. R.S.O. 1990, c. P.13, s. 28 (13).

Agreement re studies and development

29. (1) A municipality, with the approval of the Minister, may enter into agreement with any governmental authority or any agency thereof created by statute, for the carrying out of studies and the preparation and implementation of plans and programs for the development or improvement of the municipality.

Where approval of Minister not required

(2) Despite subsection (1), a municipality may enter into agreement with one or more other municipalities under subsection (1) without the approval of the Minister. R.S.O. 1990, c. P.13, s. 29.

Agreements for grants in aid of community improvement

30. The Minister, with the approval of the Lieutenant Governor in Council, and a municipality may enter into agreement providing for payment to the municipality on such terms and conditions and in such amounts as may be approved by the Lieutenant Governor in Council to assist in the community improvement of a community improvement project area as defined in section 28, including the carrying out of studies for the purpose of selecting areas for community improvement. R.S.O. 1990, c. P.13, s. 30.

31. REPEALED: 1997, c. 24, s. 226 (1).

Note: Despite the repeal of section 31, an order made under that section is continued as an order made under the corresponding provision of the *Building Code Act, 1992*. See: 1997, c. 24, ss. 226 (2), 228.

Grants or loans for repairs

32. (1) When a by-law under section 15.1 of the *Building Code Act, 1992* is in force in a municipality, the council of the municipality may pass a by-law for providing for the making of grants or loans to the registered owners or assessed owners of lands in respect of which an order has been made under subsection 15.2 (2) of that Act to pay for the whole or any part of the cost of the repairs required to be done, or of the clearing, grading and levelling of the lands, on such terms and conditions as the council may prescribe. R.S.O. 1990, c. P.13, s. 32 (1); 1997, c. 24, s. 226 (3).

Loans collected as taxes, lien on land

(2) The amount of any loan made under a by-law passed under this section, together with interest at a rate to be determined by the council, may be added by the clerk of the municipality to the collector's roll and collected in like manner as municipal taxes over a period fixed by the council, and such amount and interest shall, until payment thereof, be a lien or charge upon the land in respect of which the loan has been made.

Registration of certificate

(3) A certificate signed by the clerk of the municipality setting out the amount loaned to any owner under a by-law passed under this section, including the rate of interest thereon, together with a description of the land in respect of which the loan has been made, sufficient for registration, shall be registered in the proper land registry office against the land, and, upon repayment in full to the municipality of the amount loaned and interest thereon, a certificate signed by the clerk of the municipality showing such repayment shall be similarly registered, and thereupon the lien or charge upon the land in respect of which the loan was made is discharged. R.S.O. 1990, c. P.13, s. 32 (2, 3).

Demolition control area

33. (1) In this section,

"dwelling unit" means any property that is used or designed for use as a domestic establishment in which one or more persons may sleep and prepare and serve meals; ("logement")

"residential property" means a building that contains one or more dwelling units, but does not include subordinate or accessory buildings the use of which is incidental to the use of the main building. ("immeuble d'habitation") R.S.O. 1990, c. P.13, s. 33 (1).

Establishment of demolition control area by by-law

(2) When a by-law under section 15.1 of the *Building Code Act, 1992* or a predecessor thereof is in force in a municipality or when a by-law prescribing standards for the maintenance and occupancy of property under any special Act is in force in a municipality, the council of the local municipality may by by-law designate any area within the municipality to which the standards of maintenance and occupancy by-law applies as an area of demolition control and thereafter no person shall demolish the whole or any part of any residential property in the area of demolition control unless the person is the holder of a demolition permit issued by the council under this section. R.S.O. 1990, c. P.13, s. 33 (2); 1997, c. 24, s. 226 (4).

Council may issue or refuse to issue permit

(3) Subject to subsection (6), where application is made to the council for a permit to demolish residential property, the council may issue the permit or refuse to issue the permit.

Appeal to O.M.B.

(4) Where the council refuses to issue the permit or neglects to make a decision thereon within thirty days after the receipt by the clerk of the municipality of the application, the applicant may appeal to the Municipal Board and the Board shall hear the appeal and either dismiss the same or direct that the demolition permit be issued, and the decision of the Board shall be final.

Notice of appeal

(5) The person appealing to the Municipal Board under subsection (4) shall, in such manner and to such persons as the Board may direct, give notice of the appeal to the Board.

Application for demolition permit where building permit issued

(6) Subject to subsection (7), the council shall, on application therefor, issue a demolition permit where a building permit has been issued to erect a new building on the site of the residential property sought to be demolished.

Conditions of demolition permit

(7) A demolition permit under subsection (6) may be issued on the condition that the applicant for the permit construct and substantially complete the new building to be erected on the site of the residential property proposed to be demolished by not later than such date as the permit specifies, such date being not less than two years from the day demolition of the existing residential property is commenced, and on the condition that on failure to complete the new building within the time specified in the permit, the clerk of the municipality shall be entitled to enter on the collector's roll, to be collected in like manner as municipal taxes, such sum of money as the permit specifies, but not in any case to exceed the sum of $20,000 for each dwelling unit contained in the residential property in respect of which the demolition permit is issued and such sum shall, until payment thereof, be a lien or charge upon the land in respect of which the permit to demolish the residential property is issued.

Registration of notice

(8) Notice of any condition imposed under subsection (7) may be registered in the proper land registry office against the land to which it applies.

Registration of certificate

(9) Where the clerk of the municipality adds a sum of money to the collector's roll under subsection (7), a certificate signed by the clerk setting out the sum added to the roll, together with a

description of the land in respect of which the sum has been added to the roll, sufficient for registration, shall be registered in the proper land registry office against the land, and upon payment in full to the municipality of the sum added to the roll, a certificate signed by the clerk of the municipality showing such payment shall be similarly registered, and thereupon the lien or charge upon the land in respect of which the sum was added to the roll is discharged.

Appeal to O.M.B.

(10) Where an applicant for a demolition permit under subsection (6) is not satisfied as to the conditions on which the demolition permit is proposed to be issued, the applicant may appeal to the Municipal Board for a variation of the conditions and, where an appeal is brought, the Board shall hear the appeal and may dismiss the same or may direct that the conditions upon which the permit shall be issued be varied in such manner as the Board considers appropriate, and the decision of the Board shall be final.

Application to council for relief from conditions of demolition permit

(11) Where a condition has been imposed under subsection (7) and the holder of the demolition permit considers that it is not possible to complete the new building within the time specified in the permit or where the holder of the permit is of the opinion that the construction of the new building has become not feasible on economic or other grounds, the permit holder may apply to the council of the municipality for relief from the conditions on which the permit was issued.

Notice of application

(12) Notice of application under subsection (11) shall be sent by registered mail to the clerk of the municipality not less than sixty days before the time specified in the permit for the completion of the new building and, where the council under subsection (14) extends the time for completion of the new building, application may similarly be made for relief by sending notice of application not less than sixty days before the expiry of the extended completion time.

Extension of time

(13) Despite subsection (12), the council may, at any time, extend the date specified in that subsection for the making of an application for relief from the conditions on which the permit was issued.

Powers of council on application

(14) Where an application is made under subsection (11), the council shall consider the application and may grant the same or may extend the time for completion of the new building for such period of time and on such terms and conditions as the council considers appropriate or the council may relieve the person applying from the requirement of constructing the new building.

Appeal to O.M.B.

(15) Any person who has made application to the council under subsection (11) may appeal from the decision of the council to the Municipal Board within twenty days of the mailing of the notice of the decision, or where the council refuses or neglects to make a decision thereon within thirty days after the receipt by the clerk of the application, the applicant may appeal to the Municipal Board and the Board shall hear the appeal and the Board on the appeal has the same powers as the council has under subsection (14) and the decision of the Board shall be final.

Offence

(16) Every person who demolishes a residential property, or any portion thereof, in contravention of subsection (2) is guilty of an offence and on conviction is liable to a fine of not

more than $50,000 for each dwelling unit contained in the residential property, the whole or any portion of which residential property has been demolished.

Standards for health and safety remain in force

(17) The provisions of any general or special Act and any by-law passed thereunder respecting standards relating to the health or safety of the occupants of buildings and structures remain in full force and effect in respect of residential property situate within an area of demolition control. R.S.O. 1990, c. P.13, s. 33 (3-17).

Certain proceedings stayed

(18) Subject to subsection (17), an application to the council for a permit to demolish any residential property operates as a stay to any proceedings that may have been initiated under any by-law under section 15.1 of the *Building Code Act, 1992* or a predecessor thereof or under any special Act respecting maintenance or occupancy standards in respect of the residential property sought to be demolished, until the council disposes of the application, or where an appeal is taken under subsection (4), until the Municipal Board has heard the appeal and issued its order thereon. R.S.O. 1990, c. P.13, s. 33 (18); 1997, c. 24, s. 226 (5).

Exemption re Building Code

(19) Where a permit to demolish residential property is obtained under this section, it is not necessary for the holder thereof to obtain the permit mentioned in subsection 8 (1) of the *Building Code Act, 1992*. R.S.O. 1990, c. P.13, s. 33 (19); 1997, c. 24, s. 226 (6).

PART V
LAND USE CONTROLS AND RELATED ADMINISTRATION

Zoning by-laws

34. (1) Zoning by-laws may be passed by the councils of local municipalities:

Restricting use of land

1. For prohibiting the use of land, for or except for such purposes as may be set out in the by-law within the municipality or within any defined area or areas or abutting on any defined highway or part of a highway.

Restricting erecting, locating or using of buildings

2. For prohibiting the erecting, locating or using of buildings or structures for or except for such purposes as may be set out in the by-law within the municipality or within any defined area or areas or upon land abutting on any defined highway or part of a highway.

Marshy lands, etc.

3. For prohibiting the erection of any class or classes of buildings or structures on land that is subject to flooding or on land with steep slopes, or that is rocky, low-lying, marshy, unstable, hazardous, subject to erosion or to natural or artificial perils.

Contaminated lands; sensitive or vulnerable areas

3.1 For prohibiting any use of land and the erecting, locating or using of any class or classes of buildings or structures on land,

i. that is contaminated,

ii. that contains a sensitive groundwater feature or a sensitive surface water feature, or

iii. that is within an area identified as a vulnerable area in a drinking water source protection plan that has taken effect under the *Clean Water Act, 2006*.

Natural features and areas

3.2 For prohibiting any use of land and the erecting, locating or using of any class or classes of buildings or structures within any defined area or areas,

i. that is a significant wildlife habitat, wetland, woodland, ravine, valley or area of natural and scientific interest,

ii. that is a significant corridor or shoreline of a lake, river or stream, or

iii. that is a significant natural corridor, feature or area.

Significant archaeological resources

3.3 For prohibiting any use of land and the erecting, locating or using of any class or classes of buildings or structures on land that is the site of a significant archaeological resource.

Construction of buildings or structures

4. For regulating the type of construction and the height, bulk, location, size, floor area, spacing, character and use of buildings or structures to be erected or located within the municipality or within any defined area or areas or upon land abutting on any defined highway or part of a highway, and the minimum frontage and depth of the parcel of land and the proportion of the area thereof that any building or structure may occupy.

Minimum elevation of doors, etc.

5. For regulating the minimum elevation of doors, windows or other openings in buildings or structures or in any class or classes of buildings or structures to be erected or located within the municipality or within any defined area or areas of the municipality.

Loading or parking facilities

6. For requiring the owners or occupants of buildings or structures to be erected or used for a purpose named in the by-law to provide and maintain loading or parking facilities on land that is not part of a highway. R.S.O. 1990, c. P.13, s. 34 (1); 1994, c. 23, s. 21 (1, 2); 1996, c. 4, s. 20 (1-3); 2006, c. 22, s. 115.

Pits and quarries

(2) The making, establishment or operation of a pit or quarry shall be deemed to be a use of land for the purposes of paragraph 1 of subsection (1). R.S.O. 1990, c. P.13, s. 34 (2).

Area, density and height

(3) The authority to regulate provided in paragraph 4 of subsection (1) includes and, despite the decision of any court, shall be deemed always to have included the authority to regulate the minimum area of the parcel of land mentioned therein and to regulate the minimum and maximum density and the minimum and maximum height of development in the municipality or in the area or areas defined in the by-law. 2006, c. 23, s. 15 (1).

City of Toronto

(3.1) Subsection (3) does not apply with respect to the City of Toronto. 2006, c. 23, s. 15 (2).

Interpretation

(4) A trailer as defined in subsection 164 (4) of the *Municipal Act, 2001* or subsection 3 (1) of the *City of Toronto Act, 2006*, as the case may be, and a mobile home as defined in subsection 46 (1) of this Act are deemed to be buildings or structures for the purpose of this section. 2006, c. 32, Sched. C, s. 47 (5).

Prohibition of use of land, etc., availability of municipal services

(5) A by-law passed under paragraph 1 or 2 of subsection (1) or a predecessor of that paragraph may prohibit the use of land or the erection or use of buildings or structures unless such municipal services as may be set out in the by-law are available to service the land, buildings or structures, as the case may be. R.S.O. 1990, c. P.13, s. 34 (5).

Certificates of occupancy

(6) A by-law passed under this section may provide for the issue of certificates of occupancy without which no change may be made in the type of use of any land covered by the by-law or of any building or structure on any such land, but no such certificate shall be refused if the proposed use is not prohibited by the by-law. R.S.O. 1990, c. P.13, s. 34 (6).

Use of maps

(7) Land within any area or areas or abutting on any highway or part of a highway may be defined by the use of maps to be attached to the by-law and the information shown on such maps shall form part of the by-law to the same extent as if included therein. R.S.O. 1990, c. P.13, s. 34 (7).

Acquisition and disposition of non-conforming lands

(8) The council may acquire any land, building or structure used or erected for a purpose that does not conform with a by-law passed under this section and any vacant land having a frontage or depth less than the minimum established for the erection of a building or structure in the defined area in which such land is situate, and the council may dispose of any of such land, building or structure or may exchange any of such land for other land within the municipality. R.S.O. 1990, c. P.13, s. 34 (8); 1996, c. 4, s. 20 (4).

Excepted lands and buildings

(9) No by-law passed under this section applies,

(a) to prevent the use of any land, building or structure for any purpose prohibited by the by-law if such land, building or structure was lawfully used for such purpose on the day of the passing of the by-law, so long as it continues to be used for that purpose; or

(b) to prevent the erection or use for a purpose prohibited by the by-law of any building or structure for which a permit has been issued under subsection 8 (1) of the *Building Code Act, 1992*, prior to the day of the passing of the by-law, so long as the building or structure when erected is used and continues to be used for the purpose for which it was erected and provided the permit has not been revoked under subsection 8 (10) of that Act. R.S.O. 1990, c. P.13, s. 34 (9); 2009, c. 33, Sched. 21, s. 10 (1).

By-law may be amended

(10) Despite any other provision of this section, any by-law passed under this section or a predecessor of this section may be amended so as to permit the extension or enlargement of any land, building or structure used for any purpose prohibited by the by-law if such land, building or structure continues to be used in the same manner and for the same purpose as it was used on the day such by-law was passed. R.S.O. 1990, c. P.13, s. 34 (10).

Consultation

(10.0.1) The council,

(a) shall permit applicants to consult with the municipality before submitting applications to amend by-laws passed under this section; and

(b) may, by by-law, require applicants to consult with the municipality as described in clause (a). 2006, c. 23, s. 15 (3).

Prescribed information

(10.1) A person or public body that applies for an amendment to a by-law passed under this section or a predecessor of this section shall provide the prescribed information and material to the council. 1996, c. 4, s. 20 (5).

Other information

(10.2) A council may require that a person or public body that applies for an amendment to a by-law passed under this section or a predecessor of this section provide any other information or material that the council considers it may need, but only if the official plan contains provisions relating to requirements under this subsection. 2006, c. 23, s. 15 (4).

Refusal and timing

(10.3) Until the council has received the information and material required under subsections (10.1) and (10.2), if any, and any fee under section 69,

(a) the council may refuse to accept or further consider the application for an amendment to the by-law; and

(b) the time period referred to in subsection (11) does not begin. 2006, c. 23, s. 15 (4).

Response re completeness of application

(10.4) Within 30 days after the person or public body that makes the application for an amendment to a by-law pays any fee under section 69, the council shall notify the person or public body that the information and material required under subsections (10.1) and (10.2), if any, have been provided, or that they have not been provided, as the case may be. 2006, c. 23, s. 15 (4).

Motion re dispute

(10.5) Within 30 days after a negative notice is given under subsection (10.4), the person or public body or the council may make a motion for directions to have the Municipal Board determine,

(a) whether the information and material have in fact been provided; or

(b) whether a requirement made under subsection (10.2) is reasonable. 2006, c. 23, s. 15 (4).

Same

(10.6) If the council does not give any notice under subsection (10.4), the person or public body may make a motion under subsection (10.5) at any time after the 30-day period described in subsection (10.4) has elapsed. 2006, c. 23, s. 15 (4).

Notice of particulars and public access

(10.7) Within 15 days after the council gives an affirmative notice under subsection (10.4), or within 15 days after the Municipal Board advises the clerk of its affirmative decision under subsection (10.5), as the case may be, the council shall,

(a) give the prescribed persons and public bodies, in the prescribed manner, notice of the application for an amendment to a by-law, accompanied by the prescribed information; and

(b) make the information and material provided under subsections (10.1) and (10.2) available to the public. 2006, c. 23, s. 15 (4).

Final determination

(10.8) The Municipal Board's determination under subsection (10.5) is not subject to appeal or review. 2006, c. 23, s. 15 (4).

Notice of refusal

(10.9) When a council refuses an application to amend its by-law, it shall, not later than 15 days after the day of the refusal, ensure that written notice of the refusal, containing the prescribed information, is given to,

(a) the person or public body that made the application;

(b) each person and public body that filed a written request to be notified of a refusal; and

(c) any prescribed person or public body. 2006, c. 23, s. 15 (4).

Appeal to O.M.B.

(11) Where an application to the council for an amendment to a by-law passed under this section or a predecessor of this section is refused or the council refuses or neglects to make a decision on it within 120 days after the receipt by the clerk of the application, any of the following may appeal to the Municipal Board by filing a notice of appeal with the clerk of the municipality:

1. The applicant.

2. The Minister. 2006, c. 23, s. 15 (5).

Consolidated Hearings Act

(11.0.1) Despite the *Consolidated Hearings Act*, the proponent of an undertaking shall not give notice to the Hearings Registrar under subsection 3 (1) of that Act in respect of an application for an amendment to a by-law unless the council has made a decision on the application or the time period referred to in subsection (11) has expired. 2006, c. 23, s. 15 (5).

Appeal to O.M.B.

(11.0.2) The Municipal Board shall hear the appeal under subsection (11) and shall,

(a) dismiss it;

(b) amend the by-law in such manner as the Board may determine; or

(c) direct that the by-law be amended in accordance with the Board's order. 2006, c. 23, s. 15 (5).

Time for filing certain appeals

(11.0.3) A notice of appeal under subsection (11) with respect to the refusal of an application shall be filed no later than 20 days after the day that the giving of notice under subsection (10.9) is completed. 2006, c. 23, s. 15 (5).

Appeals restricted re certain amendments

(11.0.4) Despite subsection (11), there is no appeal in respect of all or any part of an application for an amendment to a by-law if the amendment or part of the amendment proposes to implement,

(a) an alteration to all or any part of the boundary of an area of settlement; or

(b) a new area of settlement. 2006, c. 23, s. 15 (5).

Same

(11.0.5) Despite subsection (11), if the official plan contains policies dealing with the removal of land from areas of employment, there is no appeal in respect of all or any part of an application for an amendment to a by-law if the amendment or part of the amendment proposes to remove any land from an area of employment, even if other land is proposed to be added. 2006, c. 23, s. 15 (5).

Withdrawal of appeal

(11.1) If all appeals under subsection (11) are withdrawn, the secretary of the Municipal Board shall notify the clerk of the municipality and the decision of the council is final and binding or the council may proceed to give notice of the public meeting or pass or refuse to pass the by-law, as the case may be. 1999, c. 12, Sched. M, s. 25 (1).

Information and public meeting; open house in certain circumstances

(12) Before passing a by-law under this section, except a by-law passed pursuant to an order of the Municipal Board made under subsection (11.0.2) or (26),

(a) the council shall ensure that,

(i) sufficient information and material is made available to enable the public to understand generally the zoning proposal that is being considered by the council, and

(ii) at least one public meeting is held for the purpose of giving the public an opportunity to make representations in respect of the proposed by-law; and

(b) in the case of a by-law that is required by subsection 26 (9) or is related to a development permit system, the council shall ensure that at least one open house is held for the purpose of giving the public an opportunity to review and ask questions about the information and material made available under subclause (a) (i). 2006, c. 23, s. 15 (6); 2009, c. 33, Sched. 21, s. 10 (2).

Notice

(13) Notice of the public meeting required under subclause (12) (a) (ii) and of the open house, if any, required by clause (12) (b),

(a) shall be given to the prescribed persons and public bodies, in the prescribed manner; and

(b) shall be accompanied by the prescribed information. 2006, c. 23, s. 15 (6).

Timing of open house

(14) The open house required by clause (12) (b) shall be held no later than seven days before the public meeting required under subclause (12) (a) (ii) is held. 2006, c. 23, s. 15 (6).

Timing of public meeting

(14.1) The public meeting required under subclause (12) (a) (ii) shall be held no earlier than 20 days after the requirements for giving notice have been complied with. 2006, c. 23, s. 15 (6).

Participation in public meeting

(14.2) Every person who attends a public meeting required under subclause (12) (a) (ii) shall be given an opportunity to make representations in respect of the proposed by-law. 2006, c. 23, s. 15 (6).

Alternative procedure

(14.3) If an official plan sets out alternative measures for informing and securing the views of the public in respect of proposed zoning by-laws, and if those measures are complied with, subsections (12) to (14.2) do not apply to the proposed by-laws, but subsections (14.4) and (14.6) do apply. 2006, c. 23, s. 15 (6).

Open house

(14.4) If subsection (14.3) applies and the proposed by-law is required by subsection 26 (9) or is related to a development permit system,

(a) the council shall ensure that at least one open house is held for the purpose of giving the public an opportunity to review and ask questions about the proposed by-law; and

(b) if a public meeting is also held, the open house shall be held no later than seven days before the public meeting. 2006, c. 23, s. 15 (6).

Information

(14.5) At a public meeting under subclause (12) (a) (ii), the council shall ensure that information is made available to the public regarding who is entitled to appeal under subsections (11) and (19). 2006, c. 23, s. 15 (6).

Where alternative procedures followed

(14.6) If subsection (14.3) applies, the information required under subsection (14.5) shall be made available to the public at a public meeting or in the manner set out in the official plan for informing and securing the views of the public in respect of proposed zoning by-laws. 2006, c. 23, s. 15 (6).

Information to public bodies

(15) The council shall forward to such public bodies as the council considers may have an interest in the zoning proposal sufficient information to enable them to understand it generally and such information shall be forwarded not less than twenty days before passing a by-law implementing the proposal. R.S.O. 1990, c. P.13, s. 34 (15); 1994, c. 23, s. 21 (5).

Conditions

(16) If the official plan in effect in a municipality contains policies relating to zoning with conditions, the council of the municipality may, in a by-law passed under this section, permit a use of land or the erection, location or use of buildings or structures and impose one or more prescribed conditions on the use, erection or location. 2006, c. 23, s. 15 (7).

Same

(16.1) The prescribed conditions referred to in subsection (16) may be made subject to such limitations as may be prescribed. 2006, c. 23, s. 15 (7).

Same

(16.2) When a prescribed condition is imposed under subsection (16),

(a) the municipality may require an owner of land to which the by-law applies to enter into an agreement with the municipality relating to the condition;

(b) the agreement may be registered against the land to which it applies; and

(c) the municipality may enforce the agreement against the owner and, subject to the *Registry Act* and the *Land Titles Act*, any and all subsequent owners of the land. 2006, c. 23, s. 15 (7).

City of Toronto

(16.3) Subsections (16), (16.1) and (16.2) do not apply with respect to the City of Toronto. 2006, c. 23, s. 15 (8).

Further notice

(17) Where a change is made in a proposed by-law after the holding of the public meeting mentioned in subclause (12) (a) (ii), the council shall determine whether any further notice is to be given in respect of the proposed by-law and the determination of the council as to the giving of further notice is final and not subject to review in any court irrespective of the extent of the change made in the proposed by-law. R.S.O. 1990, c. P.13, s. 34 (17); 2006, c. 23, s. 15 (9).

Notice of passing of by-law

(18) If the council passes a by-law under this section, except a by-law passed pursuant to an order of the Municipal Board made under subsection (11.0.2) or (26), the clerk of the municipality shall give written notice of the passing of the by-law not later than 15 days after the day the by-law is passed in the manner and in the form and to the persons or public bodies prescribed and the notice shall contain the prescribed information. 1994, c. 23, s. 21 (7); 1996, c. 4, s. 20 (7); 2009, c. 33, Sched. 21, s. 10 (3).

Appeal to O.M.B.

(19) Not later than 20 days after the day that the giving of notice as required by subsection (18) is completed, any of the following may appeal to the Municipal Board by filing with the clerk of the municipality a notice of appeal setting out the objection to the by-law and the reasons in support of the objection, accompanied by the fee prescribed under the *Ontario Municipal Board Act*:

1. The applicant.
2. A person or public body who, before the by-law was passed, made oral submissions at a public meeting or written submissions to the council.
3. The Minister. 2006, c. 23, s. 15 (10).

No appeal re second unit policies

(19.1) Despite subsection (19), there is no appeal in respect of a by-law that gives effect to the policies described in subsection 16 (3), including, for greater certainty, no appeal in respect of any requirement or standard in such a by-law. 2011, c. 6, Sched. 2, s. 5.

When giving of notice deemed completed

(20) For the purposes of subsection (19), the giving of written notice shall be deemed to be completed,

(a) where notice is given by publication in a newspaper, on the day that such publication occurs;

(b) where notice is given by personal service, on the day that the serving of all required notices is completed;

(c) where notice is given by mail, on the day that the mailing of all required notices is completed; and

(d) where notice is given by telephone transmission of a facsimile of the notice, on the day that the transmission of all required notices is completed. R.S.O. 1990, c. P.13, s. 34 (20); 1994, c. 23, s. 21 (9).

When by-law deemed to have come into force

(21) When no notice of appeal is filed under subsection (19), the by-law shall be deemed to have come into force on the day it was passed except that where the by-law is passed under circumstances mentioned in subsection 24 (2) the by-law shall not be deemed to have come into force on the day it was passed until the amendment to the official plan comes into effect. R.S.O. 1990, c. P.13, s. 34 (21); 1994, c. 23, s. 21 (10); 1996, c. 4, s. 20 (8).

Affidavit re no appeal, etc.

(22) An affidavit or declaration of an employee of the municipality that notice was given as required by subsection (18) or that no notice of appeal was filed under subsection (19) within the time allowed for appeal shall be conclusive evidence of the facts stated therein. R.S.O. 1990, c. P.13, s. 34 (22); 1996, c. 4, s. 20 (9).

Record

(23) The clerk of a municipality who receives a notice of appeal under subsection (11) or (19) shall ensure that,

(a) a record that includes the prescribed information and material is compiled;

(b) the notice of appeal, record and fee are forwarded to the Municipal Board within 15 days after the last day for filing a notice of appeal under subsection (11.0.3) or (19), as the case may be; and

(c) such other information or material as the Municipal Board may require in respect of the appeal is forwarded to the Board. 2006, c. 23, s. 15 (11).

Withdrawal of appeals

(23.1) If all appeals to the Municipal Board under subsection (19) are withdrawn and the time for appealing has expired, the secretary of the Board shall notify the clerk of the municipality and the decision of the council is final and binding. 1993, c. 26, s. 53 (3).

Exception

(23.2) Despite clause (23) (b), if all appeals under subsection (19) are withdrawn within 15 days after the last day for filing a notice of appeal, the municipality is not required to forward the materials described under clauses (23) (b) and (c) to the Municipal Board. 1999, c. 12, Sched. M, s. 25 (2).

Decision final

(23.3) If all appeals to the Municipal Board under subsection (19) are withdrawn within 15 days after the last day for filing a notice of appeal, the decision of the council is final and binding. 1999, c. 12, Sched. M, s. 25 (2).

Hearing and notice thereof

(24) On an appeal to the Municipal Board, the Board shall hold a hearing of which notice shall be given to such persons or bodies and in such manner as the Board may determine. R.S.O. 1990, c. P.13, s. 34 (24).

Restriction re adding parties

(24.1) Despite subsection (24), in the case of an appeal under subsection (11) that relates to all or part of an application for an amendment to a by-law that is refused, or in the case of an appeal under subsection (19), only the following may be added as parties:

1. A person or public body who satisfies one of the conditions set out in subsection (24.2).
2. The Minister. 2006, c. 23, s. 15 (12).

Same

(24.2) The conditions mentioned in paragraph 1 of subsection (24.1) are:

1. Before the by-law was passed, the person or public body made oral submissions at a public meeting or written submissions to the council.
2. The Municipal Board is of the opinion that there are reasonable grounds to add the person or public body as a party. 2006, c. 23, s. 15 (12).

New information and material at hearing

(24.3) This subsection applies if information and material that is presented at the hearing of an appeal described in subsection (24.1) was not provided to the municipality before the council made the decision that is the subject of the appeal. 2006, c. 23, s. 15 (12).

Same

(24.4) When subsection (24.3) applies, the Municipal Board may, on its own initiative or on a motion by the municipality or any party, consider whether the information and material could have materially affected the council's decision, and if the Board determines that it could have done so, it shall not be admitted into evidence until subsection (24.5) has been complied with and the prescribed time period has elapsed. 2006, c. 23, s. 15 (12).

Notice to council

(24.5) The Municipal Board shall notify the council that it is being given an opportunity to,

(a) reconsider its decision in light of the information and material; and

(b) make a written recommendation to the Board. 2006, c. 23, s. 15 (12).

Council's recommendation

(24.6) The Municipal Board shall have regard to the council's recommendation if it is received within the time period mentioned in subsection (24.4), and may but is not required to do so if it is received afterwards. 2006, c. 23, s. 15 (12).

Conflict with *SPPA*

(24.7) Subsections (24.1) to (24.6) apply despite the *Statutory Powers Procedure Act*. 2006, c. 23, s. 15 (12).

Dismissal without hearing

(25) Despite the *Statutory Powers Procedure Act* and subsections (11.0.2) and (24), the Municipal Board may dismiss all or part of an appeal without holding a hearing, on its own initiative or on the motion of any party, if,

(a) it is of the opinion that,

(i) the reasons set out in the notice of appeal do not disclose any apparent land use planning ground upon which the Board could allow all or part of the appeal,

(ii) the appeal is not made in good faith or is frivolous or vexatious,

(iii) the appeal is made only for the purpose of delay, or

(iv) the appellant has persistently and without reasonable grounds commenced before the Board proceedings that constitute an abuse of process;

(a.1) REPEALED: 2006, c. 23, s. 15 (15).

(b) the appellant has not provided written reasons for the appeal;

(c) the appellant has not paid the fee prescribed under the *Ontario Municipal Board Act*; or

(d) the appellant has not responded to a request by the Municipal Board for further information within the time specified by the Board. 1994, c. 23, s. 21 (11); 1996, c. 4, s. 20 (11, 12); 2006, c. 23, s. 15 (13-15); 2009, c. 33, Sched. 21, s. 10 (4).

Representation

(25.1) Before dismissing all or part of an appeal, the Municipal Board shall notify the appellant and give the appellant the opportunity to make representation on the proposed dismissal but this subsection does not apply if the appellant has not complied with a request made under clause (25) (d). 2000, c. 26, Sched. K, s. 5 (2).

Same

(25.1.1) Despite the *Statutory Powers Procedure Act* and subsections (11.0.2) and (24), the Municipal Board may, on its own initiative or on the motion of the municipality or the Minister, dismiss all or part of an appeal without holding a hearing if, in the Board's opinion, the application to which the appeal relates is substantially different from the application that was before council at the time of its decision. 2006, c. 23, s. 15 (16).

Dismissal

(25.2) Despite the *Statutory Powers Procedure Act*, the Municipal Board may dismiss all or part of an appeal after holding a hearing or without holding a hearing on the motion under subsection (25) or (25.1.1), as it considers appropriate. 2006, c. 23, s. 15 (17).

Powers of O.M.B.

(26) The Municipal Board may,

(a) dismiss the appeal; or

(b) allow the appeal in whole or in part and repeal the by-law in whole or in part or amend the by-law in such manner as the Board may determine or direct the council of the municipality to repeal the by-law in whole or in part or to amend the by-law in accordance with the Board's order. R.S.O. 1990, c. P.13, s. 34 (26).

Matters of provincial interest

(27) Where an appeal is made to the Municipal Board under subsection (11) or (19), the Minister, if he or she is of the opinion that a matter of provincial interest is, or is likely to be, adversely affected by the by-law, may so advise the Board in writing not later than 30 days before the day fixed by the Board for the hearing of the appeal and the Minister shall identify,

(a) the part or parts of the by-law by which the provincial interest is, or is likely to be, adversely affected; and

(b) the general basis for the opinion that a matter of provincial interest is, or is likely to be, adversely affected. 2004, c. 18, s. 6 (3).

No hearing or notice required

(28) The Minister is not required to give notice or to hold a hearing before taking any action under subsection (27). 2004, c. 18, s. 6 (3).

No order to be made

(29) If the Municipal Board has received notice from the Minister under subsection (27) and has made a decision on the by-law, the Board shall not make an order under subsection (11.0.2) or (26) in respect of the part or parts of the by-law identified in the notice. 2004, c. 18, s. 6 (3); 2009, c. 33, Sched. 21, s. 10 (5).

Action of L.G. in C.

(29.1) The Lieutenant Governor in Council may confirm, vary or rescind the decision of the Municipal Board in respect of the part or parts of the by-law identified in the notice and in doing so may repeal the by-law in whole or in part or amend the by-law in such a manner as the Lieutenant Governor in Council may determine. 2004, c. 18, s. 6 (3).

Coming into force

(30) If one or more appeals have been filed under subsection (19), the by-law does not come into force until all of such appeals have been withdrawn or finally disposed of, whereupon the by-law, except for those parts of it repealed or amended under subsection (26) or as are repealed or amended by the Lieutenant Governor in Council under subsection (29.1), shall be deemed to have come into force on the day it was passed. 1996, c. 4, s. 20 (13); 2004, c. 18, s. 6 (4).

Unappealed portions

(31) Despite subsection (30), before all of the appeals have been finally disposed of, the Municipal Board may make an order providing that any part of the by-law not in issue in the appeal shall be deemed to have come into force on the day the by-law was passed. 1993, c. 26, s. 53 (5).

Method

(32) The Municipal Board may make an order under subsection (31) on its own initiative or on the motion of any person or public body. 1993, c. 26, s. 53 (5); 1996, c. 4, s. 20 (14); 2006, c. 23, s. 15 (18).

Notice and hearing

(33) The Municipal Board may,

(a) dispense with giving notice of a motion under subsection (32) or require the giving of such notice of the motion as it considers appropriate; and

(b) make an order under subsection (31) after holding a hearing or without holding a hearing on the motion, as it considers appropriate. 1993, c. 26, s. 53 (5).

Notice

(34) Despite clause (33) (a), the Municipal Board shall give notice of a motion under subsection (32) to any person or public body who filed with the Board a written request to be notified if a motion is made. 1993, c. 26, s. 53 (5); 1994, c. 23, s. 21 (14).

No distinction on the basis of relationship

35. (1) REPEALED: 1996, c. 4, s. 21 (1).

No distinction on the basis of relationship

(2) The authority to pass a by-law under section 34, subsection 38 (1) or section 41 does not include the authority to pass a by-law that has the effect of distinguishing between persons who are related and persons who are unrelated in respect of the occupancy or use of a building or structure or a part of a building or structure, including the occupancy or use as a single housekeeping unit. 1994, c. 2, s. 43.

Provision of no effect

(3) A provision in a by-law passed under section 34, subsection 38 (1) or section 41 or in an order made under subsection 47 (1) is of no effect to the extent that it contravenes the restrictions described in subsection (2). 1994, c. 2, s. 43; 1996, c. 4, s. 21 (2).

(4) REPEALED: 1996, c. 4, s. 21 (3).

By-laws to give effect to second unit policies

35.1 (1) The council of each local municipality shall ensure that the by-laws passed under section 34 give effect to the policies described in subsection 16 (3). 2011, c. 6, Sched. 2, s. 6.

Regulations

(2) The Minister may make regulations,

(a) authorizing the use of residential units referred to in subsection 16 (3);

(b) establishing requirements and standards with respect to residential units referred to in subsection 16 (3). 2011, c. 6, Sched. 2, s. 6.

Regulation applies as zoning by-law

(3) A regulation under subsection (2) applies as though it is a by-law passed under section 34. 2011, c. 6, Sched. 2, s. 6.

Regulation prevails

(4) A regulation under subsection (2) prevails over a by-law passed under section 34 to the extent of any inconsistency, unless the regulation provides otherwise. 2011, c. 6, Sched. 2, s. 6.

Exception

(5) A regulation under subsection (2) may provide that a by-law passed under section 34 prevails over the regulation. 2011, c. 6, Sched. 2, s. 6.

Regulation may be general or particular

(6) A regulation under subsection (2) may be general or particular in its application and may be restricted to those municipalities or parts of municipalities set out in the regulation. 2011, c. 6, Sched. 2, s. 6.

Holding provision by-law

36. (1) The council of a local municipality may, in a by-law passed under section 34, by the use of the holding symbol “H” (or “h”) in conjunction with any use designation, specify the use to which lands, buildings or structures may be put at such time in the future as the holding symbol is removed by amendment to the by-law. R.S.O. 1990, c. P.13, s. 36 (1).

Condition

(2) A by-law shall not contain the provisions mentioned in subsection (1) unless there is an official plan in effect in the local municipality that contains provisions relating to the use of the holding symbol mentioned in subsection (1). R.S.O. 1990, c. P.13, s. 36 (2).

Appeal to O.M.B.

(3) Where an application to the council for an amendment to the by-law to remove the holding symbol is refused or the council refuses or neglects to make a decision thereon within 120 days after receipt by the clerk of the application, the applicant may appeal to the Municipal Board and the Board shall hear the appeal and dismiss the same or amend the by-law to remove the holding symbol or direct that the by-law be amended in accordance with its order. R.S.O. 1990, c. P.13, s. 36 (3); 1994, c. 23, s. 22 (1); 2004, c. 18, s. 7 (1).

Matters of provincial interest

(3.1) Where an appeal is made to the Municipal Board under subsection (3), the Minister, if he or she is of the opinion that a matter of provincial interest is, or is likely to be, adversely affected by the by-law, may so advise the Board in writing not later than 30 days before the day fixed by the Board for the hearing of the appeal and the Minister shall identify,

(a) the part or parts of the by-law by which the provincial interest is, or is likely to be, adversely affected; and

(b) the general basis for the opinion that a matter of provincial interest is, or is likely to be, adversely affected. 2004, c. 18, s. 7 (2).

No hearing or notice required

(3.2) The Minister is not required to give notice or to hold a hearing before taking any action under subsection (3.1). 2004, c. 18, s. 7 (2).

No order to be made

(3.3) If the Municipal Board has received notice from the Minister under subsection (3.1) and has made a decision on the by-law, the Board shall not make an order under subsection (3) in respect of the part or parts of the by-law identified in the notice. 2004, c. 18, s. 7 (2).

Action of L.G. in C.

(3.4) The Lieutenant Governor in Council may confirm, vary or rescind the decision of the Municipal Board in respect of the part or parts of the by-law identified in the notice and in doing so may repeal the by-law in whole or in part or amend the by-law in such a manner as the Lieutenant Governor in Council may determine. 2004, c. 18, s. 7 (2).

Application of subss. 34 (10.7, 10.9-25.1)

(4) Subsections 34 (10.7) and (10.9) to (25.1) do not apply to an amending by-law passed by the council to remove the holding symbol, but the council shall, in the manner and to the persons and public bodies and containing the information prescribed, give notice of its intention to pass the amending by-law. R.S.O. 1990, c. P.13, s. 36 (4); 1994, c. 23, s. 22 (2); 1996, c. 4, s. 22; 2009, c. 33, Sched. 21, s. 10 (6).

Increased density, etc., provision by-law

37. (1) The council of a local municipality may, in a by-law passed under section 34, authorize increases in the height and density of development otherwise permitted by the by-law that will be permitted in return for the provision of such facilities, services or matters as are set out in the by-law.

Condition

(2) A by-law shall not contain the provisions mentioned in subsection (1) unless there is an official plan in effect in the local municipality that contains provisions relating to the authorization of increases in height and density of development.

Agreements

(3) Where an owner of land elects to provide facilities, services or matters in return for an increase in the height or density of development, the municipality may require the owner to enter into one or more agreements with the municipality dealing with the facilities, services or matters.

Registration of agreement

(4) Any agreement entered into under subsection (3) may be registered against the land to which it applies and the municipality is entitled to enforce the provisions thereof against the owner and, subject to the provisions of the *Registry Act* and the *Land Titles Act*, any and all subsequent owners of the land. R.S.O. 1990, c. P.13, s. 37.

Interim control by-law

38. (1) Where the council of a local municipality has, by by-law or resolution, directed that a review or study be undertaken in respect of land use planning policies in the municipality or in any defined area or areas thereof, the council of the municipality may pass a by-law (hereinafter referred to as an interim control by-law) to be in effect for a period of time specified in the by-law, which period shall not exceed one year from the date of the passing thereof, prohibiting the use of land, buildings or structures within the municipality or within the defined area or areas thereof for, or except for, such purposes as are set out in the by-law.

Extension of period by-law in effect

(2) The council of the municipality may amend an interim control by-law to extend the period of time during which it will be in effect, provided the total period of time does not exceed two years from the date of the passing of the interim control by-law. R.S.O. 1990, c. P.13, s. 38 (1, 2).

Notice of passing of by-law

(3) No notice or hearing is required prior to the passing of a by-law under subsection (1) or (2) but the clerk of the municipality shall, in the manner and to the persons and public bodies and containing the information prescribed, give notice of a by-law passed under subsection (1) or (2) within thirty days of the passing thereof. R.S.O. 1990, c. P.13, s. 38 (3); 1994, c. 23, s. 23 (1).

Appeal to O.M.B.

(4) Any person or public body to whom notice of a by-law was given under subsection (3) may, within sixty days from the date of the passing of the by-law, appeal to the Municipal Board by filing with the clerk of the municipality a notice of appeal setting out the objection to the by-law and the reasons in support of the objection. R.S.O. 1990, c. P.13, s. 38 (4); 1994, c. 23, s. 23 (2).

Application

(5) If a notice of appeal is filed under subsection (4), subsections 34 (23) to (26) apply with necessary modifications to the appeal. 1996, c. 4, s. 23.

When prior zoning by-law again has effect

(6) Where the period of time during which an interim control by-law is in effect has expired and the council has not passed a by-law under section 34 consequent on the completion of the review or

study within the period of time specified in the interim control by-law, or where an interim control by-law is repealed or the extent of the area covered thereby is reduced, the provisions of any by-law passed under section 34 that applied immediately prior to the coming into force of the interim control by-law again come into force and have effect in respect of all lands, buildings or structures formerly subject to the interim control by-law. R.S.O. 1990, c. P.13, s. 38 (6).

Where by-law appealed

(6.1) If the period of time during which an interim control by-law is in effect has expired and the council has passed a by-law under section 34 consequent on the completion of the review or study within the period of time specified in the interim control by-law, but there is an appeal of the by-law under subsection 34 (19), the interim control by-law continues in effect as if it had not expired until the date of the order of the Municipal Board or until the date of a notice issued by the secretary of the Board under subsection 34 (23.1) unless the interim control by-law is repealed. 1994, c. 23, s. 23 (3).

Prohibition

(7) Where an interim control by-law ceases to be in effect, the council of the municipality may not for a period of three years pass a further interim control by-law that applies to any lands to which the original interim control by-law applied.

Application of s. 34 (9)

(8) Subsection 34 (9) applies with necessary modifications to a by-law passed under subsection (1) or (2). R.S.O. 1990, c. P.13, s. 38 (7, 8).

Temporary use provisions

39. (1) The council of a local municipality may, in a by-law passed under section 34, authorize the temporary use of land, buildings or structures for any purpose set out therein that is otherwise prohibited by the by-law. R.S.O. 1990, c. P.13, s. 39 (1).

(1.1), (1.2) REPEALED: 2002, c. 17, Sched. B, s. 11 (1).

Area and time in effect

(2) A by-law authorizing a temporary use under subsection (1) shall define the area to which it applies and specify the period of time for which the authorization shall be in effect, which shall not exceed three years from the day of the passing of the by-law. 2002, c. 17, Sched. B, s. 11 (2).

Extension

(3) Despite subsection (2), the council may by by-law grant further periods of not more than three years each during which the temporary use is authorized. R.S.O. 1990, c. P.13, s. 39 (3).

Non-application of cl. 34 (9) (a)

(4) Upon the expiry of the period or periods of time mentioned in subsections (2) and (3), clause 34 (9) (a) does not apply so as to permit the continued use of the land, buildings or structures for the purpose temporarily authorized. R.S.O. 1990, c. P.13, s. 39 (4).

Garden suites

39.1 (1) As a condition to passing a by-law authorizing the temporary use of a garden suite under subsection 39 (1), the council may require the owner of the suite or any other person to enter into an agreement with the municipality dealing with such matters related to the temporary use of the garden suite as the council considers necessary or advisable, including,

(a) the installation, maintenance and removal of the garden suite;

(b) the period of occupancy of the garden suite by any of the persons named in the agreement; and

(c) the monetary or other form of security that the council may require for actual or potential costs to the municipality related to the garden suite. 2002, c. 17, Sched. B, s. 12; 2009, c. 33, Sched. 21, s. 10 (7).

Definition

(2) In this section,

"garden suite" means a one-unit detached residential structure containing bathroom and kitchen facilities that is ancillary to an existing residential structure and that is designed to be portable. 2002, c. 17, Sched. B, s. 12.

Area and time in effect

(3) Despite subsection 39 (2), a by-law authorizing the temporary use of a garden suite shall define the area to which it applies and specify the period of time for which the authorization shall be in effect, which shall not exceed 20 years from the day of the passing of the by-law. 2011, c. 6, Sched. 2, s. 7.

Extension

(4) Despite subsection (3), the council may by by-law grant further periods of not more than three years each during which the temporary use is authorized. 2002, c. 17, Sched. B, s. 12.

Non-application

(5) Upon the expiry of the period or periods of time mentioned in subsections (3) and (4), clause 34 (9) (a) does not apply so as to permit the continued use of the garden suite. 2002, c. 17, Sched. B, s. 12.

Agreement exempting owner from requirement to provide parking

40. (1) Where an owner or occupant of a building is required under a by-law of a local municipality to provide and maintain parking facilities on land that is not part of a highway, the council of the municipality and such owner or occupant may enter into an agreement exempting the owner or occupant, to the extent specified in the agreement, from the requirement of providing or maintaining the parking facilities. R.S.O. 1990, c. P.13, s. 40 (1).

Payment of money

(2) An agreement entered into under subsection (1) shall provide for the making of one or more payments of money to the municipality as consideration for the granting of the exemption and shall set forth the basis upon which such payment is calculated. R.S.O. 1990, c. P.13, s. 40 (2).

Special account

(3) All money received by a municipality under an agreement entered into under this section shall be paid into a special account and,

(a) the money in that account shall be applied for the same purposes as a reserve fund established under the *Municipal Act, 2001* or the *City of Toronto Act, 2006*, as the case may be;

(b) the money in that account may be invested in securities in which the municipality is permitted to invest under the *Municipal Act, 2001* or the *City of Toronto Act, 2006*, as the case may be;

(c) earnings derived from the investment of the money in the special account shall be paid into that account; and

(d) the auditor of the municipality, in the auditor's annual report, shall report on the activities and position of the account. 2002, c. 17, Sched. B, s. 13 (1); 2006, c. 32, Sched. C, s. 47 (6).

Registration of agreement

(4) An agreement entered into under this section may be registered in the proper land registry office against the land to which it applies and, when so registered, any money payable to the municipality under the agreement that has become due for payment shall have priority lien status as described in section 1 of the *Municipal Act, 2001* or section 3 of the *City of Toronto Act, 2006*, as the case may be. 2002, c. 17, Sched. B, s. 13 (2); 2006, c. 32, Sched. C, s. 47 (7).

Certificate

(5) When all money payable to the municipality under an agreement registered under subsection (4) has been paid, or such agreement has been terminated, the clerk of the municipality shall, at the request of the owner of the land, provide a certificate in a form registrable in the proper land registry office, certifying that the money has been paid or that the agreement has been terminated. R.S.O. 1990, c. P.13, s. 40 (5).

Site plan control area

41. (1) In this section,

"development" means the construction, erection or placing of one or more buildings or structures on land or the making of an addition or alteration to a building or structure that has the effect of substantially increasing the size or usability thereof, or the laying out and establishment of a commercial parking lot or of sites for the location of three or more trailers as defined in subsection 164 (4) of the *Municipal Act, 2001* or subsection 3 (1) of the *City of Toronto Act, 2006*, as the case may be, or of sites for the location of three or more mobile homes as defined in subsection 46 (1) of this Act or of sites for the construction, erection or location of three or more land lease community homes as defined in subsection 46 (1) of this Act. R.S.O. 1990, c. P.13, s. 41 (1); 1994, c. 4, s. 14; 2002, c. 17, Sched. B, s. 14 (1); 2006, c. 32, Sched. C, s. 47 (8).

Exception

(1.1) The definition of "development" in subsection (1) does not include the placement of a portable classroom on a school site of a district school board if the school site was in existence on January 1, 2007. 2006, c. 23, s. 16 (1).

Establishment of site plan control area

(2) Where in an official plan an area is shown or described as a proposed site plan control area, the council of the local municipality in which the proposed area is situate may, by by-law, designate the whole or any part of such area as a site plan control area. R.S.O. 1990, c. P.13, s. 41 (2).

Designation of site plan control area

(3) A by-law passed under subsection (2) may designate a site plan control area by reference to one or more land use designations contained in a by-law passed under section 34. R.S.O. 1990, c. P.13, s. 41 (3).

Consultation

(3.1) The council,

(a) shall permit applicants to consult with the municipality before submitting plans and drawings for approval under subsection (4); and

(b) may, by by-law, require applicants to consult with the municipality as described in clause (a). 2006, c. 23, s. 16 (2).

Approval of plans or drawings

(4) No person shall undertake any development in an area designated under subsection (2) unless the council of the municipality or, where a referral has been made under subsection (12), the Municipal Board has approved one or both, as the council may determine, of the following:

1. Plans showing the location of all buildings and structures to be erected and showing the location of all facilities and works to be provided in conjunction therewith and of all facilities and works required under clause (7) (a), including facilities designed to have regard for accessibility for persons with disabilities.
2. Drawings showing plan, elevation and cross-section views for each building to be erected, except a building to be used for residential purposes containing less than twenty-five dwelling units, which drawings are sufficient to display,
   (a) the massing and conceptual design of the proposed building;
   (b) the relationship of the proposed building to adjacent buildings, streets, and exterior areas to which members of the public have access;
   (c) the provision of interior walkways, stairs, elevators and escalators to which members of the public have access from streets, open spaces and interior walkways in adjacent buildings;
   (d) matters relating to exterior design, including without limitation the character, scale, appearance and design features of buildings, and their sustainable design, but only to the extent that it is a matter of exterior design, if an official plan and a by-law passed under subsection (2) that both contain provisions relating to such matters are in effect in the municipality;
   (e) the sustainable design elements on any adjoining highway under a municipality's jurisdiction, including without limitation trees, shrubs, hedges, plantings or other ground cover, permeable paving materials, street furniture, curb ramps, waste and recycling containers and bicycle parking facilities, if an official plan and a by-law passed under subsection (2) that both contain provisions relating to such matters are in effect in the municipality; and
   (f) facilities designed to have regard for accessibility for persons with disabilities. R.S.O. 1990, c. P.13, s. 41 (4); 2002, c. 9, s. 56 (1); 2006, c. 23, s. 16 (3, 4); 2009, c. 33, Sched. 21, s. 10 (9).

Exclusions from site plan control

(4.1) The following matters relating to buildings described in paragraph 2 of subsection (4) are not subject to site plan control:

1. Interior design.
2. The layout of interior areas, excluding interior walkways, stairs, elevators and escalators referred to in subparagraph 2 (c) of subsection (4).
3. The manner of construction and standards for construction. 2006, c. 23, s. 16 (5).

Dispute about scope of site plan control

(4.2) The owner of land or the municipality may make a motion for directions to have the Municipal Board determine a dispute about whether a matter referred to in paragraph 1 or 2 of subsection (4) is subject to site plan control. 2006, c. 23, s. 16 (5).

Final determination

(4.3) The Municipal Board's determination under subsection (4.2) is not subject to appeal or review. 2006, c. 23, s. 16 (5).

Drawings for residential buildings

(5) Despite the exception provided in paragraph 2 of subsection (4), the council of the municipality may require the drawings mentioned therein for a building to be used for residential purposes containing less than twenty-five dwelling units if the proposed building is to be located in an area specifically designated in the official plan mentioned in subsection (2) as an area wherein such drawings may be required. R.S.O. 1990, c. P.13, s. 41 (5).

Proviso

(6) Nothing in this section shall be deemed to confer on the council of the municipality power to limit the height or density of buildings to be erected on the land. R.S.O. 1990, c. P.13, s. 41 (6).

Conditions to approval of plans

(7) As a condition to the approval of the plans and drawings referred to in subsection (4), a municipality may require the owner of the land to,

(a) provide to the satisfaction of and at no expense to the municipality any or all of the following:

1. Subject to the provisions of subsections (8) and (9), widenings of highways that abut on the land.
2. Subject to the *Public Transportation and Highway Improvement Act*, facilities to provide access to and from the land such as access ramps and curbings and traffic direction signs.
3. Off-street vehicular loading and parking facilities, either covered or uncovered, access driveways, including driveways for emergency vehicles, and the surfacing of such areas and driveways.
4. Walkways and walkway ramps, including the surfacing thereof, and all other means of pedestrian access.

4.1 Facilities designed to have regard for accessibility for persons with disabilities.

5. Facilities for the lighting, including floodlighting, of the land or of any buildings or structures thereon.
6. Walls, fences, hedges, trees, shrubs or other groundcover or facilities for the landscaping of the lands or the protection of adjoining lands.
7. Vaults, central storage and collection areas and other facilities and enclosures for the storage of garbage and other waste material.
8. Easements conveyed to the municipality for the construction, maintenance or improvement of watercourses, ditches, land drainage works, sanitary sewage facilities and other public utilities of the municipality or local board thereof on the land.

9. Grading or alteration in elevation or contour of the land and provision for the disposal of storm, surface and waste water from the land and from any buildings or structures thereon;

(b) maintain to the satisfaction of the municipality and at the sole risk and expense of the owner any or all of the facilities or works mentioned in paragraphs 2, 3, 4, 5, 6, 7, 8 and 9 of clause (a), including the removal of snow from access ramps and driveways, parking and loading areas and walkways;

(c) enter into one or more agreements with the municipality dealing with and ensuring the provision of any or all of the facilities, works or matters mentioned in clause (a) or (d) and the maintenance thereof as mentioned in clause (b) or with the provision and approval of the plans and drawings referred to in subsection (4);

(c.1) enter into one or more agreements with the municipality ensuring that development proceeds in accordance with the plans and drawings approved under subsection (4);

(d) subject to subsection (9.1), convey part of the land to the municipality to the satisfaction of and at no expense to the municipality for a public transit right of way. R.S.O. 1990, c. P.13, s. 41 (7); 1996, c. 4, s. 24 (1, 2); 2006, c. 23, s. 16 (6, 7).

Where area is in upper-tier municipality

(8) If an area designated under subsection (2) is within an upper-tier municipality, plans and drawings in respect of any development proposed to be undertaken in the area shall not be approved until the upper-tier municipality has been advised of the proposed development and afforded a reasonable opportunity to require the owner of the land to,

(a) provide to the satisfaction of and at no expense to the upper-tier municipality any or all of the following:

(i) subject to subsection (9), widenings of highways that are under the jurisdiction of the upper-tier municipality and that abut on the land,

(ii) subject to the *Public Transportation and Highway Improvement Act*, where the land abuts a highway under the jurisdiction of the upper-tier municipality, facilities to provide access to and from the land such as access ramps and curbings and traffic direction signs,

(iii) where the land abuts a highway under the jurisdiction of the upper-tier municipality, offstreet vehicular loading and parking facilities, either covered or uncovered, access driveways, including driveways for emergency vehicles, and the surfacing of such areas and driveways,

(iv) where the land abuts a highway under the jurisdiction of the upper-tier municipality, grading or alteration in elevation or contour of the land in relation to the elevation of the highway and provision for the disposal of storm and surface water from the land,

(v) where the land abuts a highway under the jurisdiction of the upper-tier municipality, facilities designed to have regard for accessibility for persons with disabilities;

(b) enter into one or more agreements with the upper-tier municipality dealing with and ensuring the provision of any or all of the facilities, works or matters mentioned in clause (a) or (c) and the maintenance thereof at the sole risk and expense of the owner, including the removal of snow from access ramps and driveways and parking and loading areas;

(c) subject to subsection (9.1), convey part of the land to the upper-tier municipality to the satisfaction of and at no expense to the municipality for a public transit right of way. 2002, c. 17, Sched. B, s. 14 (2); 2006, c. 23, s. 16 (8).

Widening must be described in official plan

(9) An owner may not be required to provide a highway widening under paragraph 1 of clause (7) (a) or under paragraph 1 of clause (8) (a) unless the highway to be widened is shown on or described in an official plan as a highway to be widened and the extent of the proposed widening is likewise shown or described. R.S.O. 1990, c. P.13, s. 41 (9).

Limitation

(9.1) An owner of land may not be required to convey land under clause (7) (d) or (8) (c) unless the public transit right of way to be provided is shown on or described in an official plan. 1994, c. 23, s. 24 (3); 1996, c. 4, s. 24 (3).

Registration of agreements

(10) Any agreement entered into under clause (7) (c) or (c.1) or under clause (8) (b) may be registered against the land to which it applies and the municipality is entitled to enforce the provisions thereof against the owner and, subject to the provisions of the *Registry Act* and the *Land Titles Act*, any and all subsequent owners of the land. R.S.O. 1990, c. P.13, s. 41 (10); 2002, c. 17, Sched. B, s. 14 (3); 2006, c. 23, s. 16 (9).

Application of *Municipal Act, 2001* or *City of Toronto Act, 2006*

(11) Section 446 of the *Municipal Act, 2001* or section 386 of the *City of Toronto Act, 2006*, as the case may be, applies to any requirements made under clauses (7) (a) and (b) and to any requirements made under an agreement entered into under clause (7) (c) or (c.1). R.S.O. 1990, c. P.13, s. 41 (11); 2002, c. 17, Sched. B, s. 14 (4); 2006, c. 23, s. 16 (10); 2006, c. 32, Sched. C, s. 47 (9).

Appeal to O.M.B.

(12) If the municipality fails to approve the plans or drawings referred to in subsection (4) within 30 days after they are submitted to the municipality or if the owner of the land is not satisfied with any requirement made by the municipality under subsection (7) or by the upper-tier municipality under subsection (8) or with any part thereof, including the terms of any agreement required, the owner may require the plans or drawings or the unsatisfactory requirements, or parts thereof, including the terms of any agreement required, to be referred to the Municipal Board by written notice to the secretary of the Board and to the clerk of the municipality or upper-tier municipality, as appropriate. 2002, c. 17, Sched. B, s. 14 (5).

Hearing

(12.1) The Municipal Board shall hear and determine the matter in issue and determine the details of the plans or drawings and determine the requirements, including the provisions of any agreement required, and the decision of the Board is final. 2002, c. 17, Sched. B, s. 14 (5).

Classes of development, delegation

(13) Where the council of a municipality has designated a site plan control area under this section, the council may, by by-law,

(a) define any class or classes of development that may be undertaken without the approval of plans and drawings otherwise required under subsection (4) or (5); and

(b) delegate to either a committee of the council or to an appointed officer of the municipality identified in the by-law either by name or position occupied, any of the council's powers or authority under this section, except the authority to define any class or classes of development as mentioned in clause (a). R.S.O. 1990, c. P.13, s. 41 (13).

Proviso

(14) Section 35a of *The Planning Act*, being chapter 349 of the Revised Statutes of Ontario, 1970, as it existed on the 21st day of June, 1979, shall be deemed to continue in force in respect of any by-law passed under that section on or before that day. R.S.O. 1990, c. P.13, s. 41 (14).

Certain agreements declared valid and binding

(15) Every agreement entered into by a municipality after the 16th day of December, 1973 and before the 22nd day of June, 1979, to the extent that the agreement deals with facilities and matters mentioned in subsection 35a (2) of *The Planning Act*, being chapter 349 of the Revised Statutes of Ontario, 1970, as it existed on the 21st day of June, 1979, is hereby declared to be valid and binding. R.S.O. 1990, c. P.13, s. 41 (15).

City of Toronto

(16) This section does not apply to the City of Toronto, except for subsection (1.1), paragraph 1 of subsection (4), subparagraph 2 (f) of subsection (4) and paragraph 4.1 of clause (7) (a), which provisions apply with necessary modifications. 2006, c. 23, s. 16 (11).

Conveyance of land for park purposes

42. (1) As a condition of development or redevelopment of land, the council of a local municipality may, by by-law applicable to the whole municipality or to any defined area or areas thereof, require that land in an amount not exceeding, in the case of land proposed for development or redevelopment for commercial or industrial purposes, 2 per cent and in all other cases 5 per cent of the land be conveyed to the municipality for park or other public recreational purposes. R.S.O. 1990, c. P.13, s. 42 (1).

Definition

(2) For the purposes of subsection (3),

"dwelling unit" means any property that is used or designed for use as a domestic establishment in which one or more persons may sleep and prepare and serve meals. R.S.O. 1990, c. P.13, s. 42 (2).

Alternative requirement

(3) Subject to subsection (4), as an alternative to requiring the conveyance provided for in subsection (1), in the case of land proposed for development or redevelopment for residential purposes, the by-law may require that land be conveyed to the municipality for park or other public recreational purposes at a rate of one hectare for each 300 dwelling units proposed or at such lesser rate as may be specified in the by-law. R.S.O. 1990, c. P.13, s. 42 (3).

Official plan requirement

(4) The alternative requirement authorized by subsection (3) may not be provided for in a by-law passed under this section unless there is an official plan in effect in the local municipality that contains specific policies dealing with the provision of lands for park or other public recreational purposes and the use of the alternative requirement. R.S.O. 1990, c. P.13, s. 42 (4).

Use and sale of land

(5) Land conveyed to a municipality under this section shall be used for park or other public recreational purposes, but may be sold at any time. R.S.O. 1990, c. P.13, s. 42 (5).

Payment instead of conveyance

(6) The council of a local municipality may require the payment of money to the value of the land otherwise required to be conveyed under this section in lieu of the conveyance. 2006, c. 23, s. 17 (1).

No building without payment

(6.1) If a payment is required under subsection (6), no person shall construct a building on the land proposed for development or redevelopment unless the payment has been made or arrangements for the payment that are satisfactory to the council have been made. 2006, c. 23, s. 17 (1).

Redevelopment, reduction of payment

(6.2) If land in a local municipality is proposed for redevelopment, a part of the land meets sustainability criteria set out in the official plan and the conditions set out in subsection (6.3) are met, the council shall reduce the amount of any payment required under subsection (6) by the value of that part. 2006, c. 23, s. 17 (1).

Same

(6.3) The conditions mentioned in subsection (6.2) are:

1. The official plan contains policies relating to the reduction of payments required under subsection (6).
2. No land is available to be conveyed for park or other public recreational purposes under this section. 2006, c. 23, s. 17 (1).

Determination of value

(6.4) For the purposes of subsections (6) and (6.2), the value of the land shall be determined as of the day before the day the building permit is issued in respect of the development or redevelopment or, if more than one building permit is required for the development or redevelopment, as of the day before the day the first permit is issued. 2006, c. 23, s. 17 (1).

Where land conveyed

(7) If land has been conveyed or is required to be conveyed to a municipality for park or other public purposes or a payment of money in lieu of such conveyance has been received by the municipality or is owing to it under this section or a condition imposed under section 51.1 or 53, no additional conveyance or payment in respect of the land subject to the earlier conveyance or payment may be required by a municipality in respect of subsequent development or redevelopment unless,

(a) there is a change in the proposed development or redevelopment which would increase the density of development; or

(b) land originally proposed for development or redevelopment for commercial or industrial purposes is now proposed for development or redevelopment for other purposes. 1994, c. 23, s. 25.

Non-application

(8) Despite clauses 74.1 (2) (h) and (i), subsection (7) does not apply to land proposed for development or redevelopment if, before this subsection comes into force, the land was subject to a condition that land be conveyed to a municipality for park or other public purposes or that a payment of money in lieu of such conveyance be made under this section or under section 51 or 53. 1994, c. 23, s. 25.

Changes

(9) If there is a change under clause (7) (a) or (b), the land that has been conveyed or is required to be conveyed or the payment of money that has been received or that is owing, as the case may be, shall be included in determining the amount of land or payment of money in lieu of it that may subsequently be required under this section on the development, further development or redevelopment of the lands or part of them in respect of which the original conveyance or payment was made. 1994, c. 23, s. 25.

Disputes

(10) In the event of a dispute between a municipality and an owner of land on the value of land determined under subsection (6.4), either party may apply to the Municipal Board to have the value determined and the Board shall, in accordance as nearly as may be with the *Expropriations Act*, determine the value of the land and, if a payment has been made under protest under subsection (12), the Board may order that a refund be made to the owner. 1994, c. 23, s. 25; 2006, c. 23, s. 17 (2).

Same

(11) In the event of a dispute between a municipality and an owner of land as to the amount of land or payment of money that may be required under subsection (9), either party may apply to the Municipal Board and the Board shall make a final determination of the matter. 1994, c. 23, s. 25.

Payment under protest

(12) If there is a dispute between a municipality and the owner of land under subsection (10), the owner may pay the amount required by the municipality under protest and shall make an application to the Municipal Board under subsection (10) within 30 days of the payment of the amount. 1994, c. 23, s. 25.

Notice

(13) If an owner of land makes a payment under protest and an application to the Municipal Board under subsection (12), the owner shall give notice of the application to the municipality within 15 days after the application is made. 1994, c. 23, s. 25.

Park purposes

(14) The council of a municipality may include in its estimates an amount to be used for the acquisition of land to be used for park or other public recreational purposes and may pay into the fund provided for in subsection (15) that amount, and any person may pay any sum into the same fund. 1994, c. 23, s. 25.

Special account

(15) All money received by the municipality under subsections (6) and (14) and all money received on the sale of land under subsection (5), less any amount spent by the municipality out of its general funds in respect of the land, shall be paid into a special account and spent only for the acquisition of land to be used for park or other public recreational purposes, including the erection,

improvement or repair of buildings and the acquisition of machinery for park or other public recreational purposes. 1994, c. 23, s. 25; 2009, c. 33, Sched. 21, s. 10 (10).

Investments

(16) The money in the special account may be invested in securities in which the municipality is permitted to invest under the *Municipal Act, 2001* or the *City of Toronto Act, 2006*, as the case may be, and the earnings derived from the investment of the money shall be paid into the special account, and the auditor in the auditor's annual report shall report on the activities and status of the account. 1994, c. 23, s. 25; 1996, c. 32, s. 82 (5); 2002, c. 17, Sched. B, s. 15; 2006, c. 32, Sched. C, s. 47 (10).

Application of subss. 34 (12-34)

43. (1) Subsections 34 (12) to (34) do not apply to a by-law that amends a by-law only to express a word, term or measurement in the by-law in a unit of measurement set out in Schedule I of the *Weights and Measures Act* (Canada) in accordance with the definitions set out in Schedule II of that Act and that,

(a) does not round any measurement so expressed further than to the next higher or lower multiple of 0.5 metres or 0.5 square metres, as the case may be; or

(b) does not vary by more than 5 per cent any measurement so expressed. R.S.O. 1990, c. P.13, s. 43 (1); 1993, c. 26, s. 55.

Effect of amendment that conforms with subs. (1)

(2) Any land, building or structure that otherwise conforms with a by-law passed under section 34 or a predecessor thereof or an order made by the Minister under section 47 or a predecessor thereof does not cease to conform with the by-law or order by reason only of an amendment to the by-law or order that conforms with subsection (1). R.S.O. 1990, c. P.13, s. 43 (2).

Committee of adjustment

44. (1) If a municipality has passed a by-law under section 34 or a predecessor of such section, the council of the municipality may by by-law constitute and appoint a committee of adjustment for the municipality composed of such persons, not fewer than three, as the council considers advisable. R.S.O. 1990, c. P.13, s. 44 (1).

Copy of by-law to Minister

(2) Where a by-law is passed under subsection (1), a certified copy of the by-law shall be sent to the Minister by registered mail by the clerk of the municipality within thirty days of the passing thereof. R.S.O. 1990, c. P.13, s. 44 (2).

Term of office

(3) The members of the committee who are not members of a municipal council shall hold office for the term of the council that appointed them and the members of the committee who are members of a municipal council shall be appointed annually. R.S.O. 1990, c. P.13, s. 44 (3).

Idem

(4) Members of the committee shall hold office until their successors are appointed, and are eligible for reappointment, and, where a member ceases to be a member before the expiration of his or her term, the council shall appoint another eligible person for the unexpired portion of the term. R.S.O. 1990, c. P.13, s. 44 (4).

Quorum

(5) Where a committee is composed of three members, two members constitute a quorum, and where a committee is composed of more than three members, three members constitute a quorum. R.S.O. 1990, c. P.13, s. 44 (5).

Vacancy not to impair powers

(6) Subject to subsection (5), a vacancy in the membership or the absence or inability of a member to act does not impair the powers of the committee or of the remaining members. R.S.O. 1990, c. P.13, s. 44 (6).

Chair

(7) The members of the committee shall elect one of themselves as chair, and, when the chair is absent through illness or otherwise, the committee may appoint another member to act as acting chair. R.S.O. 1990, c. P.13, s. 44 (7).

Secretary-treasurer, employees

(8) The committee shall appoint a secretary-treasurer, who may be a member of the committee, and may engage such employees and consultants as is considered expedient, within the limits of the money appropriated for the purpose. R.S.O. 1990, c. P.13, s. 44 (8).

Remuneration

(9) The members of the committee shall be paid such compensation as the council may provide. R.S.O. 1990, c. P.13, s. 44 (9).

Filing of documents, etc.

(10) The secretary-treasurer shall keep on file minutes and records of all applications and the decisions thereon and of all other official business of the committee, and section 253 of the *Municipal Act, 2001* or section 199 of the *City of Toronto Act, 2006*, as the case may be, applies with necessary modifications to such documents. R.S.O. 1990, c. P.13, s. 44 (10); 2002, c. 17, Sched. B, s. 16; 2006, c. 32, Sched. C, s. 47 (11).

Rules of procedure

(11) In addition to complying with the requirements of this Act, the committee shall comply with such rules of procedure as are prescribed. R.S.O. 1990, c. P.13, s. 44 (11).

Powers of committee

45. (1) The committee of adjustment, upon the application of the owner of any land, building or structure affected by any by-law that is passed under section 34 or 38, or a predecessor of such sections, or any person authorized in writing by the owner, may, despite any other Act, authorize such minor variance from the provisions of the by-law, in respect of the land, building or structure or the use thereof, as in its opinion is desirable for the appropriate development or use of the land, building or structure, if in the opinion of the committee the general intent and purpose of the by-law and of the official plan, if any, are maintained. R.S.O. 1990, c. P.13, s. 45 (1); 2006, c. 23, s. 18 (1); 2009, c. 33, Sched. 21, s. 10 (11).

Restriction

(1.1) Subsection (1) does not allow the committee to authorize a minor variance from conditions imposed under subsection 34 (16) of this Act or under subsection 113 (2) of the *City of Toronto Act, 2006*. 2006, c. 23, s. 18 (2).

Other powers

(2) In addition to its powers under subsection (1), the committee, upon any such application,

(a) where any land, building or structure, on the day the by-law was passed, was lawfully used for a purpose prohibited by the by-law, may permit,

(i) the enlargement or extension of the building or structure, if the use that was made of the building or structure on the day the by-law was passed, or a use permitted under subclause (ii) continued until the date of the application to the committee, but no permission may be given to enlarge or extend the building or structure beyond the limits of the land owned and used in connection therewith on the day the by-law was passed, or

(ii) the use of such land, building or structure for a purpose that, in the opinion of the committee, is similar to the purpose for which it was used on the day the by-law was passed or is more compatible with the uses permitted by the by-law than the purpose for which it was used on the day the by-law was passed, if the use for a purpose prohibited by the by-law or another use for a purpose previously permitted by the committee continued until the date of the application to the committee; or

(b) where the uses of land, buildings or structures permitted in the by-law are defined in general terms, may permit the use of any land, building or structure for any purpose that, in the opinion of the committee, conforms with the uses permitted in the by-law. R.S.O. 1990, c. P.13, s. 45 (2).

Power of committee to grant minor variances

(3) A council that has constituted a committee of adjustment may by by-law empower the committee of adjustment to grant minor variances from the provisions of any by-law of the municipality that implements an official plan, or from such by-laws of the municipality as are specified and that implement an official plan, and when a committee of adjustment is so empowered subsection (1) applies with necessary modifications. R.S.O. 1990, c. P.13, s. 45 (3).

Time for hearing

(4) The hearing on any application shall be held within thirty days after the application is received by the secretary-treasurer. R.S.O. 1990, c. P.13, s. 45 (4).

Notice of hearing

(5) The committee, before hearing an application, shall in the manner and to the persons and public bodies and containing the information prescribed, give notice of the application. R.S.O. 1990, c. P.13, s. 45 (5); 1994, c. 23, s. 26 (1).

Hearing

(6) The hearing of every application shall be held in public, and the committee shall hear the applicant and every other person who desires to be heard in favour of or against the application, and the committee may adjourn the hearing or reserve its decision. R.S.O. 1990, c. P.13, s. 45 (6).

Oaths

(7) The chair, or in his or her absence the acting chair, may administer oaths. R.S.O. 1990, c. P.13, s. 45 (7).

Decision

(8) No decision of the committee on an application is valid unless it is concurred in by the majority of the members of the committee that heard the application, and the decision of the committee, whether granting or refusing an application, shall be in writing and shall set out the reasons for the decision, and shall be signed by the members who concur in the decision. R.S.O. 1990, c. P.13, s. 45 (8).

Conditions in decision

(9) Any authority or permission granted by the committee under subsections (1), (2) and (3) may be for such time and subject to such terms and conditions as the committee considers advisable and as are set out in the decision. R.S.O. 1990, c. P.13, s. 45 (9).

Agreement re terms and conditions

(9.1) If the committee imposes terms and conditions under subsection (9), it may also require the owner of the land to enter into one or more agreements with the municipality dealing with some or all of the terms and conditions, and in that case the requirement shall be set out in the decision. 2006, c. 23, s. 18 (3).

Registration of agreement

(9.2) An agreement entered into under subsection (9.1) may be registered against the land to which it applies and the municipality is entitled to enforce the agreement against the owner and, subject to the *Registry Act* and the *Land Titles Act*, against any and all subsequent owners of the land. 2006, c. 23, s. 18 (3).

Notice of decision

(10) The secretary-treasurer shall not later than ten days from the making of the decision send one copy of the decision, certified by him or her,

(a) to the Minister, if the Minister has notified the committee by registered mail that he or she wishes to receive a copy of all decisions of the committee;

(b) to the applicant; and

(c) to each person who appeared in person or by counsel at the hearing and who filed with the secretary-treasurer a written request for notice of the decision,

together with a notice of the last day for appealing to the Municipal Board. R.S.O. 1990, c. P.13, s. 45 (10).

Additional material

(11) Where the secretary-treasurer is required to send a copy of the decision to the Minister under subsection (10), he or she shall also send to the Minister such other information and material as may be prescribed. R.S.O. 1990, c. P.13, s. 45 (11).

Appeal to O.M.B.

(12) The applicant, the Minister or any other person or public body who has an interest in the matter may within 20 days of the making of the decision appeal to the Municipal Board against the decision of the committee by filing with the secretary-treasurer of the committee a notice of appeal setting out the objection to the decision and the reasons in support of the objection accompanied by payment to the secretary-treasurer of the fee prescribed by the Municipal Board under the *Ontario Municipal Board Act* as payable on an appeal from a committee of adjustment to the Board. 1994, c. 23, s. 26 (2).

Idem

(13) The secretary-treasurer of a committee, upon receipt of a notice of appeal filed under subsection (12), shall forthwith forward the notice of appeal and the amount of the fee mentioned in subsection (12) to the Municipal Board by registered mail together with all papers and documents filed with the committee of adjustment relating to the matter appealed from and such other documents and papers as may be required by the Board. R.S.O. 1990, c. P.13, s. 45 (13).

Exception

(13.1) Despite subsection (13), if all appeals under subsection (12) are withdrawn within 15 days after the last day for filing a notice of appeal, the secretary-treasurer is not required to forward the materials described under subsection (13) to the Municipal Board. 1999, c. 12, Sched. M, s. 26.

Decision final

(13.2) If all appeals under subsection (12) are withdrawn within 15 days after the last day for filing a notice of appeal, the decision of the committee is final and binding and the secretary-treasurer of the committee shall notify the applicant and file a certified copy of the decision with the clerk of the municipality. 1999, c. 12, Sched. M, s. 26.

Where no appeal

(14) If within such 20 days no notice of appeal is given, the decision of the committee is final and binding, and the secretary-treasurer shall notify the applicant and shall file a certified copy of the decision with the clerk of the municipality. R.S.O. 1990, c. P.13, s. 45 (14); 1994, c. 23, s. 26 (3).

Where appeals withdrawn

(15) Where all appeals to the Municipal Board are withdrawn, the decision of the committee is final and binding and the secretary of the Board shall notify the secretary-treasurer of the committee who in turn shall notify the applicant and file a certified copy of the decision with the clerk of the municipality. R.S.O. 1990, c. P.13, s. 45 (15); 1994, c. 23, s. 26 (4).

Hearing

(16) On an appeal to the Municipal Board, the Board shall, except as provided in subsections (15) and (17), hold a hearing of which notice shall be given to the applicant, the appellant, the secretary-treasurer of the committee and to such other persons or public bodies and in such manner as the Board may determine. R.S.O. 1990, c. P.13, s. 45 (16); 1994, c. 23, s. 26 (5).

Dismissal without hearing

(17) Despite the *Statutory Powers Procedure Act* and subsection (16), the Municipal Board may dismiss all or part of an appeal without holding a hearing, on its own initiative or on the motion of any party, if,

(a) it is of the opinion that,

(i) the reasons set out in the notice of appeal do not disclose any apparent land use planning ground upon which the Board could allow all or part of the appeal,

(ii) the appeal is not made in good faith or is frivolous or vexatious,

(iii) the appeal is made only for the purpose of delay, or

(iv) the appellant has persistently and without reasonable grounds commenced before the Board proceedings that constitute an abuse of process;

(b) the appellant has not provided written reasons for the appeal;

(c) the appellant has not paid the fee prescribed under the *Ontario Municipal Board Act*; or

(d) the appellant has not responded to a request by the Municipal Board for further information within the time specified by the Board. 1994, c. 23, s. 26 (6); 2006, c. 23, s. 18 (4, 5).

Representation

(17.1) Before dismissing all or part of an appeal, the Municipal Board shall notify the appellant and give the appellant the opportunity to make representation on the proposed dismissal but this subsection does not apply if the appellant has not complied with a request made under clause (17) (d). 2000, c. 26, Sched. K, s. 5 (3).

Dismissal

(17.2) The Municipal Board may dismiss all or part of an appeal after holding a hearing or without holding a hearing on the motion under subsection (17), as it considers appropriate. 2000, c. 26, Sched. K, s. 5 (3).

Powers of O.M.B.

(18) The Municipal Board may dismiss the appeal and may make any decision that the committee could have made on the original application. R.S.O. 1990, c. P.13, s. 45 (18).

Amended application

(18.1) On an appeal, the Municipal Board may make a decision on an application which has been amended from the original application if, before issuing its order, written notice is given to the persons and public bodies who received notice of the original application under subsection (5) and to other persons and agencies prescribed under that subsection. 1993, c. 26, s. 56; 1994, c. 23, s. 26 (7).

Exception

(18.1.1) The Municipal Board is not required to give notice under subsection (18.1) if, in its opinion, the amendment to the original application is minor. 1996, c. 4, s. 25 (1).

Notice of intent

(18.2) Any person or public body who receives notice under subsection (18.1) may, not later than thirty days after the day that written notice was given, notify the Board of an intention to appear at the hearing or the resumption of the hearing, as the case may be. 1993, c. 26, s. 56; 1994, c. 23, s. 26 (8).

Order

(18.3) If, after the expiry of the time period in subsection (18.2), no notice of intent has been received, the Board may issue its order. 1993, c. 26, s. 56.

Hearing

(18.4) If a notice of intent is received, the Board may hold a hearing or resume the hearing on the amended application or it may issue its order without holding a hearing or resuming the hearing. 1996, c. 4, s. 25 (2).

Notice of decision

(19) When the Municipal Board makes an order on an appeal, the secretary of the Board shall send a copy thereof to the applicant, the appellant and the secretary-treasurer of the committee. R.S.O. 1990, c. P.13, s. 45 (19).

Idem

(20) The secretary-treasurer shall file a copy of the order of the Municipal Board with the clerk of the municipality. R.S.O. 1990, c. P.13, s. 45 (20).

Mobile homes, land lease community homes

46. (1) In this section,

"land lease community home" means any dwelling that is a permanent structure where the owner of the dwelling leases the land used or intended for use as the site for the dwelling, but does not include a mobile home; ("maison de communauté de terrains à bail")

"mobile home" means any dwelling that is designed to be made mobile, and constructed or manufactured to provide a permanent residence for one or more persons, but does not include a travel trailer or tent trailer or trailer otherwise designed; ("maison mobile")

"parcel of land" means a lot or block within a registered plan of subdivision or any land that may be legally conveyed under the exemption provided in clause 50 (3) (b) or clause 50 (5) (a). ("parcelle de terrain") R.S.O. 1990, c. P.13, s. 46 (1); 1994, c. 4, s. 15 (1).

One mobile home per parcel of land

(2) Unless otherwise authorized by a by-law in force under section 34 or an order of the Minister made under clause 47 (1) (a), or a permit issued under section 13 of the *Public Lands Act*, no person shall erect or locate or use or cause to be erected, located or used, a mobile home except on a parcel of land as defined in subsection (1), and in no case except as otherwise so authorized shall any person erect, locate or use or cause to be erected, located or used more than one mobile home on any such parcel of land. R.S.O. 1990, c. P.13, s. 46 (2).

One land lease community home per parcel of land

(2.1) Unless otherwise authorized by a by-law in force under section 34 or an order of the Minister made under clause 47 (1) (a), or a permit issued under section 13 of the *Public Lands Act*, no person shall construct or erect or locate or use or cause to be constructed, erected, located or used a land lease community home except on a parcel of land as defined in subsection (1), and in no case except as otherwise so authorized shall any person construct, erect, locate or use or cause to be constructed, erected, located or used more than one land lease community home on any such parcel of land. 1994, c. 4, s. 15 (2).

Saving

(3) This section does not apply to prevent the continued use in the same location of any mobile home that,

(a) was erected or located and in use prior to the 1st day of June, 1977; or

(b) was erected or located in accordance with a building permit issued prior to the 1st day of June, 1977. R.S.O. 1990, c. P.13, s. 46 (3).

Same

(4) This section does not apply to prevent the continued use in the same location of any land lease community home that,

(a) was constructed, erected or located and in use prior to the day the *Land Lease Statute Law Amendment Act, 1994* receives Royal Assent; or

(b) was constructed, erected or located in accordance with a building permit issued prior to the day the *Land Lease Statute Law Amendment Act, 1994* receives Royal Assent. 1994, c. 4, s. 15 (3).

Power of Minister re zoning and subdivision control

47. (1) The Minister may by order,

(a) in respect of any land in Ontario, exercise any of the powers conferred upon councils by section 34, 38 or 39, but subsections 34 (11) to (34) do not apply to the exercise of such powers; and

(b) in respect of any land in Ontario, exercise the powers conferred upon councils by subsection 50 (4). R.S.O. 1990, c. P.13, s. 47 (1); 1994, c. 23, s. 27 (1).

Power of Minister to allow minor variances

(2) Where an order has been made under clause (1) (a), the Minister, in respect of the lands affected by the order, has all the powers in respect of such order as a committee of adjustment has under subsections 45 (1) and (2) in respect of a by-law passed under section 34, but subsections 45 (4) to (8) and (10) to (20) do not apply to the exercise by the Minister of such powers. R.S.O. 1990, c. P.13, s. 47 (2).

Order prevails over by-law in event of conflict

(3) In the event of a conflict between an order made under clause (1) (a) and a by-law that is in effect under section 34 or 38, or a predecessor thereof, the order prevails to the extent of such conflict, but in all other respects the by-law remains in full force and effect. R.S.O. 1990, c. P.13, s. 47 (3).

Deemed by-law of municipality

(4) The Minister may, in the order or by separate order, provide that all or part of an order made under clause (1) (a) and any amendments to it in respect of land in a municipality, the council of which has the powers conferred by section 34, shall be deemed for all purposes, except the purposes of section 24, to be and to always have been a by-law passed by the council of the municipality in which the land is situate. 2001, c. 9, Sched. J, s. 2 (1).

Notice

(5) No notice or hearing is required prior to the making of an order under subsection (1) but the Minister shall give notice of any such order within thirty days of the making thereof in such manner as the Minister considers proper and shall set out in the notice the provisions of subsections (8), (9) and (10). R.S.O. 1990, c. P.13, s. 47 (5).

Idem

(6) The Minister shall cause a duplicate or certified copy of an order made under clause (1) (a),

(a) where the land affected is situate in a local municipality, to be lodged in the office of the clerk of the municipality, or where the land affected is situate in two or more local municipalities, in the office of the clerk of each of such municipalities; and

(b) where the land affected is situate in territory without municipal organization, to be lodged in the proper land registry office, where it shall be made available to the public as a production. R.S.O. 1990, c. P.13, s. 47 (6); 2002, c. 17, Sched. B, s. 17.

Registration

(7) The Minister shall cause a certified copy or duplicate of an order made under clause (1) (b) to be registered in the proper land registry office. R.S.O. 1990, c. P.13, s. 47 (7).

Revocation or amendment

(8) The Minister may, on his or her own initiative or at the request of any person or public body, by order, amend or revoke in whole or in part any order made under subsection (1). R.S.O. 1990, c. P.13, s. 47 (8); 1994, c. 23, s. 27 (2).

Information

(8.1) A request under subsection (8) shall include the prescribed information and material and such other information or material as the Minister may require. 1993, c. 26, s. 57 (2).

Refusal to consider

(8.2) The Minister may refuse to accept or further consider a request under subsection (8) until the prescribed information and material and the required fee are received. 1994, c. 23, s. 27 (3).

Notice

(9) Except as provided in subsection (10), the Minister before amending or revoking in whole or in part an order made under subsection (1) shall give notice or cause to be given notice thereof in such manner as the Minister considers proper and shall allow such period of time as he or she considers appropriate for the submission of representations in respect thereof. R.S.O. 1990, c. P.13, s. 47 (9).

Hearing by O.M.B.

(10) Where an application is made to the Minister to amend or revoke in whole or in part any order made under subsection (1), the Minister may, and on the request of any person or public body shall, request the Municipal Board to hold a hearing on the application and thereupon the Board shall hold a hearing as to whether the order should be amended or revoked in whole or in part. R.S.O. 1990, c. P.13, s. 47 (10); 1994, c. 23, s. 27 (4).

Reasons

(10.1) A request for a hearing must set out the reasons for the request and be accompanied by the fee prescribed under the *Ontario Municipal Board Act*. 1994, c. 23, s. 27 (5).

Refusal to refer

(11) The Minister may refuse to refer a request under subsection (10) to the Municipal Board if,

(a) the Minister is of the opinion that,

(i) the reasons set out in the request do not disclose any apparent land use planning ground upon which the Municipal Board could amend or revoke or refuse to revoke all or part of the order,

(ii) the request is not made in good faith or is frivolous or vexatious, or

(iii) the request is made only for the purpose of delay;

(b) the person or public body requesting the hearing has not provided written reasons for the request. 1994, c. 23, s. 27 (6); 1996, c. 4, s. 26 (1).

Notice of hearing

(12) Where the Minister has requested the Municipal Board to hold a hearing as provided for in subsection (10), notice of the hearing shall be given in such manner and to such persons as the Board may direct, and the Board shall hear any submissions that any person may desire to bring to the attention of the Board. R.S.O. 1990, c. P.13, s. 47 (12).

Dismissal without hearing

(12.1) Despite the *Statutory Powers Procedure Act* and subsection (10), the Municipal Board may dismiss a request to hold a hearing without holding a hearing, on its own initiative or on the motion of any party, if,

(a) it is of the opinion that,

(i) the reasons set out in the request do not disclose any apparent land use planning ground upon which the Board could amend or revoke or refuse to amend or revoke all or part of the order,

(ii) the request is not made in good faith or is frivolous or vexatious,

(iii) the request is made only for the purpose of delay, or

(iv) the person or public body requesting the hearing has persistently and without reasonable grounds commenced before the Board proceedings that constitute an abuse of process;

(b) the person or public body requesting the hearing has not provided written reasons for the request;

(c) the person or public body requesting the hearing has not paid the fee prescribed under the *Ontario Municipal Board Act*; or

(d) the person or public body requesting the hearing has not responded to a request by the Municipal Board for further information within the time specified by the Board. 1994, c. 23, s. 27 (7); 1996, c. 4, s. 26 (2); 2006, c. 23, s. 19 (1, 2).

Representation

(12.2) Before dismissing a request to hold a hearing, the Municipal Board shall notify the person or public body requesting the hearing and give the person or public body the opportunity to make representation on the proposed dismissal but this subsection does not apply if the person or public body has not complied with a request made under clause (12.1) (d). 2000, c. 26, Sched. K, s. 5 (4).

Dismissal

(12.3) The Municipal Board may dismiss a request after holding a hearing or without holding a hearing on the motion under subsection (12.1), as it considers appropriate. 2000, c. 26, Sched. K, s. 5 (4).

Decision of O.M.B.

(13) The Municipal Board after the conclusion of the hearing shall make a decision to either amend or revoke the order in whole or in part or refuse to amend or revoke the order in whole or in part and the Minister shall give effect to the decision of the Board. R.S.O. 1990, c. P.13, s. 47 (13); 1996, c. 4, s. 26 (3).

Minister's notice re matters of provincial interest

(13.1) If the Municipal Board has been requested to hold a hearing as provided for in subsection (10) and the Minister is of the opinion that a matter of provincial interest is, or is likely to be, adversely affected by the requested amendment or revocation, the Minister may so notify the Board in writing, not later than 30 days before the day fixed by the Board for the hearing. 2006, c. 23, s. 19 (3).

Same

(13.2) The Minister's notice shall identify,

(a) the provisions of the order by whose amendment or revocation the provincial interest is, or is likely to be, adversely affected; and

(b) the general basis for the opinion that a matter of provincial interest is, or is likely to be, adversely affected. 2006, c. 23, s. 19 (3).

Same

(13.3) The Minister is not required to give notice or to hold a hearing before giving notice under subsection (13.1). 2006, c. 23, s. 19 (3).

Effect of notice

(13.4) If the Municipal Board receives notice from the Minister under subsection (13.1), the decision of the Board is not final and binding with respect to the amendment or revocation of provisions identified in the notice, until the Lieutenant Governor in Council confirms the decision in that respect. 2006, c. 23, s. 19 (3).

Power of Lieutenant Governor in Council

(13.5) The Lieutenant Governor in Council may confirm, vary or rescind the Municipal Board's decision with respect to the amendment or revocation of provisions identified in the notice, and may direct the Minister to amend or revoke the order, in whole or in part. 2006, c. 23, s. 19 (3).

Notification of decision

(14) A copy of the decision of the Municipal Board shall be sent to each person who appeared at the hearing and made representations and to any person who in writing requests a copy of the decision. R.S.O. 1990, c. P.13, s. 47 (14).

(15)-(17) REPEALED: 1994, c. 23, s. 27 (8).

Effect of land use order

(18) An order of the Minister made under clause (1) (b) has the same effect as a by-law passed under subsection 50 (4). R.S.O. 1990, c. P.13, s. 47 (18).

Deemed by-law

(19) The Minister may, in the order or by separate order, provide that all or part of an order made under clause (1) (a) and any amendments to it in respect of land in the planning area of a planning board shall be deemed to be and to always have been a by-law passed under section 34 by the planning board in which the land is situate. 2001, c. 9, Sched. J, s. 2 (2).

Where licence, etc., not to issue

48. Despite the provisions of any other general or special Act, a licence, permit, approval or permission shall not be issued or granted nor any utility or service provided by a utilities distributor or a public or Crown agency in respect of any land, building or structure where the proposed use of the land or the erection or proposed use of the building or structure would be in contravention of

section 46 or of an order made under section 47 or of a by-law passed by a planning board under section 34 or 38. R.S.O. 1990, c. P.13, s. 48; 1994, c. 23, s. 28; 2006, c. 23, s. 20.

Power of entry

49. (1) In this section,

"officer" means an officer who has been assigned the responsibility of enforcing section 46, orders of the Minister made under clause 47 (1) (a) or zoning by-laws passed under section 34.

Entry and inspection

(2) Subject to subsection (3), where an officer believes on reasonable grounds that section 46, an order of the Minister made under clause 47 (1) (a) or a by-law passed under section 34 or 38 is being contravened, the officer or any person acting under his or her instructions may, at all reasonable times and upon producing proper identification, enter and inspect any property on or in respect of which he or she believes the contravention is occurring. R.S.O. 1990, c. P.13, s. 49 (1, 2).

Where warrant required

(3) Except under the authority of a search warrant issued under section 49.1, an officer or any person acting under his or her instructions shall not enter any room or place actually used as a dwelling without requesting and obtaining the consent of the occupier, first having informed the occupier that the right of entry may be refused and entry made only under the authority of a search warrant. R.S.O. 1990, c. P.13, s. 49 (3); 1994, c. 2, s. 45 (1).

Obstruction

(4) No person shall obstruct or attempt to obstruct an officer or a person acting under the officer's instructions in the exercise of a power under this section. 1994, c. 2, s. 45 (2).

Search warrant

49.1 (1) A provincial judge or justice of the peace may at any time issue a warrant in the prescribed form authorizing a person named in the warrant to enter and search a building, receptacle or place if the provincial judge or justice of the peace is satisfied by information on oath that there are reasonable grounds to believe that,

(a) an offence under section 67 has been committed; and

(b) the entry and search will afford evidence relevant to the commission of the offence. 1994, c. 2, s. 46; 1997, c. 24, s. 226 (7).

Seizure

(2) In a search warrant, the provincial judge or justice of the peace may authorize the person named in the warrant to seize anything that, based on reasonable grounds, will afford evidence relevant to the commission of the offence.

Receipt and removal

(3) Anyone who seizes something under a search warrant shall,

(a) give a receipt for the thing seized to the person from whom it was seized; and

(b) bring the thing seized before the provincial judge or justice of the peace issuing the warrant or another provincial judge or justice to be dealt with according to law.

Expiry

(4) A search warrant shall name the date upon which it expires, which shall be not later than fifteen days after the warrant is issued.

Time of execution

(5) A search warrant shall be executed between 6 a.m. and 9 p.m. unless it provides otherwise.

Other matters

(6) Sections 159 and 160 of the *Provincial Offences Act* apply with necessary modifications in respect of any thing seized under this section. 1994, c. 2, s. 46.

PART VI
SUBDIVISION OF LAND

Interpretation

50. (1) In this section and in section 53,

"consent" means,

(a) where land is situate in a lower-tier municipality, a consent given by the council of the upper-tier municipality,

(b) where land is situate in a single-tier municipality that is not in a territorial district, a consent given by the council of the single-tier municipality,

(c) where land is situate in a prescribed single-tier municipality that is in a territorial district, a consent given by the council of the single-tier municipality, and

(d) except as otherwise provided in clauses (a), (b) and (c), a consent given by the Minister. 2002, c. 17, Sched. B, s. 18.

References include delegates

(1.0.1) A reference in subsection (1) and in section 53 to the Minister includes a delegate of the Minister under sections 4 and 55 and a reference to a council includes a delegate of a council under section 54. 2002, c. 17, Sched. B, s. 18.

Removal of power

(1.1) The Minister may by order, accompanied by a written explanation for it, remove the powers of the council of a municipality under this section and sections 53 and 57 and the order may be in respect of one or more applications for a consent, an approval under subsection (18) or for a certificate of validation specified in the order or in respect of any or all applications for consents, approvals under subsection (18) or for certificates of validation made after the order is made. 1994, c. 23, s. 29 (2).

Minister to grant consents, etc.

(1.2) If an order is made under subsection (1.1), the Minister has the power of the council to grant consents, to give approvals under subsection (18) or to issue a certificate of validation in respect of applications to which the order relates and the council shall forward to the Minister all papers, plans, documents and other materials that relate to any matter in respect of which the powers were removed and of which a final disposition was not made by the council before the power was removed. 1994, c. 23, s. 29 (2).

Effect of revocation

(1.3) If the Minister revokes the order or part of the order made under subsection (1.1), the power to grant consents, give approvals under subsection (18) or issue certificates of validation reverts back to the council in respect of all applications to which the revoked order or revoked part of the order applied. 1994, c. 23, s. 29 (2).

Delegation

(1.4) If an order is made under subsection (1.1) in respect of land that is located in a municipal planning area, the Minister may by order delegate to the municipal planning authority the power which was removed from the council to grant consents, to give approvals under subsection (18) or to issue certificates of validation and the delegation may be subject to such conditions as the order provides. 1994, c. 23, s. 29 (2).

Effect of revocation

(1.5) If the Minister revokes the order or part of the order made under subsection (1.4), the power of the municipal planning authority to grant consents, to give approvals under subsection (18) or to issue certificates of validation reverts back to the Minister in respect of all applications to which the revoked order or revoked part of the order applies and the municipal planning authority shall forward to the Minister all papers, plans, documents and other materials that relate to any matter to which the revoked order or part of the order applies and of which a final disposition was not made by the municipal planning authority before the order or part of the order was revoked. 1994, c. 23, s. 29 (2).

Proviso

(2) For the purposes of this section, land shall be deemed and shall always have been deemed not to abut land that is being conveyed or otherwise dealt with if it abuts such land on a horizontal plane only. R.S.O. 1990, c. P.13, s. 50 (2).

Mining rights

(2.1) For the purposes of this section, land shall be deemed and shall always have been deemed to exclude mining rights in or under land but not mining rights on the land. 1994, c. 23, s. 29 (2).

Subdivision control

(3) No person shall convey land by way of a deed or transfer, or grant, assign or exercise a power of appointment with respect to land, or mortgage or charge land, or enter into an agreement of sale and purchase of land or enter into any agreement that has the effect of granting the use of or right in land directly or by entitlement to renewal for a period of twenty-one years or more unless,

(a) the land is described in accordance with and is within a registered plan of subdivision;

(b) the grantor by deed or transfer, the person granting, assigning or exercising a power of appointment, the mortgagor or chargor, the vendor under an agreement of purchase and sale or the grantor of a use of or right in land, as the case may be, does not retain the fee or the equity of redemption in, or a power or right to grant, assign or exercise a power of appointment in respect of, any land abutting the land that is being conveyed or otherwise dealt with other than land that is the whole of one or more lots or blocks within one or more registered plans of subdivision;

(c) the land or any use of or right therein is being acquired or disposed of by Her Majesty in right of Canada, Her Majesty in right of Ontario or by any municipality;

(d) the land or any use of or right therein is being acquired for the purpose of an electricity distribution line, electricity transmission line, hydrocarbon distribution line or hydrocarbon

transmission line within the meaning of Part VI of the *Ontario Energy Board Act, 1998* and in respect of which the person acquiring the land or any use of or right therein has made a declaration that it is being acquired for such purpose, which shall be conclusive evidence that it is being acquired for such purpose;

(d.1) the land or any use of or right therein is being acquired, directly or by entitlement to renewal for a period of 21 or more years but not more than 50 years, for the purpose of a renewable energy generation facility or renewable energy project, and in respect of which the person acquiring the land or any use of or right therein has made a declaration that it is being acquired for such purpose, which shall be conclusive evidence that it is being acquired for such purpose;

(e) the land or any use of or right therein is being acquired for the purposes of flood control, erosion control, bank stabilization, shoreline management works or the preservation of environmentally sensitive lands under a project approved by the Minister of Natural Resources under section 24 of the *Conservation Authorities Act* and in respect of which an officer of the conservation authority acquiring the land or any use of or right therein has made a declaration that it is being acquired for any of such purposes, which shall be conclusive evidence that it is being acquired for such purpose;

(f) a consent is given to convey, mortgage or charge the land, or grant, assign or exercise a power of appointment in respect of the land or enter into an agreement in respect of the land;

(g) the land or any use of or right therein was acquired for the purpose of an electricity distribution line, electricity transmission line, hydrocarbon distribution line or hydrocarbon transmission line within the meaning of Part VI of the *Ontario Energy Board Act, 1998* and is being disposed of to the person from whom it was acquired; or

(h) the only use of or right in land that is granted is an easement or covenant under the *Conservation Land Act*. R.S.O. 1990, c. P.13, s. 50 (3); 1998, c. 15, Sched. E, s. 27 (4-6); 2006, c. 23, s. 21 (1); 2009, c. 12, Sched. K, s. 2 (1).

Designation of plans of subdivision not deemed registered

(4) The council of a local municipality may by by-law designate any plan of subdivision, or part thereof, that has been registered for eight years or more, which shall be deemed not to be a registered plan of subdivision for the purposes of subsection (3). R.S.O. 1990, c. P.13, s. 50 (4).

Part-lot control

(5) Where land is within a plan of subdivision registered before or after the coming into force of this section, no person shall convey a part of any lot or block of the land by way of a deed, or transfer, or grant, assign or exercise a power of appointment in respect of a part of any lot or block of the land, or mortgage or charge a part of any lot or block of the land, or enter into an agreement of sale and purchase of a part of any lot or block of the land or enter into any agreement that has the effect of granting the use of or right in a part of any lot or block of the land directly or by entitlement to renewal for a period of twenty-one years or more unless,

(a) the grantor by deed or transfer, the person granting, assigning or exercising a power of appointment, the mortgagor or chargor, the vendor under an agreement of purchase and sale or the grantor of a use of or right in land, as the case may be, does not retain the fee or the equity of redemption in, or a power or right to grant, assign or exercise a power of appointment in respect of, any land abutting the land that is being conveyed or otherwise

dealt with other than land that is the whole of one or more lots or blocks within one or more registered plans of subdivision;

(b) the land or any use of or right therein is being acquired or disposed of by Her Majesty in right of Canada, Her Majesty in right of Ontario or by any municipality;

(c) the land or any use of or right therein is being acquired for the purpose of a utility line within the meaning of the *Ontario Energy Board Act, 1998* and in respect of which the person acquiring the land or any use of or right therein has made a declaration that it is being acquired for such purpose, which shall be conclusive evidence that it is being acquired for such purpose;

(c.1) the land or any use of or right therein is being acquired, directly or by entitlement to renewal for a period of 21 or more years but not more than 50 years, for the purpose of a renewable energy generation facility or renewable energy project, and in respect of which the person acquiring the land or any use of or right therein has made a declaration that it is being acquired for such purpose, which shall be conclusive evidence that it is being acquired for such purpose;

(d) the land or any use of or right therein is being acquired for the purposes of flood control, erosion control, bank stabilization, shoreline management works or the preservation of environmentally sensitive lands under a project approved by the Minister of Natural Resources under section 24 of the *Conservation Authorities Act* and in respect of which an officer of the conservation authority acquiring the land or any use of or right therein has made a declaration that it is being acquired for any of such purposes, which shall be conclusive evidence that it is being acquired for such purpose;

(e) the land that is being conveyed, or otherwise dealt with is the remaining part of a lot or block, the other part of which was acquired by a body that has vested in it the right to acquire land by expropriation;

(f) a consent is given to convey, mortgage or charge the land or grant, assign or exercise a power of appointment in respect of the land or enter into an agreement in respect of the land;

(g) the land or any use of or right therein was acquired for the purpose of a utility line within the meaning of the *Ontario Energy Board Act, 1998* and is being disposed of to the person from whom it was acquired; or

(h) the only use of or right in land that is granted is an easement or covenant under the *Conservation Land Act*. R.S.O. 1990, c. P.13, s. 50 (5); 1998, c. 15, Sched. E, s. 27 (7-9); 2006, c. 23, s. 21 (2); 2009, c. 12, Sched. K, s. 2 (2).

Conveyance of remaining part

(6) Despite subsections (3) and (5), where land is the remaining part of a parcel of land, the other part or parts of which parcel have been the subject of a consent given under clause (3) (f) or (5) (f), the whole of the remaining part may be conveyed or otherwise dealt with before the other part or parts are conveyed or otherwise dealt with, provided that the remaining part is conveyed or otherwise dealt with before the consent mentioned above lapses under subsection 53 (43). R.S.O. 1990, c. P.13, s. 50 (6); 1994, c. 23, s. 29 (3).

Designation of lands not subject to part-lot control

(7) Despite subsection (5), the council of a local municipality may by by-law provide that subsection (5) does not apply to land that is within such registered plan or plans of subdivision or parts of them as are designated in the by-law. 1996, c. 4, s. 27 (3).

Requirement for approval of by-law

(7.1) A by-law passed under subsection (7) does not take effect until it has been approved by the appropriate approval authority for the purpose of sections 51 and 51.1 in respect of the land covered by the by-law. 1996, c. 4, s. 27 (3).

Exemption from approval

(7.2) An approval under subsection (7.1) is not required if the council that passes a by-law under subsection (7) is authorized to approve plans of subdivision under section 51. 1996, c. 4, s. 27 (3).

Expiration of by-law

(7.3) A by-law passed under subsection (7) may provide that the by-law expires at the expiration of the time period specified in the by-law and the by-law expires at that time. 1996, c. 4, s. 27 (3).

Extension of time period

(7.4) The council of a local municipality may, at any time before the expiration of a by-law under subsection (7), amend the by-law to extend the time period specified for the expiration of the by-law and an approval under subsection (7.1) is not required. 1996, c. 4, s. 27 (3).

Amendment or repeal

(7.5) The council of a local municipality may, without an approval under subsection (7.1), repeal or amend a by-law passed under subsection (7) to delete part of the land described in it and, when the requirements of subsection (28) have been complied with, subsection (5) applies to the land affected by the repeal or amendment. 1996, c. 4, s. 27 (3).

Exception

(8) Nothing in subsections (3) and (5) prohibits, and subsections (3) and (5) shall be deemed never to have prohibited, the giving back of a mortgage or charge by a purchaser of land to the vendor of the land as part or all of the consideration for the conveyance of the land, provided that the mortgage or charge applies to all of the land described in the conveyance. R.S.O. 1990, c. P.13, s. 50 (8).

Part of building or structure

(9) Nothing in subsections (3) and (5) prohibits the entering into of an agreement that has the effect of granting the use of or right in a part of a building or structure for any period of years. R.S.O. 1990, c. P.13, s. 50 (9).

Exception

(10) This section does not apply to an agreement entered into under section 2 of the *Drainage Act*. R.S.O. 1990, c. P.13, s. 50 (10).

Application to ARDD

(11) This section does not apply so as to prevent the Agricultural Rehabilitation and Development Directorate of Ontario from conveying or leasing land where the land that is being conveyed or leased comprises all of the land that was acquired by the Directorate under one registered deed or transfer. R.S.O. 1990, c. P.13, s. 50 (11).

Exception to application of subss. (3, 5)

(12) Where a parcel of land is conveyed by way of a deed or transfer with a consent given under section 53, subsections (3) and (5) of this section do not apply to a subsequent conveyance of, or other transaction involving, the identical parcel of land unless the council or the Minister, as the case may be, in giving the consent, stipulates either that subsection (3) or subsection (5) shall apply to any such subsequent conveyance or transaction. R.S.O. 1990, c. P.13, s. 50 (12).

Reference to stipulation

(13) Where the council or the Minister stipulates in accordance with subsection (12), the certificate provided for under subsection 53 (42) shall contain a reference to the stipulation, and if not so contained the consent shall be conclusively deemed to have been given without the stipulation. R.S.O. 1990, c. P.13, s. 50 (13); 1994, c. 23, s. 29 (5).

Effect of contravention

(14) Where land is within a registered plan of subdivision or within a registered description under the *Condominium Act* or where land is conveyed, mortgaged or charged with a consent given under section 53 or a predecessor thereof, any contravention of this section or a predecessor thereof or of a by-law passed under a predecessor of this section or of an order made under clause 27 (1) (b), as it existed on June 25, 1970, of *The Planning Act*, being chapter 296 of the Revised Statutes of Ontario, 1960, or a predecessor thereof, that occurred before the registration of the plan of subdivision or description or before the giving of a certificate under subsection 53(42) stating that a consent has been given, as the case may be, does not and shall be deemed never to have had the effect of preventing the conveyance of or creation of any interest in the land, but this subsection does not affect the rights acquired by any person from a judgment or order of any court given or made on or before December 15, 1978. 1994, c. 23, s. 29 (6).

Simultaneous conveyances, etc., of abutting lands

(15) Where a person conveys land or grants, assigns or exercises a power of appointment in respect of land, or mortgages or charges land, or enters into an agreement of sale and purchase of land, or enters into any agreement that has the effect of granting the use of or right in land directly or by entitlement to renewal for a period of twenty-one years or more by way of simultaneous conveyances of abutting lands or by way of other simultaneous dealings with abutting lands, the person so conveying or otherwise dealing with the lands shall be deemed for the purposes of subsections (3) and (5) to retain, as the case may be, the fee or the equity of redemption in, or the power or right to grant, assign or exercise a power of appointment in respect of, land abutting the land that is being conveyed or otherwise dealt with but this subsection does not apply to simultaneous conveyances or other simultaneous dealings involving the same parties acting in their same respective capacities. R.S.O. 1990, c. P.13, s. 50 (15).

Partial discharges, etc., effect of

(16) Where a person gives a partial discharge of a mortgage on land or gives a partial cessation of a charge on land, the person giving the partial discharge or partial cessation shall be deemed to hold the fee in the lands mentioned in the mortgage or charge and to retain, after the giving of the partial discharge or partial cessation, the fee in the balance of the lands, and for the purposes of this section shall be deemed to convey by way of deed or transfer the land mentioned in the partial discharge or partial cessation. R.S.O. 1990, c. P.13, s. 50 (16).

Saving

(17) Subsection (16) does not apply to a partial discharge of mortgage or partial cessation of charge where the land described in the partial discharge or partial cessation,

(a) is the same land in respect of which a consent to convey has previously been given;

(b) includes only the whole of one or more lots or blocks within a registered plan of subdivision, unless such plan of subdivision has been designated under subsection (4);

(c) is owned by Her Majesty in right of Canada or Her Majesty in right of Ontario or by any municipality; or

(d) is land to which clause (3) (g) or (5) (g) applies. R.S.O. 1990, c. P.13, s. 50 (17); 1998, c. 15, Sched. E, s. 27 (10).

Foreclosure or exercise of power of sale

(18) No foreclosure of or exercise of a power of sale in a mortgage or charge shall have any effect in law without the approval of the Minister or of the council authorized to give a consent under section 53, as the case may be, other than a council authorized to give a consent pursuant to an order under section 4, unless all of the land subject to such mortgage or charge is included in the foreclosure or exercise of the power of sale, but this subsection does not apply where the land foreclosed or in respect of where the power of sale is exercised comprises only,

(a) the whole of one or more lots or blocks within one or more registered plans of subdivision;

(b) one or more parcels of land that do not abut any other parcel of land that is subject to the same mortgage or charge;

(c) the identical parcel of land that has been the subject of a consent to convey given under section 53 and the consent did not stipulate that subsection (3) or (5) applies to any subsequent conveyance or transaction; or

(d) the whole of the remaining part of a parcel of land, the other part or parts of which parcel have been the subject of a consent to convey given under section 53 and the consent did not stipulate that subsection (3) or (5) applies to any subsequent conveyance or transaction. R.S.O. 1990, c. P.13, s. 50 (18); 1993, c. 26, s. 58 (1); 1994, c. 23, s. 29 (7); 1996, c. 4, s. 27 (4).

Criteria

(18.1) No approval shall be given by a council under subsection (18) unless the approval conforms with the prescribed criteria. 1993, c. 26, s. 58 (2).

Release of interest by joint tenant or tenant in common

(19) Where a joint tenant or tenant in common of land releases or conveys the tenant's interest in such land to one or more other joint tenants or tenants in common of the same land while holding the fee in any abutting land, either alone or together with any other person, the tenant shall be deemed, for the purposes of subsections (3) and (5), to convey such land by way of deed or transfer and to retain the fee in the abutting land. R.S.O. 1990, c. P.13, s. 50 (19).

Partition orders

(20) No order made under the *Partition Act* for the partition of land shall have any effect in law unless,

(a) irrespective of the order, each part of the land described in the order could be conveyed without contravening this section; or

(b) a consent is given to the order. R.S.O. 1990, c. P.13, s. 50 (20).

Conveyance, etc., contrary to section not to create or convey interest in land

(21) An agreement, conveyance, mortgage or charge made, or a power of appointment granted, assigned or exercised in contravention of this section or a predecessor thereof does not create or convey any interest in land, but this section does not affect an agreement entered into subject to the express condition contained therein that such agreement is to be effective only if the provisions of this section are complied with. R.S.O. 1990, c. P.13, s. 50 (21).

Exception re prescribed statements

(22) Where a deed or transfer,

(a) contains a statement by the grantor, verifying that to the best of the grantor's knowledge and belief the deed or transfer does not contravene this section;

(b) contains a statement by the grantor's solicitor, verifying that,

(i) he or she has explained the effect of this section to the grantor,

(ii) he or she has made inquiries of the grantor to determine that the deed or transfer does not contravene this section,

(iii) based on the information supplied by the grantor, to the best of the solicitor's knowledge and belief, the deed or transfer does not contravene this section, and

(iv) he or she is an Ontario solicitor in good standing; and

(c) contains a statement by the grantee's solicitor, verifying that,

(i) he or she has investigated the title to the land and, where relevant, to abutting land,

(ii) he or she is satisfied that the record of title to the land and, where relevant, to abutting land, reveals no existing contravention of this section or a predecessor thereof or of a by-law passed under a predecessor of this section or of an order made under clause 27 (1) (b), as it existed on the 25th day of June, 1970, of *The Planning Act*, being chapter 296 of the Revised Statutes of Ontario, 1960, or a predecessor thereof, that has the effect of preventing the conveyance of any interest in the land,

(iii) to the best of his or her knowledge and belief, the deed or transfer does not contravene this section, and

(iv) he or she acts independently of the grantor's solicitor and is an Ontario solicitor in good standing; and

(d) is registered under the *Land Titles Act* or the *Registry Act*,

any contravention of this section or a predecessor thereof or of a by-law passed under a predecessor of this section or of an order made under clause 27 (1) (b), as it existed on the 25th day of June, 1970, of *The Planning Act*, being chapter 296 of the Revised Statutes of Ontario, 1960, or a predecessor thereof, does not and shall be deemed never to have had the effect of preventing the conveyance of any interest in the land, but this subsection does not affect the rights acquired by any person from a judgment or order of any court given or made on or before the day the deed or transfer is registered. R.S.O. 1990, c. P.13, s. 50 (22).

Search period re *Planning Act*

(23) For the purposes of the statement referred to in subclause (22) (c) (ii), a solicitor is not required to investigate the registered title to the land except with respect to the time since the registration of the most recent deed or transfer affecting the same land and containing the statements referred to in clauses (22) (a), (b) and (c). R.S.O. 1990, c. P.13, s. 50 (23).

Exempting orders

(24) The Minister may by order designate any part of Ontario as land to which subsection (22) shall not apply after the day a certified copy or duplicate of the order is registered in the proper land registry office in a manner approved by the Director of Land Registration appointed under the *Registry Act*. R.S.O. 1990, c. P.13, s. 50 (24).

Offence

(25) Every person who knowingly makes a false statement under subsection (22) is guilty of an offence and on conviction is liable to a fine not exceeding the aggregate of the value of,

(a) the land in respect of which the statement is made; and

(b) the relevant abutting land,

determined as of the day of registration of the deed or transfer containing the false statement. R.S.O. 1990, c. P.13, s. 50 (25).

Copy of by-law to be lodged with approval authority

(26) A certified copy or duplicate of every by-law passed under subsection (4) shall be lodged by the clerk of the municipality in the office of the approval authority. 2006, c. 23, s. 21 (3).

When by-law effective

(27) A by-law passed under subsection (4) is not effective until the requirements of subsection (28) have been complied with. R.S.O. 1990, c. P.13, s. 50 (27).

Registration of by-law

(28) A certified copy or duplicate of every by-law passed under this section shall be registered by the clerk of the municipality in the proper land registry office. R.S.O. 1990, c. P.13, s. 50 (28).

Notice

(29) No notice or hearing is required prior to the passing of a by-law under subsection (4), but the council shall give notice of the passing of any such by-law within thirty days of the passing thereof to each person appearing on the last revised assessment roll to be the owner of land to which the by-law applies, which notice shall be sent to the last known address of each such person. R.S.O. 1990, c. P.13, s. 50 (29).

Hearing by council

(30) The council shall hear in person or by an agent any person to whom a notice was sent under subsection (29), who within twenty days of the mailing of the notice gives notice to the clerk of the municipality that the person desires to make representations respecting the amendment or repeal of the by-law. R.S.O. 1990, c. P.13, s. 50 (30).

Division of land by will

50.1 (1) No provision in a will that purports to subdivide land is of any effect to subdivide that land unless, irrespective of that provision, each part of the land divided could be conveyed without contravening section 50.

Retroactive effect

(2) Subsection (1) applies even though the will was made before the 26th day of July, 1990 unless the person who made the will died on or before that date.

Tenants in common

(3) If a provision in a will is of no effect to subdivide land under subsection (1), the beneficiaries that would have been entitled to the land if the provision had been effective shall hold the undivided land as tenants in common. 1991, c. 9, s. 1.

(4) REPEALED: 1991, c. 9, s. 1.

(5) REPEALED: 1991, c. 9, s. 1.

(6) REPEALED: 1991, c. 9, s. 1.

Plan of subdivision approvals

51. (1), (2) REPEALED: 2002, c. 17, Sched. B, s. 19 (1).

Minister is approval authority

(3) Except as otherwise provided in this section, the Minister is the approval authority for the purposes of this section and section 51.1. 1999, c. 12, Sched. M, s. 28 (1).

Deemed approval authority

(3.1) If the Minister has delegated any authority under this section to a council or planning board, in accordance with section 4, the council or planning board is deemed to be the approval authority in respect of the land to which the delegation applies for the purposes of this section and section 51.1. 2009, c. 33, Sched. 21, s. 10 (12).

Single-tier municipality

(4) If land is in a single-tier municipality that is not in a territorial district, the single-tier municipality is the approval authority for the purposes of this section and section 51.1, except as otherwise prescribed. 2002, c. 17, Sched. B, s. 19 (2).

Upper-tier municipality

(5) Subject to subsection (6), if land is in an upper-tier municipality with an approved official plan, the upper-tier municipality is the approval authority for the purposes of this section and section 51.1. 2002, c. 17, Sched. B, s. 19 (3).

Timing, upper-tier as approval authority

(5.1) On the day that all or part of a plan that covers all of an upper-tier municipality comes into effect as the official plan of the municipality, the upper-tier municipality is the approval authority under subsection (5). 2002, c. 17, Sched. B, s. 19 (3).

Prescribed lower-tier municipality

(6) If land is in a prescribed lower-tier municipality, the lower-tier municipality is the approval authority for the purposes of this section and section 51.1. 2002, c. 17, Sched. B, s. 19 (3).

Prescribed single-tier municipality in a territorial district

(7) If land is in a prescribed single-tier municipality that is in a territorial district, the municipality is the approval authority for the purposes of this section and section 51.1. 2002, c. 17, Sched. B, s. 19 (3).

(8)-(10) REPEALED: 2002, c. 17, Sched. B, s. 19 (4).

Removal of power

(11) The Minister may by order, accompanied by a written explanation for it, remove the power given under subsection (3.1), (4), (5), (6) or (7) and the order may be in respect of the applications

specified in the order or in respect of any or all applications made after the order is made. 1994, c. 23, s. 30; 1996, c. 4, s. 28 (2); 2002, c. 17, Sched. B, s. 19 (5); 2009, c. 33, Sched. 21, s. 10 (13).

Minister to be approval authority

(12) If an order is made under subsection (11), the Minister becomes the approval authority in respect of the applications to which the order relates and the council of the former approval authority shall forward to the Minister all papers, plans, documents and other material that relate to any matter in respect of which the power was removed and of which a final disposition was not made by the council before the power was removed. 1994, c. 23, s. 30.

Revocation

(13) If the Minister revokes the order or part of the order made under subsection (11), the council reverts back to being the approval authority in respect of all applications to which the revoked order or revoked part of the order applies. 1994, c. 23, s. 30.

Delegation

(14) If an order is made under subsection (11) in respect of land that is located in a municipal planning area, the Minister may by order delegate to the municipal planning authority the power to approve proposed plans of subdivision which was removed from the council and the municipal planning authority becomes the approval authority in respect of the applications to which the order made under this subsection relates and the delegation may be subject to such conditions as the order provides. 1994, c. 23, s. 30.

Effect of revocation

(15) If the Minister revokes the order or part of the order made under subsection (14), the Minister reverts back to being the approval authority in respect of all applications to which the revoked order or revoked part of the order applies and the municipal planning authority shall forward to the Minister all papers, plans, documents and other material that relate to any matter to which the revoked order or part of the order applies and of which a final disposition was not made by the municipal planning authority before the order or part of the order was revoked. 1994, c. 23, s. 30.

Application

(16) An owner of land or the owner's agent duly authorized in writing may apply to the approval authority for approval of a plan of subdivision of the land or part of it. 1994, c. 23, s. 30.

Consultation

(16.1) The approval authority,

(a) shall permit applicants to consult with it before submitting applications under subsection (16); and

(b) in the case of an approval authority that is a municipality, may, by by-law, require applicants to consult with it as described in clause (a). 2006, c. 23, s. 22 (1).

Contents

(17) The applicant shall provide the approval authority with the prescribed information and material and as many copies as may be required by the approval authority of a draft plan of the proposed subdivision drawn to scale and showing,

(a) the boundaries of the land proposed to be subdivided, certified by an Ontario land surveyor;

(b) the locations, widths and names of the proposed highways within the proposed subdivision and of existing highways on which the proposed subdivision abuts;

(c) on a small key plan, on a scale of not less than one centimetre to 100 metres, all of the land adjacent to the proposed subdivision that is owned by the applicant or in which the applicant has an interest, every subdivision adjacent to the proposed subdivision and the relationship of the boundaries of the land to be subdivided to the boundaries of the township lot or other original grant of which the land forms the whole or part;

(d) the purpose for which the proposed lots are to be used;

(e) the existing uses of all adjoining lands;

(f) the approximate dimensions and layout of the proposed lots;

(g) natural and artificial features such as buildings or other structures or installations, railways, highways, watercourses, drainage ditches, wetlands and wooded areas within or adjacent to the land proposed to be subdivided;

(h) the availability and nature of domestic water supplies;

(i) the nature and porosity of the soil;

(j) existing contours or elevations as may be required to determine the grade of the highways and the drainage of the land proposed to be subdivided;

(k) the municipal services available or to be available to the land proposed to be subdivided; and

(l) the nature and extent of any restrictions affecting the land proposed to be subdivided, including restrictive covenants or easements. 1994, c. 23, s. 30; 1996, c. 4, s. 28 (3).

Other information

(18) An approval authority may require that an applicant provide any other information or material that the approval authority considers it may need, but only if the official plan contains provisions relating to requirements under this subsection. 2006, c. 23, s. 22 (2).

Refusal and timing

(19) Until the approval authority has received the information and material required under subsections (17) and (18), if any, and any fee under section 69 or 69.1,

(a) the approval authority may refuse to accept or further consider the application; and

(b) the time period referred to in subsection (34) does not begin. 2006, c. 23, s. 22 (2).

Response re completeness of application

(19.1) Within 30 days after the applicant pays any fee under section 69 or 69.1, the approval authority shall notify the applicant and the clerk of the municipality in which the land is located or the secretary-treasurer of the planning board in whose planning area the land is located that the information and material required under subsections (17) and (18), if any, have been provided, or that they have not been provided, as the case may be. 2006, c. 23, s. 22 (2).

Motion re dispute

(19.2) Within 30 days after a negative notice is given under subsection (19.1), the applicant or the approval authority may make a motion for directions to have the Municipal Board determine,

(a) whether the information and material have in fact been provided; or

(b) whether a requirement made under subsection (18) is reasonable. 2006, c. 23, s. 22 (2).

Same

(19.3) If the approval authority does not give any notice under subsection (19.1), the applicant may make a motion under subsection (19.2) at any time after the 30-day period described in subsection (19.1) has elapsed. 2006, c. 23, s. 22 (2).

Notice of particulars and public access

(19.4) Within 15 days after the approval authority gives an affirmative notice under subsection (19.1), or within 15 days after the Municipal Board advises the approval authority and the clerk or secretary-treasurer of its affirmative decision under subsection (19.2), as the case may be, the council or planning board shall,

(a) give the prescribed persons and public bodies, in the prescribed manner, notice of the application, accompanied by the prescribed information; and

(b) make the information and material provided under subsections (17) and (18) available to the public. 2006, c. 23, s. 22 (2).

Final determination

(19.5) The Municipal Board's determination under subsection (19.2) is not subject to appeal or review. 2006, c. 23, s. 22 (2).

Notice

(20) At least 14 days before a decision is made by an approval authority under subsection (31), the approval authority shall ensure that,

(a) notice of the application is given, if required by regulation, in the manner and to the persons and public bodies and containing the information prescribed; and

(b) a public meeting is held, if required by regulation, notice of which shall be given in the manner and to the persons and public bodies and containing the information prescribed. 1996, c. 4, s. 28 (4).

Request

(21) An approval authority may request that a local municipality or a planning board having jurisdiction over the land that is proposed to be subdivided give notice of the application or hold the public meeting referred to in subsection (20) or do both. 1996, c. 4, s. 28 (4).

Responsibilities

(21.1) A local municipality or planning board that is requested to give the notice referred to in clause (20) (a) shall ensure that,

(a) the notice is given in accordance with the regulation made under clause (20) (a); and

(b) the prescribed information and material are submitted to the approval authority within 15 days after the notice is given. 1996, c. 4, s. 28 (4).

Same

(21.2) A local municipality or planning board that is requested to hold the public meeting referred to in clause (20) (b) shall ensure that,

(a) notice of the meeting is given in accordance with the regulation made under clause (20) (b);

(b) the public meeting is held; and

(c) the prescribed information and material are submitted to the approval authority within 15 days after the meeting is held. 1996, c. 4, s. 28 (4).

Written submissions

(22) Any person or public body may make written submissions to the approval authority before the approval authority makes its decision under subsection (31). 1994, c. 23, s. 30.

Consultation

(23) The approval authority may confer with the persons or public bodies that the approval authority considers may have an interest in the approval of the proposed subdivision. 1994, c. 23, s. 30.

Criteria

(24) In considering a draft plan of subdivision, regard shall be had, among other matters, to the health, safety, convenience, accessibility for persons with disabilities and welfare of the present and future inhabitants of the municipality and to,

(a) the effect of development of the proposed subdivision on matters of provincial interest as referred to in section 2;

(b) whether the proposed subdivision is premature or in the public interest;

(c) whether the plan conforms to the official plan and adjacent plans of subdivision, if any;

(d) the suitability of the land for the purposes for which it is to be subdivided;

(e) the number, width, location and proposed grades and elevations of highways, and the adequacy of them, and the highways linking the highways in the proposed subdivision with the established highway system in the vicinity and the adequacy of them;

(f) the dimensions and shapes of the proposed lots;

(g) the restrictions or proposed restrictions, if any, on the land proposed to be subdivided or the buildings and structures proposed to be erected on it and the restrictions, if any, on adjoining land;

(h) conservation of natural resources and flood control;

(i) the adequacy of utilities and municipal services;

(j) the adequacy of school sites;

(k) the area of land, if any, within the proposed subdivision that, exclusive of highways, is to be conveyed or dedicated for public purposes;

(l) the extent to which the plan's design optimizes the available supply, means of supplying, efficient use and conservation of energy; and

(m) the interrelationship between the design of the proposed plan of subdivision and site plan control matters relating to any development on the land, if the land is also located within a site plan control area designated under subsection 41 (2) of this Act or subsection 114 (2) of the *City of Toronto Act, 2006*. 1994, c. 23, s. 30; 2001, c. 32, s. 31 (2); 2006, c. 23, s. 22 (3, 4).

Conditions

(25) The approval authority may impose such conditions to the approval of a plan of subdivision as in the opinion of the approval authority are reasonable, having regard to the nature of the development proposed for the subdivision, including a requirement,

(a) that land be dedicated or other requirements met for park or other public recreational purposes under section 51.1;

(b) that such highways, including pedestrian pathways, bicycle pathways and public transit rights of way, be dedicated as the approval authority considers necessary;

(b.1) that such land be dedicated for commuter parking lots, transit stations and related infrastructure for the use of the general public using highways, as the approval authority considers necessary;

(c) when the proposed subdivision abuts on an existing highway, that sufficient land, other than land occupied by buildings or structures, be dedicated to provide for the widening of the highway to such width as the approval authority considers necessary; and

(d) that the owner of the land proposed to be subdivided enter into one or more agreements with a municipality, or where the land is in territory without municipal organization, with any minister of the Crown in right of Ontario or planning board dealing with such matters as the approval authority may consider necessary, including the provision of municipal or other services. 1994, c. 23, s. 30; 2005, c. 26, Sched. B, s. 1; 2006, c. 23, s. 22 (5).

Agreements

(26) A municipality or approval authority, or both, may enter into agreements imposed as a condition to the approval of a plan of subdivision and the agreements may be registered against the land to which it applies and the municipality or the approval authority, as the case may be, is entitled to enforce the provisions of it against the owner and, subject to the *Registry Act* and the *Land Titles Act*, any and all subsequent owners of the land. 1994, c. 23, s. 30.

Land outside municipalities

(27) If the land proposed to be subdivided is located in territory without municipal organization, any minister of the Crown in right of Ontario or planning board may enter into agreements imposed as a condition to the approval of a plan of subdivision and the agreement may be registered against the land to which it applies and the minister or the planning board is entitled to enforce the provisions of it against the owner and, subject to the *Registry Act* and the *Land Titles Act*, any and all subsequent owners of land. 1994, c. 23, s. 30.

(28)-(30) REPEALED: 1996, c. 4, s. 28 (5).

Decision

(31) The approval authority may give or refuse to give approval to a draft plan of subdivision. 1994, c. 23, s. 30.

Lapse of approval

(32) In giving approval to a draft plan of subdivision, the approval authority may provide that the approval lapses at the expiration of the time period specified by the approval authority, being not less than three years, and the approval shall lapse at the expiration of the time period, but if there is an appeal under subsection (39) the time period specified for the lapsing of approval does not begin until the date the Municipal Board's decision is issued in respect of the appeal or from the date of a notice issued by the Board under subsection (51). 1994, c. 23, s. 30; 2006, c. 23, s. 22 (6).

Extension

(33) The approval authority may extend the approval for a time period specified by the approval authority and may further extend it but no extension is permissible if the approval lapses before the extension is given. 1994, c. 23, s. 30.

Appeal to O.M.B.

(34) If an application is made for approval of a plan of subdivision and the approval authority fails to make a decision under subsection (31) on it within 180 days after the day the application is received by the approval authority, the applicant may appeal to the Municipal Board with respect to the proposed subdivision by filing a notice with the approval authority, accompanied by the fee prescribed under the *Ontario Municipal Board Act*. 1994, c. 23, s. 30; 1996, c. 4, s. 28 (6); 2004, c. 18, s. 8.

Consolidated Hearings Act

(34.1) Despite the *Consolidated Hearings Act*, the proponent of an undertaking shall not give notice to the Hearings Registrar under subsection 3 (1) of that Act in respect of an application for approval of a draft plan of subdivision unless the approval authority has given or refused to give approval to the draft plan of subdivision or the time period referred to in subsection (34) has expired. 2006, c. 23, s. 22 (7).

Record

(35) An approval authority that receives a notice of appeal under subsection (34) shall ensure that,

(a) a record is compiled which includes the prescribed information and material; and

(b) the record, the notice of appeal and the fee are forwarded to the Municipal Board within 15 days after the notice is filed. 1994, c. 23, s. 30; 1996, c. 4, s. 28 (7).

Exception

(35.1) Despite clause (35) (b), if all appeals under subsection (34) are withdrawn within 15 days after the last day for filing a notice of appeal, the approval authority is not required to forward the materials described under clause (35) (b) to the Municipal Board. 1999, c. 12, Sched. M, s. 28 (3).

Where all appeals withdrawn

(35.2) If all appeals under subsection (34) are withdrawn within 15 days after the last day for filing a notice of appeal, the approval authority may proceed to make a decision under subsection (31). 1999, c. 12, Sched. M, s. 28 (3).

Withdrawal

(36) If an appeal under subsection (34) is withdrawn, the Municipal Board shall notify the approval authority and the approval authority may proceed to make a decision under subsection (31). 1994, c. 23, s. 30.

Notice

(37) If the approval authority gives or refuses to give approval to a draft plan of subdivision, the approval authority shall, within 15 days of its decision, give written notice of it, containing the prescribed information, to,

(a) the applicant;

(b) each person or public body that made a written request to be notified of the decision;

(c) REPEALED: 1996, c. 4, s. 28 (8).

(d) a municipality or a planning board for a planning area in which the land to be subdivided is situate; and

(e) any other person or public body prescribed. 1994, c. 23, s. 30; 1996, c. 4, s. 28 (8).

(38) REPEALED: 1996, c. 4, s. 28 (9).

Appeal

(39) Subject to subsection (43), not later than 20 days after the day that the giving of notice under subsection (37) is completed, any of the following may appeal the decision, the lapsing provision or any of the conditions to the Municipal Board by filing with the approval authority a notice of appeal that must set out the reasons for the appeal, accompanied by the fee prescribed under the *Ontario Municipal Board Act*:

1. The applicant.
2. A person or public body who, before the approval authority made its decision, made oral submissions at a public meeting or written submissions to the approval authority.
3. The Minister.
4. The municipality in which the land is located or the planning board in whose planning area the land is located.
5. If the land is not located in a municipality or in the planning area of a planning board, any person or public body. 2006, c. 23, s. 22 (8).

Notice completed

(40) For the purpose of subsections (39) and (49), the giving of written notice shall be deemed to be completed,

(a) where notice is given by personal service, on the day that the serving of all required notices is completed;

(b) where notice is given by mail, on the day that the mailing of all required notices is completed; and

(c) where notice is given by telephone transmission of a facsimile of the notice, on the day that the transmission of all required notices is completed. 1994, c. 23, s. 30.

No appeal

(41) If no appeal is filed under subsection (39) or (48), subject to any other right of appeal that may be exercised under this section and subject to subsection (44), the decision of the approval authority to give or to refuse to give approval to a draft plan of subdivision shall be deemed to have been made on the day after the last day for appealing the decision. 1994, c. 23, s. 30.

Declaration

(42) A sworn declaration by an employee of the approval authority that notice was given as required by subsection (37) or (45) or that no notice of appeal was filed under subsection (39) or (48) within the time allowed for appeal is conclusive evidence of the facts stated in it. 1994, c. 23, s. 30.

Appeal

(43) At any time before the approval of the final plan of subdivision under subsection (58), any of the following may appeal any of the conditions to the Municipal Board by filing with the approval authority a notice of appeal that must set out the reasons for the appeal, accompanied by the fee prescribed under the *Ontario Municipal Board Act*:

1. The applicant.
2. A public body that, before the approval authority made its decision, made oral submissions at a public meeting or written submissions to the approval authority.
3. The Minister.
4. The municipality in which the land is located or the planning board in whose planning area the land is located.
5. If the land is not located in a municipality or in the planning area of a planning board, any public body. 2006, c. 23, s. 22 (9).

Withdrawal of approval

(44) The approval authority may, in its discretion, withdraw the approval of a draft plan of subdivision or change the conditions of such approval at any time before the approval of the final plan of subdivision under subsection (58). 1994, c. 23, s. 30.

Notice

(45) If the approval authority changes the conditions to the approval of a plan of subdivision under subsection (44) after notice has been given under subsection (37), the approval authority shall, within 15 days of its decision, give written notice of the changes containing the information prescribed to,

(a) the applicant;

(b) REPEALED: 1996, c. 4, s. 28 (11).

(c) each person or public body that made a written request to be notified of changes to the conditions;

(d) a municipality or a planning board for a planning area in which the land to be subdivided is situate; and

(e) any other person or public body prescribed. 1994, c. 23, s. 30; 1996, c. 4, s. 28 (11); 2000, c. 26, Sched. K, s. 5 (5).

(46) REPEALED: 1996, c. 4, s. 28 (12).

No notice

(47) An approval authority is not required to give written notice under subsection (45) if, in the opinion of the approval authority, the change to conditions is minor. 1994, c. 23, s. 30.

Appeal

(48) Any of the following may appeal any of the changed conditions imposed by the approval authority to the Municipal Board by filing with the approval authority a notice of appeal that must set out the reasons for the appeal, accompanied by the fee prescribed under the *Ontario Municipal Board Act*:

1. The applicant.

2. A person or public body who, before the approval authority gave approval to the draft plan of subdivision, made oral submissions at a public meeting or written submissions to the approval authority or made a written request to be notified of changes to the conditions.
3. The Minister.
4. The municipality in which the land is located or the planning board in whose planning area the land is located.
5. If the land is not located in a municipality or in the planning area of a planning board, any person or public body. 2006, c. 23, s. 22 (10).

Restriction

(49) If the person appealing the changed conditions is other than the applicant or a public body, the appeal must be filed not later than 20 days after the day that the giving of written notice under subsection (45) is completed. 1994, c. 23, s. 30; 1996, c. 4, s. 28 (13).

Record

(50) An approval authority that receives a notice of appeal under subsection (39), (43) or (48) shall ensure that,

(a) a record is compiled which includes the prescribed information and material; and

(b) the record, notice of appeal and the fee are forwarded to the Municipal Board within 15 days after the last day for filing a notice of appeal under subsection (39) or (49) or within 15 days after the notice of appeal under subsection (43) or (48) was received by the approval authority. 1994, c. 23, s. 30.

Exception

(50.1) Despite clause (50) (b), if all appeals are withdrawn within 15 days after the last day for filing a notice of appeal under subsection (39) or (49) or within 15 days after the notice of appeal under subsection (43) or (48) was received by the approval authority, the approval authority is not required to forward the materials described under clause (50) (b) to the Municipal Board. 1999, c. 12, Sched. M, s. 28 (3).

Deemed decision

(50.2) If all appeals are withdrawn within 15 days after the last day for filing a notice of appeal under subsection (39) or (49) or within 15 days after the notice of appeal under subsection (43) or (48) was received by the approval authority, the decision of the approval authority shall be deemed to have been made on the day after the day all appeals have been withdrawn, subject to any other right of appeal that may be exercised under this section and subject to subsection (44). 1999, c. 12, Sched. M, s. 28 (3).

Appeals withdrawn

(51) If all appeals under subsection (39) or (48) are withdrawn and the time for appealing has expired or if all appeals under subsection (43) are withdrawn, the secretary of the Municipal Board shall notify the approval authority and the decision of the approval authority shall be deemed to have been made on the day after the day all appeals have been withdrawn, subject to any other right of appeal that may be exercised under this section and subject to subsection (44). 1994, c. 23, s. 30.

Hearing

(52) On an appeal, the Municipal Board shall hold a hearing, notice of which shall be given to such persons or public bodies and in such manner as the Board may determine. 1994, c. 23, s. 30.

Restriction re adding parties

(52.1) Despite subsection (52), in the case of an appeal under subsection (39), (43) or (48), only the following may be added as parties:

1. A person or public body who satisfies one of the conditions set out in subsection (52.2).
2. The Minister.
3. The appropriate approval authority.
4. The municipality in which the land is located or the planning board in whose planning area the land is located.
5. If the land is not located in a municipality or in the planning area of a planning board, any person or public body. 2006, c. 23, s. 22 (11).

Same

(52.2) The conditions mentioned in paragraph 1 of subsection (52.1) are:

1. Before the approval authority made its decision with respect to the plan of subdivision, the person or public body made oral submissions at a public meeting or written submissions to the approval authority, or made a written request to be notified of changes to the conditions.
2. The Municipal Board is of the opinion that there are reasonable grounds to add the person or public body as a party. 2006, c. 23, s. 22 (11).

New evidence at hearing

(52.3) This subsection applies if information and material that is presented at the hearing of an appeal under subsection (39), (43) or (48) was not provided to the approval authority before it made the decision that is the subject of the appeal. 2006, c. 23, s. 22 (11).

Same

(52.4) When subsection (52.3) applies, the Municipal Board may, on its own initiative or on a motion by the approval authority or any party, consider whether the information and material could have materially affected the approval authority's decision and, if the Board determined that it could have done so, it shall not be admitted into evidence until subsection (52.5) has been complied with and the prescribed time period has elapsed. 2006, c. 23, s. 22 (11).

Notice to approval authority

(52.5) The Municipal Board shall notify the approval authority that it is being given an opportunity to,

(a) reconsider its decision in light of the information and material; and

(b) make a written recommendation to the Board. 2006, c. 23, s. 22 (11).

Approval authority's recommendation

(52.6) The Municipal Board shall have regard to the approval authority's recommendation if it is received within the time period mentioned in subsection (52.4), and may but is not required to do so if it is received afterwards. 2006, c. 23, s. 22 (11).

Conflict with *SPPA*

(52.7) Subsections (52.1) to (52.6) apply despite the *Statutory Powers Procedure Act*. 2006, c. 23, s. 22 (11).

Dismissal without hearing

(53) Despite the *Statutory Powers Procedure Act* and subsection (52), the Municipal Board may dismiss an appeal without holding a hearing on its own initiative or on the motion of any party, if,

(a) it is of the opinion that,

(i) the reasons set out in the notice of appeal do not disclose any apparent land use planning ground upon which the Board could give or refuse to give approval to the draft plan of subdivision or determine the question as to the condition appealed to it,

(ii) the appeal is not made in good faith or is frivolous or vexatious,

(iii) the appeal is made only for the purpose of delay, or

(iv) the appellant has persistently and without reasonable grounds commenced before the Board proceedings that constitute an abuse of process;

(b) REPEALED: 2006, c. 23, s. 22 (14).

(c) the appellant has not provided written reasons for the appeal;

(d) the appellant has not paid the fee prescribed under the *Ontario Municipal Board Act*; or

(e) the appellant has not responded to a request by the Municipal Board for further information within the time specified by the Board. 1994, c. 23, s. 30; 1996, c. 4, s. 28 (14, 15); 2006, c. 23, s. 22 (12-14).

Same

(53.1) Despite the *Statutory Powers Procedure Act* and subsection (52), the Municipal Board may, on its own initiative or on the motion of the municipality, the appropriate approval authority or the Minister, dismiss all or part of an appeal without holding a hearing if, in the Board's opinion, the application to which the appeal relates is substantially different from the application that was before council at the time of its decision. 2006, c. 23, s. 22 (15).

Representation

(54) Before dismissing an appeal, the Municipal Board shall notify the appellant and give the appellant the opportunity to make representation on the proposed dismissal but this subsection does not apply if the appellant has not complied with a request made under clause (53) (e). 2000, c. 26, Sched. K, s. 5 (6).

Dismissal

(54.1) Despite the *Statutory Powers Procedure Act*, the Municipal Board may dismiss all or part of an appeal after holding a hearing or without holding a hearing on the motion under subsection (53) or (53.1), as it considers appropriate. 2006, c. 23, s. 22 (16).

Decision

(55) If all appeals under subsection (39), (43) or (48) are dismissed or withdrawn, the secretary of the Municipal Board shall notify the approval authority and the decision of the approval authority shall be deemed to have been made on the day after the day the last outstanding appeal has been dismissed or withdrawn, subject to any other right of appeal that may be exercised under this section and subject to subsection (44). 1994, c. 23, s. 30.

Powers

(56) On an appeal under subsection (34) or (39), the Municipal Board may make any decision that the approval authority could have made on the application and on an appeal under subsection (43) or (48) shall determine the question as to the conditions appealed to it. 1994, c. 23, s. 30.

Final approval

(56.1) If, on an appeal under subsection (34) or (39), the Municipal Board has given approval to a draft plan of subdivision, the Board may, by order, provide that the final approval of the plan of subdivision for the purposes of subsection (58) is to be given by the approval authority in which the land is situate. 1999, c. 12, Sched. M, s. 28 (3).

Change of conditions

(56.2) If the final approval of a plan of subdivision is to be given under subsection (56.1), the Municipal Board may change the conditions of the approval of the draft plan of subdivision under subsection (44) at any time before the approval of the final plan of subdivision by the approval authority. 1999, c. 12, Sched. M, s. 28 (3).

When draft plan approved

(57) When the draft plan is approved, the person seeking to subdivide may proceed to lay down the highways and lots upon the ground in accordance with the *Surveys Act* and with the *Registry Act* or the *Land Titles Act*, as the case may be, and to prepare a plan accordingly certified by an Ontario land surveyor. 1994, c. 23, s. 30.

Final approval of plan

(58) Upon presentation by the person seeking to subdivide, the approval authority may, if satisfied that the plan is in conformity with the approved draft plan and that the conditions of approval have been or will be fulfilled, approve the plan of subdivision and, once approved, the final plan of subdivision may be tendered for registration. 1994, c. 23, s. 30.

Withdrawal of approval

(59) If a final plan of subdivision is approved under subsection (58), but is not registered within 30 days of the date of approval, the approval authority may withdraw its approval. 1994, c. 23, s. 30.

Duplicates

(60) In addition to any requirement under the *Registry Act* or the *Land Titles Act*, the person tendering the plan of subdivision for registration shall deposit with the land registrar a duplicate, or when required by the approval authority two duplicates, of the plan of a type approved by the approval authority, and the land registrar shall endorse on it a certificate showing the number of the plan and the date when the plan was registered and shall deliver the duplicate or duplicates to the approval authority. 1994, c. 23, s. 30.

Saving

(61) The approval of a plan of subdivision does not operate to release any person from doing anything that the person may be required to do by or under the authority of any other Act. 1994, c. 23, s. 30.

Parkland

51.1 (1) The approval authority may impose as a condition to the approval of a plan of subdivision that land in an amount not exceeding, in the case of a subdivision proposed for commercial or industrial purposes, 2 per cent and in all other cases 5 per cent of the land included in the plan shall be conveyed to the local municipality for park or other public recreational purposes or, if the land is not in a municipality, shall be dedicated for park or other public recreational purposes.

Other criteria

(2) If the approval authority has imposed a condition under subsection (1) requiring land to be conveyed to the municipality and if the municipality has an official plan that contains specific policies relating to the provision of lands for park or other public recreational purposes, the municipality, in the case of a subdivision proposed for residential purposes, may, in lieu of such conveyance, require that land included in the plan be conveyed to the municipality for park or other public recreational purposes at a rate of one hectare for each 300 dwelling units proposed or at such lesser rate as may be determined by the municipality.

Payment in lieu

(3) If the approval authority has imposed a condition under subsection (1) requiring land to be conveyed to the municipality, the municipality may, in lieu of accepting the conveyance, require the payment of money by the owner of the land,

(a) to the value of the land otherwise required to be conveyed; or

(b) where the municipality would be entitled to require a conveyance under subsection (2), to the value of the land that would otherwise be required to be so conveyed.

Determination of value

(4) For the purpose of determining the amount of any payment required under subsection (3), the value of the land shall be determined as of the day before the day of the approval of the draft plan of subdivision.

Application

(5) Subsections 42 (2), (5) and (12) to (16) apply with necessary modifications to a conveyance of land or a payment of money under this section. 1994, c. 23, s. 31.

Delegation to committee or officer

51.2 (1) If a council of a municipality is the approval authority under section 51 in respect of the approval of plans of subdivision, the council may by by-law delegate all or any part of the authority to approve plans of subdivision to a committee of council or to an appointed officer identified in the by-law by name or position occupied. 1994, c. 23, s. 31; 2002, c. 17, Sched. B, s. 20 (1).

Delegation to lower-tier municipality

(2) If an upper-tier council is the approval authority under section 51 in respect of the approval of plans of subdivision, the council may, after the prescribed notice is given, by by-law delegate all or any part of the authority to approve plans of subdivision to a lower-tier municipality in respect of land situate in the lower-tier municipality. 2002, c. 17, Sched. B, s. 20 (2).

Delegation

(2.1) Despite subsections 74 (2) and 74.1 (1), an upper-tier council may delegate the authority to approve plans of subdivision under subsection (2) with respect to applications made before March 28, 1995. 2002, c. 17, Sched. B, s. 20 (3).

Delegation to planning authority

(3) If a council is the approval authority under section 51 in respect of the approval of plans of subdivision, the council may, after the prescribed notice is given, by by-law delegate all or any part of the authority to approve plans of subdivision to a municipal planning authority in respect of land situate in the municipal planning area. 1994, c. 23, s. 31; 2002, c. 17, Sched. B, s. 20 (4).

Further delegation

(4) If authority is delegated to a council under subsection (2), the council may in turn by by-law delegate all or any part of the authority to a committee of council or to an appointed officer identified in the by-law by name or position occupied. 1994, c. 23, s. 31.

Same

(5) If authority is delegated to a municipal planning authority under subsection (3) or subsection 51 (14), the municipal planning authority may in turn by by-law delegate all or any part of the authority to a committee of the municipal planning authority or to an appointed officer identified in the by-law by name or position occupied. 1994, c. 23, s. 31.

Conditions

(6) A delegation of authority made by a council or municipal planning authority under this section may be subject to such conditions as the council or municipal planning authority by by-law provides. 1994, c. 23, s. 31.

Withdrawal of delegation

(7) A council or a municipal planning authority may by by-law withdraw a delegation of authority made by a council or a municipal planning authority under this section and such withdrawal may be either in respect of one or more plans of subdivision specified in the by-law or any or all plans of subdivision in respect of which a final disposition was not made before the withdrawal. 1994, c. 23, s. 31.

Sale of lands in accordance with unregistered plan prohibited

52. (1) No person shall subdivide and offer for sale, agree to sell or sell land by a description in accordance with an unregistered plan of subdivision, but this subsection does not prohibit any person from offering for sale or agreeing to sell land by a description in accordance with a plan of subdivision in respect of which draft approval has been given under section 51.

Definition

(2) In subsection (1),

"unregistered plan of subdivision" does not include a reference plan of survey under section 150 of the *Land Titles Act* that complies with the regulations under that Act or a plan deposited under Part II of the *Registry Act* in accordance with the regulations under that Act. R.S.O. 1990, c. P.13, s. 52.

Consents

53. (1) An owner of land or the owner's agent duly authorized in writing may apply for a consent as defined in subsection 50 (1) and the council or the Minister, as the case may be, may, subject to this section, give a consent if satisfied that a plan of subdivision of the land is not necessary for the proper and orderly development of the municipality. 1994, c. 23, s. 32.

Prescribed information

(2) The applicant for a consent shall provide the council or the Minister with the prescribed information or material. 1996, c. 4, s. 29 (1).

Other information

(3) A council or the Minister may require that a person or public body that makes an application for a consent provide any other information or material that the council or the Minister considers it or he or she may need, but only if the official plan contains provisions relating to requirements under this subsection. 2006, c. 23, s. 23 (1).

Refusal and timing

(4) Until the council or the Minister has received the information and material required under subsections (2) and (3), if any, and any fee under section 69 or 69.1,

(a) the council or the Minister may refuse to accept or further consider the application for a consent; and

(b) the time period referred to in subsection (14) does not begin. 2006, c. 23, s. 23 (1).

Motion re dispute

(4.1) The applicant, the council or the Minister may make a motion for directions to have the Municipal Board determine,

(a) whether the information and material required under subsections (2) and (3), if any, have in fact been provided; or

(b) whether a requirement made under subsection (3) is reasonable. 2006, c. 23, s. 23 (1).

Final determination

(4.2) The Municipal Board's determination under subsection (4.1) is not subject to appeal or review. 2006, c. 23, s. 23 (1).

Notice

(5) At least 14 days before a decision is made by the council or the Minister, the council or the Minister shall ensure that,

(a) notice of the application is given, if required by regulation, in the manner and to the persons and public bodies and containing the information prescribed; and

(b) a public meeting is held, if required by regulation, notice of which shall be given in the manner and to the persons and public bodies and containing the information prescribed. 1996, c. 4, s. 29 (1).

Request by council

(6) A council may request that a local municipality having jurisdiction over the land that is the subject of the application for consent give notice of the application or hold the public meeting referred to in subsection (5) or do both. 1996, c. 4, s. 29 (1).

Request by Minister

(7) The Minister may request that a local municipality or planning board having jurisdiction over the land that is the subject of the application for consent give notice of the application or hold the public meeting referred to in subsection (5) or do both. 1996, c. 4, s. 29 (1).

Responsibilities

(7.1) A local municipality or planning board that is requested under subsection (6) or (7) to give notice shall ensure that,

(a) the notice is given in accordance with the regulation made under clause (5) (a); and

(b) the prescribed information and material are submitted to the council or the Minister, as the case may be, within 15 days after the notice is given. 1996, c. 4, s. 29 (1).

Same

(7.2) A local municipality or planning board that is requested under subsection (6) or (7) to hold a public meeting shall ensure that,

(a) notice of the meeting is given in accordance with the regulation made under clause (5) (b);

(b) the public meeting is held; and

(c) the prescribed information and material are submitted to the council or the Minister, as the case may be, within 15 days after the meeting is held. 1996, c. 4, s. 29 (1).

Written submissions

(8) Any person or public body may make written submissions to the council or the Minister before the council or the Minister gives or refuses to give a provisional consent. 1994, c. 23, s. 32.

Procedure

(9) A council in dealing with applications for consent shall comply with such rules of procedure as are prescribed. 1994, c. 23, s. 32.

Council to confer

(10) A council, in determining whether a provisional consent is to be given, shall confer with the persons or public bodies prescribed. 1994, c. 23, s. 32.

Minister may confer

(11) The Minister in determining whether a provisional consent is to be given may confer with the persons or public bodies that the Minister considers may have an interest in the application. 1994, c. 23, s. 32.

Powers

(12) A council or the Minister in determining whether a provisional consent is to be given shall have regard to the matters under subsection 51 (24) and has the same powers as the approval authority has under subsection 51 (25) with respect to the approval of a plan of subdivision and subsections 51 (26) and (27) and section 51.1 apply with necessary modifications to the granting of a provisional consent. 1994, c. 23, s. 32.

Parks

(13) If, on the giving of a provisional consent, land is required to be conveyed to a municipality for park or other public recreational purposes and the council of the municipality requires the payment of money to the value of the land in lieu of the conveyance, for the purpose of determining the amount of the payment, the value of the land shall be determined as of the day before the day the provisional consent was given. 1994, c. 23, s. 32.

Appeal to O.M.B.

(14) If an application is made for a consent and the council or the Minister fails to make a decision under subsection (1) on the application within 90 days after the day the application is

received by the clerk of the municipality or the Minister, the applicant may appeal to the Municipal Board with respect to the consent application by filing a notice with the clerk of the municipality or the Minister, accompanied by the fee prescribed under the *Ontario Municipal Board Act*. 1994, c. 23, s. 32; 1996, c. 4, s. 29 (2); 2004, c. 18, s. 9.

Consolidated Hearings Act

(14.1) Despite the *Consolidated Hearings Act*, the proponent of an undertaking shall not give notice to the Hearings Registrar under subsection 3 (1) of that Act in respect of an application requested under subsection (1) unless the council or the Minister has given or refused to give a provisional consent or the time period referred to in subsection (14) has expired. 2006, c. 23, s. 23 (2).

Record

(15) If the clerk of the municipality or the Minister receives a notice of appeal under subsection (14), the clerk of the municipality or the Minister shall ensure that,

(a) a record is compiled which includes the prescribed information and material; and

(b) the record, the notice of appeal and the fee are forwarded to the Municipal Board within 15 days after the notice is filed. 1994, c. 23, s. 32; 1996, c. 4, s. 29 (3).

Appeal withdrawn

(16) If an appeal under subsection (14) is withdrawn, the Municipal Board shall notify the council or Minister and the council or the Minister may proceed to make a decision under subsection (1). 1994, c. 23, s. 32.

Exception

(16.1) Despite clause (15) (b), if all appeals under subsection (14) are withdrawn within 15 days after the last day for filing a notice of appeal, the clerk of the municipality or the Minister is not required to forward the materials described under clause (15) (b) to the Municipal Board. 1999, c. 12, Sched. M, s. 29.

Where all appeals withdrawn

(16.2) If all appeals under subsection (14) are withdrawn within 15 days after the last day for filing a notice of appeal, the council or the Minister may proceed to make a decision under subsection (1). 1999, c. 12, Sched. M, s. 29.

Notice of decision

(17) If the council or the Minister gives or refuses to give a provisional consent, the council or the Minister shall ensure that written notice of it is given within 15 days, containing the information prescribed to,

(a) the applicant;

(b) each person or public body that made a written request to be notified of the decision or conditions;

(c) REPEALED: 1996, c. 4, s. 29 (4).

(d) the Minister, with respect to a decision by a council to give a provisional consent, if the Minister has notified the council that he or she wishes to receive a copy of all decisions made to give a provisional consent; and

(e) any other person or public body prescribed. 1994, c. 23, s. 32; 1996, c. 4, s. 29 (4).

(18) REPEALED: 1996, c. 4, s. 29 (5).

Appeal

(19) Any person or public body may, not later than 20 days after the giving of notice under subsection (17) is completed, appeal the decision or any condition imposed by the council or the Minister or appeal both the decision and any condition to the Municipal Board by filing with the clerk of the municipality or the Minister a notice of appeal setting out the reasons for the appeal, accompanied by the fee prescribed under the *Ontario Municipal Board Act*. 1994, c. 23, s. 32; 1996, c. 4, s. 29 (6).

Notice completed

(20) For the purpose of subsections (19) and (27), the giving of written notice shall be deemed to be completed,

(a) where notice is given by personal service, on the day that the serving of all required notices is completed;

(b) where notice is given by mail, on the day that the mailing of all required notices is completed; and

(c) where notice is given by telephone transmission of a facsimile of the notice, on the day that the transmission of all required notices is completed. 1994, c. 23, s. 32.

No appeal

(21) If no appeal is filed under subsection (19) or (27), subject to subsection (23), the decision of the council or the Minister, as the case may be, to give or refuse to give a provisional consent is final. 1994, c. 23, s. 32.

Declaration

(22) A sworn declaration by an employee of the municipality or the Ministry of Municipal Affairs and Housing that notice was given under subsection (17) or (24) or that no notice of appeal was filed under subsection (19) or (27) within the time allowed for appeal is conclusive evidence of the facts stated in it. 1994, c. 23, s. 32; 1996, c. 4, s. 29 (7).

Change of conditions

(23) The council or the Minister, as the case may be, may change the conditions of a provisional consent at any time before a consent is given. 1994, c. 23, s. 32.

Notice

(24) If the council or the Minister changes conditions of a provisional consent under subsection (23) after notice has been given under subsection (17), the council or the Minister shall ensure that written notice of the changes containing the information prescribed is given within 15 days to,

(a) the applicant;

(b) each person or public body that made a written request to be notified of changes to the conditions;

(c) the Minister, with respect to a change of conditions by council, if the Minister has notified the council that he or she wishes to receive a copy of the changes of conditions; and

(d) any other person or public body prescribed. 1994, c. 23, s. 32; 1996, c. 4, s. 29 (8).

(25) REPEALED: 1996, c. 4, s. 29 (9).

No notice required

(26) The council or the Minister, as the case may be, is not required to give written notice under subsection (24) if, in the council's or the Minister's opinion, the change to conditions is minor. 2009, c. 33, Sched. 21, s. 10 (14).

Appeal

(27) Any person or public body may, not later than 20 days after the giving of notice under subsection (24) is completed, appeal any of the changed conditions imposed by the council or the Minister by filing with the clerk of the municipality or the Minister a notice of appeal setting out the reasons for the appeal, accompanied by the fee prescribed under the *Ontario Municipal Board Act*. 1994, c. 23, s. 32; 1996, c. 4, s. 29 (10).

Record

(28) If the clerk or the Minister, as the case may be, receives a notice of appeal under subsection (19) or (27), the clerk or the Minister shall ensure that,

(a) a record is compiled which includes the information and material prescribed; and

(b) the record, the notice of appeal and the fee are forwarded to the Municipal Board within 15 days after the last day for filing a notice of appeal under subsection (19) or (27). 1994, c. 23, s. 32.

Appeals withdrawn

(29) If all appeals under subsection (19) or (27) are withdrawn and the time for appealing has expired, the Municipal Board shall notify the council or the Minister, as the case may be, and subject to subsection (23), the decision of the council or the Minister to give or refuse to give a provisional consent is final. 1994, c. 23, s. 32.

Exception

(29.1) Despite clause (28) (b), if all appeals under subsection (19) or (27) are withdrawn within 15 days after the last day for filing a notice of appeal, the clerk of the municipality or the Minister is not required to forward the materials described under clause (28) (b) to the Municipal Board. 1999, c. 12, Sched. M, s. 29.

Decision final

(29.2) If all appeals under subsection (19) or (27) are withdrawn within 15 days after the last day for filing a notice of appeal, the decision of the council or the Minister, subject to subsection (23), to give or refuse to give a provisional consent is final. 1999, c. 12, Sched. M, s. 29.

Hearing

(30) On an appeal, the Municipal Board shall hold a hearing, of which notice shall be given to such persons or public bodies and in such manner as the Board may determine. 1994, c. 23, s. 32; 1996, c. 4, s. 29 (11).

Dismissal without hearing

(31) Despite the *Statutory Powers Procedure Act* and subsection (30), the Municipal Board may dismiss an appeal without holding a hearing, on its own initiative or on the motion of any party, if,

(a) it is of the opinion that,

(i) the reasons set out in the notice of appeal do not disclose any apparent land use planning ground upon which the Board could give or refuse to give the provisional consent or could determine the question as to the condition appealed to it,

(ii) the appeal is not made in good faith or is frivolous or vexatious,

(iii) the appeal is made only for the purpose of delay, or

(iv) the appellant has persistently and without reasonable grounds commenced before the Board proceedings that constitute an abuse of process;

(b) the appellant did not make oral submissions at a public meeting or did not make written submissions to the council or the Minister before a provisional consent was given or refused and, in the opinion of the Board, the appellant does not provide a reasonable explanation for having failed to make a submission;

(c) the appellant has not provided written reasons for the appeal;

(d) the appellant has not paid the fee prescribed under the *Ontario Municipal Board Act*; or

(e) the appellant has not responded to a request by the Municipal Board for further information within the time specified by the Board. 1994, c. 23, s. 32; 1996, c. 4, s. 29 (12); 2006, c. 23, s. 23 (3, 4).

Representation

(32) Before dismissing an appeal, the Municipal Board shall notify the appellant and give the appellant the opportunity to make representation on the proposed dismissal but this subsection does not apply if the appellant has not complied with a request made under clause (31) (e). 2000, c. 26, Sched. K, s. 5 (7).

Dismissal

(32.1) The Municipal Board may dismiss an appeal after holding a hearing or without holding a hearing on the motion under subsection (31), as it considers appropriate. 2000, c. 26, Sched. K, s. 5 (7).

Decision final

(33) If all appeals under subsection (19) or (27) are dismissed or withdrawn, the Municipal Board shall notify the council or the Minister and, subject to subsection (23), the decision of the council or the Minister to give or refuse to give a provisional consent is final. 1994, c. 23, s. 32.

Powers

(34) On an appeal under subsection (14) or (19), the Municipal Board may make any decision that the council or the Minister, as the case may be, could have made on the original application and on an appeal of the conditions under subsection (27), the Board shall determine the question as to the condition or conditions appealed to it. 1994, c. 23, s. 32.

Amended application

(35) On an appeal, the Municipal Board may make a decision on an application which has been amended from the original application if, at any time before issuing its order, written notice is given to the persons and public bodies prescribed under subsection (10) and to any person or public body conferred with under subsection (11) on the original application. 1994, c. 23, s. 32.

No written notice

(35.1) The Municipal Board is not required to give written notice under subsection (35) if, in the opinion of the Board, the amendment to the original application is minor. 1996, c. 4, s. 29 (13).

Notice

(36) Any person or public body that receives notice under subsection (35) may, not later than 30 days after the day that written notice was given, notify the Municipal Board of an intention to appear at the hearing or the resumption of the hearing, as the case may be. 1994, c. 23, s. 32.

Order

(37) If, after the expiry of the time period in subsection (36), no notice of intent has been received, the Municipal Board may issue its order. 1994, c. 23, s. 32.

Notice received

(38) If a notice of intent under subsection (36) is received, the Municipal Board may hold a hearing or resume the hearing on the amended application or issue its order without holding a hearing or resuming the hearing. 1994, c. 23, s. 32; 1996, c. 4, s. 29 (14).

Consent

(39) If the decision of the Municipal Board under subsection (34) is that a provisional consent be given, the council or the Minister shall give the consent, but if conditions have been imposed, the consent shall not be given until the council or the Minister is satisfied that the conditions have been fulfilled. 1994, c. 23, s. 32.

Same

(40) If the decision of the council or the Minister on an application is that provisional consent be given and there has been no appeal under subsection (19) or (27), subject to subsection (23), the consent shall be given, but if conditions have been imposed the consent shall not be given until the council or the Minister is satisfied that the conditions have been fulfilled. 1994, c. 23, s. 32.

Conditions not fulfilled

(41) If conditions have been imposed and the applicant has not, within a period of one year after notice was given under subsection (17) or (24), whichever is later, fulfilled the conditions, the application for consent shall be deemed to be refused but, if there is an appeal under subsection (14), (19) or (27), the application for consent shall not be deemed to be refused for failure to fulfil the conditions until the expiry of one year from the date of the order of the Municipal Board issued in respect of the appeal or from the date of a notice issued by the Board under subsection (29) or (33). 1994, c. 23, s. 32.

Certificate

(42) When a consent has been given under this section, the clerk of the municipality or the Minister, as the case may be, shall give a certificate to the applicant stating that the consent has been given and the certificate is conclusive evidence that the consent was given and that the provisions of this Act leading to the consent have been complied with and that, despite any other provision of this Act, the council or the Minister had jurisdiction to grant the consent and after the certificate has been given no action may be maintained to question the validity of the consent. 1994, c. 23, s. 32.

Lapse of consent

(43) A consent given under this section lapses at the expiration of two years from the date of the certificate given under subsection (42) if the transaction in respect of which the consent was given

is not carried out within the two-year period, but the council or the Minister in giving the consent may provide for an earlier lapsing of the consent. 1994, c. 23, s. 32.

Where delegation

(44) If a land division committee or a committee of adjustment has had delegated to it the authority for the giving of consents, any reference in this section to the clerk of the municipality shall be deemed to be a reference to the secretary-treasurer of the land division committee or committee of adjustment. 1994, c. 23, s. 32.

Delegation of authority to give consents

54. (1) The council of an upper-tier municipality may by by-law delegate to the council of a lower-tier municipality the authority for the giving of consents under section 53 in respect of land situate in the lower-tier municipality. 2002, c. 17, Sched. B, s. 21 (1).

Delegation

(1.1) The council of a county may by by-law delegate to a municipal planning authority the authority for the giving of consents under section 53 in respect of land in a municipal planning area. 1994, c. 23, s. 33 (2).

Further delegation

(2) Where authority is delegated to a council under subsection (1), such council may, in turn, by by-law, delegate the authority or any part of such authority, to a committee of council, to an appointed officer identified in the by-law by name or position occupied or to a committee of adjustment. R.S.O. 1990, c. P.13, s. 54 (2).

Included powers

(2.1) If council has delegated its authority to give consents under subsection (1), (1.1), (2), (2.3), (4) or (5), that delegation shall be deemed to include the authority to give approvals under subsection 50 (18) and to issue certificates of validation under section 57 in respect of land situate in the lower-tier municipality. 1993, c. 26, s. 61 (1); 1994, c. 23, s. 33 (3); 2002, c. 17, Sched. B, s. 21 (2).

Limitation

(2.2) Section 53 does not apply in the exercise of authority under subsection (2.1) to give approvals under subsection 50 (18) or to issue certificates of validation. 1994, c. 23, s. 33 (4).

Further delegation

(2.3) If authority is delegated to a municipal planning authority under subsection (1.1) or (5) or subsection 50 (1.4), the municipal planning authority may, in turn, by by-law delegate the authority or any part of the authority to a committee of the municipal planning authority or to an appointed officer identified in the by-law by name or position occupied. 1994, c. 23, s. 33 (5).

(3) REPEALED: 1994, c. 23, s. 33 (6).

Delegation to committee of council, etc.

(4) Except as delegated under subsection (1) or (1.1), the authority or any part of such authority of the council of an upper-tier municipality may be delegated by the council to a committee of council, to an appointed officer identified in the by-law by name or position occupied or to a land division committee. R.S.O. 1990, c. P.13, s. 54 (4); 1994, c. 23, s. 33 (7); 2002, c. 17, Sched. B, s. 21 (3).

Delegation, single-tier municipalities

(5) The council of a single-tier municipality authorized to give a consent under section 53 may by by-law delegate the authority of the council under section 53 or any part of that authority to a committee of council, to an appointed officer identified in the by-law by name or position occupied, to a municipal planning authority or to the committee of adjustment. 2002, c. 17, Sched. B, s. 21 (4).

Committee of adjustment

(6) Where, under subsection (2) or (5), a committee of adjustment has had delegated to it the authority to give a consent, section 53 applies with necessary modifications and subsections 45 (4) to (20) do not apply in the exercise of that authority. 1994, c. 23, s. 33 (9).

Same

(6.1) Where, under subsection (2) or (5), a committee of adjustment has the authority to give approvals under subsection 50 (18) and the authority to issue certificates of validation under section 57, subsection 45 (8) applies in the exercise of that authority, but subsections 45 (4) to (7) and (9) to (20) do not apply. 1993, c. 26, s. 61 (3).

Conditions

(7) A delegation of authority made by a council or a municipal planning authority under this section may be subject to such conditions as the council or the municipal planning authority by by-law provides and the council or the municipal planning authority may by by-law withdraw the delegation of authority but, where authority delegated under subsection (1) or (1.1) is withdrawn, all applications for consent, for approval under subsection 50 (18) or for the issuance of a certificate of validation under section 57 made prior to the withdrawal shall continue to be dealt with as if the delegation had not been withdrawn. 1994, c. 23, s. 33 (10).

District land division committee, delegation

55. (1) The Minister by order may constitute and appoint one or more district land division committees composed of such persons as he or she considers advisable and may by order delegate thereto the authority of the Minister to give consents under section 53, the authority to give approvals under subsection 50 (18) or the authority to issue certificates of validation under section 57 in respect of such lands situate in a territorial district as are defined in the order. R.S.O. 1990, c. P.13, s. 55 (1); 1993, c. 26, s. 62 (1).

Conditions and withdrawal of delegation

(2) A delegation made by the Minister under subsection (1) may be subject to such conditions as the Minister may by order provide and the Minister may by order withdraw any delegation. R.S.O. 1990, c. P.13, s. 55 (2).

Body corporate

(2.1) A district land division committee is a body corporate. 1994, c. 23, s. 34 (1).

Application of s. 44

(3) Where the Minister has delegated his or her authority to a district land division committee under subsection (1), subsections 44 (5), (6), (7), (8), (10) and (11) apply with necessary modifications. R.S.O. 1990, c. P.13, s. 55 (3).

Agreements

(4) A district land division committee may enter into agreements imposed as a condition to the giving of a consent in respect of land situate in territory without municipal organization and subsection 51 (26) applies with necessary modifications to any such agreement. R.S.O. 1990, c. P.13, s. 55 (4); 1994, c. 23, s. 34 (2).

Remuneration

(5) The members of a district land division committee appointed under this section shall be paid such remuneration as is provided for by the order appointing them. R.S.O. 1990, c. P.13, s. 55 (5).

Fees

(6) A district land division committee may prescribe a tariff of fees for the processing of applications, which shall be designed to meet only the anticipated cost to the committee in respect of the processing of applications. 1993, c. 26, s. 62 (2).

Land division committee

56. (1) The council of an upper-tier municipality may by by-law constitute and appoint a land division committee composed of such persons, not fewer than three, as the council considers advisable. R.S.O. 1990, c. P.13, s. 56 (1); 2002, c. 17, Sched. B, s. 22.

Application of subss. 44 (2-11)

(2) Subsections 44 (2) to (11) apply, with necessary modifications, where a land division committee is constituted under subsection (1) of this section. R.S.O. 1990, c. P.13, s. 56 (2).

Validation certificate

57. (1) A council authorized to give a consent under section 53, other than a council authorized to give a consent pursuant to an order under section 4, may issue a certificate of validation in respect of land described in the certificate, providing that the contravention of section 50 or a predecessor of it or of a by-law passed under a predecessor of section 50 or of an order made under clause 27 (1) (b), as it read on the 25th day of June, 1970, of *The Planning Act*, being chapter 296 of the Revised Statutes of Ontario, 1960, or a predecessor of it does not have and shall be deemed never to have had the effect of preventing the conveyance of or creation of any interest in such land. 1993, c. 26, s. 63; 1996, c. 4, s. 30 (1).

Limitation

(2) A certificate of validation under subsection (1) or an order of the Minister under subsection (3) does not affect the rights acquired by any person from a judgment or order of any court given or made on or before the day on which the certificate is issued or order is made. 1993, c. 26, s. 63.

Territorial district

(3) If the Minister has authority to give consents under section 53, the Minister may by order exercise the powers conferred upon a council by subsection (1) in respect of land in a territorial district. 2002, c. 17, Sched. B, s. 23.

Proviso

(4) No order shall be made by the Minister under subsection (3) in respect of land situate in a local municipality unless the council of the local municipality in which the land is situate has by by-law requested the Minister to make such order, and the council has the power to pass that by-law. 1993, c. 26, s. 63; 2009, c. 33, Sched. 21, s. 10 (15).

Conditions

(5) A council may, as a condition to the passage of a by-law under subsection (4), impose such conditions in respect of any land described in the by-law as it considers appropriate. 1993, c. 26, s. 63.

Criteria for consideration

(6) In considering whether to issue a certificate under subsection (1), regard shall be had to the prescribed criteria. 1993, c. 26, s. 63.

Criteria for certificate

(7) No certificate shall be issued by a council under subsection (1) unless,

(a) the land described in the certificate conforms with the prescribed criteria; or

(b) the Minister, by order, has exempted that land from the criteria. 1993, c. 26, s. 63.

Conditions

(8) A council or the Minister may, as a condition to issuing a certificate of validation or order, impose such conditions in respect of any land described in the certificate or order as it considers appropriate. 1993, c. 26, s. 63.

Proviso

(9) Nothing in this section derogates from the power a council or the Minister has to grant consents referred to in section 53. 1993, c. 26, s. 63.

PART VII
GENERAL

Acquisition of land

58. The *Municipal Act, 2001* or the *City of Toronto Act, 2006*, as the case may be, applies to the acquisition of land under this Act. 2006, c. 32, Sched. C, s. 47 (12).

Power to clear, grade, etc., lands acquired

59. When a municipality has acquired or holds lands for any purpose authorized by this Act, the municipality may clear, grade or otherwise prepare the land for the purpose for which it has been acquired or is held. R.S.O. 1990, c. P.13, s. 59.

Exchange of lands

60. When a municipality acquires land for any purpose authorized by this Act, the whole or partial consideration therefor may be land then owned by the municipality. R.S.O. 1990, c. P.13, s. 60.

Fair hearing

61. Where, in passing a by-law under this Act, a council is required by this Act, by the provisions of an official plan or otherwise by law, to afford any person an opportunity to make representation in respect of the subject-matter of the by-law, the council shall afford such person a fair opportunity to make representation but throughout the course of passing the by-law the council shall be deemed to be performing a legislative and not a judicial function. R.S.O. 1990, c. P.13, s. 61.

Not subject to Act

62. (1) An undertaking of Hydro One Inc. (as defined in subsection 2 (1) of the *Electricity Act, 1998*) or Ontario Power Generation Inc. (as defined in subsection 2 (1) of that Act) that has been

approved under the *Environmental Assessment Act* is not subject to this Act. 1998, c. 15, Sched. E, s. 27 (11); 2002, c. 1, Sched. C, s. 4.

Subsidiaries included

(2) For the purposes of subsection (1), a reference to a corporation is deemed to include a subsidiary of that corporation. 1998, c. 15, Sched. E, s. 27 (11).

Exempt undertakings

62.0.1 (1) An undertaking or class of undertakings within the meaning of the *Environmental Assessment Act* that relates to energy is not subject to this Act or to section 113 or 114 of the *City of Toronto Act, 2006* if,

(a) it has been approved under Part II or Part II.1 of the *Environmental Assessment Act* or is the subject of,

(i) an order under section 3.1 or a declaration under section 3.2 of that Act, or

(ii) an exempting regulation made under that Act; and

(b) a regulation under clause 70 (h) prescribing the undertaking or class of undertakings is in effect. 2006, c. 23, s. 24.

Same

(2) An undertaking referred to in subsection 62 (1) that has been approved under the Environmental Assessment Act is not subject to section 113 or 114 of the *City of Toronto Act, 2006*. 2006, c. 23, s. 24.

Renewable energy undertakings

Policy statements and provincial plans

62.0.2 (1) Despite any Act or regulation, the following do not apply to a renewable energy undertaking, except in relation to a decision under section 28 or Part VI:

1. A policy statement issued under subsection 3 (1).
2. A provincial plan, subject to subsection (2). 2009, c. 12, Sched. K, s. 3.

Exception

(2) Subsection (1) does not apply in respect of,

(a) the Niagara Escarpment Plan;

(b) another provincial plan, if the provincial plan is prescribed for the purposes of this subsection; or

(c) a provision of another provincial plan, if the provision is prescribed for the purposes of this subsection. 2009, c. 12, Sched. K, s. 3.

Official plans

(3) For greater certainty, an official plan does not affect a renewable energy undertaking. 2009, c. 12, Sched. K, s. 3.

Same

(4) Section 24 does not apply to,

(a) the undertaking of a public work that is a renewable energy undertaking or is intended to facilitate or support a renewable energy undertaking;

(b) the passing of a by-law with respect to a public work described in clause (a); or

(c) the passing of a by-law that is intended to facilitate or support a renewable energy undertaking. 2009, c. 12, Sched. K, s. 3.

Demolition control area

(5) A by-law passed under section 33 does not apply to a renewable energy undertaking. 2009, c. 12, Sched. K, s. 3.

By-laws and orders under Part V

(6) A by-law or order passed or made under Part V does not apply to a renewable energy undertaking. 2009, c. 12, Sched. K, s. 3.

Transition, existing agreements

(7) An agreement that is entered into under Part V before the day subsection 4 (1) of Schedule G to the *Green Energy and Green Economy Act, 2009* comes into force applies to a renewable energy project, and to any related renewable energy testing facility and renewable energy testing project, until the day a renewable energy approval is issued under section 47.5 of the *Environmental Protection Act* in relation to the renewable energy project. 2009, c. 12, Sched. K, s. 3.

Development permit system

(8) A regulation or by-law made or passed under section 70.2 does not apply to a renewable energy undertaking. 2009, c. 12, Sched. K, s. 3.

***City of Toronto Act, 2006*, ss. 113, 114**

(9) A by-law passed under section 113 or 114 of the *City of Toronto Act, 2006* does not apply to a renewable energy undertaking. 2009, c. 12, Sched. K, s. 3.

***Ontario Planning and Development Act, 1994*, s. 17**

(10) An order made under section 17 of the *Ontario Planning and Development Act, 1994* does not apply to a renewable energy undertaking. 2009, c. 12, Sched. K, s. 3.

Variation of notice requirements

62.1 The Minister, the council of a municipality or a planning board may by agreement with a First Nation vary or waive the prescribed notice requirements to a band in respect of an official plan, a zoning by-law or any application under this Act. 1994, c. 23, s. 37.

Deemed compliance

63. If the Minister, the council of a municipality, a planning board or the Municipal Board exercises any authority under this Act, including giving an approval, an exemption from an approval or a consent, the provisions of this Act that relate to or are requirements for the exercise of the authority shall be deemed to have been complied with upon the decision becoming final. 1996, c. 4, s. 32; 1999, c. 12, Sched. M, s. 30.

64. REPEALED: 2009, c. 33, Sched. 2, s. 59 (1).

Discretionary dispute resolution techniques

65. The Minister, the council of a municipality, a local board, a planning board or the Municipal Board or their agents shall, if they consider it appropriate, at any time before a decision is made

under this Act, use mediation, conciliation or other dispute resolution techniques to attempt to resolve concerns or disputes in respect of any planning application or matter. 1994, c. 23, s. 39.

Effect where authority delegated

66. If the Minister or the council delegates an authority under this Act, including the authority to give an approval, an exemption from an approval or a consent, the exercise of the authority and the decision of the delegate has the same force and effect as if it were the exercise of authority or the decision of the Minister or the council, as the case may be. 1996, c. 4, s. 33.

Penalty

67. (1) Every person who contravenes section 41, section 46, subsection 49 (4) or section 52 or who contravenes a by-law passed under section 34 or 38 or an order made under section 47 and, if the person is a corporation, every director or officer of the corporation who knowingly concurs in the contravention, is guilty of an offence and on conviction is liable,

(a) on a first conviction to a fine of not more than $25,000; and

(b) on a subsequent conviction to a fine of not more than $10,000 for each day or part thereof upon which the contravention has continued after the day on which the person was first convicted. 1994, c. 2, s. 48.

Corporation

(2) Where a corporation is convicted under subsection (1), the maximum penalty that may be imposed is,

(a) on a first conviction a fine of not more than $50,000; and

(b) on a subsequent conviction a fine of not more than $25,000 for each day or part thereof upon which the contravention has continued after the day on which the corporation was first convicted,

and not as provided in subsection (1).

Order of prohibition

(3) Where a conviction is entered under subsection (1), in addition to any other remedy or any penalty provided by law, the court in which the conviction has been entered, and any court of competent jurisdiction thereafter, may make an order prohibiting the continuation or repetition of the offence by the person convicted. R.S.O. 1990, c. P.13, s. 67 (2, 3).

Proceeds of fines

67.1 If an offence has been committed under section 41, 52 or 67 or under a by-law passed under section 34 or 38, and a proceeding in respect of the offence is undertaken by the municipality or planning board and a conviction has been entered, the proceeds of any fine in relation to the offence shall be paid to the treasurer of the municipality or secretary-treasurer of the planning board and section 2 of the *Administration of Justice Act* and section 4 of the *Fines and Forfeitures Act* do not apply in respect of the fine. 1996, c. 4, s. 34; 1997, c. 24, s. 226 (8).

Exception

68. (1) Despite section 53 of the *Assessment Act*, it is not an offence to disclose the information referred to therein to any employee of a municipality or of a planning board who declares that such information is required in the course of his or her planning duties. R.S.O. 1990, c. P.13, s. 68 (1); 1994, c. 23, s. 41 (1).

Offence

(2) An employee of a municipality or of a planning board who wilfully discloses or permits to be disclosed the information referred to in subsection (1) to any other person not likewise entitled in the course of his or her duties to acquire or have access to the information is guilty of an offence and on conviction is liable to a fine of not more than $5,000. R.S.O. 1990, c. P.13, s. 68 (2); 1994, c. 23, s. 41 (2).

Exception

(3) This section does not prevent disclosure of such information by any person when being examined as a witness in an action or other proceeding in a court or in an arbitration. R.S.O. 1990, c. P.13, s. 68 (3).

Tariff of fees

69. (1) The council of a municipality, by by-law, and a planning board, by resolution, may establish a tariff of fees for the processing of applications made in respect of planning matters, which tariff shall be designed to meet only the anticipated cost to the municipality or to a committee of adjustment or land division committee constituted by the council of the municipality or to the planning board in respect of the processing of each type of application provided for in the tariff. R.S.O. 1990, c. P.13, s. 69 (1); 1996, c. 4, s. 35 (1).

Reduction or waiver of fees

(2) Despite a tariff of fees established under subsection (1), the council of a municipality, a planning board, a committee of adjustment or a land division committee in processing an application may reduce the amount of or waive the requirement for the payment of a fee in respect of the application where the council, planning board or committee is satisfied that it would be unreasonable to require payment in accordance with the tariff. R.S.O. 1990, c. P.13, s. 69 (2); 1996, c. 4, s. 35 (2).

Payment under protest: appeal to O.M.B.

(3) Any person who is required to pay a fee under subsection (1) for the processing of an application in respect of a planning matter may pay the amount of the fee under protest and thereafter appeal to the Municipal Board against the levying of the fee or the amount of the fee by giving written notice of appeal to the Municipal Board within thirty days of payment of the fee. R.S.O. 1990, c. P.13, s. 69 (3); 1996, c. 4, s. 35 (3).

Hearing

(4) The Municipal Board shall hear an appeal made under subsection (3) and shall dismiss the appeal or direct that a refund payment be made to the appellant in such amount as the Board determines. R.S.O. 1990, c. P.13, s. 69 (4).

Fees

69.1 (1) The Minister may charge fees for the processing of applications to the Minister in respect of planning matters including the approval of an official plan or official plan amendment. 1993, c. 26, s. 64 ; 1994, c. 23, s. 42.

Same

(2) The Minister may reduce the amount of or waive the payment of a fee described under subsection (1). 1993, c. 26, s. 64.

Fees

69.2 (1) If a prescribed municipality fails to adopt a plan and submit it for approval as an official plan, the Minister may charge fees to the municipality for the processing of planning applications by the Minister in respect of land situate in the municipality, including the approval of an official plan or official plan amendment. 1994, c. 23, s. 43; 2002, c. 17, Sched. B, s. 25.

Reduction

(2) The Minister may reduce the amount of or waive the payment of a fee described under subsection (1). 1994, c. 23, s. 43.

Proviso

(3) Nothing in this section prevents the Minister from charging a fee under section 69.1 in addition to a fee under this section. 1994, c. 23, s. 43.

Regulations

70. The Lieutenant Governor in Council may make regulations,

(a)-(f) REPEALED: 1996, c. 4, s. 36.

(g) prescribing the form of a warrant and the form in which the information on oath will be taken under section 49.1;

(h) for the purposes of section 62.0.1, prescribing an undertaking or class of undertakings that relates to energy. 1994, c. 23, s. 44; 1996, c. 4, s. 36; 2006, c. 23, s. 25.

Regulations

70.1 (1) The Minister may make regulations,

1. prescribing forms for the purposes of this Act and providing for their use;
2. prescribing information and material that are to be provided under this Act and the manner in which they are to be provided;
3. prescribing the manner in which any notice is to be given under this Act, including the persons or public bodies to whom it shall be given, the person or public bodies who shall give the notice and the contents of the notice;
4. prescribing the timing requirements for any notice given under any provision of this Act;
5. prescribing information and material that must be included in any record;
6. prescribing plans or policies and provisions of those plans or policies for the purposes of clause (f) of the definition of “provincial plan” in subsection 1 (1);
7. prescribing any ministry of the Province of Ontario to be a public body under subsection 1 (3);
8. excluding any board, commission, agency or official from the definition of “public body” under subsection 1 (4);
9. prescribing conditions for the purpose of subsection 8.1 (1);
10. prescribing a term for the purpose of clause 8.1 (3) (a) and qualifications for the purpose of clause 8.1 (3) (b);
11. prescribing eligibility criteria for the purpose of subsection 8.1 (4);
12. prescribing classes for the purpose of clause 8.1 (5) (c);
13. prescribing requirements for the purpose of subsection 8.1 (8);

14. prescribing the methods for determining the number of members from each municipality to be appointed to a municipal planning authority under subsection 14.1 (5);
15. prescribing matters for the purpose of clause 16 (1) (b) and for the purpose of clause 16 (2) (c);
16. prescribing the processes to be followed and the materials to be developed under section 16.1;
17. prescribing municipalities for the purposes of subsection 17 (13) and section 69.2;
18. prescribing information and material for the purposes of clauses 17 (15) (a) and (b), public bodies for the purposes of clause 17 (15) (b) and the manner of making information and material available for the purposes of clause 17 (15) (c);
19. prescribing, for the purposes of clauses 17 (17) (a) and (b), clause 22 (6.4) (a), clause 34 (10.7) (a), clauses 34 (13) (a) and (b) and clause 51 (19.4) (a),
    i. persons and public bodies,
    ii. the manner of giving notice, and
    iii. information;
20. prescribing time periods for the purpose of subsections 17 (44.4), 34 (24.4) and 51 (52.4);
21. prescribing public bodies for the purpose of clause 26 (3) (a);
22. prescribing upper-tier municipalities for the purpose of subsection 28 (2);
23. prescribing matters for the purpose of subsection 28 (4.0.1);
24. prescribing conditions for the purpose of subsection 34 (16) and limitations for the purpose of subsection 34 (16.1);
25. prescribing rules of procedure for committees of adjustment;
26. prescribing criteria for the purposes of subsection 50 (18.1) and subsection 57 (6);
27. requiring that notice be given under subsections 51 (20) and 53 (5);
28. prescribing rules of procedure under subsection 53 (9) for councils and their delegates;
29. prescribing persons or public bodies for the purposes of subsection 53 (10);
30. prescribing rules of procedure for district land division committees constituted under section 55;
31. prescribing any other matter that is referred to in this Act as prescribed, other than matters that are prescribed under sections 70, 70.2 and 70.3. 2006, c. 23, s. 26.

Same

(2) A regulation made under this section or section 70 may be general or particular in its application. 1994, c. 23, s. 45.

Development permit system

70.2 (1) The Lieutenant Governor in Council may, by regulation,

(a) establish a development permit system that local municipalities may by by-law adopt to control land use development in the municipality; or

(b) delegate to local municipalities the power to establish a development permit system upon such conditions as may be set out in the regulation. 1994, c. 23, s. 46.

Contents

(2) A regulation under subsection (1) may,

(a) vary, supplement or override any provision in Part V or any municipal by-law passed under Part V as necessary to establish a development permit system;

(b) authorize or require a local municipality to pass a by-law to vary, supplement or override a by-law passed under Part V as necessary to establish a development permit system;

(c) exempt a municipality which has adopted or established a development permit system from any provision of Part V set out in the regulation;

(d) prohibit a municipality which has adopted or established a development permit system from passing a by-law under those provisions of Part V that are specified in the regulation;

(e) set out procedures for appealing to the Municipal Board in respect of a development permit or a condition in a permit, including prescribing persons or public bodies that may appeal to the Board in that regard;

(f) prescribe policies that must be contained in an official plan before a development permit system may be adopted or established;

(g) prescribe conditions or criteria that must be met before a municipality passes a by-law adopting or establishing a development permit system;

(h) prescribe conditions or criteria that must be met before a development permit may be issued or that must be included in a development permit;

(i) prescribe powers that the municipality may exercise in administering a development permit system;

(j) limit or restrict the manner in which municipalities may exercise the power to issue development permits or pass by-laws adopting or establishing a development permit system;

(k) establish different standards or procedures for different municipalities or classes of municipalities;

(l) authorize the municipalities to appoint employees to carry out the duties required under the development permit system and delegate to them the powers necessary to carry out these duties;

(m) require any owner of land, upon the request of the municipality, to enter into agreements with the municipality as a condition to obtaining a development permit;

(n) revoke any provision in a development permit by-law or any condition in a development permit in respect of any defined area and set out other provisions or conditions that apply in respect of that area;

(o) prescribe provisions that must be contained in a development permit system;

(p) exempt any development or class of development, any municipality or class of municipality or any areas from a development permit area or a development permit by-law;

(q) provide for transitional matters that may be necessary to implement a development permit system or to cease using a development permit system. 1994, c. 23, s. 46.

Same

(3) A regulation under this section may be general or particular in its application and may be restricted to those municipalities set out in the regulation. 1994, c. 23, s. 46.

Conflicts

(4) A regulation made under this section prevails over the provisions of any other Act that are specified in the regulation. 1994, c. 23, s. 46.

Registration of agreement

(5) An agreement entered into under clause (2) (m) may be registered against the land to which it applies and the municipality may enforce its provisions against the owner and, subject to the *Registry Act* and the *Land Titles Act*, any and all subsequent owners of the land. 1994, c. 23, s. 46; 2006, c. 23, s. 27.

Deemed conformity with official plan

(6) If a development permit by-law is passed under this section by the council of a municipality in which an official plan is in effect, subsection 24 (4) applies to the by-law in the same manner as if it were a by-law passed under section 34. 1994, c. 23, s. 46.

Conformity with upper tier plans

(7) If an approval authority has approved an official plan adopted by an upper-tier municipality, every development permit by-law that is then in effect in the area affected by the plan shall be amended to conform with the plan and subsections 27 (2) to (4) apply, with necessary modifications, to the amendment. 1994, c. 23, s. 46; 2002, c. 17, Sched. B, s. 27.

Offence

(8) Every person who contravenes a development permit by-law passed under this section or the conditions of a development permit is guilty of an offence and on conviction is liable to the fines set out in section 67 and section 67 applies to the offence. 1994, c. 23, s. 46.

Regulations

70.3 (1) The Lieutenant Governor in Council may by regulation authorize municipalities to pass by-laws establishing a system for allocating sewage and water services to land that is the subject of an application under section 51 upon such conditions as may be set out in the regulation.

Contents of regulations

(2) A regulation under subsection (1) may,

(a) prescribe conditions or criteria that must be met before a municipality passes a by-law establishing a system;

(b) prescribe powers that the municipality may exercise in administering the system including the power to issue permits or collect fees;

(c) prescribe policies that must be contained in an official plan before a system may be established;

(d) require that the official plan of the municipality contain policies regarding the allocation of services;

(e) authorize the by-law to apply to any class of plan of subdivision or description under the *Condominium Act* in respect of which draft approval was given before or after the by-law was passed; and

(f) provide for transitional matters that may be necessary to implement a system.

Same

(3) A regulation under this section may be general or particular in its application and may be restricted to those municipalities set out in the regulation. 1994, c. 23, s. 47.

Applications

(3.1) Despite sections 74 and 74.1, a regulation under this section may apply to any application for approval of a plan of subdivision or an application for approval of a condominium description under the *Condominium Act* in respect of which draft approval was given before or after this subsection came into force. 1996, c. 4, s. 38.

Conflicts

(4) A regulation made under this section prevails over the provisions of any other Act that are specified in the regulation. 1994, c. 23, s. 47.

Regulations

70.4 (1) The Minister may make regulations,

(a) providing for transitional matters respecting matters and proceedings that were commenced before or after the *Strong Communities (Planning Amendment) Act, 2004* came into force;

(b) modifying or replacing all or any part of the definition of "area of settlement" in subsection 1 (1). 2004, c. 18, s. 10.

Same

(2) Without limiting clause (1) (a), a regulation under that clause may,

(a) determine which matters and proceedings may be continued and disposed of under this Act, as it read on the day immediately before the *Strong Communities (Planning Amendment) Act, 2004* came into force and which matters and proceedings must be continued and disposed of under this Act as it read on the day the *Strong Communities (Planning Amendment) Act, 2004* came into force;

(b) for the purpose of clause (1) (a), deem a matter or proceeding to have been commenced on the date or in the circumstances prescribed in the regulation. 2004, c. 18, s. 10.

Retroactive

(3) A regulation under this section may be retroactive to December 15, 2003. 2004, c. 18, s. 10.

Scope

(4) A regulation under this section may be general or particular in its application. 2004, c. 18, s. 10.

Conflict

(5) A regulation under clause (1) (a) prevails over any provision of this Act specifically mentioned in the regulation. 2004, c. 18, s. 10.

Regulations

70.5 (1) The Minister may make regulations,

(a) providing for transitional matters respecting matters and proceedings that were commenced before or after the effective date;

(b) modifying or replacing all or any part of the definition of "area of employment" in subsection 1 (1). 2006, c. 23, s. 28.

Same

(2) A regulation under clause (1) (a) may, without limitation,

(a) determine which matters and proceedings may be continued and disposed of under this Act, as it read on the day before the effective date, and which matters and proceedings must be continued and disposed of under this Act as it read on the effective date;

(b) for the purpose of clause (1) (a), deem a matter or proceeding to have been commenced on the date or in the circumstances prescribed in the regulation. 2006, c. 23, s. 28.

Retroactive

(3) A regulation under clause (1) (a) may be retroactive to December 12, 2005. 2006, c. 23, s. 28.

Scope

(4) A regulation under this section may be general or particular in its application. 2006, c. 23, s. 28.

Conflict

(5) A regulation under clause (1) (a) prevails over any provision of this Act specifically mentioned in the regulation. 2006, c. 23, s. 28.

Definition

(6) In this section,

"effective date" means the date on which section 28 of the *Planning and Conservation Land Statute Law Amendment Act, 2006* comes into force. 2006, c. 23, s. 28.

Conflict

71. In the event of conflict between the provisions of this and any other general or special Act, the provisions of this Act prevail. R.S.O. 1990, c. P.13, s. 71.

Repeal of joint official plans

72. (1) REPEALED: 1994, c. 23, s. 48.

Repeal of joint official plans

(2) Unless continued in force by an order made by the Minister under subsection (3), every official plan of a joint planning area, other than an official plan that was adopted by the council of a county and other than an official plan of a joint planning area in a territorial district, that was in effect immediately before the 1st day of August, 1983, shall be deemed to have been repealed two years from that day, if not sooner repealed.

Continuation of joint official plans

(3) The Minister may by order provide for the remaining in force of any joint official plan or part or parts thereof that would otherwise be deemed to be repealed under subsection (2) and in such order may make such provision for the effectual continuation of such plan or the part or parts thereof as the Minister considers necessary, including provision for the allocation of the plan or part or parts thereof to any local municipality or county situate wholly or partly within the area to which the plan applies.

Amendment or repeal

(4) The Minister may approve any amendment or repeal of an official plan of a joint planning area that may be proposed by the council of any municipality affected by the official plan. R.S.O. 1990, c. P.13, s. 72 (2-4).

Continuation

72.1 Even though this Act may be amended after an official plan came into effect, the official plan remains in effect but may be amended or repealed in accordance with this Act as amended. 1996, c. 4, s. 39.

Planning areas and boards dissolved

73. (1) Except as provided in subsection (3), on the 1st day of August, 1983, all planning areas including joint planning areas and subsidiary planning areas together with the planning boards thereof were dissolved.

Assets and liabilities

(2) All the assets and liabilities of a planning board dissolved by this section are, in the case of a planning board of a planning area consisting of part or all of one municipality, assets and liabilities of such municipality and in the case of a planning board of a joint planning area, assets and liabilities of the municipalities that form part of the joint planning area and if such municipalities cannot agree as to the disposition of the assets and liabilities, the Municipal Board, upon the application of one or more of the municipalities, shall direct a final disposition thereof.

Planning areas that are continued

(3) Each planning area that immediately before the 1st day of August, 1983, consisted of the whole of two or more municipalities that are situate in a territorial district or consisted of the whole of one or more municipalities and territory without municipal organization or consisted solely of territory without municipal organization shall continue as a planning area under this Act without any change in name until altered or dissolved by the Minister.

Planning boards that are continued

(4) Each planning board of a planning area mentioned in subsection (3) shall continue as a planning board under this Act without any change in name or constitution until the planning area is dissolved or the name or constitution of the planning board is changed by the Minister. R.S.O. 1990, c. P.13, s. 73.

Transition

74. (1) In this section,

"former Act" means *The Planning Act*, being chapter 379 of the Revised Statutes of Ontario, 1980. R.S.O. 1990, c. P.13, s. 74 (1).

Matters, etc., continued

(2) Despite the repeal of the former Act by section 73 of the *Planning Act, 1983*, being chapter 1, any matter or proceeding mentioned in subsection (3) that was commenced under the former Act before the 1st day of August, 1983, shall be continued and finally disposed of under the former Act. R.S.O. 1990, c. P.13, s. 74 (2).

When matters, etc., deemed commenced

(3) For the purposes of subsection (2), a matter or proceeding shall be deemed to have been commenced, in the case of,

(a) an official plan or an amendment thereto or a repeal thereof, on the day the by-law adopting the plan or adopting or proposing the amendment or repeal of the plan is passed;

(b) redevelopment under section 22 of the former Act, on the day the by-law designating the redevelopment area is passed;

(c) subdivision of land under section 36 of the former Act, on the day the application is made under subsection (1) of that section;

(d) a zoning by-law or an amendment thereto, on the day the by-law is passed;

(e) development in a site plan control area, on the day the application is made under subsection 40 (4) of the former Act;

(f) an application made to a committee of adjustment, a land division committee or planning board for a planning area in a territorial district, on the day the application is made; and

(g) an application to the Minister for a consent under section 29 of the former Act, on the day the application is made. R.S.O. 1990, c. P.13, s. 74 (3).

Request to amend official plan

(4) Despite clause (3) (a), where a request to initiate an amendment to an official plan was received by a council before the 1st day of August, 1983,

(a) if the council refuses to propose the amendment or fails to propose it within thirty days from the receipt of the request and the person who made the request requests the Minister to refer the proposal to the Municipal Board, the matter shall be continued and finally disposed of under the former Act; or

(b) if the council accedes to the request, the matter shall be continued and finally disposed of under either the former Act or under this Act as determined by the council. R.S.O. 1990, c. P.13, s. 74 (4); 2009, c. 33, Sched. 2, s. 59 (2).

Report of planning board

(5) In the case of a request to initiate an amendment to an official plan that is continued and finally disposed of under the former Act as mentioned in subsection (4), section 17 of the former Act pertaining to the obtaining of a planning board report do not apply. R.S.O. 1990, c. P.13, s. 74 (5).

Request to amend zoning by-law

(6) Despite clause (3) (d), where an application to amend a zoning by-law was received by a council before the 1st day of August, 1983,

(a) if the council refuses the application or refuses or neglects to make a decision thereon within one month after the receipt of the application and the applicant appeals to the Municipal Board, the matter shall be continued and finally disposed of under the former Act;

(b) if the council accedes to the request, the matter shall be continued and finally disposed of under either the former Act or under this Act as determined by the council. R.S.O. 1990, c. P.13, s. 74 (6); 2009, c. 33, Sched. 2, s. 59 (3).

Transition

74.1 (1) Any matter or proceeding mentioned in subsection (2) that was commenced before March 28, 1995 shall be continued and finally disposed of under this Act as it read on March 27, 1995. 1996, c. 4, s. 40 (1).

Same

(2) For the purposes of subsection (1), a matter or proceeding shall be deemed to have been commenced, in the case of,

(a) an official plan or an amendment to it or a repeal of it, on the day the by-law adopting the plan or adopting the amendment or repeal of the plan is passed;

(b) a request for an official plan amendment by any person or public body, on the day the request was received, whether or not the official plan amendment is adopted;

(c) a zoning by-law or an amendment to it, on the day the by-law is passed;

(d) an application for an amendment to a zoning by-law that has been refused or has not been decided before the day this section comes into force, on the day the application is made;

(e) development in a site plan control area, on the day the application under subsection 41 (4) is made;

(f) an application for a minor variance under section 45, on the day the application is made;

(g) an application to amend or revoke an order under section 47, on the day the application is made;

(h) an application for the approval of a plan of subdivision under section 51, on the day the application is made; and

(i) an application for a consent under section 53, on the day the application is made. 1994, c. 23, s. 50; 1996, c. 4, s. 40 (2).

Transition

75. (1) Any matter or proceeding that was commenced on or after March 28, 1995 but before this section came into force shall be continued and finally disposed of under this Act as it read on the day before this section came into force.

Determination of date

(2) For the purposes of subsection (1), a matter or proceeding shall be deemed to have been commenced on the day determined under subsection 74.1 (2).

Exception

(3) Despite subsection (1), in exercising any authority in respect of a matter or proceeding referred to in subsection (5), the council of a municipality, a local board, a planning board, the Minister and the Municipal Board, shall have regard to the policy statements issued under subsection 3 (1) if,

(a) the matter or proceeding was commenced on or after March 28, 1995; and

(b) no decision has been made in respect of the matter or proceeding. 1996, c. 4, s. 41.

Exception, comments, etc.

(4) Despite subsection (1), in providing any comments, submissions or advice with respect to any matter or proceeding referred to in subsection (5), a minister or a ministry, board, commission

or agency of the government shall have regard to the policy statements issued under subsection 3 (1), if,

(a) the matter or proceeding was commenced on or after March 28, 1995; and

(b) no decision has been made in respect of the matter or proceeding. 1996, c. 4, s. 41; 1998, c. 15, Sched. E, s. 27 (12).

Deemed commencement

(5) For the purposes of clauses (3) (a) and (4) (a), a matter or proceeding shall be deemed to have been commenced,

(a) in the case of a request for an official plan amendment by any person or public body, on the day the request was received, whether or not the official plan amendment is adopted;

(b) in the case of an application for an amendment to a zoning by-law under section 34 that has been refused or has not been decided before the day this section comes into force, on the day the application is made;

(c) in the case of an application for a minor variance under section 45, on the day the application is made;

(d) in the case of an application for the approval of a plan of subdivision under section 51, on the day the application is made; and

(e) in the case of an application for a consent under section 53, on the day the application is made.

Determination of date of decision

(6) For the purposes of clauses (3) (b) and (4) (b), a decision shall be deemed to have been made,

(a) in the case of a request for an amendment to an official plan by any person or public body, on the day that,

(i) the council or planning board adopts all or part of the amendment,

(ii) the council or planning board refuses to adopt all or part of the amendment, or

(iii) the approval authority proposes to approve, modifies and approves or refuses to approve all or part of the amendment;

(b) in the case of an application for an amendment to a zoning by-law under section 34, on the day that,

(i) the council passes the amending by-law, or

(ii) the council refuses the application to amend the by-law;

(c) in the case of an application for a minor variance under section 45, on the day a decision is made by the committee of adjustment;

(d) in the case of an application for the approval of a plan of subdivision under section 51, on the day that the approval authority decides to give or refuses to give approval to the draft plan under subsection 51 (31); and

(e) in the case of an application for a consent under section 53, on the day the council or the Minister gives or refuses to give a provisional consent.

Transition

(7) If subsection (3) applies to all or part of an official plan, subsection 3 (8) of this Act, as it read before the coming into force of section 3 of the *Land Use Planning and Protection Act, 1996*, does not apply to the plan. 1996, c. 4, s. 41.

Transition – residential units

76. (1) If on November 16, 1995, a detached house, semi-detached house or row house was used or occupied as two residential units, section 1, subsections 16 (2), (3) and (4), 31 (3.1) and (3.2), 35 (1), (3) and (4) and 51 (28), (29) and (30) of this Act and Ontario Regulation 384/94, as they read on November 15, 1995, continue to apply to that house.

Same

(2) Section 1, subsections 16 (2), (3) and (4), 31 (3.1) and (3.2), 35 (1), (3) and (4) and 51 (28), (29) and (30) of this Act and Ontario Regulation 384/94, as they read on November 15, 1995, continue to apply to a detached house, a semi-detached house or a row house if on or before the day on which subsection 20 (1) of the *Land Use Planning and Protection Act, 1996* comes into force,

(a) a permit has been issued under section 8 or 10 of the *Building Code Act* permitting the erection, alteration, occupancy or use of the house for two residential units; and

(b) the building permit has not been revoked under section 8 of the *Building Code Act*. 1996, c. 4, s. 42.

County of Oxford

77. (1) The County of Oxford may exercise all the powers of a lower-tier municipality under this Act, and no lower-tier municipality in the County of Oxford shall, except as provided in this section, exercise any powers under this Act. 2002, c. 17, Sched. B, s. 28.

Committee of adjustment

(2) The council of each lower-tier municipality in the County of Oxford shall be deemed to be a committee of adjustment. 2002, c. 17, Sched. B, s. 28.

Powers of lower-tier municipality

(3) A lower-tier municipality in the County of Oxford may exercise the powers provided in section 28, except under subsection 28 (12), and in sections 29, 30, 32, 33, 34, 36, 37, 38, 39, 40, 41, 42, 44, 45, 46 and 69. 2002, c. 17, Sched. B, s. 28; 2006, c. 23, s. 29 (1).

Non-application of subs. (2)

(3.1) If a lower-tier municipality passes a by-law constituting and appointing a committee of adjustment under subsection 44 (1), subsection (2) of this section ceases to apply to the council of the lower-tier municipality on the day the by-law comes into force, except with respect to matters that, on that day, are before the council and have not been finally disposed of. 2006, c. 23, s. 29 (2).

Conflicts

(4) Despite subsection (3), if there is a conflict between a by-law passed by the County of Oxford and a by-law passed by a lower-tier municipality in the exercise of a power under subsection (3), the by-law of the County of Oxford prevails. 2002, c. 17, Sched. B, s. 28.

Land division committee

(5) Subsection 54 (1) does not apply to the County of Oxford and the County of Oxford may be or may constitute and appoint a land division committee for the purpose of giving consents under this Act. 2002, c. 17, Sched. B, s. 28.

PART I

CONSENT APPLICATIONS TO A MUNICIPAL COUNCIL

1. In this Part,

"approval authority" means,

(a) the municipal council that has the authority to grant a consent in respect of the land that is the subject of an application for a consent, and includes a delegate of the municipal council, or

(b) a municipal planning authority that has been delegated the authority to grant a consent in respect of the land that is the subject of an application for a consent, and includes a delegate of the municipal planning authority; ("autorité approbatrice")

"hazard distance" means the distance established as the hazard distance applicable to the propane operation referenced in a risk and safety management plan required under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("distance de danger")

"propane operation" means an operation in respect of which a person is required to prepare a risk and safety management plan under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("installation de propane")

"propane operator" means a person who is required to prepare a risk and safety management plan under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("exploitant d'une installation de propane")

"reserve" means a tract of land, the legal title of which is vested in the Crown in right of Canada, that has been set apart by the Crown for the use and benefit of a First Nation; ("réserve")

"subject land" means the land to be severed and the land to be retained. ("terrain visé") O. Reg. 197/96, s. 1; O. Reg. 547/06, s. 1; O. Reg. 469/09, s. 1.

2. The information and material to be provided to the approval authority by an applicant under subsection 53 (2) of the Act are set out in Schedule 1. O. Reg. 547/06, s. 2.

3. (1) This section applies to notice of an application for a consent under clause 53 (5) (a) of the Act. O. Reg. 547/06, s. 2.

(2) Notice shall be given in the manner described in the following subsections of this section:

1. Subsection (3) or (6).
2. Subsection (8).
3. Subsection (9).
4. Subsection (10). O. Reg. 547/06, s. 2.

(3) Notice shall be given,

(a) by personal service or ordinary mail, to every owner of land within 60 metres of the subject land, subject to subsections (4) and (5); and

(b) by posting a notice, clearly visible and legible from a public highway or other place to which the public has access, at every separately assessed property within the subject land, or, if posting on the property is impractical, at a nearby location chosen by the official described in subsection (7). O. Reg. 547/06, s. 2.

(4) For the purposes of clause (3) (a), the owner of land is deemed to be the person shown on the last revised assessment roll of the municipality or on the current provincial land tax roll at the address shown on the roll, but if the approval authority is a municipality and the clerk of the municipality has received written notice of a change of ownership, the notice shall be given to the new owner instead, at the address set out in the notice of change of ownership. O. Reg. 547/06, s. 2.

(5) For the purposes of clause (3) (a), if a condominium development is located within 60 metres of the subject land, notice may be given to the condominium corporation, according to its most recent address for service or mailing address as registered under section 7 of the *Condominium Act, 1998*, instead of being given to all owners assessed in respect of the condominium development. O. Reg. 547/06, s. 2.

(6) Notice shall be given by publishing a notice in a newspaper that, in the opinion of the official described in subsection (7), is of sufficiently general circulation in the area adjoining the subject land that it would give the public in the area reasonable notice of the application. O. Reg. 547/06, s. 2.

(7) The official for the purposes of subsections (3) and (6) is,

(a) the clerk of the municipality, if the approval authority is,

(i) the council of the municipality or a committee of the council, or

(ii) an appointed officer;

(b) the secretary-treasurer of the land division committee or committee of adjustment, if the approval authority is the land division committee or committee of adjustment; and

(c) the secretary-treasurer of the municipal planning authority, if the approval authority is,

(i) a municipal planning authority or a committee of the authority, or

(ii) an appointed officer. O. Reg. 547/06, s. 2.

(8) Every person and public body that has given the approval authority a written request for a notice to which this section applies (including the person's or public body's address) shall be given notice by personal service, ordinary mail or fax. O. Reg. 547/06, s. 2.

(9) Notice shall be given, by personal service, ordinary mail or fax, to all the following persons and public bodies, except those who have notified the approval authority that they do not wish to receive notice:

1. The clerk of every local municipality in which the subject land is located, or the secretary-treasurer of every municipal planning authority or planning board in whose planning area the subject land is located.

2. The clerk of every upper-tier municipality in which the subject land is located.

3. The secretary-treasurer of a conservation authority, if the subject land is within an area that is under the jurisdiction of the conservation authority.

3.1 Every propane operator of a propane operation, if,

i. any part of the propane operation's hazard distance is within the subject land, and

ii. the approval authority has been notified of the propane operation's hazard distance by a director appointed under section 4 of the *Technical Standards and Safety Act, 2000*.

4. TransCanada PipeLines Limited, if any of the subject land is within 200 metres of a pipeline owned and operated by TransCanada PipeLines Limited.

5. If any of the subject land is within 300 metres of a railway line, the secretary of the company operating the railway line.
6. If any of the subject land is within or abuts the area covered by the Niagara Escarpment Plan, the senior planner of the district office of the Niagara Escarpment Commission having jurisdiction over that land or the area that it abuts, as the case may be.
7. The Niagara Parks Commission, if any of the subject land adjoins the Niagara Parkway or is in the jurisdiction of the Niagara Parks Commission.
8. The St. Lawrence Parks Commission, if any of the subject land adjoins the 1000 Islands Parkway and is within the jurisdiction of the St. Lawrence Parks Commission under section 9 of the *St. Lawrence Parks Commission Act*.
9. Parks Canada, if any of the subject land adjoins a historic site, park or historic canal under the jurisdiction of Parks Canada.
10. The chief of every First Nation council, if the First Nation is located on a reserve any part of which is within one kilometre of the subject land. O. Reg. 547/06, s. 2; O. Reg. 469/09, ss. 2, 3.

(10) Notice of an application for consent under clause 53 (5) (a) of the Act shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located, if the regional director has given the approval authority a written request to be given such notices. O. Reg. 547/06, s. 2.

(11) A notice given to the persons and public bodies set out in subsections (9) and (10) shall also include a copy of the application. O. Reg. 547/06, s. 2.

(12) A notice under subsection (9) that is given by a local municipality on the request of the approval authority under subsection 53 (7.1) of the Act shall include, if the approval authority so directs, a request that written comments be submitted to the approval authority. O. Reg. 547/06, s. 2.

(13) A notice, other than a notice that is given by posting as described in clause (3) (b), shall include the following:

1. An explanation of the purpose and effect of the application.
2. A description of the subject land, a key map showing the subject land, or an explanation why no description or key map is provided.
3. Where and when additional information and material regarding the application will be available to the public for inspection.
4. The following statement:

   If a person or public body that files an appeal of a decision of (*name of the approval authority*) in respect of the proposed consent does not make written submissions to (*name of the approval authority*) before it gives or refuses to give a provisional consent, the Ontario Municipal Board may dismiss the appeal.

5. The following statement:

   If you wish to be notified of the decision of (*name of the approval authority*) in respect of the proposed consent, you must make a written request to (*name and address of the approval authority*).

6. If it is known that the subject land is the subject of an application under the Act for a minor variance or for an amendment to an official plan, a zoning by-law or a Minister's zoning order, a statement of that fact and the file number of the application. O. Reg. 547/06, s. 2.

(14) A notice that is given by posting as described in clause (3) (b) shall include the following:

1. An explanation of the purpose and effect of the application.
2. Where and when additional information and material regarding the application will be available to the public for inspection.
3. How to obtain a copy of the notice described in subsection (13). O. Reg. 547/06, s. 2.

4. Where a local municipality gives notice of an application for consent pursuant to a request by an approval authority under subsection 53 (7.1) of the Act, it shall submit to the approval authority both of the following:

1. A certified copy of the written notice of the application.
2. An affidavit or sworn declaration by an employee of the local municipality certifying that the requirements for the giving of notice under clause 53 (5) (a) of the Act have been complied with. O. Reg. 197/96, s. 4.

5. A record to be compiled by the approval authority and forwarded to the Municipal Board under clause 53 (15) (a) of the Act shall include the following:

1. The original or a certified copy of the application received by the approval authority.

1.1 The original or a certified copy of the prescribed information and material received by the approval authority under subsection 53 (2) of the Act.

1.2 If applicable, the original or a certified copy of any other information and material that is required to be provided by the official plan of the municipality or planning board.

2. The original or a certified copy of the notice of appeal and the date it was received.
3. The original or a copy of all written submissions and comments received.
4. If a public meeting is held, a copy of the minutes of the public meeting, if any, and a list of all persons and public bodies that made oral submissions at the public meeting.
5. A copy of any planning report considered by the approval authority. O. Reg. 197/96, s. 5; O. Reg. 547/06, s. 3.

6. (1) Notice of the decision of the approval authority under subsection 53 (17) of the Act shall include the following:

1. A copy of the decision of the approval authority including the conditions, if any.
2. The last date for filing a notice of appeal of the decision of the approval authority and a statement that the notice of appeal must be filed with the approval authority, must set out the reasons for the appeal and must be accompanied by the fee required by the Ontario Municipal Board.
3. If applicable, the following statement:

   You will be entitled to receive notice of any changes to the conditions of the provisional consent if you have made a written request to be notified of changes to the conditions of the provisional consent.

4. The following statement:

Only individuals, corporations and public bodies may appeal decisions in respect of applications for consent to the Ontario Municipal Board. A notice of appeal may not be filed by an unincorporated association or group. However, a notice of appeal may be filed in the name of an individual who is a member of the association or group on its behalf.

5. If it is known that the land that is the subject of the application for consent is the subject of an application under the Act for a minor variance or for an amendment to an official plan, a zoning by-law or a Minister's zoning order, a statement of that fact and the file number of the application. O. Reg. 197/96, s. 6 (1); O. Reg. 547/06, s. 4 (1).

(2) Notice of the decision of the approval authority under subsection 53 (17) of the Act shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located, if the regional director has given the approval authority a written request to be given notice of such decisions. O. Reg. 547/06, s. 4 (2).

7. (1) Notice of changes to the conditions of a provisional consent under subsection 53 (24) of the Act shall include the following:

1. The proposed changes.
2. The last date for filing a notice of appeal of the conditions of the provisional consent and a statement that the notice of appeal must be filed with the approval authority, must set out the reasons for the appeal and must be accompanied by the fee required by the Ontario Municipal Board.
3. The following statement:

   Only individuals, corporations and public bodies may appeal decisions in respect of applications for consent to the Ontario Municipal Board. A notice of appeal may not be filed by an unincorporated association or group. However, a notice of appeal may be filed in the name of an individual who is a member of the association or group on its behalf. O. Reg. 197/96, s. 7 (1).

(2) Notice of changes to the conditions of a provisional consent under subsection 53 (24) of the Act shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located, if the regional director has given the approval authority a written request to be given notice of such changes. O. Reg. 547/06, s. 5.

8. A record to be compiled by the approval authority and forwarded to the Municipal Board under clause 53 (28) (a) of the Act shall include the following:

1. The original or a certified copy of the application received by the approval authority.

1.1 The original or a certified copy of the prescribed information and material received by the approval authority under subsection 53 (2) of the Act.

1.2 If applicable, the original or a certified copy of any other information and material that is required to be provided by the official plan of the municipality or planning board.

2. A copy of the decision of the approval authority.
3. The original or a certified copy of the notice of appeal and the date it was received.
4. The original or a copy of all written submissions and comments received.
5. If notice of an application for consent is given by the local municipality, the affidavit or sworn declaration submitted to the approval authority under paragraph 2 of section 4.

5.1 A statement by an employee of the approval authority as to whether the decision of the approval authority,

i. is consistent with the policy statements issued under subsection 3 (1) of the Act,

ii. conforms to or does not conflict with any applicable provincial plan or plans, and

iii. conforms to the official plan of the municipality or planning board.

6. If notice of an application for consent is given by the approval authority, an affidavit or sworn declaration of an employee of the approval authority certifying that the requirements for the giving of notice under subsections 53 (17) and (24) of the Act have been complied with.

7. If a public meeting was held, a copy of the minutes of the public meeting, if any, and a list of all persons and public bodies that made oral submissions at the public meeting.

8. A copy of any planning report considered by the approval authority. O. Reg. 197/96, s. 8; O. Reg. 547/06, s. 6.

9. (1) If the approval authority, in granting a consent, has not stipulated that subsection 50 (3) or (5) of the Act shall apply to any subsequent conveyance of or transaction involving the same parcel, the certificate required under subsection 53 (42) of the Act shall be one of the following:

1. A stamp in Form 1, if the certificate is affixed to a deed or other document relating to the transaction in respect of which the consent has been given.

2. A Certificate in Form 2 in all other cases. O. Reg. 197/96, s. 9 (1).

(2) If the approval authority, in granting a consent, has stipulated that subsection 50 (3) or (5) of the Act shall apply to any subsequent conveyance of or transaction involving the same parcel, the certificate required under subsection 53 (42) of the Act shall be one of the following:

1. A stamp in Form 3, if it is affixed to a deed or other document relating to the transaction in respect of which the consent has been given.

2. A Certificate in Form 4 in all other cases. O. Reg. 197/96, s. 9 (2).

PART II
CONSENT APPLICATIONS TO THE MINISTER

10. The information and material to be provided to the Minister by an applicant under subsection 53 (2) of the Act are set out in Schedule 1. O. Reg. 547/06, s. 7.

11. (1) Notice of an application for consent under clause 53 (5) (a) of the Act shall be given in the manner described in the following subsections of this section:

1. Subsection (2) or (3).

2. Subsection (6). O. Reg. 547/06, s. 7.

(2) Notice shall be given by publishing a notice in a newspaper that, in the Minister's opinion, is of sufficiently general circulation in the area adjoining the subject land that it would give the public in the area reasonable notice of the application. O. Reg. 547/06, s. 7.

(3) Notice shall be given by personal service or ordinary mail to every owner of land within 60 metres of the subject land, subject to subsections (4) and (5). O. Reg. 547/06, s. 7.

(4) For the purposes of subsection (3), the owner of land is deemed to be the person shown on the last revised assessment roll of the municipality or on the current provincial land tax roll at the address shown on the roll. O. Reg. 547/06, s. 7.

(5) For the purposes of subsection (3), if a condominium development is located within 60 metres of the subject land, notice may be given to the condominium corporation, according to its most recent address for service or mailing address as registered under section 7 of the *Condominium Act, 1998*, instead of being given to all owners assessed in respect of the condominium development. O. Reg. 547/06, s. 7.

(6) Every person and public body that has given the Minister a written request for a notice to which this section applies (including the person's or public body's address) shall be given notice by personal service, ordinary mail or fax. O. Reg. 547/06, s. 7.

12. Where a local municipality or planning board gives notice of an application for consent pursuant to a request by the Minister under subsection 53 (7.1) of the Act, it shall submit to the Minister both of the following:

1. A certified copy of the written notice of the application.
2. An affidavit or sworn declaration by an employee of the local municipality or planning board certifying that the requirements for the giving of notice under clause 53 (5) (a) of the Act have been complied with. O. Reg. 197/96, s. 12.

13. Sections 5 to 9 apply, with necessary modifications, to applications for consent to the Minister. O. Reg. 547/06, s. 8.

14. OMITTED (REVOKES OTHER REGULATIONS AND PROVIDES FOR TRANSITION). O. Reg. 197/96, s. 14; O. Reg. 547/06, s. 9.

15. OMITTED (PROVIDES FOR COMING INTO FORCE OF PROVISIONS OF THE ENGLISH VERSION OF THIS REGULATION). O. Reg. 197/96, s. 15.

SCHEDULE 1
INFORMATION AND MATERIAL TO BE INCLUDED IN AN APPLICATION FOR CONSENT UNDER SUBSECTION 53 (2) OF THE ACT

1. The name, address, telephone number and, if applicable, the e-mail address of the owner of the subject land, and of the agent if the applicant is the owner's authorized agent.

2. The date of the application.

3. The type and purpose of the proposed transaction (*for example, a transfer for the creation of a new lot, a lot addition, an easement, a charge, a lease or a correction of title*).

4. If known, the name of the person to whom the land or an interest in the land is to be transferred, charged or leased.

5. A description of the subject land, including such information as the municipality, or the geographic township in unorganized territory, concession and lot numbers, registered plan and lot numbers, reference plan and part numbers, and street names and numbers.

6. Whether there are any easements or restrictive covenants affecting the subject land.

7. If the answer to section 6 is yes, a description of each easement or covenant and its effect.

8. The following information, with respect to the land intended to be severed and the land intended to be retained:

(a) the frontage, depth and area, in metric units;

(b) the existing and proposed uses of the land;

(c) the existing and proposed buildings and structures on the land;

(d) whether access to the land will be,

(i) by a provincial highway, a municipal road that is maintained all year or seasonally, another public road or a right of way, or

(ii) by water;

(e) if access to the land will be by water only, the parking and docking facilities to be used and the approximate distance of these facilities from the land and the nearest public road;

(f) whether water will be provided by a publicly owned and operated piped water system, a privately owned and operated individual or communal well, a lake or other water body or other means; and

(g) whether sewage disposal will be provided by a publicly owned and operated sanitary sewage system, a privately owned and operated individual or communal septic system, a privy or other means.

9. The current designation of the subject land in the applicable official plan.

10. If known,

(a) whether the subject land has ever been the subject of an application for approval of a plan of subdivision under section 51 of the Act or a consent under section 53 of the Act; and

(b) if the answer to clause (a) is yes, the file number of the application and the status of the application.

11. Whether any land has been severed from the parcel originally acquired by the owner of the subject land.

12. If the answer to section 11 is yes, the date of the transfer, the name of the transferee and the uses of the severed land.

13. If known,

(a) whether the subject land is the subject of any other application under the Act, such as an application for an amendment to an official plan, a zoning by-law or a Minister's zoning order, an application for a minor variance or an application for an approval of a plan of subdivision or a consent; and

(b) if the answer to clause (a) is yes, the file number of the application and the status of the application.

14. A sketch showing the following, in metric units:

(a) the boundaries and dimensions of any land abutting the subject land that is owned by the owner of the subject land;

(b) the approximate distance between the subject land and the nearest township lot line or landmark such as a bridge or railway crossing;

(c) the boundaries and dimensions of the subject land, the part that is intended to be severed and the part that is intended to be retained;

(d) the location of all land previously severed from the parcel originally acquired by the current owner of the subject land;

(e) the approximate location of all natural and artificial features (*for example, buildings, railways, roads, watercourses, drainage ditches, banks of rivers or streams, wetlands, wooded areas, wells and septic tanks*) that,

(i) are located on the subject land and on land that is adjacent to it, and

(ii) in the applicant's opinion, may affect the application;

(f) the current uses of land that is adjacent to the subject land (*for example, residential, agricultural or commercial*);

(g) the location, width and name of any roads within or abutting the subject land, indicating whether it is an unopened road allowance, a public travelled road, a private road or a right of way;

(h) if access to the subject land will be by water only, the location of the parking and boat docking facilities to be used; and

(i) the location and nature of any easement affecting the subject land.

15. Whether the application is consistent with policy statements issued under subsection 3 (1) of the Act.

16. Whether the subject land is within an area of land designated under any provincial plan or plans.

17. If the answer to section 16 is yes, whether the application conforms to or does not conflict with the applicable provincial plan or plans.

18. If the applicant is not the owner of the subject land, the owner's written authorization to the applicant to make the application.

19. An affidavit or sworn declaration by the applicant that the information required under this Schedule and provided by the applicant is accurate.

O. Reg. 547/06, s. 10.

Planning Act

ONTARIO REGULATION 200/96
MINOR VARIANCE APPLICATIONS

1. In this Regulation,

"committee" means the committee of adjustment having jurisdiction in the area in which the subject land is situate; ("comité")

"hazard distance" means the distance established as the hazard distance applicable to the propane operation referenced in a risk and safety management plan required under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("distance de danger")

"propane operation" means an operation in respect of which a person is required to prepare a risk and safety management plan under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("installation de propane")

"propane operator" means a person who is required to prepare a risk and safety management plan under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("exploitant d'une installation de propane")

"reserve" means a tract of land, the legal title of which is vested in the Crown in Right of Canada, that has been set apart by the Crown for the use and benefit of a First Nation; ("réserve")

"secretary-treasurer" means the secretary-treasurer of a committee; ("secrétaire-trésorier")

"subject land" means the land that is the subject of the application for a minor variance or permission under section 45 of the Act. ("terrain visé") O. Reg. 200/96, s. 1; O. Reg. 471/09, s. 1.

2. The information and material to be provided by an applicant under section 45 of the Act are set out in the Schedule. O. Reg. 200/96, s. 2.

3. (1) At least 10 days before the day of the hearing on an application for a minor variance or permission under subsection 45 (5) of the Act, notice shall be given in compliance with subsection (2) or (4) but need not be given in compliance with more than one of those subsections. O. Reg. 200/96, s. 3 (1); O. Reg. 508/98, s. 1 (1).

(2) Notice under subsection (1) may be given by doing both of the following:

1. Giving notice by personal service or prepaid first class mail to every owner of land within 60 metres of the area to which the application applies. However, if a condominium development is located within 60 metres of the area, notice may be given to the condominium corporation, according to its most recent address for service or mailing address as registered under section 7 of the *Condominium Act, 1998*, instead of being given to all owners assessed in respect of the condominium development.
2. Posting a notice, clearly visible and legible from a public highway or other place to which the public has access, at every separately assessed property in the area to which the application applies or, where posting on the property is impractical, at a nearby location chosen by the secretary-treasurer. O. Reg. 200/96, s. 3 (2); O. Reg. 471/09, s. 2.

(3) REVOKED: O. Reg. 508/98, s. 1 (2).

(4) Notice under subsection (1) may be given by publication in a newspaper that, in the opinion of the secretary-treasurer, is of sufficiently general circulation in the area to which the application applies to give the public reasonable notice of the hearing. O. Reg. 200/96, s. 3 (4).

(5) For the purposes of subsection (2), the owner of land shall be deemed to be the person shown on the last revised assessment roll of the municipality or on the current provincial land tax roll at the address shown on the roll. However, if the approval authority is a municipality and the clerk of the municipality has received written notice of a change of ownership, the notice shall be given instead to the new owner at the address set out in the notice. O. Reg. 508/98, s. 1 (3).

(6) Despite subsections (2) and (3), where a zoning by-law restricts the use of the land which is the subject of an application to detached, semi-detached or duplex housing and the application is for a minor variance under subsection 45 (1) of the Act, the committee of adjustment may direct that the area of notification set out in those subsections be reduced to 30 metres. O. Reg. 200/96, s. 3 (6); O. Reg. 432/96, s. 1 (1).

(7) Every person and public body that has given the secretary-treasurer a written request for notice of a hearing on an application for a minor variance or permission under subsection 45 (1) or (2) of the Act shall be given notice of the hearing by personal service, prepaid first class mail or telephone transmission of a facsimile of the notice. O. Reg. 200/96, s. 3 (7); O. Reg. 432/96, s. 1 (2).

(8) A written request given under subsection (7) shall show the address of the person or public body. O. Reg. 200/96, s. 3 (8).

(9) Notice of a hearing on an application for a minor variance or permission under subsection 45 (5) of the Act shall be given by personal service, prepaid first class mail or telephone transmission of a facsimile of the notice to all of the following persons and public bodies except those who have notified the committee that they do not wish to receive notice:

1. The clerk of every local municipality having jurisdiction in the area to which the application applies.
2. The clerk of every county and every regional or district municipality having jurisdiction in the area to which the application applies.
3. The clerk of the area municipality in the area to which the application applies, if the notice is given by The Regional Municipality of Haldimand-Norfolk, The Regional Municipality of Sudbury or the County of Oxford.
4. The secretary-treasurer of every planning board or municipal planning authority having jurisdiction in the area to which the application applies.
5. The secretary-treasurer of every conservation authority having jurisdiction in the area to which the application applies.

5.1 Every propane operator of a propane operation, if,

   i. any part of the propane operation's hazard distance is within the area to which the application applies, and

   ii. the secretary-treasurer has been notified of the propane operation's hazard distance by a director appointed under section 4 of the *Technical Standards and Safety Act, 2000*.

6. If the subject land is within or abuts the area covered by the Niagara Escarpment Plan,

   i. the senior planner of the district office of the Niagara Escarpment Commission having jurisdiction over that land, and

   ii. the senior planner of the district office of the Niagara Escarpment Commission having jurisdiction over the area that abuts that land.

7. The chief of every First Nation council, if the First Nation is located on a reserve any part of which is within one kilometre of the subject land. O. Reg. 200/96, s. 3 (9); O. Reg. 508/98, s. 1 (4); O. Reg. 471/09, ss. 3, 4.

(10) Notice of a hearing on an application for a minor variance or permission under section 45 of the Act shall be given by personal service, prepaid first class mail or telephone transmission of a facsimile of the notice to the director of the Provincial Planning Services Branch of the Ministry of Municipal Affairs

and Housing, if the director has given the secretary-treasurer a written request to be given notice of hearings on applications for a minor variance or permission. O. Reg. 200/96, s. 3 (10); O. Reg. 508/98, s. 1 (5).

(11) Notice of a hearing shall include the following:

1. The date, time and location of the hearing.
2. An explanation of the purpose and effect of the proposed minor variance or permission.
3. A description of the subject land or a key map showing the location of the subject land.
4. Where and when additional information regarding the application will be available to the public for inspection.
5. If it is known that the subject land is the subject of an application under the Act or for approval of a plan of subdivision or a consent, a statement of that fact and the file number of the application.

(12) Despite subsection (11), if notice of a hearing is given by posting on the subject land, the notice shall include the following:

1. The date, time and location of the hearing.
2. An explanation of the purpose and effect of the proposed minor variance or permission.
3. Where and when additional information regarding the application will be available to the public for inspection.
4. How to obtain a copy of the written notice of the hearing. O. Reg. 200/96, s. 3 (11, 12).

4. OMITTED (REVOKES OTHER REGULATIONS AND PROVIDES FOR TRANSITION). O. Reg. 200/96, s. 4.

5. OMITTED (PROVIDES FOR COMING INTO FORCE OF PROVISIONS OF THE ENGLISH VERSION OF THIS REGULATION). O. Reg. 200/96, s. 5.

SCHEDULE
INFORMATION AND MATERIAL TO BE PROVIDED IN AN APPLICATION UNDER SECTION 45 OF THE ACT

1. The name, address and telephone number of the owner of the subject land and of the agent if the applicant is an agent authorized by the owner.
2. The current designation of the subject land in any applicable official plan.
3. The current zoning of the subject land.
4. The nature and extent of the relief from the zoning by-law.
5. The reason why the proposed use cannot comply with the provisions of the zoning by-law.
6. The description of the subject land, such as the municipality, concession and lot numbers, registered plan and lot numbers, reference plan and part numbers and name of street and number.
7. The frontage, depth and area of the subject land.
8. Whether access to the subject land is by a provincial highway, a municipal road that is maintained all year or seasonally, another public road or a right of way or by water.
9. If access to the subject land is by water only, the parking and docking facilities used or to be used and the approximate distance of these facilities from the subject land and the nearest public road.
10. The existing uses of the subject land.
11. Whether there are any buildings or structures on the subject land.
12. If the answer to item 11 is yes, for each building or structure the type of building or structure, the setback from the front lot line, rear lot line and side lot lines, the height in metres of the building or structure and the dimensions or floor area of the building or structure.

13. The proposed uses of the subject land.
14. Whether any buildings or structures are proposed to be built on the subject land.
15. If the answer to item 14 is yes, for each building or structure the type of building or structure, the setback from the front lot line, rear lot line, and side lot lines, the height in metres of the building or structure and the dimensions or floor area of the building or structure.
16. The date the subject land was acquired by the current owner.
17. The date the existing buildings or structures on the subject land were constructed.
18. The length of time that the existing uses of the subject land have continued.
19. Whether water is provided to the subject land by a publicly owned and operated piped water system, a privately owned and operated individual or communal well, a lake or other water body or other means.
20. Whether sewage disposal is provided to the subject land by a publicly owned and operated sanitary sewage system, a privately owned and operated individual or communal septic system, a privy or other means.
21. Whether storm drainage is provided by sewers, ditches, swales or other means.
22. If known, whether the subject land is the subject of an application under the Act for approval of a plan of subdivision or a consent.
23. If the answer to item 22 is yes, and if known, the file number of the application and the status of the application.
24. If known, whether the subject land has ever been the subject of an application under section 45 of the Act.
25. A sketch showing the following:
    i. The boundaries and dimensions of the subject land.
    ii. The location, size and type of all existing and proposed buildings and structures on the subject land, indicating the distance of the buildings or structures from the front yard lot line, rear yard lot line and the side yard lot lines.
    iii. The approximate location of all natural and artificial features on the subject land and on land that is adjacent to the subject land that, in the opinion of the applicant, may affect the application. Examples include buildings, railways, roads, watercourses, drainage ditches, river or stream banks, wetlands, wooded areas, wells and septic tanks.
    iv. The current uses on land that is adjacent to the subject land.
    v. The location, width and name of any roads within or abutting the subject land, indicating whether it is an unopened road allowance, a public travelled road, a private road or a right of way.
    vi. If access to the subject land is by water only, the location of the parking and docking facilities to be used.
    vii. the location and nature of any easement affecting the subject land.
26. An affidavit or sworn declaration by the applicant that the information required under this Schedule and provided by the applicant is true.

Schedule 1	Information and material to be provided with a request under subsection 22 (4) of the Act

Definitions

1. In this Regulation,

"hazard distance" means the distance established as the hazard distance applicable to the propane operation referenced in a risk and safety management plan required under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("distance de danger")

"propane operation" means an operation in respect of which a person is required to prepare a risk and safety management plan under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("installation de propane")

"propane operator" means a person who is required to prepare a risk and safety management plan under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("exploitant d'une installation de propane")

"reserve" means a tract of land, the legal title of which is vested in the Crown in right of Canada, that has been set apart by the Crown for the use and benefit of a First Nation; ("réserve")

"subject land" means the land to which a proposed official plan or plan amendment applies. ("terrain visé") O. Reg. 543/06, s. 1; O. Reg. 467/09, s. 1.

Information and material for review (s. 17 (15) of Act)

2. For the purposes of clauses 17 (15) (a) and (b) of the Act, the council shall ensure that the appropriate approval authority and the prescribed public bodies are given an opportunity to review the following information and material in the course of the preparation of a plan:

1. A description of the subject land, including such information as the municipality, or the geographic township in unorganized territory, concession and lot numbers, reference plan and part numbers, and street names and numbers.
2. If known, the approximate area of the subject land, in metric units.
3. Whether the proposed amendment changes, replaces or deletes a policy in the official plan.
4. If the answer to paragraph 3 is yes, the policy to be changed, replaced or deleted.
5. Whether the proposed amendment adds a policy to the official plan.
6. The purpose of the proposed official plan amendment.
7. The current designation of the subject land in the official plan and the land uses that the designation authorizes.
8. Whether the proposed amendment changes or replaces a designation in the official plan.
9. If the proposed amendment changes or replaces a designation in the official plan, the designation to be changed or replaced.
10. The land uses that the proposed amendment would authorize.
11. Whether water will be provided to the subject land by a publicly owned and operated piped water system, a privately owned and operated individual or communal well, a lake or other water body, or other means.

12. Whether sewage disposal will be provided to the subject land by a publicly owned and operated sanitary sewage system, a privately owned and operated individual or communal septic system, a privy or other means.
13. If the proposed amendment would permit development on a privately owned and operated individual or communal septic system and more than 4500 litres of effluent would be produced per day as a result of the development being completed,
    i. a servicing options report, and
    ii. a hydrogeological report.
14. Whether the subject land or land within 120 metres of it is the subject of an application under the Act for,
    i. a minor variance or a consent,
    ii. an amendment to an official plan, a zoning by-law or a Minister's zoning order, or
    iii. approval of a plan of subdivision or a site plan.
15. If the answer to paragraph 14 is yes, the following information about each application:
    i. its file number,
    ii. the name of the approval authority considering it,
    iii. the land it affects,
    iv. its purpose,
    v. its status, and
    vi. its effect on the proposed amendment.
16. Whether the proposed amendment is consistent with the policy statements issued under subsection 3 (1) of the Act.
17. Whether the subject land is within an area of land designated under any provincial plan or plans.
18. If the answer to paragraph 17 is yes, whether the proposed amendment conforms to or does not conflict with the provincial plan or plans.
19. The original or a certified copy of any other information and material that is required to be provided by the official plan of the municipality or planning board. O. Reg. 543/06, s. 2.

Notice of public meeting and open house (s. 17 (17) of Act)

3. (1) This section applies to notice of a public meeting and to notice of an open house, if any, for the purposes of subsection 17 (17) of the Act. O. Reg. 543/06, s. 3 (1).

(2) Notice of a public meeting and notice of an open house may be given together or separately. O. Reg. 543/06, s. 3 (2).

(3) Notice shall be given in the manner described in the following subsections of this section:

1. Subsection (4) or (7).
2. Subsection (8).
3. Subsection (9).

4. Subsection (11) or (12). O. Reg. 543/06, s. 3 (3).

(4) Notice shall be given,

(a) by personal service or ordinary mail, to every owner of land within 120 metres of the subject land, subject to subsections (5) and (6); and

(b) by posting a notice, clearly visible and legible from a public highway or other place to which the public has access, at every separately assessed property within the subject land or, if posting on the property is impractical, at a nearby location chosen by the clerk of the municipality or the secretary-treasurer of the planning board. O. Reg. 543/06, s. 3 (4).

(5) For the purposes of clause (4) (a), the owner of land is deemed to be the person shown on the last revised assessment roll of the municipality or on the current provincial land tax roll at the address shown on the roll, but if the approval authority is a municipality and the clerk of the municipality has received written notice of a change of ownership, the notice shall be given to the new owner instead, at the address set out in the notice of change of ownership. O. Reg. 543/06, s. 3 (5).

(6) For the purposes of clause (4) (a), if a condominium development is located within 120 metres of the subject land, notice may be given to the condominium corporation, according to its most recent address for service or mailing address as registered under section 7 of the *Condominium Act, 1998*, instead of being given to all owners assessed in respect of the condominium development. O. Reg. 543/06, s. 3 (6).

(7) Notice shall be given by publishing a notice in a newspaper that, in the opinion of the clerk of the municipality or the secretary-treasurer of the planning board, is of sufficiently general circulation in the area to which the proposed official plan or plan amendment would apply that it would give the public reasonable notice of the public meeting or open house, as the case may be. O. Reg. 543/06, s. 3 (7).

(8) Every person and public body that has given the clerk of the municipality or the secretary-treasurer of the planning board a written request for a notice to which this section applies (including the person's or public body's address) shall be given notice by personal service, ordinary mail or fax. O. Reg. 543/06, s. 3 (8).

(9) Notice shall be given, by personal service, ordinary mail or fax, to all the following persons and public bodies, except those who have notified the clerk of the municipality or the secretary-treasurer of the planning board that they do not wish to receive notice:

1. The clerk of the approval authority of the proposed official plan or plan amendment, if the approval authority is not the Minister.
2. The clerk of every municipality or the secretary-treasurer of every municipal planning authority having jurisdiction in the area to which the proposed official plan or plan amendment would apply.
3. The secretary of every school board having jurisdiction in the area to which the proposed official plan or plan amendment would apply.
4. The secretary-treasurer of every conservation authority having jurisdiction in the area to which the proposed official plan or plan amendment would apply.
5. The secretary of every company operating a natural gas utility in the local municipality or planning area to which the proposed official plan or plan amendment would apply.

6. The secretary of every company operating an oil or natural gas pipeline in the local municipality or planning area to which the proposed official plan or plan amendment would apply.

6.1 Every propane operator of a propane operation, if,

   i. any part of the propane operation's hazard distance is within the area to which the proposed official plan or plan amendment would apply, and

   ii. the clerk of the municipality or the secretary-treasurer of the planning board has been notified of the propane operation's hazard distance by a director appointed under section 4 of the *Technical Standards and Safety Act, 2000*.

7. If any of the land to which the proposed official plan or plan amendment would apply is within 300 metres of a railway line, the secretary of the company operating the railway line.

8. The Executive Vice-President, Law and Development, of Ontario Power Generation Inc.

9. The secretary of Hydro One Inc.

10. If any of the land to which the proposed official plan or plan amendment would apply is within or abuts the area covered by the Niagara Escarpment Plan, the senior planner of the district office of the Niagara Escarpment Commission having jurisdiction over that land or the area that it abuts, as the case may be.

11. Parks Canada, if any of the land to which the proposed official plan or plan amendment would apply adjoins a historic site, park or historic canal under the jurisdiction of Parks Canada.

12. The Niagara Parks Commission, if any of the land to which the proposed official plan or plan amendment would apply adjoins the Niagara Parkway or is in the jurisdiction of the Niagara Parks Commission.

13. The St. Lawrence Parks Commission, if any part of the land to which the proposed official plan or plan amendment would apply adjoins the 1000 Islands Parkway and is within the jurisdiction of the St. Lawrence Parks Commission under section 9 of the *St. Lawrence Parks Commission Act*.

14. The clerk of every municipality or the secretary-treasurer of every municipal planning authority or planning board, if any part of the municipality, municipal planning area or planning area is within one kilometre of the land to which the proposed official plan or plan amendment would apply.

15. The chief of every First Nation council, if the First Nation is located on a reserve any part of which is within one kilometre of the area to which the proposed official plan or plan amendment would apply. O. Reg. 543/06, s. 3 (9); O. Reg. 467/09, ss. 2, 3.

(10) A notice given under paragraph 1 of subsection (9) shall also include a copy of the proposed official plan or plan amendment. O. Reg. 543/06, s. 3 (10).

(11) If the approval authority of a proposed official plan or plan amendment is the Minister, notice shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located**,** unless the regional director has notified the clerk of the municipality or the secretary-treasurer of the planning board that he or she does not wish to receive such notices. O. Reg. 543/06, s. 3 (11).

(12) If the approval authority of a proposed official plan or plan amendment is not the Minister, notice shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located**,** if the regional director has given the clerk of the municipality or the secretary-treasurer of the planning board a written request to be given such notices. O. Reg. 543/06, s. 3 (12).

(13) Subsections (11) and (12) apply whether or not the proposed official plan or plan amendment is exempt from approval under subsection 17 (9) or (10) of the Act. O. Reg. 543/06, s. 3 (13).

(14) A notice given under subsection (11) or (12) shall also include a copy of the proposed official plan or plan amendment. O. Reg. 543/06, s. 3 (14).

(15) A notice, other than a notice that is given by posting as described in clause (4) (b), shall include the following:

1. The date, time and location of the public meeting or open house.
2. An explanation of the purpose and effect of the proposed official plan or plan amendment.
3. A description of the subject land, a key map showing the subject land, or an explanation why no description or key map is provided.
4. Where and when a copy of the proposed official plan or plan amendment and information and material will be available to the public for inspection.
5. The following statement:

   If you wish to be notified of the adoption of the proposed official plan (*or official plan amendment*), or of the refusal of a request to amend the official plan, you must make a written request to (*name and address of municipality or planning board*).
6. The following statements:
   i. If a person or public body does not make oral submissions at a public meeting or make written submissions to (*name of municipality or planning board*) before the proposed official plan (*or official plan amendment*) is adopted, the person or public body is not entitled to appeal the decision of (*reference to council and name of municipality, or name of planning board or approval authority, as the case may be*) to the Ontario Municipal Board.
   ii. If a person or public body does not make oral submissions at a public meeting or make written submissions to (*name of municipality or planning board*) before the proposed official plan (*or official plan amendment*) is adopted, the person or public body may not be added as a party to the hearing of an appeal before the Ontario Municipal Board unless, in the opinion of the Board, there are reasonable grounds to add the person or public body as a party.
7. If it is known that the subject land is the subject of an application under the Act for a minor variance or a consent, for an amendment to a zoning by-law or a Minister's zoning order or for approval of a plan of subdivision, a statement of that fact and the file number of the application. O. Reg. 543/06, s. 3 (15).

(16) A notice that is given by posting as described in clause (4) (b) shall include the following:

1. The date, time and location of the public meeting or open house.

2. An explanation of the purpose and effect of the proposed official plan or plan amendment.
3. Where and when a copy of the proposed official plan or plan amendment and information and material will be available to the public for inspection.
4. How to obtain a copy of the notice described in subsection (15). O. Reg. 543/06, s. 3 (16).

Notice of adoption of proposed plan or amendment (s. 17 (23) of Act)

4. Notice of the adoption of a proposed official plan or plan amendment under subsection 17 (23) of the Act shall include the following:

1. The date that the by-law adopting the proposed official plan or plan amendment was passed.
2. The purpose and effect of the proposed official plan or plan amendment.
3. Where and when information in respect of the proposed official plan or plan amendment will be available to the public for inspection.
4. If the proposed official plan or plan amendment requires approval from the approval authority under subsection 17 (22) of the Act,
   i. a statement that any person or public body will be entitled to receive notice of the decision of the approval authority if a written request to be notified of the decision (including the person's or public body's address) is made to the approval authority, and
   ii. the name and address of the approval authority to which the proposed official plan or plan amendment will be submitted for approval.
5. If the proposed official plan or plan amendment is exempt from approval under subsection 17 (9) or (10) of the Act,
   i. the last date for filing a notice of appeal, and a statement that the notice of appeal,
      A. must be filed with the clerk of the municipality or the secretary-treasurer of the planning board,
      B. must set out the reasons for the appeal, and the specific part of the proposed official plan or plan amendment to which the appeal applies, and
      C. must be accompanied by the fee required by the Municipal Board, and
   ii. the following statements:
      A. The proposed official plan (*or official plan amendment*) is exempt from approval by the (*name of approval authority*). The decision of the council is final if a notice of appeal is not received on or before the last day for filing a notice of appeal.
      B. Only individuals, corporations or public bodies may appeal a decision of the municipality or planning board to the Ontario Municipal Board. A notice of appeal may not be filed by an unincorporated association or group. However, a notice of appeal may be filed in the name of an individual who is a member of the association or the group on its behalf.
      C. No person or public body shall be added as a party to the hearing of the appeal unless, before the plan was adopted, the person or public body made oral submissions at a public meeting or written submissions to the council or, in the opinion of the Ontario Municipal Board, there are reasonable grounds to add the person or public body as a party.

6. If it is known that the subject land is the subject of an application under the Act for a minor variance or a consent, for an amendment to a zoning by-law or a Minister's zoning order or for approval of a plan of subdivision, a statement of that fact and the file number of the application. O. Reg. 543/06, s. 4.

Details of notice (s. 17 (23) of Act)

5. (1) If a proposed official plan or plan amendment is adopted by the council of a municipality and its approval authority is the Minister, notice of its adoption shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located, unless the regional director has notified the clerk of the municipality or the secretary-treasurer of the planning board that he or she does not wish to receive such notices. O. Reg. 543/06, s. 5 (1).

(2) If a proposed official plan or plan amendment is adopted by the council of a municipality and its approval authority is not the Minister, notice of its adoption shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located, if the regional director has given the clerk of the municipality or the secretary-treasurer of the planning board a written request to be given such notices. O. Reg. 543/06, s. 5 (2).

(3) Subsections (1) and (2) apply whether or not the proposed official plan or plan amendment is exempt from approval under subsection 17 (9) or (10) of the Act. O. Reg. 543/06, s. 5 (3).

(4) A notice given under this section shall also include a copy of the proposed official plan or plan amendment. O. Reg. 543/06, s. 5 (4).

Record compiled by clerk for O.M.B. (s. 17 (29) of Act)

6. A record compiled by the clerk of the municipality or secretary-treasurer of the planning board and forwarded to the Municipal Board under subsection 17 (29) of the Act shall include the following:

1. A certified copy of the by-law adopting the proposed official plan or plan amendment.
2. A certified copy of the proposed official plan or plan amendment.
3. The original or a certified copy of the notice of appeal and the date it was received by the municipality or planning board.
4. The original or a copy of all written submissions and comments and the dates they were received.
5. An affidavit or sworn declaration in accordance with subsection 14 (1).
6. A statement from an employee of the municipality or planning board as to whether the decision of the council or planning board,
   i. is consistent with the policy statements issued under subsection 3 (1) of the Act, and
   ii. conforms to or does not conflict with any applicable provincial plan or plans.
7. If a public meeting was held, a copy of the minutes.
8. A copy of any planning report considered by the council or planning board.

9. If applicable, the original or a certified copy of the prescribed information and material received by the council or planning board under clauses 17 (15) (a) and (b) and subsection 22 (4) of the Act.
10. The original or a certified copy of any other information and material that is required to be provided by the official plan of the municipality or planning board. O. Reg. 543/06, s. 6.

Record compiled by clerk for approval authority (s. 17 (31) of Act)

7. A record compiled by the clerk of the municipality or secretary-treasurer of the planning board and forwarded to the approval authority under subsection 17 (31) of the Act shall include the following:

1. A certified copy of the by-law adopting the proposed official plan or plan amendment.
2. A certified copy of the proposed official plan or plan amendment.
3. In the case of a proposed official plan, a statement as to whether it replaces an existing official plan.
4. The original or a copy of all written submissions and comments and the dates they were received.
5. An affidavit or sworn declaration in accordance with subsection 14 (1).
6. An affidavit or sworn declaration in accordance with subsection 14 (2).
7. A statement from an employee of the municipality or planning board as to whether the decision of the council or planning board,
   i. is consistent with the policy statements issued under subsection 3 (1) of the Act, and
   ii. conforms to or does not conflict with any applicable provincial plan or plans.
8. If a public meeting was held, a copy of the minutes.
9. A copy of any planning report considered by the council or planning board.
10. If applicable, the prescribed information and material under clauses 17 (15) (a) and (b) of the Act.
11. If applicable, the original or a certified copy of,
    i. the supporting information and material under clauses 17 (15) (a) and (b) of the Act,
    ii. the prescribed information and material under subsection 22 (4) of the Act, and
    iii. any other information and material that is required to be provided by the official plan of the municipality or planning board. O. Reg. 543/06, s. 7.

Notice of approval authority's decision (s. 17 (35) of Act)

8. (1) Notice of the approval authority's decision in respect of a proposed official plan or plan amendment under subsection 17 (35) of the Act shall include the following:

1. An explanation of the purpose and effect of the proposed official plan or plan amendment.
2. A statement that the approval authority has made a decision to approve, modify and approve or refuse the proposed official plan or plan amendment, as the case may be.
3. If the approval authority has made a decision to refuse the proposed official plan or plan amendment, a written explanation for the refusal.

4. Where and when information in respect of the proposed official plan or plan amendment and the decision will be available to the public for inspection.
5. The last date for filing a notice of appeal, and a statement that the notice of appeal,
   i. must be filed with the approval authority,
   ii. must set out the reasons for the appeal and the specific part of the proposed official plan or plan amendment to which the appeal applies, and
   iii. must be accompanied by the fee required by the Municipal Board.
6. The following statement:

   The decision of (*name of approval authority*) is final if a notice of appeal is not received on or before the last day for filing a notice of appeal.
7. The following statements:
   i. Only individuals, corporations or public bodies may appeal a decision of the approval authority to the Ontario Municipal Board. A notice of appeal may not be filed by an unincorporated association or group. However, a notice of appeal may be filed in the name of an individual who is a member of the association or the group on its behalf.
   ii. No person or public body shall be added as a party to the hearing of the appeal unless, before the plan was adopted, the person or public body made oral submissions at a public meeting or written submissions to the council or, in the opinion of the Ontario Municipal Board, there are reasonable grounds to add the person or public body as a party.
8. If it is known that the subject land is the subject of an application under the Act for a minor variance or a consent, for an amendment to a zoning by-law or a Minister's zoning order or for approval of a plan of subdivision, a statement of that fact and the file number of the application. O. Reg. 543/06, s. 8 (1).

(2) If the approval authority of a proposed official plan or plan amendment is not the Minister, notice of a decision by the approval authority in respect of a proposed official plan or plan amendment adopted by the council of a local municipality shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located, if the regional director has given the clerk of the municipality or the secretary-treasurer of the planning board a written request to be given notice of such decisions. O. Reg. 543/06, s. 8 (2).

(3) A notice given under subsection (2) shall also include a copy of the proposed official plan or plan amendment. O. Reg. 543/06, s. 8 (3).

Record compiled by approval authority for O.M.B. (s. 17 (42) of Act)

9. A record compiled by the approval authority and forwarded to the Municipal Board under subsection 17 (42) of the Act shall include the following:

1. If applicable, a copy of the approval authority's decision.
2. The original or a certified copy of the notice of appeal and the date it was received.
3. The original or a certified copy of the record received by the approval authority under section 7.

4. If applicable, an affidavit or sworn declaration in accordance with subsection 14 (3).
5. A statement from an employee of the approval authority as to whether the decision of the approval authority,
   i. is consistent with the policy statements issued under subsection 3 (1) of the Act, and
   ii. conforms to or does not conflict with any applicable provincial plan or plans.
6. The original or a copy of all written submissions and comments received.
7. If applicable, a copy of any planning report considered by the approval authority. O. Reg. 543/06, s. 9.

Information and material — request for amendment to official plan (s. 22 (4) of Act)

10. The information and material to be provided by an applicant under subsection 22 (4) of the Act are set out in Schedule 1. O. Reg. 543/06, s. 10.

Notice ("complete application") (s. 22 (6.4) (a) of Act)

11. (1) Section 3 applies, with necessary modifications, to a notice given under clause 22 (6.4) (a) of the Act. O. Reg. 543/06, s. 11 (1).

(2) The notice referred to in subsection (1) may be given together with notice of a public meeting, notice of an open house or both, for the purposes of subsection 17 (17) of the Act, or may be given separately. O. Reg. 543/06, s. 11 (2).

Notice of refusal of request (s. 22 (6.6) of Act)

12. Notice of the refusal of a request to amend an official plan under subsection 22 (6.6) of the Act shall include the following:

1. An explanation of the purpose and effect of the requested official plan amendment.
2. A statement that the council or planning board has made a decision to refuse the requested amendment, including the date of the refusal.
3. A written explanation for the refusal.
4. The last date for filing a notice of appeal, and a statement that the notice of appeal,
   i. must be filed with the clerk of the municipality or the secretary-treasurer of the planning board, as the case may be,
   ii. must be accompanied by the fee required by the Municipal Board, and
   iii. must set out the reasons for the appeal and the specific part of the requested amendment to which the appeal applies.
5. The following statement:

   The decision of the (*reference to council and name of municipality, or name of planning board*) is final if a notice of appeal is not received on or before the last day for filing a notice of appeal.

6. The following statements:
   i. A person or public body that requested an amendment to the official plan of (*name of municipality or* planning board) may appeal the refusal of the requested amendment to the Ontario Municipal Board in respect of all or any part of the requested amendment

by filing a notice of appeal with the clerk of the (*name of municipality*) or the secretary-treasurer of the (*name of planning board*).

ii. No person or public body shall be added as a party to the hearing of the appeal unless, before the requested official plan amendment was refused, the person or public body made oral submissions at a public meeting, if any, or written submissions to the council or, in the opinion of the Ontario Municipal Board, there are reasonable grounds to add the person or public body as a party. O. Reg. 543/06, s. 12.

Record compiled by clerk for O.M.B. (s. 22 (9) of Act)

13. A record compiled by the clerk of the municipality or secretary-treasurer of the planning board and forwarded to the Municipal Board under subsection 22 (9) of the Act shall include the following:

1. The original or a certified copy of the request for an amendment to the official plan.
2. The original or a certified copy of the prescribed information and material received by the council or planning board under subsection 22 (4) of the Act.
3. The original or a certified copy of any other information and material that is required to be provided by the official plan of the municipality or planning board.
4. The original or a copy of all written submissions and comments received by the council or planning board, and the dates they were received.
5. An affidavit or sworn declaration in accordance with subsection 14 (1).
6. A statement from an employee of the municipality or planning board as to whether the decision of the council or planning board,
   i. is consistent with the policy statements issued under subsection 3 (1) of the Act, and
   ii. conforms to or does not conflict with any applicable provincial plan or plans.
7. If a public meeting was held, a copy of the minutes.
8. A copy of any planning report considered by the council or planning board.
9. If applicable, a copy of the resolution of the council or planning board refusing to adopt the requested amendment.
10. If applicable, a copy of the written explanation for the refusal. O. Reg. 543/06, s. 13.

Affidavit or sworn declaration

14. (1) An affidavit or sworn declaration for the purposes of paragraph 5 of section 6, paragraph 5 of section 7 or paragraph 5 of section 13,

(a) shall be made by an employee of the municipality or planning board; and

(b) shall contain,

(i) a certificate that the requirements for giving notice and holding public meetings and open houses, if required, or the alternative measures for informing and obtaining the views of the public set out in the official plan have been complied with,

(ii) a certificate that any requirements for giving notice of adoption have been complied with,

(iii) if a public meeting was held, a list of all persons and public bodies that made oral submissions at the public meeting, and

(iv) if subsection 22 (6.4) of the Act applies, a certificate that the requirements of clause 22 (6.4) (a) of the Act have been complied with. O. Reg. 543/06, s. 14 (1).

(2) An affidavit or sworn declaration for the purposes of paragraph 6 of section 7,

(a) shall be made by,

(i) the clerk, commissioner or director of planning of the municipality or the secretary-treasurer of the planning board, or

(ii) another employee of the municipality or planning board who is designated by a resolution of the municipality or planning board; and

(b) shall certify that the information and material provided as required by paragraph 10 of section 7 is accurate. O. Reg. 543/06, s. 14 (2).

(3) An affidavit or sworn declaration for the purposes of paragraph 4 of section 9,

(a) shall be made by an employee of the approval authority; and

(b) shall certify that the requirement for giving notice of the decision under subsection 17 (35) of the Act has been complied with. O. Reg. 543/06, s. 14 (3).

Transition

15. Despite the revocation of Ontario Regulation 198/96 (Official Plans and Plan Amendments) made under the Act, the following shall be continued and disposed of as if Ontario Regulation 198/96 had not been revoked:

1. Any matter or proceeding that is deemed to have been commenced before May 22, 1996, under section 75 of the Act.

2. Any matter or proceeding that is commenced on or after May 22, 1996 but before the day this Regulation comes into force. O. Reg. 543/06, s. 15.

16. OMITTED (REVOKES OTHER REGULATIONS). O. Reg. 543/06, s. 16.

17. OMITTED (PROVIDES FOR COMING INTO FORCE OF PROVISIONS OF THIS REGULATION). O. Reg. 543/06, s. 17.

SCHEDULE 1
INFORMATION AND MATERIAL TO BE PROVIDED WITH A REQUEST UNDER SUBSECTION 22 (4) OF THE ACT

1. The name, address, telephone number and, if applicable, the e-mail address of the applicant.

2. The name of the municipality or planning board that is being requested to initiate the amendment to its official plan.

3. The date of the request to the municipality or planning board.

4. The name of the official plan requested to be amended.

5. A description of the subject land, including such information as the municipality, or the geographic township in unorganized territory, concession and lot numbers, reference plan and part numbers, and street names and numbers.

6. If known, the approximate area of the subject land, in metric units.

7. Whether the requested amendment changes, replaces or deletes a policy in the official plan.

8. If the answer to section 7 is yes, the policy to be changed, replaced or deleted.

9. Whether the requested amendment adds a policy to the official plan.

10. The purpose of the requested amendment.

11. The current designation of the subject land in the official plan and the land uses that the designation authorizes.

12. Whether the requested amendment changes or replaces a designation in the official plan.

13. If the requested amendment changes or replaces a designation in the official plan, the designation to be changed or replaced.

14. The land uses that the requested official plan amendment would authorize.

15. Whether water will be provided to the subject land by a publicly owned and operated piped water system, a privately owned and operated individual or communal well, a lake or other water body, or other means.

16. Whether sewage disposal will be provided to the subject land by a publicly owned and operated sanitary sewage system, a privately owned and operated individual or communal septic system, a privy or other means.

17. If the requested amendment would permit development on a privately owned and operated individual or communal septic system and more than 4500 litres of effluent would be produced per day as a result of the development being completed,

(a) a servicing options report; and

(b) a hydrogeological report.

18. Whether the subject land or land within 120 metres of it is the subject of an application by the applicant under the Act for,

(a) a minor variance or a consent;

(b) an amendment to an official plan, a zoning by-law or a Minister's zoning order; or

(c) approval of a plan of subdivision or a site plan.

19. If the answer to section 18 is yes, the following information about each application:

(a) its file number;

(b) the name of the approval authority considering it;

(c) the land it affects;

(d) its purpose;

(e) its status; and

(f) its effect on the requested amendment.

20. If a policy in the official plan is being changed, replaced or deleted or if a policy is being added, the text of the requested amendment.

21. If the requested amendment changes or replaces a schedule in the official plan, the requested schedule and the text that accompanies it.

22. If the requested amendment alters all or any part of the boundary of an area of settlement in a municipality or establishes a new area of settlement in a municipality, the current official plan policies, if any, dealing with the alteration or establishment of an area of settlement.

23. If the requested amendment removes the subject land from an area of employment, the current official plan policies, if any, dealing with the removal of land from an area of employment.

24. Whether the requested amendment is consistent with the policy statements issued under subsection 3 (1) of the Act.

25. Whether the subject land is within an area of land designated under any provincial plan or plans.

26. If the answer to section 25 is yes, whether the requested amendment conforms to or does not conflict with the provincial plan or plans.

27. An affidavit or sworn declaration by the applicant certifying that the information required under this Schedule and provided by the applicant is accurate.

Schedule 1	Information and material to be provided with an application under subsection 51 (17) of the Act

Definitions

1. In this Regulation,

"hazard distance" means the distance established as the hazard distance applicable to the propane operation referenced in a risk and safety management plan required under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("distance de danger")

"propane operation" means an operation in respect of which a person is required to prepare a risk and safety management plan under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("installation de propane")

"propane operator" means a person who is required to prepare a risk and safety management plan under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("exploitant d'une installation de propane")

"reserve" means a tract of land, the legal title of which is vested in the Crown in right of Canada, that has been set apart by the Crown for the use and benefit of a First Nation; ("réserve")

"subject land" means the land to which a proposed plan of subdivision applies. ("terrain visé") O. Reg. 544/06, s. 1; O. Reg. 468/09, s. 1.

Information and material to be provided by applicant (s. 51 (17) of Act)

2. The information and material to be provided by an applicant for approval of a plan of subdivision, for the purposes of subsection 51 (17) of the Act, are set out in Schedule 1. O. Reg. 544/06, s. 2.

Notice ("complete application") (s. 51 (19.4) of Act)

3. (1) Section 4 applies, with necessary modifications, to a notice given under subsection 51 (19.4) of the Act. O. Reg. 544/06, s. 3 (1).

(2) The notice referred to in subsection (1) may be given together with notice of an application, notice of a public meeting or both, for the purposes of subsection 51 (20) of the Act, or may be given separately. O. Reg. 544/06, s. 3 (2).

Notice of application for approval of plan of subdivision (s. 51 (20) (a) of Act)

4. (1) Notice of an application for approval of a plan of subdivision under clause 51 (20) (a) of the Act shall be given in the manner described in the following subsections of this section:

1. Subsection (2) or (5).
2. Subsection (7).
3. Subsection (8).
4. Subsection (9). O. Reg. 544/06, s. 4 (1).

(2) Notice shall be given,

(a) by personal service or ordinary mail, to every owner of land within 120 metres of the subject land and every owner of land within 120 metres of land that abuts the subject land and is owned by the same person that owns the subject land; and

(b) by posting a notice, clearly visible and legible from a public highway or other place to which the public has access, at every separately assessed property within the subject land or, if

posting on the property is impractical, at a nearby location chosen by the official described in subsection (6). O. Reg. 544/06, s. 4 (2).

(3) For the purposes of clause (2) (a), the owner of land is deemed to be the person shown on the last revised assessment roll of the municipality or on the current provincial land tax roll at the address shown on the roll but, if the approval authority is a municipality and the clerk of the municipality has received written notice of a change of ownership, the notice shall be given to the new owner instead, at the address set out in the notice. O. Reg. 544/06, s. 4 (3).

(4) For the purposes of clause (2) (a), if a condominium development is located within 120 metres of the subject land, notice may be given to the condominium corporation, according to its most recent address for service or mailing address as registered under section 7 of the *Condominium Act, 1998*, instead of being given to all owners assessed in respect of the condominium development. O. Reg. 544/06, s. 4 (4).

(5) Notice shall be given by publishing it in a newspaper that, in the opinion of the official described in subsection (6), is of sufficiently general circulation in the area adjoining the subject land that it would give the public reasonable notice of the application. O. Reg. 544/06, s. 4 (5).

(6) The official for the purposes of subsections (2) and (5) is,

(a) the clerk of the municipality, if the approval authority is,

(i) the council of the municipality or a committee of the council, or

(ii) an appointed officer;

(b) the secretary-treasurer of the municipal planning authority, if the approval authority is,

(i) a municipal planning authority or a committee of the authority, or

(ii) an appointed officer;

(c) the secretary-treasurer of the planning board, if the approval authority is a planning board; and

(d) an employee of the Ministry of Municipal Affairs and Housing, if the approval authority is the Minister. O. Reg. 544/06, s. 4 (6).

(7) Every person and public body that has given the approval authority a written request for a notice to which this section applies (including the person's or public body's address) shall be given notice by personal service, ordinary mail or fax. O. Reg. 544/06, s. 4 (7).

(8) Notice shall be given, by personal service, ordinary mail or fax, to all the following persons and public bodies except those who have notified the approval authority that they do not wish to receive notice:

1. The clerk of every local municipality or the secretary-treasurer of every municipal planning authority or planning board having jurisdiction in the area to which the plan of subdivision would apply.
2. The clerk of every upper-tier municipality having jurisdiction in the area to which the plan of subdivision would apply.
3. The secretary of every school board having jurisdiction in the area to which the plan of subdivision would apply.
4. The secretary-treasurer of every conservation authority having jurisdiction in the area to which the plan of subdivision would apply.

5. The secretary of every municipal or other corporation operating an electric utility in the local municipality or planning area to which the plan of subdivision would apply.
6. The Executive Vice-President, Law and Development, of Ontario Power Generation Inc.
7. The secretary of Hydro One Inc.
8. The secretary of every company operating a natural gas utility in the local municipality or planning area to which the plan of subdivision would apply.
9. The secretary of every company operating an oil or natural gas pipeline in the local municipality or planning area to which the plan of subdivision would apply.

9.1 Every propane operator of a propane operation, if,

   i. any part of the propane operation's hazard distance is within the area to which the plan of subdivision would apply, and

   ii. the approval authority has been notified of the propane operation's hazard distance by a director appointed under section 4 of the *Technical Standards and Safety Act, 2000*.

10. If any of the subject land is within 300 metres of a railway line, the secretary of the company operating the railway line.
11. The secretary of every company operating as a telecommunication infrastructure provider in the area to which the plan of subdivision would apply.
12. The chair or secretary of the municipal heritage committee of the municipality, if any, if the land to which the plan of subdivision would apply includes or adjoins a property or district designated under Part IV or V of the *Ontario Heritage Act*.
13. If any of the subject land is within or abuts the area covered by the Niagara Escarpment Plan, the senior planner of the district office of the Niagara Escarpment Commission having jurisdiction over that land or the area that it abuts, as the case may be.
14. The Niagara Parks Commission, if any of the subject land adjoins the Niagara Parkway and is in the jurisdiction of the Niagara Parks Commission.
15. The St. Lawrence Parks Commission, if any of the subject land adjoins the 1000 Islands Parkway and is within the jurisdiction of the St. Lawrence Parks Commission under section 9 of the *St. Lawrence Parks Commission Act*.
16. Parks Canada, if any of the subject land adjoins a historic site, park or historic canal under the jurisdiction of Parks Canada.
17. The clerk of every municipality and the secretary-treasurer of every municipal planning authority or planning board, if any part of the municipality, municipal planning area or planning area is within one kilometre of the area to which the plan of subdivision would apply.
18. The chief of every First Nation council, if the First Nation is located on a reserve any part of which is within one kilometre of the area covered by the proposed plan of subdivision. O. Reg. 544/06, s. 4 (8); O. Reg. 468/09, ss. 2, 3.

(9) If the approval authority of a proposed plan of subdivision is not the Minister, notice shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located, if the regional director has

given the approval authority a written request to be given notice of applications for approval of plans of subdivision. O. Reg. 544/06, s. 4 (9).

(10) A notice, other than a notice that is given by posting as described in clause (2) (b), shall include the following:

1. A description of the proposed plan of subdivision.
2. A description of the land or a key map showing the location of the land proposed to be subdivided.
3. Where and when additional information regarding the proposed plan of subdivision will be available to the public for inspection.
4. The following statements:
   i. If a person or public body does not make oral submissions at a public meeting, if one is held, or make written submissions to (*name of the approval authority*) in respect of the proposed plan of subdivision before the approval authority gives or refuses to give approval to the draft plan of subdivision, the person or public body is not entitled to appeal the decision of (*name of the approval authority*) to the Ontario Municipal Board.
   ii. If a person or public body does not make oral submissions at a public meeting, if one is held, or make written submissions to (*name of the approval authority*) in respect of the proposed plan of subdivision before the approval authority gives or refuses to give approval to the draft plan of subdivision, the person or public body may not be added as a party to the hearing of an appeal before the Ontario Municipal Board unless, in the opinion of the Board, there are reasonable grounds to do so.
5. The following statement:
   i. If you wish to be notified of the decision of (*name of the approval authority*) in respect of the proposed plan of subdivision, you must make a written request to (*name and address of the approval authority*).
6. If it is known that the land proposed to be subdivided is the subject of an application under the Act for a minor variance or for an amendment to an official plan, a zoning by-law or a Minister's zoning order, a statement of that fact and the file number of the application. O. Reg. 544/06, s. 4 (10).

(11) A notice given to the persons and public bodies set out in subsections (8) and (9) shall also include a copy of the application. O. Reg. 544/06, s. 4 (11).

(12) A notice that is given by posting as described in clause (2) (b) shall include the following:

1. A description of the proposed plan of subdivision.
2. Where and when additional information and material regarding the proposed plan of subdivision will be available to the public for inspection.
3. How to obtain a copy of the notice described in subsection (10). O. Reg. 544/06, s. 4 (12).

Public meeting (s. 51 (20) (b) of Act)

5. (1) If the land that is the subject of an application for approval of a plan of subdivision under subsection 51 (16) of the Act is located in a municipality or in the planning area of a planning board, the approval authority shall ensure that a public meeting is held under clause 51 (20) (b) of the Act. O. Reg. 544/06, s. 5 (1).

(2) The public meeting shall be held no sooner than 14 days after the requirements for giving notice of the meeting have been complied with. O. Reg. 544/06, s. 5 (2).

(3) Subsections 4 (1) to (9) apply, with necessary modifications, to giving notice of a public meeting under subsection (1). O. Reg. 544/06, s. 5 (3).

(4) A notice, other than a notice that is given by posting as described in clause 4 (2) (b), shall include the following:

1. The date, time and location of the public meeting.
2. A description of the proposed plan of subdivision.
3. A description of the land or a key map showing the location of the land proposed to be subdivided.
4. The following statements:
   i. If a person or public body does not make oral submissions at the public meeting or make written submissions to (*name of the approval authority*) in respect of the proposed plan of subdivision before the approval authority gives or refuses to give approval to the draft plan of subdivision, the person or public body is not entitled to appeal the decision of (*name of the approval authority*) to the Ontario Municipal Board.
   ii. If a person or public body does not make oral submissions at the public meeting or make written submissions to (*name of the approval authority*) in respect of the proposed plan of subdivision before the approval authority gives or refuses to give approval to the draft plan of subdivision, the person or public body may not be added as a party to the hearing of an appeal before the Ontario Municipal Board unless, in the opinion of the Board, there are reasonable grounds to do so. O. Reg. 544/06, s. 5 (4).

(5) A notice that is given by posting as described in clause 4 (2) (b) shall include the following:

1. The date, time and location of the public meeting.
2. A description of the proposed plan of subdivision.
3. Where and when additional information and material regarding the proposed plan of subdivision will be available to the public for inspection.
4. How to obtain a copy of the notice described in subsection (4). O. Reg. 544/06, s. 5 (5).

Request by approval authority (s. 51 (21) of Act)

6. (1) This section applies if an approval authority makes a request to a local municipality or planning board under subsection 51 (21) of the Act. O. Reg. 544/06, s. 6 (1).

(2) If the approval authority requests that the local municipality or planning board give notice of an application for approval of a plan of subdivision,

(a) the notice shall include, if the approval authority so directs, a request to submit any written comments to the approval authority; and

(b) the local municipality or planning board shall submit to the approval authority,

(i) a certified copy of the notice described in subsection 5 (4), and

(ii) an affidavit or sworn declaration by an employee of the local municipality or planning board certifying that the notice requirements under clause 51 (20) (a) of the Act have been complied with. O. Reg. 544/06, s. 6 (2).

(3) If the approval authority requests that the local municipality or planning board hold a public meeting, the local municipality or planning board shall submit to the approval authority,

(a) the original or a copy of all written submissions and comments received by the local municipality or the planning board on or before the day the public meeting was held;

(b) an affidavit or sworn declaration by an employee of the local municipality or planning board certifying that the notice requirements and the requirement for holding a public meeting under clause 51 (20) (b) of the Act have been complied with;

(c) an affidavit or sworn declaration by an employee of the local municipality or planning board listing all persons and public bodies that made oral submissions at the public meeting; and

(d) a copy of the minutes of the public meeting. O. Reg. 544/06, s. 6 (3).

Condominiums

7. Sections 3 to 6 do not apply to an application for approval of a condominium description, other than an application for approval of a vacant land condominium description or a common elements condominium description. O. Reg. 544/06, s. 7; O. Reg. 468/09, s. 4.

Record compiled by approval authority for O.M.B. (s. 51 (35) (a) of Act)

8. A record compiled by the approval authority and forwarded to the Municipal Board under clause 51 (35) (a) of the Act shall include the following:

1. The original or a certified copy of the application received by the approval authority.
2. The original or a certified copy of the prescribed information and material received by the approval authority under subsection 51 (17) of the Act.
3. If applicable, the original or certified copy of any other information and material that the applicant was required to provide to the approval authority.
4. The original or a certified copy of the notice of appeal and the date it was received.
5. The original or a copy of all written submissions and comments received, and the date they were received.
6. If the local municipality or planning board gave notice of the application, the original or a certified copy of the affidavit or sworn declaration described in subclause 6 (2) (b) (ii).
7. If the approval authority gave notice of the application, an affidavit or sworn declaration of an employee of the approval authority certifying that the notice requirements under clause 51 (20) (a) of the Act have been complied with.
8. If the local municipality or planning board held the public meeting, the affidavits or sworn declarations described in clauses 6 (3) (b) and (c).
9. If the approval authority held the public meeting,
    i. an affidavit or sworn declaration of an employee of the approval authority certifying that the notice requirements and the requirement for holding a public meeting under clause 51 (20) (b) of the Act have been complied with, and
    ii. an affidavit or sworn declaration of an employee of the approval authority listing all persons and public bodies that made oral submissions at the public meeting.
10. A copy of the minutes of the public meeting.

11. A copy of any planning report considered by the approval authority. O. Reg. 544/06, s. 8.

Notice of approval authority's decision (s. 51 (37) of Act)

9. (1) Notice of the approval authority's decision under subsection 51 (37) of the Act shall include the following:

1. A copy of the decision, including the conditions and the lapsing provision, if any.
2. The last date for filing a notice of appeal, and a statement that the notice of appeal,
   i. must be filed with the approval authority,
   ii. must set out the reasons for the appeal, and
   iii. must be accompanied by the fee required by the Municipal Board.
3. A statement that any of the following may, at any time before the approval of the final plan of subdivision, appeal any of the conditions imposed by the approval authority to the Municipal Board by filing a notice of appeal with the approval authority:
   i. the applicant,
   ii. any public body that, before the approval authority made its decision, made oral submissions at a public meeting or written submissions to the approval authority,
   iii. the Minister,
   iv. the municipality in which the subject land is located, or the planning board in whose planning area it is located,
   v. if the subject land is not located in a municipality or planning area, any public body.
4. If applicable, the following statements:
   i. You will be entitled to receive notice of any changes to the conditions of approval of the proposed plan of subdivision if you have made a written request to be notified of changes to the conditions.
   ii. No person or public body shall be added as a party to the hearing of an appeal regarding any changes to the conditions of approval unless the person or public body, before the approval authority made its decision, made oral submissions at a public meeting or written submissions to the approval authority, or made a written request to be notified of the changes to the conditions.
5. The following statements:
   i. Only individuals, corporations or public bodies may appeal decisions in respect of a proposed plan of subdivision to the Ontario Municipal Board. A notice of appeal may not be filed by an unincorporated association or group. However, a notice of appeal may be filed in the name of an individual who is a member of the association or group on its behalf.
   ii. No person or public body shall be added as a party to the hearing of the appeal of the decision of the approval authority, including the lapsing provisions or the conditions, unless the person or public body, before the decision of the approval authority, made oral submissions at a public meeting or written submissions to the council or, in the Ontario Municipal Board's opinion, there are reasonable grounds to add the person or public body as a party.

6. If it is known that the subject land is the subject of an application under the Act for a minor variance or for an amendment to an official plan, a zoning by-law or a Minister's zoning order, a statement of that fact and the file number of the application. O. Reg. 544/06, s. 9 (1).

(2) If the approval authority of a proposed plan of subdivision is not the Minister, notice of the decision of the approval authority under subsection 51 (37) of the Act shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located, if the regional director has given the approval authority a written request to be given notice of its decisions on applications for approval of plans of subdivision. O. Reg. 544/06, s. 9 (2).

Notice of changes to conditions of draft approval (s. 51 (45) of Act)

10. (1) Notice of changes to the conditions of draft approval of a plan of subdivision under subsection 51 (45) of the Act shall include the following:

1. A copy of the proposed changes to the conditions of draft approval.
2. A statement that any of the following may, at any time before the approval of the final plan of subdivision, appeal any of the conditions of draft approval to the Municipal Board by filing a notice of appeal with the approval authority:
   i. the applicant,
   ii. any public body that, before the approval authority made its decision, made oral submissions at a public meeting or written submissions to the approval authority,
   iii. the Minister,
   iv. the municipality in which the subject land is located, or the planning board in whose planning area it is located,
   v. if the subject land is not located in a municipality or planning area, any public body.
3. The last date for filing a notice of appeal, and a statement that the notice of appeal,
   i. must be filed with the approval authority,
   ii. must set out the reasons for the appeal, and
   iii. must be accompanied by the fee required by the Municipal Board.
4. The following statements:
   i. Only individuals, corporations or public bodies may appeal decisions in respect of a proposed plan of subdivision to the Ontario Municipal Board. A notice of appeal may not be filed by an unincorporated association or group. However, a notice of appeal may be filed in the name of an individual who is a member of the association or group on its behalf.
   ii. No person or public body shall be added as a party to the hearing of an appeal regarding any changed conditions imposed by the approval authority, unless the person or public body, before the approval authority made its decision, made oral submissions at a public meeting or written submissions to the approval authority, or made a written request to be notified of the changes to the conditions. O. Reg. 544/06, s. 10 (1).

(2) If the approval authority of a proposed plan of subdivision is not the Minister, notice of changes to the conditions of approval of a plan of subdivision under subsection 51 (45) of the Act

shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located, if the regional director has given the approval authority a written request to be given notice of changes to the conditions of approval of plans of subdivision. O. Reg. 544/06, s. 10 (2).

Record compiled by approval authority for O.M.B. (s. 51 (50) (a) of Act)

11. A record compiled by the approval authority and forwarded to the Municipal Board under clause 51 (50) (a) of the Act shall include the following:

1. The information and material set out in section 8.
2. A copy of the decision of the approval authority, including the conditions and the lapsing provision, if any.
3. A statement by an employee of the approval authority as to whether the decision of the approval authority,
   i. is consistent with the policy statements issued under subsection 3 (1) of the Act,
   ii. conforms to or does not conflict with any applicable provincial plan or plans, and
   iii. conforms to the official plan of the municipality or planning board.
4. If applicable, an affidavit or sworn declaration by an employee of the approval authority certifying that the notice requirements under subsection 51 (37) of the Act have been complied with.
5. If applicable, a copy of the proposed changes to the conditions of draft approval.
6. If applicable, an affidavit or sworn declaration by an employee of the approval authority certifying that the notice requirements under subsection 51 (45) of the Act have been complied with. O. Reg. 544/06, s. 11.

Transition

12. Despite the revocation of Ontario Regulation 196/96 (Plans of Subdivision) made under the Act, the following shall be continued and disposed of as if Ontario Regulation 196/96 had not been revoked:

1. Any matter or proceeding that is deemed to have been commenced before May 22, 1996, under section 75 of the Act.
2. Any matter or proceeding that is commenced on or after May 22, 1996 but before the day this Regulation comes into force. O. Reg. 544/06, s. 12.

13. OMITTED (REVOKES OTHER REGULATIONS). O. Reg. 544/06, s. 13.

14. OMITTED (PROVIDES FOR COMING INTO FORCE OF PROVISIONS OF THIS REGULATION). O. Reg. 544/06, s. 14.

SCHEDULE 1
INFORMATION AND MATERIAL TO BE PROVIDED WITH AN APPLICATION UNDER SUBSECTION 51 (17) OF THE ACT

1. The name, address, telephone number and, if applicable, the e-mail address of the owner of the subject land, and of the agent if the applicant is the owner's authorized agent.

2. The date of the application.

3. A description of the subject land, including such information as the municipality, or the geographic township in unorganized territory, concession and lot numbers, reference plan and part numbers, and street names and numbers.

4. Whether there are any easements or restrictive covenants affecting the subject land.

5. If the answer to section 4 is yes, a description of each easement or covenant and its effect.

6. If known,

(a) whether the subject land was ever the subject of an application for approval of a plan of subdivision under section 51 of the Act, for a consent under section 53 of the Act, for a minor variance, for approval of a site plan, or for an amendment to an official plan, a zoning by-law or a Minister's zoning order; and

(b) if the answer to clause (a) is yes, the file number and status of the application.

7. The total number of lots or blocks shown on the draft plan, and the number of lots or blocks shown on the draft plan for each of the following uses:

1. Detached residential.
2. Semi-detached residential.
3. Multiple attached residential.
4. Apartment residential.
5. Seasonal residential.
6. Mobile home.
7. Other residential.
8. Commercial.
9. Industrial.
10. Institutional.
11. Park or open space.
12. Roads.
13. Other.

8. The total number of units or dwellings shown on the draft plan, and the number of units or dwellings shown on the draft plan for each of the uses listed in section 7, except the uses described in paragraphs 11 and 12 of that section.

9. In hectares, the total area of land shown on the draft plan, and the area of land shown on the draft plan for each of the uses listed in section 7.

10. The total number of units or dwellings shown on the draft plan per hectare, and the number of units or dwellings shown on the draft plan per hectare for each of the uses listed in section 7, except the uses described in paragraphs 11 and 12 of that section.

11. The total number of parking spaces shown on the draft plan, and the number of parking spaces shown on the draft plan for each of the uses listed in section 7, except the uses described in paragraphs 1, 2, 11 and 12 of that section.

12. If the application is for approval of a condominium description, the number of parking spaces shown on the draft plan for detached and semi-detached residential use.

13. If one of the uses referred to under section 7, 8, 9, 10 or 11 is identified as "other residential", "institutional" or "other", a description of the use.

14. The current designation of the subject land in the applicable official plan.

15. Whether access to the subject land will be,

(a) by a provincial highway, a municipal road that is maintained all year or seasonally, another public road or a right of way; or

(b) by water.

16. If access to the subject land will be by water only, the parking and docking facilities to be used and the approximate distance of these facilities from the subject land and the nearest public road.

17. Whether water will be provided to the subject land by a publicly owned and operated piped water system, a privately owned and operated individual or communal well, a lake or other water body or other means.

18. If the plan would permit development of more than five lots or units on privately owned and operated individual or communal wells,

(a) a servicing options report; and

(b) a hydrogeological report.

19. Whether sewage disposal will be provided to the subject land by a publicly owned and operated sanitary sewage system, a privately owned and operated individual or communal septic system or other means.

20. If the plan would permit development of five or more lots or units on privately owned and operated individual or communal septic systems,

(a) a servicing options report; and

(b) a hydrogeological report.

21. If the plan would permit development of fewer than five lots or units on privately owned and operated individual or communal septic systems, and more than 4500 litres of effluent would be produced per day as a result of the development being completed,

(a) a servicing options report; and

(b) a hydrogeological report.

22. If the plan would permit development of fewer than five lots or units on privately owned and operated individual or communal septic systems, and 4500 litres of effluent or less would be produced per day as a result of the development being completed, a hydrogeological report.

23. Whether the subject land contains any areas of archaeological potential.

24. If the plan would permit development on land that contains known archaeological resources or areas of archaeological potential,

(a) an archaeological assessment prepared by a person who holds a licence that is effective with respect to the subject land, issued under Part VI (Conservation of Resources of Archaeological Value) of the *Ontario Heritage Act*; and

(b) a conservation plan for any archaeological resources identified in the assessment.

25. Whether storm drainage will be provided by sewers, ditches, swales or other means.

26. If the application is for approval of a condominium description,

(a) whether a site plan for the proposed condominium has been approved and whether a site plan agreement has been entered into;

(b) whether a building permit for the proposed condominium has been issued;

(c) whether the proposed condominium is under construction or has been completed;

(d) if construction has been completed, the date of completion; and

(e) whether the proposed condominium is a conversion of a building containing residential rental units, and in that case the number of units to be converted.

27. Whether the plan is consistent with policy statements issued under subsection 3 (1) of the Act.

28. Whether the subject land is within an area of land designated under any provincial plan or plans.

29. If the answer to section 28 is yes, whether the plan conforms to or does not conflict with the applicable provincial plan or plans.

30. If the applicant is not the owner of the subject land, the owner's written authorization to the applicant to make the application.

31. An affidavit or sworn declaration by the applicant that the information required under this Schedule and provided by the applicant is accurate.

O. Reg. 544/06, Sched. 1.

PLANNING ACT

ONTARIO REGULATION 545/06
ZONING BY-LAWS, HOLDING BY-LAWS AND INTERIM CONTROL BY-LAWS

CONTENTS

1.	Definitions
2.	Information and material — application to amend zoning by-law (s. 34 (10.1) of Act)
3.	Notice (“complete application”) (s. 34 (10.7) (a) of Act)
4.	Notice of refusal of application to amend zoning by-law (s. 34 (10.9) of Act)
5.	Notice of public meeting and open house re proposed zoning by-law (s. 34 (13) of Act)
6.	Notice of passing of zoning by-law (s. 34 (18) of Act)
7.	Record compiled by clerk for O.M.B. (s. 34 (23) of Act)
8.	Notice of intention to pass amending by-law to remove holding symbol (s. 36 (4) of Act)
9.	Notice of passing of interim control by-law or extension (s. 38 (3) of Act)
10.	Transition
Schedule 1	Information and material to be provided in an application under subsection 34 (10.1) of the act

Definitions

1. In this Regulation,

"hazard distance" means the distance established as the hazard distance applicable to the propane operation referenced in a risk and safety management plan required under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("distance de danger")

"propane operation" means an operation in respect of which a person is required to prepare a risk and safety management plan under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("installation de propane")

"propane operator" means a person who is required to prepare a risk and safety management plan under Ontario Regulation 211/01 (Propane Storage and Handling) made under the *Technical Standards and Safety Act, 2000*; ("exploitant d'une installation de propane")

"reserve" means a tract of land, the legal title of which is vested in the Crown in right of Canada, that has been set apart by the Crown for the use and benefit of a First Nation; ("réserve")

"subject land" means the land to which a by-law, proposed by-law or proposed by-law amendment applies. ("terrain visé") O. Reg. 545/06, s. 1; O. Reg. 470/09, s. 1.

Information and material — application to amend zoning by-law (s. 34 (10.1) of Act)

2. The information and material to be provided by an applicant under subsection 34 (10.1) of the Act are set out in Schedule 1. O. Reg. 545/06, s. 2.

Notice ("complete application") (s. 34 (10.7) (a) of Act)

3. (1) Section 5 applies, with necessary modifications, to a notice given under clause 34 (10.7) (a) of the Act. O. Reg. 545/06, s. 3 (1).

(2) The notice referred to in subsection (1) may be given together with notice of a public meeting, notice of an open house or both, for the purposes of subsection 34 (13) of the Act, or may be given separately. O. Reg. 545/06, s. 3 (2).

Notice of refusal of application to amend zoning by-law (s. 34 (10.9) of Act)

4. Notice of the refusal of an application to amend a zoning by-law under subsection 34 (10.9) of the Act shall include the following:

1. An explanation of the purpose and effect of the application.
2. A statement that the council or planning board has made a decision to refuse the application, including the date of the refusal.
3. A written explanation for the refusal.
4. The last date for filing a notice of appeal, and a statement that the notice of appeal,
   i. must be filed with the clerk of the municipality or the secretary-treasurer of the planning board, as the case may be,
   ii. must be accompanied by the fee required by the Municipal Board, and
   iii. must set out the reasons for the appeal.
5. The following statement:

The decision of the (*reference to council and name of municipality, or name of planning board*) is final if a notice of appeal is not received before or on the last day for filing a notice of appeal. O. Reg. 545/06, s. 4.

Notice of public meeting and open house re proposed zoning by-law (s. 34 (13) of Act)

5. (1) This section applies to notice of a public meeting and to notice of an open house, if any, for the purposes of subsection 34 (13) of the Act. O. Reg. 545/06, s. 5 (1).

(2) Notice of a public meeting and notice of an open house may be given together or separately. O. Reg. 545/06, s. 5 (2).

(3) Notice shall be given in the manner described in the following subsections of this section:

1. Subsection (4) or (7).
2. Subsection (8).
3. Subsection (9).
4. Subsection (10). O. Reg. 545/06, s. 5 (3).

(4) Notice shall be given,

(a) by personal service or ordinary mail, to every owner of land within 120 metres of the subject land, subject to subsections (5) and (6); and

(b) by posting a notice, clearly visible and legible from a public highway or other place to which the public has access, at every separately assessed property within the subject land or, if posting on the property is impractical, at a nearby location chosen by the clerk of the municipality or the secretary-treasurer of the planning board. O. Reg. 545/06, s. 5 (4).

(5) For the purposes of clause (4) (a), the owner of land is deemed to be the person shown on the last revised assessment roll of the municipality or on the current provincial land tax roll at the address shown on the roll, but if the land is in a municipality and the clerk of the municipality has received written notice of a change of ownership, the notice shall be given to the new owner instead, at the address set out in the notice of change of ownership. O. Reg. 545/06, s. 5 (5).

(6) For the purposes of clause (4) (a), if a condominium development is located within 120 metres of the subject land, notice may be given to the condominium corporation, according to its most recent address for service or mailing address as registered under section 7 of the *Condominium Act, 1998*, instead of being given to all owners assessed in respect of the condominium development. O. Reg. 545/06, s. 5 (6).

(7) Notice shall be given by publishing a notice in a newspaper that, in the opinion of the clerk of the municipality or the secretary-treasurer of the planning board, is of sufficiently general circulation in the area to which the proposed by-law would apply that it would give the public reasonable notice of the public meeting or open house, as the case may be. O. Reg. 545/06, s. 5 (7).

(8) Every person and public body that has given the clerk of the municipality or the secretary-treasurer of the planning board a written request for a notice to which this section applies (including the person's or public body's address) shall be given notice by personal service, ordinary mail or fax. O. Reg. 545/06, s. 5 (8).

(9) Notice shall be given, by personal service, ordinary mail or fax, to all the following persons and public bodies, except those who have notified the clerk of the municipality or the secretary-treasurer of the planning board that they do not wish to receive notice:

1. The clerk of every upper-tier municipality having jurisdiction in the area to which the proposed by-law would apply.
2. The clerk of the lower-tier municipality to which the proposed by-law would apply, if the notice is given by the County of Oxford.
3. The secretary-treasurer of every planning board or municipal planning authority having jurisdiction in the area to which the proposed by-law would apply.
4. The secretary of every school board having jurisdiction in the area to which the proposed by-law would apply.
5. The secretary-treasurer of every conservation authority having jurisdiction in the area to which the proposed by-law would apply.
6. The secretary of every municipal or other corporation operating an electric utility in the local municipality or planning area to which the proposed by-law would apply.
7. The secretary of every company operating a natural gas utility in the local municipality or the planning area to which the proposed by-law would apply.
8. The Executive Vice-President, Law and Development, of Ontario Power Generation Inc.
9. The secretary of Hydro One Inc.
10. The secretary of every company operating an oil or natural gas pipeline in the local municipality or the planning area to which the proposed by-law would apply.

10.1 Every propane operator of a propane operation, if,

   i. any part of the propane operation's hazard distance is within the area to which the proposed by-law would apply, and

   ii. the clerk of the municipality or the secretary-treasurer of the planning board has been notified of the propane operation's hazard distance by a director appointed under section 4 of the *Technical Standards and Safety Act, 2000*.

11. If any of the land to which the proposed by-law would apply is within 300 metres of a railway line, the secretary of the company operating the railway line.
12. The chair or secretary of the municipal heritage committee of the municipality, if any, if the land to which the proposed by-law would apply includes or adjoins a property or district designated under Part IV or V of the *Ontario Heritage Act*.
13. If any of the land to which the proposed by-law would apply is within or abuts the area covered by the Niagara Escarpment Plan, the senior planner of the district office of the Niagara Escarpment Commission having jurisdiction over that land or the abutted area, as the case may be.
14. Parks Canada, if any of the land to which the proposed by-law would apply adjoins a historic site, park or historic canal under the jurisdiction of Parks Canada.
15. The Niagara Parks Commission, if any of the land to which the proposed by-law would apply adjoins the Niagara Parkway or is in the jurisdiction of the Niagara Parks Commission.
16. The St. Lawrence Parks Commission, if any part of the land to which the proposed by-law would apply adjoins the 1000 Islands Parkway and is in the jurisdiction of the St. Lawrence Parks Commission under section 9 of the *St. Lawrence Parks Commission Act*.

17. The clerk of every municipality and the secretary-treasurer of every municipal planning authority or planning board if any part of the municipality, municipal planning area or planning area is within one kilometre of the land to which the proposed by-law would apply.

18. The chief of every First Nation council, if the First Nation is located on a reserve any part of which is within one kilometre of the area to which the proposed by-law would apply. O. Reg. 545/06, s. 5 (9); O. Reg. 470/09, ss. 2, 3.

(10) Notice shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located, if the regional director has given the clerk of the municipality or the secretary-treasurer of the planning board a written request to be given notice of open houses and public meetings. O. Reg. 545/06, s. 5 (10).

(11) A notice, other than a notice that is given by posting as described in clause (4) (b), shall include the following:

1. The date, time and location of the public meeting or open house.
2. An explanation of the purpose and effect of the proposed by-law.
3. A description of the subject land, a key map showing the subject land, or an explanation why no description or key map is provided.
4. Where and when additional information and material about the proposed by-law will be available to the public for inspection.
5. The following statements:
   i. If a person or public body does not make oral submissions at a public meeting or make written submissions to (*name of municipality or planning board*) before the by-law is passed, the person or public body is not entitled to appeal the decision of (*reference to council and name of municipality, or name of planning board*) to the Ontario Municipal Board.
   ii. If a person or public body does not make oral submissions at a public meeting, or make written submissions to (*name of municipality or planning board*) before the by-law is passed, the person or public body may not be added as a party to the hearing of an appeal before the Ontario Municipal Board unless, in the opinion of the Board, there are reasonable grounds to do so.
6. If it is known that the subject land is the subject of an application under the Act for a minor variance or a consent, for an amendment to an official plan or a Minister's zoning order, or for approval of a plan of subdivision, a statement of that fact and the file number of the application. O. Reg. 545/06, s. 5 (11).

(12) A notice that is given by posting as described in clause (4) (b) shall include the following:

1. The date, time and location of the public meeting or open house.
2. An explanation of the purpose and effect of the proposed by-law.
3. Where and when additional information and material about the proposed by-law will be available to the public for inspection.
4. How to obtain a copy of the notice described in subsection (11). O. Reg. 545/06, s. 5 (12).

Notice of passing of zoning by-law (s. 34 (18) of Act)

6. (1) Notice of the passing of a zoning by-law under subsection 34 (18) of the Act shall be given in the manner described in the following subsections of this section:

1. Subsection (2) or (3).
2. Subsection (6).
3. Subsection (7).
4. Subsection (8). O. Reg. 545/06, s. 6 (1).

(2) Notice shall be given by publishing a notice in a newspaper that, in the opinion of the clerk of the municipality or the secretary-treasurer of the planning board, is of sufficiently general circulation in the area where the subject land is located that it would give the public reasonable notice of the passing of the by-law. O. Reg. 545/06, s. 6 (2).

(3) Notice shall be given by personal service or ordinary mail to every owner of land within 120 metres of the subject land, subject to subsections (4) and (5). O. Reg. 545/06, s. 6 (3).

(4) For the purposes of subsection (3), the owner of land is deemed to be the person shown on the last revised assessment roll of the municipality or on the current provincial land tax roll at the address shown on the roll but, if the land is in a municipality and the clerk of the municipality has received written notice of a change of ownership, the notice shall be given instead to the new owner at the address set out in the notice of change of ownership. O. Reg. 545/06, s. 6 (4).

(5) For the purposes of subsection (3), if a condominium development is located within 120 metres of the subject land, notice may be given to the condominium corporation, according to its most recent address for service or mailing address as registered under section 7 of the *Condominium Act*, *1998*, instead of being given to all owners assessed in respect of the condominium development. O. Reg. 545/06, s. 6 (5).

(6) Every person and public body that has given the clerk of the municipality or the secretary-treasurer of the planning board a written request for a notice to which this section applies (including the person's or public body's address) shall be given notice by personal service, ordinary mail or fax. O. Reg. 545/06, s. 6 (6).

(7) Notice shall be given, by personal service, ordinary mail or fax, to all the following persons and public bodies except those who have notified the clerk of the municipality or the secretary-treasurer of the planning board that they do not wish to receive notice:

1. The clerk of the upper-tier municipality, if the by-law is passed by the council of a local municipality that forms part of an upper-tier municipality.
2. The clerk of the lower-tier municipality to which the by-law applies, if it is passed by the County of Oxford.
3. The secretary-treasurer of every planning board or municipal planning authority having jurisdiction in the area where the subject land is located. O. Reg. 545/06, s. 6 (7).

(8) Notice shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located, if the regional director has given the clerk of the municipality or the secretary-treasurer of the planning board a written request to be given notice of the passing of by-laws under section 34 of the Act. O. Reg. 545/06, s. 6 (8).

(9) A notice shall include the following:

1. An explanation of the purpose and effect of the by-law.

2. The number of the by-law and the date it was passed.
3. A description of the subject land, a key map showing the subject land, or an explanation why no description or key map is provided.
4. The last date for filing a notice of appeal, and a statement that the notice of appeal,
   i. must be filed with the clerk of the municipality or the secretary-treasurer of the planning board,
   ii. must set out the reasons for the appeal, and
   iii. must be accompanied by the fee required by the Municipal Board.
5. The following statements:
   i. Only individuals, corporations and public bodies may appeal a by-law to the Ontario Municipal Board. A notice of appeal may not be filed by an unincorporated association or group. However, a notice of appeal may be filed in the name of an individual who is a member of the association or the group on its behalf.
   ii. No person or public body shall be added as a party to the hearing of the appeal unless, before the by-law was passed, the person or public body made oral submissions at a public meeting or written submissions to the council or, in the opinion of the Ontario Municipal Board, there are reasonable grounds to add the person or public body as a party.
6. If it is known that the subject land is the subject of an application under the Act for a consent, for an amendment to an official plan or a Minister's zoning order, or for approval of a plan of subdivision, a statement of that fact and the file number of the application. O. Reg. 545/06, s. 6 (9).

(10) A notice given under subsection (7) or (8) shall also include a copy of the by-law. O. Reg. 545/06, s. 6 (10).

Record compiled by clerk for O.M.B. (s. 34 (23) of Act)

7. (1) A record compiled by the clerk of the municipality or secretary-treasurer of the planning board and forwarded to the Municipal Board under subsection 34 (23) of the Act shall include the following:

1. If applicable, a certified copy of the by-law.
2. If applicable, a certified copy of the notice of the refusal to amend the by-law.
3. The original or a certified copy of the notice of appeal and the date it was received by the municipality or planning board.
4. The original or a copy of all written submissions and comments and the dates they were received.
5. An affidavit or sworn declaration in accordance with subsection (2).
6. A statement by an employee of the municipality or planning board as to whether the decision of the council or planning board,
   i. is consistent with the policy statements issued under subsection 3 (1) of the Act,
   ii. conforms to or does not conflict with any applicable provincial plan or plans, and
   iii. conforms to the official plan of the municipality or planning board.
7. If a public meeting was held, a copy of the minutes.

8. A copy of any planning report considered by the council or planning board.

9. The original or a certified copy of the prescribed information and material received by the council or planning board under subsection 34 (10.1) of the Act.

10. The original or a certified copy of any other information and material that is required to be provided by the official plan of the municipality or planning board. O. Reg. 545/06, s. 7 (1).

(2) The affidavit or sworn declaration for the purposes of paragraph 5 of subsection (1),

(a) shall be made by an employee of the municipality or planning board; and

(b) shall contain,

(i) a certificate that the requirements for giving notice and holding public meetings and open houses, if required, or the alternative measures for informing and obtaining the views of the public set out in the official plan have been complied with,

(ii) a certificate that any requirements for giving notice of the passing of the by-law have been complied with,

(iii) if a public meeting was held, a list of all persons and public bodies that made oral submissions at a public meeting, and

(iv) if subsection 34 (10.7) of the Act applies, a certificate that the requirements of clause 34 (10.7) (a) of the Act have been complied with. O. Reg. 545/06, s. 7 (2).

Notice of intention to pass amending by-law to remove holding symbol (s. 36 (4) of Act)

8. (1) Notice of an intention to pass an amending by-law to remove a holding symbol from a zoning by-law under subsection 36 (4) of the Act shall be given in the manner described in the following subsections of this section:

1. Subsection (2) or (3).

2. Subsection (6). O. Reg. 545/06, s. 8 (1).

(2) Notice shall be given by publishing a notice in a newspaper that, in the opinion of the clerk of the municipality or the secretary-treasurer of the planning board, is of sufficiently general circulation in the area where the subject land is located to give the public reasonable notice of the intention of the council or planning board. O. Reg. 545/06, s. 8 (2).

(3) Notice shall be given by personal service or ordinary mail to every owner of land in the area where the subject land is located, subject to subsections (4) and (5). O. Reg. 545/06, s. 8 (3).

(4) For the purposes of subsection (3), the owner of land is deemed to be the person shown on the last revised assessment roll of the municipality or on the current provincial land tax roll at the address shown on the roll but, if the land is in a municipality and the clerk of the municipality has received written notice of a change of ownership, the notice shall be given instead to the new owner at the address set out in the notice of change of ownership. O. Reg. 545/06, s. 8 (4).

(5) For the purposes of subsection (3), if a condominium development is located within the area where the subject land is located, notice may be given to the condominium corporation, according to its most recent address for service or mailing address as registered under section 7 of the *Condominium Act, 1998*, instead of being given to all owners assessed in respect of the condominium development. O. Reg. 545/06, s. 8 (5).

(6) Every person and public body that has given the clerk of the municipality or the secretary-treasurer of the planning board a written request for a notice to which this section applies (including the

person's or public body's address) shall be given notice by personal service, ordinary mail or fax. O. Reg. 545/06, s. 8 (6).

(7) The notice shall include the following:

1. An explanation of the effect of the removal of the holding symbol.
2. A description of the subject land, a key map showing the subject land, or an explanation why no description or key map is provided.
3. A statement of the earliest date on which the council or the planning board proposes to meet to pass the amending by-law. O. Reg. 545/06, s. 8 (7).

Notice of passing of interim control by-law or extension (s. 38 (3) of Act)

9. (1) Notice of the passing of an interim control by-law or of a by-law extending the period during which an interim control by-law will be in effect under subsection 38 (3) of the Act shall be given in the manner described in the following subsections of this section:

1. Subsection (2) or (3).
2. Subsection (6).
3. Subsection (7). O. Reg. 545/06, s. 9 (1).

(2) Notice shall be given by publishing a notice in a newspaper that, in the opinion of the clerk of the municipality or the secretary-treasurer of the planning board, is of sufficiently general circulation in the area where the subject land is located to give the public reasonable notice of the passing of the by-law. O. Reg. 545/06, s. 9 (2).

(3) Notice shall be given by personal service or ordinary mail to every owner of land within 120 metres of the subject land, subject to subsections (4) and (5). O. Reg. 545/06, s. 9 (3).

(4) For the purposes of subsection (3), the owner of land is deemed to be the person shown on the last revised assessment roll of the municipality or on the current provincial land tax roll at the address shown on the roll but, if the land is in a municipality and the clerk of the municipality has received written notice of a change of ownership, the notice shall be given instead to the new owner at the address set out in the notice of change of ownership. O. Reg. 545/06, s. 9 (4).

(5) For the purposes of subsection (3), if a condominium development is located within 120 metres of the subject land, notice may be given to the condominium corporation, according to its most recent address for service or mailing address as registered under section 7 of the *Condominium Act, 1998*, instead of being given to all owners assessed in respect of the condominium development. O. Reg. 545/06, s. 9 (5).

(6) Notice shall be given, by personal service, ordinary mail or fax, to all the following persons and public bodies except those who have notified the clerk of the municipality or the secretary-treasurer of the planning board that they do not wish to receive notice:

1. The clerk of the upper-tier municipality, if the by-law is passed by the council of a local municipality that forms part of an upper-tier municipality.
2. The clerk of the lower-tier municipality to which the by-law applies, if it is passed by the County of Oxford. O. Reg. 545/06, s. 9 (6).

(7) Notice shall be given, by personal service, ordinary mail or fax, to the regional director of the Ministry of Municipal Affairs and Housing Municipal Services Office responsible for the region that includes the municipality or planning area where the subject land is located, if the regional director has

given the clerk of the municipality or the secretary-treasurer of the planning board a written request to be given notice of the passing of by-laws under subsection 38 (3) of the Act. O. Reg. 545/06, s. 9 (7).

(8) The notice shall include the following:

1. A copy of the by-law and an explanation of its purpose and effect.
2. A description of the subject land, a key map showing the subject land, or an explanation why no description or key map is provided.
3. A statement that the council or the planning board has authority to extend the period during which the by-law will be in effect to a total period not exceeding two years.
4. The last date for filing a notice of appeal, and a statement that the notice of appeal,
   i. must be filed with the clerk of the municipality or the secretary-treasurer of the planning board, as the case may be,
   ii. must set out the reasons for the appeal, and
   iii. must be accompanied by the fee required by the Municipal Board.
5. The following statement:

   Only individuals, corporations and public bodies may appeal an interim control by-law to the Ontario Municipal Board. A notice of appeal may not be filed by an unincorporated association or group. However, a notice of appeal may be filed in the name of an individual who is a member of the association or the group on its behalf. O. Reg. 545/06, s. 9 (8).

Transition

10. Despite the revocation of Ontario Regulation 199/96 (Zoning By-laws, Holding By-laws and Interim Control By-laws) made under the Act, the following shall be continued and disposed of as if Ontario Regulation 199/96 had not been revoked:

1. Any matter or proceeding that is deemed to have been commenced before May 22, 1996, under section 75 of the Act.
2. Any matter or proceeding that is commenced on or after May 22, 1996, but before the day this Regulation comes into force. O. Reg. 545/06, s. 10.

11. OMITTED (REVOKES OTHER REGULATIONS). O. Reg. 545/06, s. 11.

12. OMITTED (PROVIDES FOR COMING INTO FORCE OF PROVISIONS OF THIS REGULATION). O. Reg. 545/06, s. 12.

SCHEDULE 1
INFORMATION AND MATERIAL TO BE PROVIDED IN AN APPLICATION UNDER SUBSECTION 34 (10.1) OF THE ACT

1. The name, address, telephone number and, if applicable, the e-mail address of the applicant.
2. The date of the application to the municipality or planning board.
3. If known, the names and addresses of the holders of any mortgages, charges or other encumbrances in respect of the subject land.
4. The current designation of the subject land in the applicable official plan, and an explanation of how the application conforms to the official plan.
5. The current zoning of the subject land.

6. The nature and extent of the rezoning requested.

7. The reason why the rezoning is requested.

8. If the subject land is within an area where the municipality has pre-determined the minimum and maximum density requirements or the minimum and maximum height requirements, a statement of these requirements.

9. A description of the subject land, including such information as the municipality, concession and lot numbers, registered plan and lot numbers, reference plan and part numbers and street names and numbers.

10. The frontage, depth and area of the subject land, in metric units.

11. If the application is to implement an alteration to the boundary of an area of settlement or to implement a new area of settlement, details of the official plan or official plan amendment that deals with the matter.

12. If the application is to remove land from an area of employment, details of the official plan or official plan amendment that deals with the matter.

13. If the subject land is within an area where zoning with conditions may apply, an explanation of how the application conforms to the official plan policies relating to zoning with conditions.

14. Whether access to the subject land will be,

(a) by a provincial highway, a municipal road that is maintained all year or seasonally, another public road or a right of way; or

(b) by water.

15. If access to the subject land will be by water only, the parking and docking facilities used or to be used and the approximate distance of these facilities from the subject land and the nearest public road.

16. The existing uses of the subject land.

17. Whether there are any buildings or structures on the subject land.

18. If the answer to section 17 is yes, the following information for each building or structure:

(a) the type of building or structure; and

(b) in metric units, the setback from the front lot line, rear lot line and side lot lines, the height of the building or structure and its dimensions or floor area.

19. The proposed uses of the subject land.

20. Whether any buildings or structures are proposed to be built on the subject land.

21. If the answer to section 20 is yes, the following information for each building or structure:

(a) the type of building or structure; and

(b) in metric units, the setback from the front lot line, rear lot line and side lot lines, the height of the building or structure and its dimensions or floor area.

22. If known,

(a) the date the subject land was acquired by the current owner;

(b) the date any existing buildings or structures on the subject land were constructed; and

(c) the length of time that the existing uses of the subject land have continued.

23. Whether water will be provided to the subject land by a publicly owned and operated piped water system, a privately owned and operated individual or communal well, a lake or other water body or other means.

24. Whether sewage disposal will be provided to the subject land by a publicly owned and operated sanitary sewage system, a privately owned and operated individual or communal septic system, a privy or other means.

25. If the application would permit development on privately owned and operated individual or communal septic systems, and more than 4500 litres of effluent would be produced per day as a result of the development being completed,

(a) a servicing options report; and

(b) a hydrogeological report.

26. Whether storm drainage will be provided by sewers, ditches, swales or other means.

27. If known,

(a) whether the subject land has ever been the subject of an application under the Act for approval of a plan of subdivision or for a consent;

(b) if the answer to clause (a) is yes, the file number and status of the application;

(c) whether the subject land has ever been the subject of an application under section 34 of the Act; and

(d) whether the subject land has ever been the subject of a Minister's Zoning Order and, if known, the Ontario Regulation number of that order.

28. A sketch showing, in metric units,

(a) the boundaries and dimensions of the subject land;

(b) the location, size and type of all existing and proposed buildings and structures on the subject land, indicating their distance from the front lot line, rear lot line and side lot lines;

(c) the approximate location of all natural and artificial features (*for example, buildings, railways, roads, watercourses, drainage ditches, banks of rivers or streams, wetlands, wooded areas, wells and septic tanks*) that,

(i) are located on the subject land and on land that is adjacent to it, and

(ii) in the applicant's opinion, may affect the application;

(d) the current uses of land that is adjacent to the subject land;

(e) the location, width and name of any roads within or abutting the subject land, indicating whether it is an unopened road allowance, a public travelled road, a private road or a right of way;

(f) if access to the subject land will be by water only, the location of the parking and docking facilities to be used; and

(g) the location and nature of any easement affecting the subject land.

29. Whether the application for an amendment to the zoning by-law is consistent with policy statements issued under subsection 3 (1) of the Act.

30. Whether the subject land is within an area of land designated under any provincial plan or plans.

31. If the answer to section 30 is yes, whether the application conforms to or does not conflict with the applicable provincial plan or plans.

32. An affidavit or sworn declaration by the applicant that the information required under this Schedule and provided by the applicant is accurate.

O. Reg. 545/06, Sched. 1.

Schedule 1	Information and material to be provided in an application for approval of a development permit

Definition

1. (1) In this Regulation,

"development" means,

(a) the construction, erection or placing of one or more buildings or structures on land,

(b) the making of an addition or alteration to a building or structure that has the effect of substantially increasing its size or usability,

(c) the laying out and establishment of,

(i) a commercial parking lot,

(ii) sites for the location of three or more mobile homes as defined in subsection 46 (1) of the Act,

(iii) sites for the construction, erection or location of three or more land lease community homes as defined in subsection 46 (1) of the Act, or

(iv) sites for the location of three or more trailers as defined in subsection 164 (4) of the *Municipal Act, 2001*,

(d) site alteration, including but not limited to,

(i) alteration of the grade of land, and

(ii) placing or dumping fill, or

(e) the removal of vegetation. O. Reg. 608/06, s. 1 (1).

(2) Subsection (1) applies instead of the definition of "development" in subsection 41 (1) of the Act or subsection 114 (1) of the *City of Toronto Act, 2006*. O. Reg. 608/06, s. 1 (2); O. Reg. 448/07, s. 1.

Development permit system

2. The council of a local municipality may by by-law establish a development permit system within the municipality for any area or areas set out in the by-law. O. Reg. 608/06, s. 2.

Conditions re official plan

3. (1) The council shall not pass a development permit by-law for any area in the municipality unless, before the passing of the by-law, the official plan in effect in the municipality,

(a) identifies the area as a proposed development permit area;

(b) sets out the scope of the authority that may be delegated and any limitations on the delegation, if the council intends to delegate any authority under the development permit by-law; and

(c) for each proposed development permit area identified under clause (a),

(i) contains a statement of the municipality's goals, objectives and policies in proposing a development permit system for the area,

(ii) sets out the types of criteria that may be included in the development permit by-law for determining whether any class of development or any use of land may be permitted by development permit, and

(iii) sets out the types of conditions that may be included in the development permit by-law in accordance with clause 4 (2) (i) and subsections 4 (4), (5) and (6). O. Reg. 608/06, s. 3 (1).

(2) The types of criteria described in subclause (1) (c) (ii) and the types of conditions described in subclause (1) (c) (iii) shall be in accordance with the goals, objectives and policies described in subclause (1) (c) (i). O. Reg. 608/06, s. 3 (2).

(3) For greater certainty, subsection (1) is subject to subsection 24 (2) of the Act. O. Reg. 608/06, s. 3 (3).

(4) The official plan may,

(a) set out information and materials that are required, in addition to those set out in Schedule 1, in an application for a development permit; and

(b) exempt any class of development or any use of land from any of the requirements of Schedule 1, but only if the official plan sets out what information and materials are to be provided in an application that falls within that class or use. O. Reg. 608/06, s. 3 (4).

(5) The official plan may contain policies relating to the application of paragraph 5 of subsection 4 (5), respecting conditions requiring the provision of specified facilities, services and matters in exchange for a specified height or density of development, which may be within the ranges set out under clause 4 (2) (c) or outside those ranges as set out under clause 4 (3) (f). O. Reg. 608/06, s. 3 (5).

Development permit by-law

4. (1) Section 34 of the Act, section 113 of the *City of Toronto Act, 2006* and the regulations made under those sections apply, with necessary modifications, to the making of a development permit by-law, and the by-law is deemed to be a by-law passed under section 34 of the Act, except as set out in this Regulation. O. Reg. 608/06, s. 4 (1).

(2) A development permit by-law shall,

(a) contain a description of the area to which the by-law applies, which shall be within the boundaries of an area identified in the official plan as a proposed development permit area;

(b) set out and define the permitted uses of land;

(c) set out a list of minimum and maximum standards for development;

(d) set out any internal review procedures regarding decisions made under subsection 10 (8);

(e) set out the manner in which notice shall be given, under subsection 10 (12), of decisions made under subsection 10 (8);

(f) provide that a development permit may be amended as described in the by-law;

(g) provide that an agreement referred to in paragraph 7 of subsection (5) may be amended as described in the by-law;

(h) provide that an agreement referred to in section 6 may be amended in the same way as an agreement referred to in paragraph 7 of subsection (5);

(i) if the council wishes to impose conditions in making decisions under subsection 10 (8), outline the conditions;

(j) if the council is delegating any authority under the by-law, set out the scope of the authority that is delegated and any limitations on the delegation; and

(k) state that the placement of a portable classroom on a school site of a district school board is exempt from the requirement for a development permit if the school site was in existence on January 1, 2007, in accordance with section 16. O. Reg. 608/06, s. 4 (2).

(3) A development permit by-law may, in addition to the matters set out in subsection 34 (1) of the Act,

(a) prohibit any development or change of use of land unless a development permit is obtained;

(b) set out and define classes of development;

(c) exempt any defined class of development or use of land from the requirement for a development permit;

(d) set out a list of classes of development or uses of land that may be permitted if the criteria set out in the official plan and in the by-law have been met;

(e) set out criteria that the council shall use in making decisions under subsection 10 (8); and

(f) set out a range of possible variations from the standards referred to in clause (2) (c) that may be authorized in connection with the issuing of a development permit. O. Reg. 608/06, s. 4 (3).

(4) A condition that is outlined for the purposes of clause (2) (i),

(a) shall be of a type that is permitted by the official plan;

(b) shall be reasonable for and related to the appropriate use of the land; and

(c) shall not conflict with federal and provincial statutes and regulations. O. Reg. 608/06, s. 4 (4).

(5) Some examples of conditions that may be outlined for the purposes of clause (2) (i) are:

1. A condition that is permitted by section 34, 40, 41 or 42 of the Act or by section 113 or 114 of the *City of Toronto Act, 2006*.
2. A condition that is related to the removal or restoration of vegetation.
3. A condition that is related to site alteration, including but not limited to,
   i. alteration or restoration of the grade of land, and
   ii. placing or dumping fill.
4. A condition that is related to ongoing monitoring requirements that are considered necessary for the protection of,
   i. public health and safety, or
   ii. the natural environment.
5. A condition that requires the provision of specified facilities, services and matters in exchange for a specified height or density of development, which may be within the ranges set out under clause (2) (c) or outside those ranges as set out under clause (3) (f).
6. With respect to land described in paragraph 3, 3.1 or 3.2 of subsection 34 (1) of the Act, a condition that is related to the matters that would otherwise be prohibited under those paragraphs.
7. A condition requiring the owner of the land to enter into one or more agreements with the municipality respecting one or more other conditions imposed under clause 10 (8) (c), (d) or (e). O. Reg. 608/06, s. 4 (5).

(6) A condition described in paragraph 5 of subsection (5) may be imposed only if,

(a) the official plan sets out policies relating to the application of that paragraph;

(b) the by-law specifically identifies the area of the municipality in respect of which a condition described in that paragraph may be imposed; and

(c) the by-law establishes a proportional relationship between the quantity or monetary value of the facilities, services and matters that may be required and the height or density of development that may be allowed. O. Reg. 608/06, s. 4 (6).

Agreement between municipality and owner

5. (1) An agreement referred to in paragraph 7 of subsection 4 (5) may be registered against the land to which it applies, and the municipality is entitled to enforce it against the owner and, subject to the *Registry Act* and the *Land Titles Act*, against any and all subsequent owners of the land. O. Reg. 608/06, s. 5 (1).

(2) The ability to impose a condition referred to in paragraph 7 of subsection 4 (5) is in addition to the powers set out in clauses 41 (7) (c) and (c.1) of the Act and in clauses 114 (11) (c) and (d) of the *City of Toronto Act, 2006*. O. Reg. 608/06, s. 5 (2).

Pre-existing agreements under s. 41 of Act or s. 114 of *City of Toronto Act, 2006*

6. When an agreement has been entered into by a municipality under section 41 of the Act or section 114 of the *City of Toronto Act, 2006*, and afterwards a development permit by-law that applies to the same land as the agreement comes into force under this Regulation,

(a) the agreement continues to be valid and binding; and

(b) the agreement may be amended as if it were an agreement referred to in paragraph 7 of subsection 4 (5). O. Reg. 608/06, s. 6.

Notice of proposed by-law

7. In addition to the requirements set out in section 6 of Ontario Regulation 545/06 (Zoning By-laws, Holding By-laws and Interim Control By-laws) made under the Act, written notice of a proposed development permit by-law shall contain,

(a) a description of the purpose and effect of the development permit system in the municipality;

(b) a description of the proposed development permit area or areas;

(c) a statement that an appeal to the Municipal Board against a decision on a development permit application may be made only by the owner of the land to which the application relates; and

(d) a description of any internal review procedures contained in the by-law. O. Reg. 608/06, s. 7.

Non-application of certain provisions of Act and *City of Toronto Act, 2006*

8. (1) Subsection 34 (21) and section 45 of the Act do not apply to a development permit by-law. O. Reg. 608/06, s. 8 (1).

(2) Section 37 and subsections 41 (2), (3) and (13) of the Act and subsections 114 (2), (3) and (17) of the *City of Toronto Act, 2006* do not apply to land subject to a development permit by-law. O. Reg. 608/06, s. 8 (2).

Commencement of by-law

9. (1) A development permit by-law comes into force on,

(a) the day after the last day for filing a notice of appeal, if there are no appeals; or

(b) the day after the day on which all the appeals are disposed of by the Municipal Board, or such later date as the Board may otherwise order, subject to subsection (2). O. Reg. 608/06, s. 9 (1).

(2) If there are appeals that have not yet been disposed of, the Municipal Board may, on its own initiative or on the motion of any person or public body, make an order providing that any part of the development permit by-law that is not in issue in such an appeal is deemed to have come into force on,

(a) the day after the last day for filing a notice of appeal; or

(b) such later date as the Board may otherwise order. O. Reg. 608/06, s. 9 (2).

(3) On the day the development permit by-law comes into force, all by-laws passed under section 34 of the Act are deemed to be repealed with respect to the area covered by the development permit by-law. O. Reg. 608/06, s. 9 (3).

(4) If subsection (2) applies, the relevant parts of by-laws passed under section 34 of the Act are deemed to be repealed with respect to the area covered by the part of the development permit by-law that is deemed to have come into force early. O. Reg. 608/06, s. 9 (4).

Application for development permit

10. (1) An owner of land or the owner's authorized agent may apply to the council of the municipality for a development permit with respect to land subject to a development permit by-law. O. Reg. 608/06, s. 10 (1).

(2) An application for a development permit shall contain the information and material set out in Schedule 1, except as provided in subsection 3 (4). O. Reg. 608/06, s. 10 (2).

(3) The council may require that additional information and materials be included in an application for a development permit, as described in clause 3 (4) (a). O. Reg. 608/06, s. 10 (3).

(4) Until the council has received the information and material referred to in subsections (2) and (3), if any, and any fee under section 69 of the Act,

(a) the council may refuse to accept or further consider the application; and

(b) the 45-day period referred to in subsection 12 (1) does not begin. O. Reg. 608/06, s. 10 (4).

(5) When an applicant applies for a development permit, the applicant or the municipality may make a motion for directions to have the Municipal Board determine,

(a) whether the information and material required under subsections (2) and (3) have in fact been provided; or

(b) whether a requirement made under subsection (3) is reasonable. O. Reg. 608/06, s. 10 (5).

(6) The council shall consider the application for a development permit,

(a) when the information and material and fee have been received as described in subsection (4); or

(b) when the Municipal Board makes a determination to that effect under subsection (5). O. Reg. 608/06, s. 10 (6).

(7) If the Municipal Board makes the determination described in clause (6) (b), the 45-day period referred to in subsection 12 (1) is counted from the day on which the information, material and fee referred to in subsection (4) had all been received. O. Reg. 608/06, s. 10 (7).

(8) On considering the application, the council may,

(a) refuse the application;

(b) approve the application and issue a development permit with no conditions attached;

(c) approve the application and require that conditions be met before issuing a development permit;

(d) approve the application and issue a development permit with conditions attached; or

(e) approve the application, require that conditions be met before issuing a development permit and, when the conditions have been met, issue a development permit with conditions attached. O. Reg. 608/06, s. 10 (8).

(9) A condition that is imposed under clause (8) (c), (d) or (e) shall meet the following requirements:

1. The condition shall be clear, precise and quantifiable.
2. The condition shall include a clear statement of whether it must be complied with before construction, renovation or change of use of a building.
3. The condition shall not deal with the following aspects of buildings and structures:
   i. interior design,
   ii. the layout of interior areas, other than interior walkways, stairs, elevators and escalators to which members of the public have access from streets, open spaces and interior walkways in adjacent buildings,
   iii. the manner of construction and construction standards. O. Reg. 608/06, s. 10 (9).

(10) When the council attaches a condition to a development permit under clause (8) (d) or (e), it may require that the fulfilment of the condition be secured in a way that is satisfactory to the council. O. Reg. 608/06, s. 10 (10).

(11) The council, in considering an application for a development permit, may confer with any persons or public bodies that the council considers to have an interest in the application. O. Reg. 608/06, s. 10 (11).

(12) Within 15 days after the council makes a decision under subsection (8), written notice of the decision, including reasons and any conditions imposed, shall be given to the applicant and to each person or public body that filed a written request to be informed of the decision with the clerk of the municipality. O. Reg. 608/06, s. 10 (12).

(13) Section 41 of the Act or section 114 of the *City of Toronto Act, 2006* applies, with necessary modifications, to an application for a development permit, except as otherwise provided in this Regulation. O. Reg. 608/06, s. 10 (13).

(14) Subsections 41 (6), (12) and (12.1) of the Act and subsections 114 (10), (15) and (16) of the *City of Toronto Act, 2006* do not apply to an application for a development permit. O. Reg. 608/06, s. 10 (14).

Motion for directions re fulfillment of condition

11. In the case of a decision under clause 10 (8) (c), (d) or (e) the applicant may, at any time, make a motion for directions to have the Municipal Board determine whether a specified condition has been fulfilled. O. Reg. 608/06, s. 11.

Appeal to O.M.B.

12. (1) If the council fails to make a decision under subsection 10 (8) within 45 days after the date on which the information and material and fee are received as described in subsection 10 (4) or (7), the applicant may appeal to the Municipal Board against the failure to make a decision. O. Reg. 608/06, s. 12 (1).

(2) The applicant may appeal any decision made under subsection 10 (8) to the Municipal Board no later than 20 days after the day notice of the decision is given. O. Reg. 608/06, s. 12 (2).

(3) The appeal may be made by filing with the clerk of the municipality a notice of appeal setting out the reasons for the appeal, accompanied by the fee prescribed under the *Ontario Municipal Board Act*. O. Reg. 608/06, s. 12 (3).

Duties of clerk

13. On receiving a notice of appeal under section 12, the clerk of the municipality shall ensure that,

(a) a record is compiled that includes,

(i) the original or a true copy of the application,

(ii) a copy of the development permit by-law, certified by the clerk,

(iii) a copy of any decision of council relating to the application, certified by the clerk, and

(iv) an affidavit or sworn declaration by an employee of the municipality that the notice requirements of subsection 10 (12) have been complied with; and

(b) the notice of appeal, the record and the fee are forwarded to the Municipal Board within 15 days after the notice of appeal is received under section 12. O. Reg. 608/06, s. 13.

Decision of O.M.B.

14. (1) On an appeal under section 12, the Municipal Board,

(a) shall hold a hearing and determine the matter in issue; and

(b) may make any decision that the council could have made under subsection 10 (8). O. Reg. 608/06, s. 14 (1).

(2) The Municipal Board's decision is final. O. Reg. 608/06, s. 14 (2).

(3) If the Municipal Board orders that a development permit be issued, the council shall issue it, except that if the Municipal Board imposes conditions, the development permit shall not be issued until,

(a) in the case of conditions that are required to be met before the development permit is issued, the council is satisfied that the conditions have been met;

(b) in the case of conditions that are attached to the development permit, their fulfillment has been secured in a way that is satisfactory to the council. O. Reg. 608/06, s. 14 (3).

(4) Subsection 10 (12) applies to orders of the Municipal Board, with necessary modifications. O. Reg. 608/06, s. 14 (4).

Delegation by council

15. (1) If clauses 3 (1) (b) and 4 (2) (j) have been complied with, the council may delegate the authority described in subsection (2) to,

(a) a committee appointed by the council, including a committee of the council; or

(b) an employee of the municipality, identified by name or position. O. Reg. 608/06, s. 15 (1).

(2) The authority that may be delegated is authority to,

(a) make any decision that the council is authorized to make under subsection 10 (8); and

(b) enter into agreements referred to in paragraph 7 of subsection 4 (5). O. Reg. 608/06, s. 15 (2).

(3) The authority delegated as described in clause (2) (a) or (b) or as described in both clauses may be made subject to any limitations that are set out in the delegation. O. Reg. 608/06, s. 15 (3).

Exemption

16. The placement of a portable classroom on a school site of a district school board is exempt from the requirement for a development permit if the school site was in existence on January 1, 2007. O. Reg. 608/06, s. 16.

Transition

17. (1) In this section,

"development permit by-law" means By-law 2004-180 of the Township of Lake of Bays, including any amendments made before the day this Regulation comes into force. O. Reg. 608/06, s. 17 (1).

(2) Until the council of the Township of Lake of Bays revokes the development permit by-law and replaces it in accordance with this Regulation,

(a) despite the revocation of Ontario Regulation 246/01, the development permit by-law continues to be in force, shall be interpreted and may be amended as if that regulation were still in force;

(b) the council may amend the development permit by-law to extend its application to any area within the Township of Lake of Bays in addition to the land described in section 3 of Schedule 1 to Ontario Regulation 246/01. O. Reg. 608/06, s. 17 (2).

18. OMITTED (REVOKES OTHER REGULATIONS). O. Reg. 608/06, s. 18.

19. OMITTED (PROVIDES FOR COMING INTO FORCE OF PROVISIONS OF THIS REGULATION). O. Reg. 608/06, s. 19.

SCHEDULE 1
INFORMATION AND MATERIAL TO BE PROVIDED IN AN APPLICATION FOR APPROVAL OF A DEVELOPMENT PERMIT

1. The name, address, telephone number and, if applicable, the e-mail address of the owner of the subject land, and of the agent if the applicant is an authorized agent.

2. The current designation of the subject land in the applicable official plan and the land uses that the designation authorizes.

3. Whether a variation is requested within the provisions set out in the development permit by-law.

4. Whether the proposed use is,

(a) a permitted use; or

(b) a use that may be permitted subject to criteria as set out in the development permit by-law.

5. If the answer to section 3 or clause 4 (b) is yes, a statement regarding how the applicable criteria have been addressed.

6. A description of the subject land, including such information as the municipality, concession and lot numbers, registered plan and lot numbers, reference plan and part numbers and street names and numbers.

7. The frontage, depth and area of the subject land, in metric units.

8. Whether access to the subject land is,

(a) by a provincial highway, a municipal road that is maintained all year or seasonally, another public road or a right of way; or

(b) by water.

9. If access to the subject land is by water only, the parking and docking facilities used or to be used and the approximate distance of these facilities from the subject land and the nearest public road.

10. The existing uses of the subject land.

11. Whether there are any buildings or structures on the subject land.

12. If the answer to section 11 is yes, the following information for each building or structure:

(a) the type of building or structure; and

(b) in metric units, the setback from the front lot line, rear lot line and side lot lines, the height of the building or structure and its dimensions or floor area.

13. The proposed uses of the subject land.

14. Whether any buildings or structures are proposed to be built on the subject land.

15. If the answer to section 14 is yes, the following information for each proposed building or structure:

(a) the type of building or structure; and

(b) in metric units, the setback from the front lot line, rear lot line and side lot lines, the height of the building or structure and its dimensions or floor area.

16. Whether the proposed building or structure is within an area described in the official plan and development permit by-law as an area within which plans and drawings under subsection 41 (4) or (5) of the Act or subsection 114 (5) or (9) of the *City of Toronto Act, 2006* may be required.

17. One or both of the following, as required by the development permit by-law:

1. Plans that show the location of all buildings and structures to be erected, the location of all facilities and works to be provided in conjunction with the buildings and structures, and the location of all facilities and works required under clause 41 (7) (a) of the Act or clause 114 (11) (a) of the *City of Toronto Act, 2006*, including facilities designed to have regard for accessibility for persons with disabilities.

2. Drawings that show plan, elevation and cross-section views for each building to be erected and are sufficient to display,

   i. the massing and conceptual design of the proposed building,

   ii. the relationship of the proposed building to adjacent buildings, streets, and exterior areas to which members of the public have access,

   iii. the provision of interior walkways, stairs, elevators and escalators to which members of the public have access from streets, open spaces and interior walkways in adjacent buildings,

   iv. matters relating to exterior design, including without limitation the character, scale, appearance and design features of the proposed building, and its sustainable design, but only

to the extent that it is a matter of exterior design, if the official plan contains provisions relating to such matters,

v. the sustainable design elements on any adjoining highway under a municipality's jurisdiction, including without limitation trees, shrubs, hedges, plantings or other ground cover, permeable paving materials, street furniture, curb ramps, waste and recycling containers and bicycle parking facilities, and

vi. facilities designed to have regard for accessibility for persons with disabilities.

18. Plans and drawings referred to in section 17 shall not include the following:

1. Interior design.

2. The layout of interior areas, other than the interior walkways, stairs, elevators and escalators referred to in subparagraph 2 iii of section 17.

3. The manner of construction and standards for construction.

19. If known,

(a) the date the subject land was acquired by the current owner;

(b) the date any existing buildings or structures on the subject land were constructed; and

(c) the length of time that the existing uses of the subject land have continued.

20. Whether water is provided to the subject land by a publicly owned and operated piped water system, a privately owned and operated individual or communal well, a lake or other water body or other means.

21. Whether sewage disposal is provided to the subject land by a publicly owned and operated sanitary sewage system, a privately owned and operated individual or communal septic system, a privy or other means.

22. Whether storm drainage is provided by sewers, ditches, swales or other means.

23. If known,

(a) whether the subject land has ever been the subject of an application under the Act for approval of a plan of subdivision or a consent;

(b) if the answer to clause (a) is yes, the file number and status of the application;

(c) whether the subject land has ever been the subject of an application under section 34 or 45 of the Act; and

(d) if the answer to clause (c) is yes, the file number and status of the application.

24. A sketch showing, in metric units,

(a) the boundaries and dimensions of the subject land;

(b) the location, size and type of all existing and proposed buildings and structures on the subject land, indicating their distance from the front yard lot line, rear yard lot line and side yard lot lines;

(c) the approximate location of all natural and artificial features (for example, buildings, railways, roads, watercourses, drainage ditches, banks of rivers or streams, wetlands, wooded areas, wells and septic tanks) that,

(i) are located on the subject land and on land that is adjacent to it, and

(ii) in the applicant's opinion, may affect the application;

(d) the current uses of land that is adjacent to the subject land;

(e) the location, width and name of any roads within or abutting the subject land, indicating whether it is an unopened road allowance, a public travelled road, a private road or a right of way;

(f) if access to the subject land is by water only, the location of the parking and docking facilities to be used; and

(g) the location and nature of any easement or restrictive covenant affecting the subject land.

25. An affidavit or sworn declaration by the applicant that the information required under this Schedule and provided by the applicant is accurate.

Interpretation

Definitions

1. (1) In this Act,

"action" means an action under Part VIII; ("action")

"construction trade newspaper" means a newspaper having circulation generally throughout Ontario, that is published no less frequently than on all days except Saturdays and holidays, and in which calls for tender on construction contracts are customarily published, and that is primarily devoted to the publication of matters of concern to the construction industry; ("journal de l'industrie de la construction")

"contract" means the contract between the owner and the contractor, and includes any amendment to that contract; ("contrat")

"contractor" means a person contracting with or employed directly by the owner or an agent of the owner to supply services or materials to an improvement; ("entrepreneur")

"court" means the Superior Court of Justice; ("tribunal")

"Crown" includes a Crown agency to which the *Crown Agency Act* applies; ("Couronne")

"holdback" means the 10 per cent of the value of the services or materials supplied under a contract or subcontract required to be withheld from payment by Part IV; ("retenue")

"home" means,

(a) a self-contained one-family dwelling, detached or attached to one or more others by a common wall,

(b) a building composed of two self-contained, one-family dwellings under one ownership, or

(c) a condominium one-family dwelling unit, including the common interests appurtenant thereto,

and includes any structure or works used in conjunction therewith; ("logement")

"home buyer" means a person who buys the interest of an owner in a premises that is a home, whether built or not at the time the agreement of purchase and sale in respect thereof is entered into, provided,

(a) not more than 30 per cent of the purchase price, excluding money held in trust under section 81 of the *Condominium Act, 1998*, is paid prior to the conveyance, and

(b) the home is not conveyed until it is ready for occupancy, evidenced in the case of a new home by the issuance of a municipal permit authorizing occupancy or the issuance under the *Ontario New Home Warranties Plan Act* of a certificate of completion and possession; ("acquéreur d'un logement")

"improvement" means, in respect of any land,

(a) any alteration, addition or repair to the land,

(b) any construction, erection or installation on the land, including the installation of industrial, mechanical, electrical or other equipment on the land or on any building, structure

or works on the land that is essential to the normal or intended use of the land, building, structure or works, or

(c) the complete or partial demolition or removal of any building, structure or works on the land; ("améliorations")

"interest in the premises" means an estate or interest of any nature, and includes a statutory right given or reserved to the Crown to enter any lands or premises belonging to any person or public authority for the purpose of doing any work, construction, repair or maintenance in, upon, through, over or under any lands or premises; ("intérêt sur le local")

"land" includes any building, structure or works affixed to the land, or an appurtenance to any of them, but does not include the improvement; ("bien-fonds")

"lien claimant" means a person having a preserved or perfected lien; ("créancier privilégié")

"materials" means every kind of movable property,

(a) that becomes, or is intended to become, part of the improvement, or that is used directly in the making of the improvement, or that is used to facilitate directly the making of the improvement,

(b) that is equipment rented without an operator for use in the making of the improvement; ("matériaux")

"mortgage" includes a charge and "mortgagee" includes a chargee; ("hypothèque", "créancier hypothécaire")

"municipality" means a municipality or local board, both as defined in the *Municipal Affairs Act*; ("municipalité")

"owner" means any person, including the Crown, having an interest in a premises at whose request and,

(a) upon whose credit, or

(b) on whose behalf, or

(c) with whose privity or consent, or

(d) for whose direct benefit,

an improvement is made to the premises but does not include a home buyer; ("propriétaire")

"payer" means the owner, contractor or subcontractor who is liable to pay for the materials or services supplied to an improvement under a contract or subcontract; ("responsable du paiement")

"payment certifier" means an architect, engineer or any other person upon whose certificate payments are made under a contract or subcontract; ("personne qui autorise le paiement")

"person having a lien" includes both a lien claimant and a person with an unpreserved lien; ("titulaire d'un privilège")

"premises" includes,

(a) the improvement,

(b) all materials supplied to the improvement, and

(c) the land occupied by the improvement, or enjoyed therewith, or the land upon or in respect of which the improvement was done or made; ("local")

"price" means the contract or subcontract price,

(a) agreed upon between the parties, or

(b) where no specific price has been agreed upon between them, the actual value of the services or materials that have been supplied to the improvement under the contract or subcontract; ("prix")

"services or materials" includes both services and materials; ("services ou matériaux")

"subcontract" means any agreement between the contractor and a subcontractor, or between two or more subcontractors, relating to the supply of services or materials to the improvement and includes any amendment to that agreement; ("contrat de sous-traitance")

"subcontractor" means a person not contracting with or employed directly by the owner or an agent of the owner but who supplies services or materials to the improvement under an agreement with the contractor or under the contractor with another subcontractor; ("sous-traitant")

"suffers damages as a result" means suffers damages that could be reasonably foreseen to result; ("subir des dommages en conséquence")

"supply of services" means any work done or service performed upon or in respect of an improvement, and includes,

(a) the rental of equipment with an operator, and

(b) where the making of the planned improvement is not commenced, the supply of a design, plan, drawing or specification that in itself enhances the value of the owner's interest in the land,

and a corresponding expression has a corresponding meaning; ("prestation de services")

"wages" means the money earned by a worker for work done by time or as piece work, and includes all monetary supplementary benefits, whether provided for by statute, contract or collective bargaining agreement; ("salaire")

"worker" means a person employed for wages in any kind of labour; ("ouvrier")

"workers' trust fund" means any trust fund maintained in whole or in part on behalf of any worker on an improvement and into which any monetary supplementary benefit is payable as wages for work done by the worker in respect of the improvement; ("fonds en fiducie des ouvriers")

"written notice of a lien" includes a claim for lien and any written notice given by a person having a lien that,

(a) identifies the payer and identifies the premises, and

(b) states the amount that the person has not been paid and is owed to the person by the payer. ("avis écrit d'un privilège") R.S.O. 1990, c. C.30, s. 1 (1); 2002, c. 17, Sched. F, Table; 2006, c. 19, Sched. C, s. 1 (1); 2010, c. 16, Sched. 2, s. 2 (1, 2).

When materials supplied

(2) For the purposes of this Act, materials are supplied to an improvement when they are,

(a) placed on the land on which the improvement is being made;

(b) placed upon land designated by the owner or an agent of the owner that is in the immediate vicinity of the premises, but placing materials on the land so designated does not, of itself, make that land subject to a lien; or

(c) in any event, incorporated into or used in making or facilitating directly the making of the improvement. R.S.O. 1990, c. C.30, s. 1 (2).

Idem

(3) A contractor or subcontractor to whom materials are supplied and who designates land under clause (2) (b) is deemed to be the owner's agent for that purpose, unless the person supplying the materials has actual notice to the contrary. R.S.O. 1990, c. C.30, s. 1 (3).

Contracts, substantial performance and completion

When contract substantially performed

2. (1) For the purposes of this Act, a contract is substantially performed,

(a) when the improvement to be made under that contract or a substantial part thereof is ready for use or is being used for the purposes intended; and

(b) when the improvement to be made under that contract is capable of completion or, where there is a known defect, correction, at a cost of not more than,

(i) 3 per cent of the first $500,000 of the contract price,

(ii) 2 per cent of the next $500,000 of the contract price, and

(iii) 1 per cent of the balance of the contract price. R.S.O. 1990, c. C.30, s. 2 (1).

Idem

(2) For the purposes of this Act, where the improvement or a substantial part thereof is ready for use or is being used for the purposes intended and the remainder of the improvement cannot be completed expeditiously for reasons beyond the control of the contractor or, where the owner and the contractor agree not to complete the improvement expeditiously, the price of the services or materials remaining to be supplied and required to complete the improvement shall be deducted from the contract price in determining substantial performance. R.S.O. 1990, c. C.30, s. 2 (2).

When contract deemed completed

(3) For the purposes of this Act, a contract shall be deemed to be completed and services or materials shall be deemed to be last supplied to the improvement when the price of completion, correction of a known defect or last supply is not more than the lesser of,

(a) 1 per cent of the contract price; and

(b) $1,000. R.S.O. 1990, c. C.30, s. 2 (3).

PART I
GENERAL

Act binds Crown

3. (1) Subject to section 16 (where lien does not attach to the premises), this Act binds the Crown. R.S.O. 1990, c. C.30, s. 3 (1).

Exception re certain payments

(2) This Act does not apply in respect of labour, material or services supplied as a result of a contract, as defined in the *Ministry of Transportation and Communications Creditors Payment Act*, being chapter 290 of the Revised Statutes of Ontario, 1980, made before the 1st day of April, 1990. R.S.O. 1990, c. C.30, s. 3 (2).

Exception re notice of claim

(3) Section 7 of the *Proceedings Against the Crown Act* does not apply in respect of an action against the Crown under this Act. R.S.O. 1990, c. C.30, s. 3 (3).

(4) REPEALED: 1997, c. 23, s. 4 (1).

No waiver of rights

4. An agreement by any person who supplies services or materials to an improvement that this Act does not apply to the person or that the remedies provided by it are not available for the benefit of the person is void. R.S.O. 1990, c. C.30, s. 4.

Contracts to conform

5. (1) Every contract or subcontract related to an improvement is deemed to be amended in so far as is necessary to be in conformity with this Act. R.S.O. 1990, c. C.30, s. 5 (1).

Retention of holdbacks authorized

(2) Without restricting the generality of subsection (1), where the purchaser is an owner, an agreement of purchase and sale that provides for the making or completion of an improvement shall be deemed to provide for the retention of holdbacks by the purchaser, and tender by the purchaser on closing is not defective by reason only that the purchaser does not tender the amount of the holdbacks. R.S.O. 1990, c. C.30, s. 5 (2).

Minor irregularities

6. No certificate, declaration or claim for lien is invalidated by reason only of a failure to comply strictly with subsection 32 (2) or (5), subsection 33 (1) or subsection 34 (5), unless in the opinion of the court a person has been prejudiced thereby, and then only to the extent of the prejudice suffered. R.S.O. 1990, c. C.30, s. 6.

PART II
TRUST PROVISIONS

Owner's trust

Amounts received for financing a trust

7. (1) All amounts received by an owner, other than the Crown or a municipality, that are to be used in the financing of the improvement, including any amount that is to be used in the payment of the purchase price of the land and the payment of prior encumbrances, constitute, subject to the payment of the purchase price of the land and prior encumbrances, a trust fund for the benefit of the contractor. R.S.O. 1990, c. C.30, s. 7 (1).

Amounts certified as payable

(2) Where amounts become payable under a contract to a contractor by the owner on a certificate of a payment certifier, an amount that is equal to an amount so certified that is in the owner's hands or received by the owner at any time thereafter constitutes a trust fund for the benefit of the contractor. R.S.O. 1990, c. C.30, s. 7 (2).

Where substantial performance certified

(3) Where the substantial performance of a contract has been certified, or has been declared by the court, an amount that is equal to the unpaid price of the substantially performed portion of the contract that is in the owner's hands or is received by the owner at any time thereafter constitutes a trust fund for the benefit of the contractor. R.S.O. 1990, c. C.30, s. 7 (3).

Obligations as trustee

(4) The owner is the trustee of the trust fund created by subsection (1), (2) or (3), and the owner shall not appropriate or convert any part of a fund to the owner's own use or to any use inconsistent with the trust until the contractor is paid all amounts related to the improvement owed to the contractor by the owner. R.S.O. 1990, c. C.30, s. 7 (4).

Contractor's and subcontractor's trust

Amounts received a trust

8. (1) All amounts,

(a) owing to a contractor or subcontractor, whether or not due or payable; or

(b) received by a contractor or subcontractor,

on account of the contract or subcontract price of an improvement constitute a trust fund for the benefit of the subcontractors and other persons who have supplied services or materials to the improvement who are owed amounts by the contractor or subcontractor. R.S.O. 1990, c. C.30, s. 8 (1).

Obligations as trustee

(2) The contractor or subcontractor is the trustee of the trust fund created by subsection (1) and the contractor or subcontractor shall not appropriate or convert any part of the fund to the contractor's or subcontractor's own use or to any use inconsistent with the trust until all subcontractors and other persons who supply services or materials to the improvement are paid all amounts related to the improvement owed to them by the contractor or subcontractor. R.S.O. 1990, c. C.30, s. 8 (2).

Vendor's trust

Amounts received a trust

9. (1) Where the owner's interest in a premises is sold by the owner, an amount equal to,

(a) the value of the consideration received by the owner as a result of the sale,

less,

(b) the reasonable expenses arising from the sale and the amount, if any, paid by the vendor to discharge any existing mortgage indebtedness on the premises,

constitutes a trust fund for the benefit of the contractor. R.S.O. 1990, c. C.30, s. 9 (1).

Obligations as trustee

(2) The former owner is the trustee of the trust created by subsection (1), and shall not appropriate or convert any part of the trust property to the former owner's own use or to any use inconsistent with the trust until the contractor is paid all amounts owed to the contractor that relate to the improvement. R.S.O. 1990, c. C.30, s. 9 (2).

Payment discharging trust

10. Subject to Part IV (holdbacks), every payment by a trustee to a person the trustee is liable to pay for services or materials supplied to the improvement discharges the trust of the trustee making the payment and the trustee's obligations and liability as trustee to all beneficiaries of the trust to the extent of the payment made by the trustee. R.S.O. 1990, c. C.30, s. 10.

Where trust funds may be reduced

11. (1) Subject to Part IV, a trustee who pays in whole or in part for the supply of services or materials to an improvement out of money that is not subject to a trust under this Part may retain from trust funds an amount equal to that paid by the trustee without being in breach of the trust. R.S.O. 1990, c. C.30, s. 11 (1).

Application of trust funds to discharge loan

(2) Subject to Part IV, where a trustee pays in whole or in part for the supply of services or materials to an improvement out of money that is loaned to the trustee, trust funds may be applied to discharge the loan to the extent that the lender's money was so used by the trustee, and the application of trust money does not constitute a breach of the trust. R.S.O. 1990, c. C.30, s. 11 (2).

Set-off by trustee

12. Subject to Part IV, a trustee may, without being in breach of trust, retain from trust funds an amount that, as between the trustee and the person the trustee is liable to pay under a contract or subcontract related to the improvement, is equal to the balance in the trustee's favour of all outstanding debts, claims or damages, whether or not related to the improvement. R.S.O. 1990, c. C.30, s. 12.

Liability for breach of trust

By corporation

13. (1) In addition to the persons who are otherwise liable in an action for breach of trust under this Part,

(a) every director or officer of a corporation; and

(b) any person, including an employee or agent of the corporation, who has effective control of a corporation or its relevant activities,

who assents to, or acquiesces in, conduct that he or she knows or reasonably ought to know amounts to breach of trust by the corporation is liable for the breach of trust. R.S.O. 1990, c. C.30, s. 13 (1).

Effective control of corporation

(2) The question of whether a person has effective control of a corporation or its relevant activities is one of fact and in determining this the court may disregard the form of any transaction and the separate corporate existence of any participant. R.S.O. 1990, c. C.30, s. 13 (2).

Joint and several liability

(3) Where more than one person is found liable or has admitted liability for a particular breach of trust under this Part, those persons are jointly and severally liable. R.S.O. 1990, c. C.30, s. 13 (3).

Contribution

(4) A person who is found liable, or who has admitted liability, for a particular breach of a trust under this Part is entitled to recover contribution from any other person also liable for the breach in such amount as will result in equal contribution by all parties liable for the breach unless the court considers such apportionment would not be fair and, in that case, the court may direct such contribution or indemnity as the court considers appropriate in the circumstances. R.S.O. 1990, c. C.30, s. 13 (4).

PART III
THE LIEN

Creation of lien

14. (1) A person who supplies services or materials to an improvement for an owner, contractor or subcontractor, has a lien upon the interest of the owner in the premises improved for the price of those services or materials. R.S.O. 1990, c. C.30, s. 14 (1).

Note: Subsection (1) applies to services and materials supplied by architects, holders of certificates of practice under the *Architects Act* and their employees under contracts made on or after November 28, 1997, and under subcontracts made under such contracts. See: 1997, c. 23, s. 4 (2).

No lien for interest

(2) No person is entitled to a lien for any interest on the amount owed to the person in respect of the services or materials that have been supplied by the person, but nothing in this subsection affects any right that the person may otherwise have to recover that interest. R.S.O. 1990, c. C.30, s. 14 (2).

When lien arises

15. A person's lien arises and takes effect when the person first supplies services or materials to the improvement. R.S.O. 1990, c. C.30, s. 15.

Interest of Crown

16. (1) A lien does not attach to the interest of the Crown in a premises. R.S.O. 1990, c. C.30, s. 16 (1).

Interest of person other than Crown

(2) Where an improvement is made to a premises in which the Crown has an interest, but the Crown is not an owner within the meaning of this Act, the lien may attach to the interest of any other person in that premises. R.S.O. 1990, c. C.30, s. 16 (2).

Where lien does not attach to premises

(3) Where the Crown is the owner of a premises within the meaning of this Act, or where the premises is,

(a) a public street or highway owned by a municipality; or

(b) a railway right-of-way,

the lien does not attach to the premises but constitutes a charge as provided in section 21, and the provisions of this Act shall have effect without requiring the registration of a claim for lien against the premises. R.S.O. 1990, c. C.30, s. 16 (3).

Limitation on value of lien

17. (1) The lien of a person is limited to the amount owing to the person in relation to the improvement and, subject to Part IV (holdbacks), it is further limited to the least amount owed in relation to the improvement by a payer to the contractor or to any subcontractor whose contract or subcontract was in whole or in part performed by the supply of services or materials giving rise to the lien. R.S.O. 1990, c. C.30, s. 17 (1).

Idem

(2) Subject to Part IV, the total value of the liens of all members of a class, as defined in section 79, is limited to the least amount owed in relation to the improvement by a payer to the contractor or to any subcontractor whose contract or subcontract was in whole or in part performed by the supply of services or materials made by the members of the class. R.S.O. 1990, c. C.30, s. 17 (2).

Set-off

(3) Subject to Part IV, in determining the amount of a lien under subsection (1) or (2), there may be taken into account the amount that is, as between a payer and the person the payer is liable to pay, equal to the balance in the payer's favour of all outstanding debts, claims or damages, whether or not related to the improvement. R.S.O. 1990, c. C.30, s. 17 (3).

Public highway, liability of municipality re

(4) Despite subsection (1), where land is dedicated to a municipality as a public street or highway and an improvement is made to the land at the written request of, or under an agreement with, the municipality, but not at its expense, the municipality shall nevertheless, on default of payment by the proper payer, be liable to the value of the holdbacks under Part IV that would have been required were the improvement made at the expense of the municipality, and the procedure for making a claim under this subsection shall be the same as for enforcing a claim for lien against a municipality in respect of a public street or highway. R.S.O. 1990, c. C.30, s. 17 (4).

Joint or common interests

18. Where the interest of the owner in the premises is held jointly or in common with another person who knew or ought reasonably to have known of the making of the improvement, the joint or common interest in the premises of that person is also subject to the lien unless the contractor receives actual notice, before the supply of services or materials to the improvement is commenced, that the person having the joint or common interest assumes no responsibility for the improvement to be made. R.S.O. 1990, c. C.30, s. 18.

Where owner's interest leasehold

19. (1) Where the interest of the owner to which the lien attaches is leasehold, the interest of the landlord shall also be subject to the lien to the same extent as the interest of the owner if the contractor gives the landlord written notice of the improvement to be made, unless the landlord, within fifteen days of receiving the notice from the contractor, gives the contractor written notice that the landlord assumes no responsibility for the improvement to be made. R.S.O. 1990, c. C.30, s. 19 (1).

Forfeiture or termination of lease, effect of

(2) No forfeiture of a lease to, or termination of a lease by, a landlord, except for non-payment of rent, deprives any person having a lien against the leasehold of the benefit of the person's lien. R.S.O. 1990, c. C.30, s. 19 (2).

Notice to lien claimants

(3) Where a landlord intends to enforce forfeiture or terminate a lease of the premises because of non-payment of rent, and there is a claim for lien registered against the premises in the proper land registry office, the landlord shall give notice in writing of the intention to enforce forfeiture or terminate the lease and of the amount of the unpaid rent to each person who has registered a claim for lien against the premises. R.S.O. 1990, c. C.30, s. 19 (3).

Payment of unpaid rent

(4) A person receiving notice under subsection (3) may, within ten days thereafter, pay to the landlord the amount of the unpaid rent, and the amount so paid may be added by that person to the person's claim for lien. R.S.O. 1990, c. C.30, s. 19 (4).

General lien, more than one premises

20. (1) Where an owner enters into a single contract for improvements on more than one premises of the owner, any person supplying services or materials under that contract, or under a subcontract under that contract, may choose to have the person's lien follow the form of the contract and be a general lien against each of those premises for the price of all services and materials the person supplied to all the premises. R.S.O. 1990, c. C.30, s. 20 (1).

Where subs. (1) does not apply

(2) Subsection (1) does not apply and no general lien arises under or in respect of a contract that provides in writing that liens shall arise and expire on a lot-by-lot basis. R.S.O. 1990, c. C.30, s. 20 (2).

Lien a charge

21. The lien of a person is a charge upon the holdbacks required to be retained by Part IV, and subject to subsection 17 (3), any additional amount owed in relation to the improvement by a payer to the contractor or to any subcontractor whose contract or subcontract was in whole or in part performed by the supply of services or materials giving rise to the lien. R.S.O. 1990, c. C.30, s. 21.

PART IV
HOLDBACKS

Holdbacks

Basic holdback

22. (1) Each payer upon a contract or subcontract under which a lien may arise shall retain a holdback equal to 10 per cent of the price of the services or materials as they are actually supplied under the contract or subcontract until all liens that may be claimed against the holdback have expired as provided in Part V, or have been satisfied, discharged or provided for under section 44 (payment into court). R.S.O. 1990, c. C.30, s. 22 (1).

Separate holdback for finishing work

(2) Where the contract has been certified or declared to be substantially performed but services or materials remain to be supplied to complete the contract, the payer upon the contract, or a subcontract, under which a lien may arise shall retain, from the date certified or declared to be the date of substantial performance of the contract, a separate holdback equal to 10 per cent of the price of the remaining services or materials as they are actually supplied under the contract or subcontract, until all liens that may be claimed against the holdback have expired as provided in Part V, or have been satisfied, discharged or provided for under section 44. R.S.O. 1990, c. C.30, s. 22 (2).

When obligation to retain applies

(3) The obligation to retain the holdbacks under subsections (1) and (2) applies irrespective of whether the contract or subcontract provides for partial payments or payment on completion. R.S.O. 1990, c. C.30, s. 22 (3).

Personal liability of owner

23. (1) Subject to subsections (2), (3) and (4), an owner is personally liable for holdbacks that the owner is required to retain under this Part to those lien claimants who have valid liens against the owner's interest in the premises. R.S.O. 1990, c. C.30, s. 23 (1).

Limitation

(2) Where the defaulting payer is the contractor, the owner's personal liability to a lien claimant or to a class of lien claimants as defined by section 79 does not exceed the holdbacks the owner is required to retain. R.S.O. 1990, c. C.30, s. 23 (2).

Idem

(3) Where the defaulting payer is a subcontractor, the owner's personal liability to a lien claimant or to a class of lien claimants as defined by section 79 does not exceed the lesser of,

(a) the holdbacks the owner is required to retain; and

(b) the holdbacks required to be retained by the contractor or a subcontractor from the lien claimant's defaulting payer. R.S.O. 1990, c. C.30, s. 23 (3).

How determined

(4) The personal liability of an owner under this section may only be determined by an action under this Act. R.S.O. 1990, c. C.30, s. 23 (4).

Transition

(5) This section does not affect the rights acquired by any person from a judgment or order of any court before the 28th day of June, 1990. R.S.O. 1990, c. C.30, s. 23 (5).

Payments that may be made

24. (1) A payer may, without jeopardy, make payments on a contract or subcontract up to 90 per cent of the price of the services or materials that have been supplied under that contract or subcontract unless, prior to making payment, the payer has received written notice of a lien. R.S.O. 1990, c. C.30, s. 24 (1).

Idem

(2) Where a payer has received written notice of a lien and has retained, in addition to the holdbacks required by this Part, an amount sufficient to satisfy the lien, the payer may, without jeopardy, make

payment on a contract or subcontract up to 90 per cent of the price of the services and materials that have been supplied under that contract or subcontract, less the amount retained. R.S.O. 1990, c. C.30, s. 24 (2).

Payment where subcontract certified complete

25. Where a subcontract has been certified complete under section 33, each payer upon the contract and any subcontract may, without jeopardy, make payment reducing the holdbacks required by this Part to the extent of the amount of holdback the payer has retained in respect of the completed subcontract, where all liens in respect of the completed subcontract have expired as provided in Part V, or have been satisfied, discharged or provided for under section 44 (payment into court). R.S.O. 1990, c. C.30, s. 25.

Payment of basic holdback

26. Each payer upon the contract or a subcontract may, without jeopardy, make payment of the holdback the payer is required to retain by subsection 22 (1) (basic holdback), so as to discharge all claims in respect of that holdback, where all liens that may be claimed against that holdback have expired as provided in Part V, or have been satisfied, discharged or provided for under section 44. R.S.O. 1990, c. C.30, s. 26.

Payment of holdback for finishing work

27. Each payer upon the contract or a subcontract may, without jeopardy, make payment of the holdback the payer is required to retain by subsection 22 (2) (holdback for finishing work), so as to discharge all claims in respect of that holdback, where all liens that may be claimed against that holdback have expired as provided in Part V, or have been satisfied, discharged or provided for under section 44. R.S.O. 1990, c. C.30, s. 27.

Direct payment to person having lien

28. Where an owner, contractor or subcontractor makes a payment without obligation to do so to any person having a lien for or on account of any amount owing to that person for services or materials supplied to the improvement and gives written notice of the payment or the intention to pay to the proper payer of that person, the payment shall be deemed to be a payment by the owner, contractor or subcontractor to the proper payer of that person, but no such payment reduces the amount of the holdback required to be retained under this Part or reduces the amount that must be retained in response to a written notice of lien given by a person other than the person to whom payment is made. R.S.O. 1990, c. C.30, s. 28.

Discharge of lien

29. Payments made in accordance with this Part operate as a discharge of the lien to the extent of the amount paid. R.S.O. 1990, c. C.30, s. 29.

How holdback not to be applied

30. Where the contractor or a subcontractor defaults in the performance of a contract or subcontract, a holdback shall not be applied by any payer toward obtaining services or materials in substitution for those that were to have been supplied by the person in default, nor in payment or satisfaction of any claim against the person in default, until all liens that may be claimed against that holdback have expired as provided in Part V, or have been satisfied, discharged or provided for under section 44 (payment into court). R.S.O. 1990, c. C.30, s. 30.

PART V
EXPIRY, PRESERVATION AND PERFECTION OF LIENS

Expiry of liens

31. (1) Unless preserved under section 34, the liens arising from the supply of services or materials to an improvement expire as provided in this section. R.S.O. 1990, c. C.30, s. 31 (1).

Contractor's liens

(2) Subject to subsection (4), the lien of a contractor,

(a) for services or materials supplied to an improvement on or before the date certified or declared to be the date of the substantial performance of the contract, expires at the conclusion of the forty-five-day period next following the occurrence of the earlier of,

(i) the date on which a copy of the certificate or declaration of the substantial performance of the contract is published as provided in section 32, and

(ii) the date the contract is completed or abandoned; and

(b) for services or materials supplied to the improvement where there is no certification or declaration of the substantial performance of the contract, or for services or materials supplied to the improvement after the date certified or declared to be the date of substantial performance, expires at the conclusion of the forty-five-day period next following the occurrence of the earlier of,

(i) the date the contract is completed, and

(ii) the date the contract is abandoned. R.S.O. 1990, c. C.30, s. 31 (2).

Liens of other persons

(3) Subject to subsection (4), the lien of any other person,

(a) for services or materials supplied to an improvement on or before the date certified or declared to be the date of the substantial performance of the contract, expires at the conclusion of the forty-five-day period next following the occurrence of the earliest of,

(i) the date on which a copy of the certificate or declaration of the substantial performance of the contract is published, as provided in section 32, and

(ii) the date on which the person last supplies services or materials to the improvement, and

(iii) the date a subcontract is certified to be completed under section 33, where the services or materials were supplied under or in respect of that subcontract; and

(b) for services or materials supplied to the improvement where there is no certification or declaration of the substantial performance of the contract, or for services or materials supplied to the improvement after the date certified or declared to be the date of the substantial performance of the contract, expires at the conclusion of the forty-five-day period next following the occurrence of the earlier of,

(i) the date on which the person last supplied services or materials to the improvement, and

(ii) the date a subcontract is certified to be completed under section 33, where the services or materials were supplied under or in respect of that subcontract. R.S.O. 1990, c. C.30, s. 31 (3).

Separate liens when ongoing supply

(4) Where a person has supplied services or materials to an improvement on or before the date certified or declared to be the date of the substantial performance of the contract and has also supplied, or is to supply, services or materials after that date, the person's lien in respect of the services or materials supplied on or before the date of substantial performance expires without affecting any lien that the person may have for the supply of services or materials after that date. R.S.O. 1990, c. C.30, s. 31 (4).

Declaration of last supply

(5) Where a person who has supplied services or materials under a contract or subcontract makes a declaration in the prescribed form declaring,

(a) the date on which the person last supplied services or materials under that contract or subcontract; and

(b) that the person will not supply any further services or materials under that contract or subcontract,

then the facts so stated shall be deemed to be true against the person making the declaration. R.S.O. 1990, c. C.30, s. 31 (5).

Rules governing certification or declaration of substantial performance

32. (1) The following rules govern the certification and declaration of the substantial performance of a contract:

1. On the application of the contractor, the payment certifier shall determine whether the contract has been substantially performed in accordance with section 2, and, if the payment certifier so determines, shall certify the substantial performance of the contract by signing a certificate in the prescribed form. If there is no payment certifier, the owner and contractor shall make the determination jointly and shall both sign the certificate.
2. The payment certifier or the owner and the contractor jointly, as the case may be, shall set out in the certificate the date on which the contract was substantially performed.
3. The date set out in the certificate as the date on which the contract was substantially performed is deemed for the purpose of this Act to be the date on which that event occurred.
4. Where the payment certifier certifies the substantial performance of a contract the payment certifier shall within seven days of the day the certificate is signed give a copy of the certificate to the owner and to the contractor.
5. The contractor shall publish a copy of the certificate once in a construction trade newspaper.
6. Where the contractor does not publish a copy of the certificate within seven days of receiving a copy of the certificate signed by the payment certifier or, where there is no payment certifier, signed by the owner, any person may publish a copy of the certificate.
7. Where there is a failure or refusal to certify substantial performance of the contract within a reasonable time, any person may apply to the court, and the court, upon being satisfied that the contract is substantially performed, and upon such terms as to costs or otherwise as it considers fit, may declare that the contract has been substantially performed, and the declaration has the same force and effect as a certificate of substantial performance of the contract.

8. Unless the court otherwise orders, the day the declaration is made shall be deemed to be the date the contract was substantially performed.
9. The person who applied to the court shall publish a copy of the declaration of substantial performance once in a construction trade newspaper.
10. For the purposes of this Part, a certificate or declaration of the substantial performance of a contract has no effect until a copy of the certificate or declaration is published. R.S.O. 1990, c. C.30, s. 32 (1).

Contents of certificate

(2) Every certificate or declaration made or given under this section shall include,

(a) the name and address for service of the owner and of the contractor;

(b) the name and address of the payment certifier, where there is one;

(c) a short description of the improvement;

(d) the date on which the contract was substantially performed;

(e) where the lien attaches to the premises, a concise description containing a reference to lot and plan or instrument registration number sufficient to identify the premises; and

(f) the street address, if any, of the premises. R.S.O. 1990, c. C.30, s. 32 (2); 2010, c. 16, Sched. 2, s. 2 (3).

Liability for refusal to certify

(3) Any person who is required by this section to make a determination of the substantial performance of a contract, and who after receiving an application fails or refuses within a reasonable time to certify the substantial performance of the contract, even though there is no reasonable doubt that the contract has, in fact, been substantially performed, is liable to anyone who suffers damages as a result. R.S.O. 1990, c. C.30, s. 32 (3).

Liability for failure to furnish copy of certificate

(4) A payment certifier who fails to comply with paragraph 4 of subsection (1) is liable to anyone who suffers damages as a result. R.S.O. 1990, c. C.30, s. 32 (4).

Manner of publication

(5) A construction trade newspaper shall publish upon commercially reasonable terms copies of certificates or declarations of substantial performance in the prescribed form and manner. R.S.O. 1990, c. C.30, s. 32 (5).

Certificate re subcontract

33. (1) Upon the request of the contractor, the payment certifier on the contract may determine whether a subcontract has been completed, and, if the payment certifier so determines, shall certify the completion of the subcontract in the prescribed form; alternatively, the owner and the contractor may jointly make the declaration and certify completion in the prescribed form. R.S.O. 1990, c. C.30, s. 33 (1).

Date subcontract deemed completed

(2) Where a subcontract is certified to be completed, the subcontract shall be deemed to have been completed on the date of certification. R.S.O. 1990, c. C.30, s. 33 (2).

Services or materials supplied after subcontract certified completed

(3) If services or materials are supplied to the improvement under or in respect of a subcontract after the date the subcontract is certified to be completed, those services or materials shall be deemed to have been last supplied on the date of certification. R.S.O. 1990, c. C.30, s. 33 (3).

Copy of certificate

(4) Within seven days of the date the subcontract is certified to be completed, the payment certifier or the owner and the contractor, as the case may be, shall give a copy of the certificate,

(a) to the subcontractor whose subcontract has been certified as complete; and

(b) to the owner and the contractor, where certification is by the payment certifier. R.S.O. 1990, c. C.30, s. 33 (4).

Notice of intention to register in accordance with the *Condominium Act, 1998*

Definitions

33.1 (1) In this section,

"declaration" means a declaration as defined in the *Condominium Act, 1998*; ("déclaration")

"description" means a description as defined in the *Condominium Act, 1998*; ("description")

"registered" means registered as defined in the *Condominium Act, 1998*. ("enregistré") 2010, c. 16, Sched. 2, s. 2 (4).

Notice required

(2) An owner of land described in a description that is intended to be registered together with a declaration in accordance with the *Condominium Act, 1998* shall publish notice of the intended registration in a construction trade newspaper at least five and not more than 15 days, excluding Saturdays and holidays, before the description is submitted for approval under subsection 9 (3) of the *Condominium Act, 1998*. 2010, c. 16, Sched. 2, s. 2 (4).

Contents

(3) The notice shall be in the prescribed form and shall include,

(a) the owner's name and address for service;

(b) a concise overview of the land described in the description, including reference to the lot and plan number and the parcel number or numbers of the land; and

(c) if, to the best of the owner's knowledge, information and belief, a contractor supplied services or materials to an improvement in respect of the land during the 90-day period preceding the day on which the description is to be submitted for approval under subsection 9 (3) of the *Condominium Act, 1998*, the contractor's name, address and, if known, address for service. 2010, c. 16, Sched. 2, s. 2 (4).

Liability for failure to comply

(4) An owner who fails to comply with this section is liable to any person entitled to a lien who suffers damages as a result. 2010, c. 16, Sched. 2, s. 2 (4).

How lien preserved

34. (1) A lien may be preserved during the supplying of services or materials or at any time before it expires,

(a) where the lien attaches to the premises, by the registration in the proper land registry office of a claim for lien on the title of the premises in accordance with this Part; and

(b) where the lien does not attach to the premises, by giving to the owner a copy of the claim for lien. R.S.O. 1990, c. C.30, s. 34 (1); 2010, c. 16, Sched. 2, s. 2 (5).

Public highway

(2) Where a claim for lien is in respect of a public street or highway owned by a municipality, the copy of the claim for lien shall be given to the clerk of the municipality. R.S.O. 1990, c. C.30, s. 34 (2); 2010, c. 16, Sched. 2, s. 2 (6).

Premises owned by Crown

(3) Where the owner of the premises is the Crown, the copy of the claim for lien shall be given to the office prescribed by regulation, or, where no office has been prescribed, to the ministry or Crown agency for whom the improvement is made. R.S.O. 1990, c. C.30, s. 34 (3); 2010, c. 16, Sched. 2, s. 2 (7).

Railway right-of-way

(4) Where the premises is a railway right-of-way, the copy of the claim for lien shall be given to the manager or any person apparently in charge of any office of the railway in Ontario. R.S.O. 1990, c. C.30, s. 34 (4); 2010, c. 16, Sched. 2, s. 2 (7).

Contents of claim for lien

(5) Every claim for lien shall set out,

(a) the name and address for service of the person claiming the lien and the name and address of the owner of the premises and of the person for whom the services or materials were supplied and the time within which those services or materials were supplied;

(b) a short description of the services or materials that were supplied;

(c) the contract price or subcontract price;

(d) the amount claimed in respect of services or materials that have been supplied; and

(e) a description of the premises,

(i) where the lien attaches to the premises, sufficient for registration under the *Land Titles Act* or the *Registry Act*, as the case may be, or

(ii) where the lien does not attach to the premises, being the address or other identification of the location of the premises. R.S.O. 1990, c. C.30, s. 34 (5); 2010, c. 16, Sched. 2, s. 2 (8).

(6) REPEALED: 2010, c. 16, Sched. 2, s. 2 (9).

Preservation of general lien

(7) Subject to subsection 44 (4) (apportionment), a general lien shall be preserved against each of the premises that the person having the lien desires the lien to continue to apply against, and the claim against each premises may be for the price of the services or materials that have been supplied to all the premises. R.S.O. 1990, c. C.30, s. 34 (7).

Who may join in claim

(8) Any number of persons having liens upon the same premises may unite in a claim for lien. R.S.O. 1990, c. C.30, s. 34 (8); 2010, c. 16, Sched. 2, s. 2 (10).

Liability for exaggerated claim, etc.

35. In addition to any other ground on which the person may be liable, any person who preserves a claim for lien or who gives written notice of a lien,

(a) for an amount which the person knows or ought to know is grossly in excess of the amount which the person is owed; or

(b) where the person knows or ought to know that the person does not have a lien,

is liable to any person who suffers damages as a result. R.S.O. 1990, c. C.30, s. 35.

What liens may be perfected

36. (1) A lien may not be perfected unless it is preserved. R.S.O. 1990, c. C.30, s. 36 (1).

Expiry of preserved lien

(2) A lien that has been preserved expires unless it is perfected prior to the end of the forty-five-day period next following the last day, under section 31, on which the lien could have been preserved. R.S.O. 1990, c. C.30, s. 36 (2).

How lien perfected

(3) A lien claimant perfects the lien claimant's preserved lien,

(a) where the lien attaches to the premises, when the lien claimant commences an action to enforce the lien and, except where an order to vacate the registration of the lien is made, the lien claimant registers a certificate of action in the prescribed form on the title of the premises; or

(b) where the lien does not attach to the premises, when the lien claimant commences an action to enforce the lien. R.S.O. 1990, c. C.30, s. 36 (3).

Rules re sheltering

(4) A preserved lien becomes perfected by sheltering under a lien perfected by another lien claimant in respect of the same improvement in accordance with the following rules:

1. The preserved lien of a lien claimant is perfected by sheltering under the perfected lien of another lien claimant in respect of the same improvement where,

    i. the lien of that other lien claimant was a subsisting perfected lien at the time when the lien of the lien claimant was preserved, or

ii. the lien of that other lien claimant is perfected in accordance with clause (3) (a) or (b) between the time when the lien of the lien claimant was preserved and the time that the lien of the lien claimant would have expired under subsection (2).

2. The validity of the perfection of a sheltered lien does not depend upon the validity, proper preservation or perfection of the lien under which it is sheltered.

3. A sheltered claim for lien is perfected only as to the defendants and the nature of the relief claimed in the statement of claim under which it is sheltered.

4. Upon notice given by a defendant named in a statement of claim, any lien claimant whose lien is sheltered under that statement of claim shall provide the defendant with further particulars of the claim for lien or of any fact alleged in the claim for lien. R.S.O. 1990, c. C.30, s. 36 (4).

General lien

(5) Subject to subsection 44 (4) (apportionment), a preserved general lien that attaches to the premises shall be perfected against each premises to which the person having the lien desires the lien to continue to apply. R.S.O. 1990, c. C.30, s. 36 (5).

Where period of credit extended

(6) A person who has preserved a lien, but who has extended a period of credit for the payment of the amount to which the lien relates, may commence an action for the purpose of perfecting the lien even though the period of credit has not at the time expired. R.S.O. 1990, c. C.30, s. 36 (6).

Expiry of perfected lien

37. (1) A perfected lien expires immediately after the second anniversary of the commencement of the action that perfected the lien, unless one of the following occurs on or before that anniversary:

1. An order is made for the trial of an action in which the lien may be enforced.

2. An action in which the lien may be enforced is set down for trial. 1994, c. 27, s. 42 (1).

Note: Subsection 37 (1), as re-enacted by the Statutes of Ontario, 1994, chapter 27, subsection 42 (1), does not affect any rights acquired by a person under a judgment or court order before December 9th, 1994. See: 1994, c. 27, s. 42 (3).

Motion under s. 46

(2) Where a lien has expired under subsection (1), a motion may be made under section 46. R.S.O. 1990, c. C.30, s. 37 (2).

Saving other rights

38. The expiration of a lien under this Act shall not affect any other legal or equitable right or remedy otherwise available to the person whose lien has expired. R.S.O. 1990, c. C.30, s. 38.

PART VI
RIGHT TO INFORMATION

Right to information;

39. (1) Any person having a lien or who is the beneficiary of a trust under Part II or who is a mortgagee may, at any time, by written request, require information to be provided within a reasonable time, not to exceed twenty-one days, as follows:

from owner or contractor

1. By the owner or contractor, with,
   i. the names of the parties to the contract,
   ii. the contract price,
   iii. the state of accounts between the owner and the contractor,
   iv. a copy of any labour and material payment bond in respect of the contract posted by the contractor with the owner, and
   v. a statement of whether the contract provides in writing that liens shall arise and expire on a lot-by-lot basis.

from contractor or subcontractor

2. By the contractor or a subcontractor, with,
   i. the names of the parties to a subcontract,
   ii. the state of accounts between the contractor and a subcontractor or between a subcontractor and another subcontractor,
   iii. a statement of whether there is a provision in a subcontract providing for certification of the subcontract,
   iv. a statement of whether a subcontract has been certified as complete, and
   v. a copy of any labour and material payment bond posted by a subcontractor with the contractor or by a subcontractor with another subcontractor.

from owner

3. By an owner who is selling the owner's interest in a premises that is a home, with,
   i. the name and address of the purchaser, the sale price, the amount of the purchase price paid or to be paid prior to the conveyance, the scheduled date of the conveyance and the lot and plan number or other legal description of the premises as contained in the agreement of purchase and sale, and
   ii. the date on which a permit authorizing occupancy or a certificate of completion and possession has been issued. R.S.O. 1990, c. C.30, s. 39 (1).

from mortgagee or unpaid vendor

(2) Any person having a lien or any beneficiary of a trust under Part II may, at any time, by written request, require a mortgagee or unpaid vendor to provide the person within a reasonable time, not to exceed twenty-one days, with,

(a) sufficient details concerning any mortgage on the premises to enable the person who requests the information to determine whether the mortgage was taken by the mortgagee for the purposes of financing the making of the improvement;

(b) a statement showing the amount advanced under the mortgage, the dates of those advances, and any arrears in payment including any arrears in the payment of interest; or

(c) a statement showing the amount secured under the agreement of purchase and sale and any arrears in payment including any arrears in the payment of interest. R.S.O. 1990, c. C.30, s. 39 (2).

by trustee or workers' trust fund

(3) The trustee of a workers' trust fund may at any time by written request require any contractor or subcontractor to permit the trustee, within a reasonable time after making the request, not to exceed twenty-one days, to inspect the payroll records of all workers who are beneficiaries of the fund, and who have supplied labour to the making of the improvement, and who are employed by the contractor or the subcontractor. R.S.O. 1990, c. C.30, s. 39 (3).

respecting publication of certificate of substantial performance

(4) A contractor shall, upon written request whenever made to the contractor by any person, within a reasonable time furnish in writing to the person the date of publication and the name of the construction trade newspaper in which a copy of a certificate of substantial performance has been published under subsection 32 (1). R.S.O. 1990, c. C.30, s. 39 (4).

Liability for failure to provide information

(5) Where a person, who is required under subsection (1), (2), (3) or (4) to provide information or access to information, does not provide the information or access to information as required or knowingly or negligently mis-states that information, the person is liable to the person who made the request for any damages sustained by reason thereof. R.S.O. 1990, c. C.30, s. 39 (5).

Order by court to comply with request

(6) Upon motion, the court may at any time, whether or not an action has been commenced, order a person to comply with a request that has been made to the person under this section and, when making the order, the court may make any order as to costs as it considers appropriate in the circumstances, including an order for the payment of costs on a substantial indemnity basis. R.S.O. 1990, c. C.30, s. 39 (6); 2006, c. 21, Sched. C, s. 102 (1).

Cross-examination on claim for lien

40. (1) Any of the following persons is liable to be cross-examined without an order on a claim for lien at any time, regardless of whether an action has been commenced:

1. The lien claimant.
2. An agent or assignee of the lien claimant.
3. A trustee of the workers' trust fund, where subsection 81 (2) applies. 2010, c. 16, Sched. 2, s. 2 (11).

Who may participate

(2) There shall be only one examination under subsection (1), but the contractor, the payer of the lien claimant, and every person named in the claim for lien who has an interest in the premises are entitled to participate therein. R.S.O. 1990, c. C.30, s. 40 (2).

Notice

(3) Any person intending to examine a person under subsection (1) shall give at least seven days notice of the examination specifying the time and place for the examination to,

(a) the person to be examined or the person's solicitor;

(b) every other person named in the claim for lien as having an interest in the premises;

(c) the contractor; and

(d) the payer of the lien claimant. R.S.O. 1990, c. C.30, s. 40 (3).

Application of rules of court

(4) The rules of court pertaining to examinations apply, with necessary modifications, to cross-examinations under this section. R.S.O. 1990, c. C.30, s. 40 (4).

PART VII
DISCHARGE OF PRESERVED OR PERFECTED LIENS

Discharge of lien and withdrawal of written notice of lien

Discharge of lien claim by release

41. (1) A preserved or perfected lien may be discharged,

(a) where the lien attaches to the premises, by the registration of a release in the prescribed form on the title to the premises and the release shall, except where the lien claimant is a corporation, be supported by an affidavit of execution; or

(b) where the lien does not attach to the premises, by giving a release in the prescribed form to the owner, in the manner set out in section 34 for the giving of copies of the claim for lien. R.S.O. 1990, c. C.30, s. 41 (1).

Withdrawal of written notice of lien

(2) A written notice of a lien may be withdrawn by giving a withdrawal in writing to the person to whom the written notice of a lien was given, and a payer given the withdrawal shall, in respect of the operation of subsection 24 (2), be in the same position as if the written notice of a lien had never been given. R.S.O. 1990, c. C.30, s. 41 (2).

Discharge of general lien

42. A preserved or perfected general lien may be discharged against any one or more of the premises that are subject to it, without affecting its application to any other premises to which it applies, by the registration of a release in the prescribed form on the title to the premises released. R.S.O. 1990, c. C.30, s. 42.

Postponement of lien claim

43. A preserved or perfected lien may be postponed in favour of the interest of another person in the premises by the registration on the title to the premises of a notice of postponement in the prescribed

form, and, in that case, subsection 78 (8) applies (priorities in event of postponement). R.S.O. 1990, c. C.30, s. 43.

Vacating lien by payment into court

Without notice

44. (1) Upon the motion of any person, without notice to any other person, the court shall make an order vacating,

(a) where the lien attaches to the premises, the registration of a claim for lien and any certificate of action in respect of that lien; or

(b) where the lien does not attach to the premises, the claim for lien,

where the person bringing the motion pays into court, or posts security in an amount equal to, the total of,

(c) the full amount claimed as owing in the claim for lien; and

(d) the lesser of $50,000 or 25 per cent of the amount described in clause (c), as security for costs. R.S.O. 1990, c. C.30, s. 44 (1).

On payment in of reasonable amount

(2) Upon the motion of any person, the court may make an order vacating the registration of a claim for lien, and any certificate of action in respect of that lien, upon the payment into court or the posting of security of an amount that the court determines to be reasonable in the circumstances to satisfy the lien. R.S.O. 1990, c. C.30, s. 44 (2).

Where lien does not attach to premises

(3) Where the lien does not attach to the premises, the court may make an order, upon the motion of any person, vacating a claim for lien given to the owner, upon the payment into court or the posting of security of an amount that the court determines to be reasonable in the circumstances to satisfy the lien. R.S.O. 1990, c. C.30, s. 44 (3).

Where general lien

(4) Where a motion is made to vacate the registration of a general lien against one or more of the premises subject to that lien, the court may apportion the general lien between the premises in respect of which the motion is made and all other premises that are subject to the lien. R.S.O. 1990, c. C.30, s. 44 (4).

Reduction of amount paid into court

(5) Where an amount has been paid into court or security has been posted with the court under this section, the court, upon notice to such persons as it may require, may order where it is appropriate to do so,

(a) the reduction of the amount paid into court, and the payment of any part of the amount paid into court to the person entitled; or

(b) the reduction of the amount of security posted with the court, and the delivery up of the security posted with the court for cancellation or substitution, as the case may be. R.S.O. 1990, c. C.30, s. 44 (5).

Lien a charge upon amount paid into court

(6) Where an order is made under clause (1) (a) or subsection (2), the lien ceases to attach to the premises and ceases to attach to the holdbacks and other amounts subject to a charge under section 21, and becomes instead a charge upon the amount paid into court or security posted, and the owner or payer shall, in respect of the operation of sections 21, 23 and 24, be in the same position as if the lien had not been preserved or written notice of the lien had not been given. R.S.O. 1990, c. C.30, s. 44 (6).

Idem

(7) Where an order is made under clause (1) (b) or subsection (3), the lien ceases to attach to the holdbacks and other amounts subject to a charge under section 21 and becomes instead a charge upon the amount paid into court or security posted and the owner or payer shall, in respect of the operation of sections 21, 23 and 24, be in the same position as if the lien had not been preserved or written notice of the lien had not been given. R.S.O. 1990, c. C.30, s. 44 (7).

Consolidation of motions

(8) Where more than one motion is made under subsection (1), (2) or (3) for the payment into court or posting of security to obtain an order vacating the registration of one or more preserved or perfected liens arising from the same improvement, the court may consolidate the motions and require that the amount paid into court or security posted be adequate to satisfy all the liens that are the subject of each of the motions, or make any other order that it considers appropriate. R.S.O. 1990, c. C.30, s. 44 (8).

Rules

(9) Where an order is made under subsection (1), (2) or (3), the following rules apply:

1. The lien claimant whose lien was the subject of the order may proceed with an action to enforce the claim against the amount paid into court or security posted in accordance with the procedures set out in Part VIII, but no certificate of action shall be registered against the premises.
2. The amount paid into court or security posted is subject to the claims of all persons having a lien to the same extent as if the amount paid into court or security posted was realized by the sale of the premises in an action to enforce the lien and shall be distributed among all lien claimants in accordance with the priorities provided for in section 80.
3. Where any amount is realized in a lien action by the sale of the premises or otherwise, it shall be pooled into a common fund with the amount paid into court or security posted under this section, and shall be distributed among all lien claimants in accordance with the priorities provided for in section 80.
4. A lien claimant whose lien is sheltered, in accordance with subsection 36 (4), under the lien that was the subject of the order may proceed with an action to enforce the sheltered lien as if the order had not been made. R.S.O. 1990, c. C.30, s. 44 (9); 2010, c. 16, Sched. 2, s. 2 (12).

Declaration by court that preserved lien has expired

45. (1) Where a lien that attaches to the premises is not preserved or is not perfected within the time allowed for doing so under section 31 or 36, the court upon,

(a) the motion of any person without notice to any other person;

(b) proof that the lien has not been preserved or perfected within the time allowed; and

(c) production of,

(i) a certificate of search under the *Land Titles Act*, or

(ii) a registrar's abstract under the *Registry Act*,

together with a certified copy of the claim for lien,

shall declare that the lien has expired and order that the registration of the claim for lien be vacated. R.S.O. 1990, c. C.30, s. 45 (1).

Idem

(2) Where the court is satisfied that a lien that does not attach to the premises has not been preserved or perfected within the time allowed for doing so under section 31 or 36, the court upon the motion of any person without notice to any other person shall declare that the lien has expired. R.S.O. 1990, c. C.30, s. 45 (2).

Order returning amount paid into court or cancelling security

(3) Where a declaration is made under subsection (1) or (2), the court shall order that,

(a) any amount that has been paid into court under section 44 in respect of that lien be returned to the person who paid the amount into court; and

(b) any security that has been posted under section 44 in respect of that lien be cancelled. R.S.O. 1990, c. C.30, s. 45 (3).

Order dismissing action, etc.

46. (1) Where a perfected lien that attaches to the premises has expired under section 37, the court, upon the motion of any person, shall declare that the lien has expired and shall make an order dismissing the action to enforce that lien and vacating the registration of a claim for lien and the certificate of action in respect of that action. R.S.O. 1990, c. C.30, s. 46 (1).

Idem

(2) Where a perfected lien that does not attach to the premises has expired under section 37, the court, upon the motion of any person, shall declare that the lien has expired and shall make an order dismissing the action to realize upon that lien. R.S.O. 1990, c. C.30, s. 46 (2).

Costs

(3) A motion under subsection (1) or (2) may be brought without notice, but no order as to costs in the action may be made upon the motion unless notice of that motion was given to the person against whom the order for costs is sought. R.S.O. 1990, c. C.30, s. 46 (3).

Order returning money paid into court or cancelling security

(4) Where an action is dismissed under subsection (1) or (2), the court shall order that,

(a) any amount that has been paid into court under section 44 in respect of that action be returned to the person who paid the amount into court; and

(b) any security that has been posted under section 44 in respect of that action be cancelled. R.S.O. 1990, c. C.30, s. 46 (4).

General power to discharge lien

47. (1) Upon motion, the court may,

(a) order the discharge of a lien;

(b) order that the registration of,

(i) a claim for lien, or

(ii) a certificate of action,

or both, be vacated;

(c) declare, where written notice of a lien has been given, that the lien has expired, or that the written notice of the lien shall no longer bind the person to whom it was given; or

(d) dismiss an action,

upon any proper ground and subject to any terms and conditions that the court considers appropriate in the circumstances. R.S.O. 1990, c. C.30, s. 47 (1).

Direction by court

(2) Where a certificate of action is vacated under subsection (1), and there remain liens which may be enforced in the action to which that certificate relates, the court shall give any directions that are necessary in the circumstances in respect of the continuation of that action subject to paragraph 4 of subsection 44 (9). R.S.O. 1990, c. C.30, s. 47 (2); 2010, c. 16, Sched. 2, s. 2 (13).

Discharge irrevocable

48. A discharge of a lien under this Part is irrevocable and the discharged lien cannot be revived, but no discharge affects the right of the person whose lien was discharged to claim a lien in respect of services or materials supplied by the person subsequent to the preservation of the discharged lien. R.S.O. 1990, c. C.30, s. 48.

Registration of orders

49. Where the lien attaches to the premises, an order declaring that a lien has expired, or discharging a lien, or vacating the registration of a claim for lien or a certificate of action, may be registered by registering on the title to the premises a certified copy of the order that includes a description of the premises sufficient for registration under the *Registry Act* or the *Land Titles Act*, as the case may be, and a reference to the registration number of every preserved or perfected claim for lien and certificate of action thereby affected. R.S.O. 1990, c. C.30, s. 49.

PART VIII
JURISDICTION AND PROCEDURE

Lien claims and trust claims

Lien claim enforceable in action

50. (1) A lien claim is enforceable in an action in the Superior Court of Justice in accordance with the procedure set out in this Part. R.S.O. 1990, c. C.30, s. 50 (1); 2006, c. 19, Sched. C, s. 1 (1).

Trust claim and lien claim not to be joined

(2) A trust claim shall not be joined with a lien claim but may be brought in any court of competent jurisdiction. R.S.O. 1990, c. C.30, s. 50 (2).

Joinder in action

(3) Any number of lien claimants whose liens are in respect of the same owner and the same premises may join in the same action. R.S.O. 1990, c. C.30, s. 50 (3).

Court to dispose completely of action

51. The court, whether the action is being tried by a judge or on a reference by a master, a case management master or a person agreed on by the parties,

(a) shall try the action, including any set-off, crossclaim, counterclaim and, subject to section 56, third party claim, and all questions that arise therein or that are necessary to be tried in order to dispose completely of the action and to adjust the rights and liabilities of the persons appearing before it or upon whom notice of trial has been served; and

(b) shall take all accounts, make all inquiries, give all directions and do all things necessary to dispose finally of the action and all matters, questions and accounts arising therein or at the trial and to adjust the rights and liabilities of, and give all necessary relief to, all parties to the action. R.S.O. 1990, c. C.30, s. 51; 1994, c. 27, s. 42 (4); 1996, c. 25, s. 4 (1).

Where exclusive jurisdiction not acquired

52. A judge, master or case management master does not acquire exclusive jurisdiction over the trial of an action or reference by reason only of appointing the time and place for the trial of the action or reference, or for holding a settlement meeting. R.S.O. 1990, c. C.30, s. 52; 1996, c. 25, s. 4 (2).

Statement of claim and defence

How action commenced

53. (1) An action shall be commenced by issuing a statement of claim in the office of the local registrar of the court for the area in which the premises or a part thereof are situate. R.S.O. 1990, c. C.30, s. 53 (1).

Service of statement of claim

(2) The statement of claim shall be served within ninety days after it is issued, but the court may, upon a motion made before or after the expiration of that period of time, extend the time for service. R.S.O. 1990, c. C.30, s. 53 (2).

Crossclaim or counterclaim

(3) A crossclaim or counterclaim by any person shall accompany the person's statement of defence, but on motion the court may grant leave to deliver a crossclaim or counterclaim after this time where it is appropriate to do so, and where leave is granted, the court may,

(a) make any order as to costs that it considers appropriate; and

(b) give directions as to the conduct of the action. R.S.O. 1990, c. C.30, s. 53 (3).

Time for delivery of pleadings

54. (1) The time for delivering a statement of defence to a lien claim, crossclaim, counterclaim or third party claim shall be twenty days. R.S.O. 1990, c. C.30, s. 54 (1).

Noting in default

(2) Where a person against whom a claim is made in a statement of claim, counterclaim, crossclaim or third party claim defaults in the delivery of a defence to that claim, the person against whom the claim is made may be noted in default. R.S.O. 1990, c. C.30, s. 54 (2).

Effect of default in defence

(3) Where a defendant or third party has been noted in default under subsection (2), the defendant or third party shall not be permitted to contest the claim of the person who named the defendant or third party as a defendant or third party, or to file a statement of defence, except with leave of the court, to be given only where the court is satisfied that there is evidence to support a defence, and where leave is granted, the court,

(a) may make any order as to costs that it considers appropriate; and

(b) may give directions as to the conduct of the action. R.S.O. 1990, c. C.30, s. 54 (3).

Allegations of fact deemed admitted

(4) Except where leave has been granted under subsection (3), a defendant or third party who has been noted in default under subsection (2) shall be deemed to admit all allegations of fact made in the statement of claim, counterclaim, crossclaim or third party claim, as the case may be, and shall not be entitled to notice of or to participate in the trial of the action or any step in the action and judgment may be given against the defendant or third party. R.S.O. 1990, c. C.30, s. 54 (4).

Accommodating multiple claims

Joinder of claims

55. (1) A plaintiff in an action may join with a lien claim a claim for breach of contract or subcontract. R.S.O. 1990, c. C.30, s. 55 (1).

Counterclaims and crossclaims

(2) A defendant in an action may,

(a) counterclaim against the person who named the defendant as a defendant in respect of any claim that the defendant may be entitled to make against that person, whether or not that claim is related to the making of the improvement;

(b) crossclaim against a co-defendant in respect of any claim that the defendant may be entitled to make against that person related to the making of the improvement. R.S.O. 1990, c. C.30, s. 55 (2).

Rules re third party claims

56. The following rules govern third party claims:

1. Subject to paragraph 2, a person against whom a claim is made in a statement of claim, crossclaim, counterclaim or third party claim may join a person who is not a party to the action as a third party for the purpose of claiming contribution or indemnity from the third party in respect of that claim.

2. A person may only be joined as a third party with leave of the court upon a motion made with notice to the owner and all persons having subsisting preserved or perfected liens at the time of the motion, but such leave shall not be given unless the court is satisfied that the trial of the third party claim will not,

   i. unduly prejudice the ability of the third party or of any lien claimant or defendant to prosecute a claim or conduct a defence, or

   ii. unduly delay or complicate the resolution of the lien action.

3. The court may give such directions as it considers appropriate in the circumstances in respect of the conduct of third party claims. R.S.O. 1990, c. C.30, s. 56.

Parties

57. (1) The person serving the notice of trial and all persons served with notice of trial are parties to the action. R.S.O. 1990, c. C.30, s. 57 (1).

Adding parties

(2) Subject to section 54, the court may at any time add or join any person as a party to the action. R.S.O. 1990, c. C.30, s. 57 (2).

Reference to master, etc.

58. (1) On motion made after the delivery of all statements of defence, or the statement of defence to all crossclaims, counterclaims or third party claims, if any, or after the time for their delivery has expired, a judge may refer the whole action or any part of it for trial,

(a) to a master assigned to the area in which the premises or part of the premises are situate;

(a.1) to a case management master; or

(b) to a person agreed on by the parties. 1994, c. 27, s. 42 (5); 1996, c. 25, s. 4 (3).

Notice

(1.1) Notice of a motion for a reference under clause (1) (b) shall be given to every person who is or would be entitled to a notice of settlement meeting under subsection 60 (2). 1994, c. 27, s. 42 (5).

Requirement for consent

(1.2) A reference under clause (1) (b) shall not be made unless the persons entitled to notice under subsection (1.1) consent to the reference. 1994, c. 27, s. 42 (5).

Deemed consent

(1.3) A person given notice under subsection (1.1) who does not oppose the motion or does not appear at the hearing of the motion shall be deemed to consent to the reference under clause (1) (b). 1994, c. 27, s. 42 (5).

Master not to hear motion

(2) A master or a case management master shall not hear or dispose of a motion made under subsection (1). R.S.O. 1990, c. C.30, s. 58 (2); 1996, c. 25, s. 4 (4).

Reference directed

(3) At the trial, a judge may direct a reference to a master assigned to the area in which the premises or part of the premises are situate, to a case management master or to a person agreed on by the parties. 1996, c. 25, s. 4 (5).

Powers of master on reference

(4) A master or case management master to whom a reference has been directed has all the jurisdiction, powers and authority of the court to try and completely dispose of the action and all matters and questions arising in connection with the action, including the giving of leave to amend any pleading and the giving of directions to a receiver or trustee appointed by the court. R.S.O. 1990, c. C.30, s. 58 (4); 1996, c. 25, s. 4 (6).

Powers of person agreed on by parties

(4.1) Subsection (4) also applies to a person who is agreed on by the parties and to whom a reference has been directed. 1994, c. 27, s. 42 (7).

Application to set aside order of reference

(5) Where under subsection (1) the action has been referred to a master, to a case management master or to a person agreed on by the parties for trial, any person who subsequently becomes a party to the action may, within seven days after becoming a party to the action, make a motion to a judge of the court that directed the reference to set aside the judgment directing the reference. 1996, c. 25, s. 4 (7).

Effect on subsequent party to action

(6) Where no motion is made under subsection (5), or where the motion is refused, the person who subsequently became a party to the action is bound by the judgment directing the reference as if the person had been a party to the action at the time the reference was directed. R.S.O. 1990, c. C.30, s. 58 (6).

Carriage of action

59. (1) The court may at any time make an order awarding carriage of the action to any person who has a perfected lien. R.S.O. 1990, c. C.30, s. 59 (1).

Consolidation of actions

(2) Where more than one action is brought to enforce liens in respect of the same improvement, the court may,

(a) consolidate all the actions into one action; and

(b) award carriage of the action to any person who has a perfected lien. R.S.O. 1990, c. C.30, s. 59 (2).

Application to fix date for trial or settlement meeting

60. (1) Any party may make a motion to the court without notice to any other person at any time after,

(a) the delivery of the statements of defence, or the statements of defence to all crossclaims, counterclaims or third party claims, if any, where the plaintiff's claim is disputed; or

(b) the expiry of the time for the delivery of these statements of defence in all other cases,

to have a day, time and place fixed for the trial of the action, or for the holding of a settlement meeting under section 61, or both. R.S.O. 1990, c. C.30, s. 60 (1).

Notice of settlement meeting

(2) Where the court orders the holding of a settlement meeting, then at least ten days before the date appointed for the holding of the meeting, the party who obtained the appointment shall serve a notice of settlement meeting upon any person who was, on the twelfth day before the date appointed,

(a) subject to section 54 (default in filing defence), the owner and every other person named as a defendant in every statement of claim in respect of the action;

(b) where the lien attaches to the premises, a person with a registered interest in the premises;

(c) where the lien attaches to the premises, an execution creditor of the owner;

(d) any other person having a preserved or perfected lien against the premises; and

(e) a person joined as a third party under section 56. R.S.O. 1990, c. C.30, s. 60 (2).

Request to identify other persons having lien

(3) Where the lien does not attach to the premises, the party who obtained the appointment for the holding of the settlement meeting shall request the owner to inform the party who obtained the appointment of the identity of every person described in clause (2) (d). R.S.O. 1990, c. C.30, s. 60 (3).

Service of notice of trial

(4) Subject to section 54, where the court fixes a date for trial, the party who obtained the appointment shall serve a notice of trial, at least ten days before the date appointed for trial, upon any person who is or would be entitled to a notice of a settlement meeting under subsection (2). R.S.O. 1990, c. C.30, s. 60 (4).

Conduct of settlement meeting

61. (1) Where a settlement meeting is ordered by the court, it shall be conducted in accordance with this section. R.S.O. 1990, c. C.30, s. 61 (1).

Idem

(2) The settlement meeting shall be conducted by,

(a) a person selected by a majority of the persons present at the meeting; or

(b) where no person is selected, by the person who took out the appointment,

and shall be for the purpose of resolving or narrowing any issues to be tried in the action. R.S.O. 1990, c. C.30, s. 61 (2).

Idem

(3) The results of the settlement meeting shall be embodied in a statement of settlement which shall summarize those issues of fact and law which have been settled by the parties. R.S.O. 1990, c. C.30, s. 61 (3).

Statement of settlement

(4) The statement of settlement shall be filed with the court and shall be attached to and form part of the record, and the settlement shall be binding upon all persons served with notice of the settlement meeting, and upon all defendants against whom pleadings have been noted closed under section 54, but subject to subsection 54 (3), the court may vary or set aside the statement of settlement upon such order as to costs or otherwise as it considers appropriate. R.S.O. 1990, c. C.30, s. 61 (4).

Power of court

(5) Upon the filing of the statement of settlement with the court, the court may,

(a) if there was no dispute at the meeting to a claim for lien, declare the lien valid and give such further judgment as it considers appropriate;

(b) enter a judgment or make a report upon consent on those issues which have been settled by the parties;

(c) make any order that is necessary in order to give effect to any judgment or report of the court under clause (a) or (b); and

(d) make any order that is necessary for, or will expedite the conduct of, the trial. R.S.O. 1990, c. C.30, s. 61 (5).

Non-application of Rule 50

(6) Rule 50 of the Rules of Civil Procedure does not apply to an action under this Act. R.S.O. 1990, c. C.30, s. 61 (6).

Judgment or report

62. (1) The results of the trial shall be embodied,

(a) in a judgment in the prescribed form, where the trial is conducted by a judge of the court; or

(b) in a report in the prescribed form, where the trial is conducted on a reference by a master, by a case management master, or by a person agreed on by the parties. R.S.O. 1990, c. C.30, s. 62 (1); 1994, c. 27, s. 42 (9); 1996, c. 25, s. 4 (8).

Varying form

(2) The prescribed form of judgment or report may be varied by the court in order to meet the circumstances of the case so as to afford to any party to the action any right or remedy in the judgment or report to which the party is entitled. R.S.O. 1990, c. C.30, s. 62 (2).

(3) REPEALED: 1999, c. 12, Sched. B, s. 3.

Issue of execution

(4) The judgment or report may direct any party found liable to make a payment, to make such payment forthwith, and execution may be issued,

(a) immediately, in the case of a judgment; or

(b) after confirmation, in the case of a report. R.S.O. 1990, c. C.30, s. 62 (4).

Order for sale

(5) The court may order that the interest in the premises be sold and may direct the sale to take place at any time after the judgment or confirmation of the report, allowing a reasonable time for advertising the sale. R.S.O. 1990, c. C.30, s. 62 (5).

Persons who may be let in

(6) The court may allow any person with a perfected lien,

(a) who was not served with a notice of trial; or

(b) whose action was stayed by reason of an order under the *Arbitrations Act*,

to be let in to prove the claim at any time before the amount realized in the action for the satisfaction of the lien has been distributed, and where the claim is allowed, the judgment or report shall be amended to include the claim. R.S.O. 1990, c. C.30, s. 62 (6).

Personal judgment

63. Subject to paragraph 3 of subsection 36 (4) (sheltering), the court may award any lien claimant a personal judgment, whether the claimant proves the lien or not, upon any ground relating to the claim that is disclosed by the evidence against any party to the action for any amount that may be due to the claimant and that the claimant might have recovered in a proceeding against that party. R.S.O. 1990, c. C.30, s. 63.

Right to share in proceeds

64. Where an interest in the premises is sold under court order, or by a trustee appointed under Part IX, a person with a perfected lien is entitled to share in the proceeds of sale in respect of the amount owing to the person, although that amount or part thereof was not payable at the time of the commencement of the action or at the time of the distribution of the proceeds. R.S.O. 1990, c. C.30, s. 64.

Orders for completion of sale

65. (1) The court may make all orders necessary for the completion of a sale and for vesting an interest in the premises in the purchaser. R.S.O. 1990, c. C.30, s. 65 (1).

Payment into court of proceeds

(2) Where an interest in the premises is sold under court order, or by a trustee appointed under Part IX, the proceeds of the sale shall be paid into court to the credit of the action. R.S.O. 1990, c. C.30, s. 65 (2).

Fees and disbursements

(3) The court may add to the claim of the party having carriage of the action the fees and actual disbursements of the party in connection with the sale. R.S.O. 1990, c. C.30, s. 65 (3).

To whom proceeds paid

(4) The court shall direct to whom the proceeds shall be paid in accordance with the priorities established by this Act. R.S.O. 1990, c. C.30, s. 65 (4).

Where proceeds insufficient to satisfy judgment

(5) Where the proceeds of the sale are not sufficient to satisfy the judgment and costs, the court shall certify the amount of the deficiency and give personal judgment in the appropriate amount to each party whose judgment is not satisfied out of the proceeds against each person who has been found liable to the party. R.S.O. 1990, c. C.30, s. 65 (5).

Application to court for directions

66. Where a person is in possession of an amount that may be subject to a trust under Part II, the person may apply to the court for direction and the court may give any direction or make any order that the court considers appropriate in the circumstances. R.S.O. 1990, c. C.30, s. 66.

Procedure generally

Summary procedure

67. (1) The procedure in an action shall be as far as possible of a summary character, having regard to the amount and nature of the liens in question. R.S.O. 1990, c. C.30, s. 67 (1).

Interlocutory steps

(2) Interlocutory steps, other than those provided for in this Act, shall not be taken without the consent of the court obtained upon proof that the steps are necessary or would expedite the resolution of the issues in dispute. R.S.O. 1990, c. C.30, s. 67 (2).

Application of rules of court

(3) Except where inconsistent with this Act, and subject to subsection (2), the *Courts of Justice Act* and the rules of court apply to pleadings and proceedings under this Act. R.S.O. 1990, c. C.30, s. 67 (3).

Technical assistance

(4) The court may obtain the assistance of any merchant, accountant, actuary, building contractor, architect, engineer or other person in such a way as it considers fit, to enable it to determine better any matter of fact in question, and may fix the remuneration of such person and direct the payment thereof by any of the parties. R.S.O. 1990, c. C.30, s. 67 (4).

Representation

(5) A lien claimant whose claim is for an amount within the monetary jurisdiction of the Small Claims Court may be represented by a person authorized under the *Law Society Act* to represent the claimant. 2006, c. 21, Sched. C, s. 102 (2).

Manner of making motion

(6) Where in this Act the court is empowered to do anything upon motion, the motion may be made in the manner provided for in the rules of court for the making of motions, regardless of whether any action has been commenced at the time the motion is made. R.S.O. 1990, c. C.30, s. 67 (6).

PART IX
EXTRAORDINARY REMEDIES

Application for appointment of trustee

68. (1) Any person having a lien, or any other person having an interest in the premises, may apply to the court for the appointment of a trustee and the court may appoint a trustee upon such terms as to the giving of security or otherwise as the court considers appropriate. R.S.O. 1990, c. C.30, s. 68 (1).

Powers of trustee

(2) Subject to the supervision and direction of the court, a trustee appointed under subsection (1) may,

(a) act as a receiver and manager and, subject to the *Planning Act* and the approval of the court, mortgage, sell or lease the premises or any part thereof;

(b) complete or partially complete the improvement;

(c) take appropriate steps for the preservation of the premises; and

(d) subject to the approval of the court, take such other steps as are appropriate in the circumstances. R.S.O. 1990, c. C.30, s. 68 (2).

Liens a charge on amounts recovered

(3) Subject to subsection 78 (7), all liens shall be a charge upon any amount recovered by the trustee after payment of the reasonable business expenses and management costs incurred by the trustee in the exercise of any power under subsection (2). R.S.O. 1990, c. C.30, s. 68 (3).

Sale subject to encumbrances

(4) Any interest in the premises that is to be sold may be offered for sale subject to any mortgage, charge, interest or other encumbrance that the court directs. R.S.O. 1990, c. C.30, s. 68 (4).

Orders for completion of sale, etc.

(5) The court may make all orders necessary for the completion of any mortgage, lease or sale by a trustee under this section. R.S.O. 1990, c. C.30, s. 68 (5).

Labour and material payment bonds

69. (1) Where a labour and material payment bond is in effect in respect of an improvement, any person whose payment is guaranteed by that bond has a right of action to recover the amount of the person's claim, in accordance with the terms and conditions of the bond, against the surety on the bond, where the principal on the bond defaults in making the payment guaranteed by the bond. R.S.O. 1990, c. C.30, s. 69 (1).

Saving

(2) Nothing in this section makes the surety liable for an amount in excess of the amount that the surety undertakes to pay under the bond and the surety's liability under the bond shall be reduced by and to the extent of any payment made in good faith by the surety either before or after judgment is obtained against the surety. R.S.O. 1990, c. C.30, s. 69 (2).

Subrogation

(3) The surety, upon satisfaction of its obligation to any person whose payment is guaranteed by the bond, shall be subrogated to all the rights of that person. R.S.O. 1990, c. C.30, s. 69 (3).

PART X
APPEALS

Stated case

70. (1) Where in the course of an action a question of law arises, the court may state the question in the form of a stated case for the opinion of the Divisional Court, and the stated case shall thereupon be set down to be heard before the Divisional Court and notice of hearing shall be served by the party setting down the matter upon all parties concerned. R.S.O. 1990, c. C.30, s. 70 (1).

Facts to be set out

(2) The stated case shall set forth those facts material to the determination of the question raised. R.S.O. 1990, c. C.30, s. 70 (2).

Appeal to Divisional Court

71. (1) Subject to subsection (3), an appeal lies to the Divisional Court from a judgment or an order on a motion to oppose confirmation of a report under this Act. R.S.O. 1990, c. C.30, s. 71 (1).

Notice of appeal

(2) A party wishing to appeal shall file and serve a notice of appeal within fifteen days of the date of the judgment or order, but the time for filing or serving the notice of appeal may be extended by the written consent of all parties, or by a single judge of the Divisional Court where an appropriate case is made out for doing so. R.S.O. 1990, c. C.30, s. 71 (2).

Where no appeal lies

(3) No appeal lies from,

(a) a judgment or an order on a motion to oppose confirmation of a report under this Act, where the amount claimed is $1,000 or less; or

(b) an interlocutory order made by the court. R.S.O. 1990, c. C.30, s. 71 (3).

PART XI
PRIORITIES

Enforcement of lien despite default

72. A person who has supplied services or materials in respect of an improvement may enforce a lien despite the non-completion or abandonment of the contract or a subcontract by any other person. R.S.O. 1990, c. C.30, s. 72.

Assignment of lien rights

73. The rights of a person having a lien may be assigned by an instrument in writing and, if not assigned, upon the death of the person pass to the person's personal representative. R.S.O. 1990, c. C.30, s. 73.

Continuation of general lien

74. (1) Subject to section 82, where one or more premises that are subject to an unpreserved general lien are sold, the general lien continues for the full amount of the lien against those premises that are subject to the lien, that were not sold. R.S.O. 1990, c. C.30, s. 74 (1).

Idem

(2) Where a person having a preserved or perfected general lien releases the lien against one or more of the premises subject to the lien, the lien continues for the full amount of the lien against those premises that were not released. R.S.O. 1990, c. C.30, s. 74 (2).

Effect of taking security

75. (1) The taking of any security for, or the acceptance of any promissory note or bill of exchange for, or the taking of any acknowledgment of, or the giving of time for the payment of, or the taking of proceedings for the recovery of, or the obtaining of a personal judgment for, the claim, does not in itself merge, waive, pay, satisfy, prejudice or destroy a lien. R.S.O. 1990, c. C.30, s. 75 (1).

Where note or bill negotiated

(2) Where any promissory note or bill of exchange has been negotiated, the person having the lien may still enforce the lien if the person is the holder of the promissory note or bill of exchange at the time when the person proves the claim for lien. R.S.O. 1990, c. C.30, s. 75 (2).

Time not extended

(3) Nothing in this section extends the time for, or dispenses with the requirement for, the preservation or perfection of a lien. R.S.O. 1990, c. C.30, s. 75 (3).

Lien claimant deemed purchaser

76. Where a claim for lien is preserved by registration, the lien claimant shall be deemed to be a purchaser to the extent of his lien within the provisions of the *Registry Act* and *Land Titles Act*, but except as otherwise provided in this Act, those Acts do not apply to any lien arising under this Act. R.S.O. 1990, c. C.30, s. 76.

Priority of liens over executions, etc.

77. The liens arising from an improvement have priority over all judgments, executions, assignments, attachments, garnishments and receiving orders except those executed or recovered upon before the time when the first lien arose in respect of the improvement. R.S.O. 1990, c. C.30, s. 77.

Priority over mortgages, etc.

78. (1) Except as provided in this section, the liens arising from an improvement have priority over all conveyances, mortgages or other agreements affecting the owner's interest in the premises. R.S.O. 1990, c. C.30, s. 78 (1).

Building mortgage

(2) Where a mortgagee takes a mortgage with the intention to secure the financing of an improvement, the liens arising from the improvement have priority over that mortgage, and any mortgage taken out to repay that mortgage, to the extent of any deficiency in the holdbacks required to be retained by the owner under Part IV, irrespective of when that mortgage, or the mortgage taken out to repay it, is registered. R.S.O. 1990, c. C.30, s. 78 (2).

Prior mortgages, prior advances

(3) Subject to subsection (2), and without limiting the effect of subsection (4), all conveyances, mortgages or other agreements affecting the owner's interest in the premises that were registered prior to

the time when the first lien arose in respect of an improvement have priority over the liens arising from the improvement to the extent of the lesser of,

(a) the actual value of the premises at the time when the first lien arose; and

(b) the total of all amounts that prior to that time were,

(i) advanced in the case of a mortgage, and

(ii) advanced or secured in the case of a conveyance or other agreement. R.S.O. 1990, c. C.30, s. 78 (3).

Prior mortgages, subsequent advances

(4) Subject to subsection (2), a conveyance, mortgage or other agreement affecting the owner's interest in the premises that was registered prior to the time when the first lien arose in respect of an improvement, has priority, in addition to the priority to which it is entitled under subsection (3), over the liens arising from the improvement, to the extent of any advance made in respect of that conveyance, mortgage or other agreement after the time when the first lien arose, unless,

(a) at the time when the advance was made, there was a preserved or perfected lien against the premises; or

(b) prior to the time when the advance was made, the person making the advance had received written notice of a lien. R.S.O. 1990, c. C.30, s. 78 (4).

Special priority against subsequent mortgages

(5) Where a mortgage affecting the owner's interest in the premises is registered after the time when the first lien arose in respect of an improvement, the liens arising from the improvement have priority over the mortgage to the extent of any deficiency in the holdbacks required to be retained by the owner under Part IV. R.S.O. 1990, c. C.30, s. 78 (5).

General priority against subsequent mortgages

(6) Subject to subsections (2) and (5), a conveyance, mortgage or other agreement affecting the owner's interest in the premises that is registered after the time when the first lien arose in respect to the improvement, has priority over the liens arising from the improvement to the extent of any advance made in respect of that conveyance, mortgage or other agreement, unless,

(a) at the time when the advance was made, there was a preserved or perfected lien against the premises; or

(b) prior to the time when the advance was made, the person making the advance had received written notice of a lien. R.S.O. 1990, c. C.30, s. 78 (6).

Advances to trustee under Part IX

(7) Despite anything in this Act, where an amount is advanced to a trustee appointed under Part IX as a result of the exercise of any powers conferred upon the trustee under that Part,

(a) the interest in the premises acquired by the person making the advance takes priority, to the extent of the advance, over every lien existing at the date of the trustee's appointment; and

(b) the amount received is not subject to any lien existing at the date of the trustee's appointment. R.S.O. 1990, c. C.30, s. 78 (7).

Where postponement

(8) Despite subsections (4) and (6), where a preserved or perfected lien is postponed in favour of the interest of some other person in the premises, that person shall enjoy priority in accordance with the postponement over,

(a) the postponed lien; and

(b) where an advance is made, any unpreserved lien in respect of which no written notice has been received by the person in whose favour the postponement is made at the time of the advance,

but nothing in this subsection affects the priority of the liens under subsections (2) and (5). R.S.O. 1990, c. C.30, s. 78 (8).

Saving

(9) Subsections (2) and (5) do not apply in respect of a mortgage that was registered prior to the 2nd day of April, 1983. R.S.O. 1990, c. C.30, s. 78 (9).

Financial guarantee bond

(10) A purchaser who takes title from a mortgagee takes title to the premises free of the priority of the liens created by subsections (2) and (5) where,

(a) a bond of an insurer licensed under the *Insurance Act* to write surety and fidelity insurance; or

(b) a letter of credit or a guarantee from a bank listed in Schedule I or II to the *Bank Act* (Canada),

in a form prescribed is registered on the title to the premises, and, upon registration, the security of the bond, letter of credit or the guarantee takes the place of the priority created by those subsections, and persons who have proved liens have a right of action against the surety on the bond or guarantee or the issuer of the letter of credit. R.S.O. 1990, c. C.30, s. 78 (10); 1997, c. 19, s. 30.

Home buyer's mortgage

(11) Subsections (2) and (5) do not apply to a mortgage given or assumed by a home buyer. R.S.O. 1990, c. C.30, s. 78 (11).

Persons who comprise class

79. All persons having a lien who have supplied services or materials to the same payer comprise a class, and a person who has supplied services or materials to more than one payer is a member of every class to the extent to which the person's lien relates to that class. R.S.O. 1990, c. C.30, s. 79.

Priority between and within class

80. (1) Except where it is otherwise provided by this Act,

(a) no person having a lien is entitled to any priority over another member of the same class;

(b) all amounts available to satisfy the liens in respect of an improvement shall be distributed rateably among the members of each class according to their respective rights; and

(c) the lien of every member of a class has priority over the lien of the payer of that class. R.S.O. 1990, c. C.30, s. 80 (1).

Where conveyance or mortgage void

(2) Any conveyance or mortgage in respect of the premises to any person entitled to a lien on the premises, in payment of or as security for that claim, whether given before or after that lien arises, is void against all other persons entitled to a lien on the premises. R.S.O. 1990, c. C.30, s. 80 (2).

Worker's priority

81. (1) The lien of a worker has priority over the lien of any other person belonging to the same class to the extent of the amount of forty regular-time working days' wages. R.S.O. 1990, c. C.30, s. 81 (1).

Workers' trust fund

(2) Where monetary supplementary benefits are payable to a workers' trust fund instead of to a worker, the trustee of the workers' trust fund is subrogated to the rights of the worker under this Act with respect to those benefits. R.S.O. 1990, c. C.30, s. 81 (2).

Device to defeat workers' priority void

(3) Every device to defeat the priority given to workers by this section is void. R.S.O. 1990, c. C.30, s. 81 (3).

Subordination of general lien claims

82. Where a general lien is realized against a premises in an action in which other liens are also realized against the premises,

(a) the general lien shall rank with the other liens according to the rules of priority set out in section 80 only to the extent of,

(i) the total value of the general lien,

divided by,

(ii) the total number of premises to which the person having the general lien supplied services or materials under contract or subcontract; and

(b) in respect of the balance of the general lien, it shall rank next in priority to all other liens against the premises, whether or not of the same class. R.S.O. 1990, c. C.30, s. 82.

Application of insurance proceeds

83. Where a premises that is subject to a lien is destroyed in whole or in part, any amount received by the owner or a mortgagee by reason of any insurance on the premises shall take the place of the premises so destroyed and shall be distributed in accordance with the priorities set out in this Part. R.S.O. 1990, c. C.30, s. 83.

Distribution of proceeds of sale

84. Where an interest in the premises is sold or leased under an order of the court or by a trustee appointed under Part IX, the proceeds received as a result of that disposition, together with any amount paid into court under subsection 65 (2), shall be distributed in accordance with the priorities set out in this Part. R.S.O. 1990, c. C.30, s. 84.

Priorities on insolvency

85. (1) Where a payer becomes insolvent, the trust fund of which that payer is trustee shall be distributed so that priority over all others is given to a beneficiary of that trust who has proved a lien and

a beneficiary of a trust created by section 8 that is derived from that trust, who has proved a lien. R.S.O. 1990, c. C.30, s. 85 (1).

Idem

(2) Priority in the distribution of trust funds among those who have proved liens shall be in accordance with the respective priorities of their liens as set out in this Part. R.S.O. 1990, c. C.30, s. 85 (2).

Idem

(3) The remaining trust funds shall be distributed among the beneficiaries of that trust and the beneficiaries of trusts created by section 8 that are derived from that trust, whose liens have not been proved, in accordance with the respective priorities to which those liens would have been entitled as set out in this Part, had those liens been proved. R.S.O. 1990, c. C.30, s. 85 (3).

PART XII
MISCELLANEOUS RULES

Costs

86. (1) Subject to subsection (2), any order as to the costs in an action, application, motion or settlement meeting is in the discretion of the court, and an order as to costs may be made against,

(a) a party to the action or motion; or

(b) a person who represented a party to the action, application or motion, where the person,

(i) knowingly participated in the preservation or perfection of a lien, or represented a party at the trial of an action, where it is clear that the claim for a lien is without foundation or is for a grossly excessive amount, or that the lien has expired, or

(ii) prejudiced or delayed the conduct of the action,

and the order may be made on a substantial indemnity basis, including where the motion is heard by, or the action has been referred under section 58 to, a master, case management master or commissioner. 2006, c. 21, Sched. C, s. 102 (3).

Where least expensive course not taken

(2) Where the least expensive course is not taken by a party, the costs allowed to the party shall not exceed what would have been incurred had the least expensive course been taken. R.S.O. 1990, c. C.30, s. 86 (2).

How documents may be given

87. (1) Except where otherwise ordered by the court, all documents and notices required to be given or that may be given under this Act, may be served in any manner permitted under the rules of court or, in the alternative, may be sent by certified or registered mail addressed to the intended recipient at the recipient's last known mailing address,

(a) according to the records of the person sending the document; or

(b) as stated on the most recently registered instrument identifying the recipient as a person having an interest in the premises. R.S.O. 1990, c. C.30, s. 87 (1).

When document deemed received

(2) In the absence of evidence to the contrary, a document or notice sent to a person by certified or registered mail shall be deemed to have been received by the person on the fifth day following the date on which it was mailed, exclusive of Saturdays and holidays. R.S.O. 1990, c. C.30, s. 87 (2).

Date of mailing

(3) Where a document or notice is sent by registered mail, the date appearing on the postal registration receipt shall be deemed conclusively to be the date of mailing. R.S.O. 1990, c. C.30, s. 87 (3).

Regulations

88. The Lieutenant Governor in Council may make regulations,

(a) prescribing forms and providing for their use;

(b) prescribing the appropriate offices of the Crown to which claims for lien must be sent;

(c) prescribing the form and manner of publication of copies of certificates and declarations of substantial performance under section 32. R.S.O. 1990, c. C.30, s. 88.

Note: Despite Schedules A and B to the Revised Statutes of Ontario, 1990, section 92 of the *Construction Lien Act, 1983*, being chapter 6, shall be deemed to continue in force. See: 1993, c. 27, s. 8, par. 1 and s. 9.

1. The office of the Crown to which a copy of a claim for lien must be given under subsection 34 (3) of the Act is as follows:

1. Where the contract is with a Ministry of the Crown, the office of the Director of Legal Services of that Ministry.
2. Where the contract is with the Ontario Mortgage and Housing Corporation, the office of the Director of Legal Services of the Ministry of Housing.
3. Where the contract is with a college of applied arts and technology, the office of the president of the college.
4. Where the contract is with any other office of the Crown, the chief executive officer of that office. R.R.O. 1990, Reg. 175, s. 1.

2. (1) A notice to a contractor under section 18 of the Act may be in Form 1. R.R.O. 1990, Reg. 175, s. 2 (1).

(2) A notice to a landlord under subsection 19 (1) of the Act may be in Form 2. R.R.O. 1990, Reg. 175, s. 2 (2).

(3) A notice to a contractor under subsection 19 (1) of the Act may be in Form 3. R.R.O. 1990, Reg. 175, s. 2 (3).

(4) A notice to a lien claimant under subsection 19 (3) of the Act may be in Form 4. R.R.O. 1990, Reg. 175, s. 2 (4).

(5) A declaration of last supply under subsection 31 (5) of the Act shall be in Form 5. R.R.O. 1990, Reg. 175, s. 2 (5).

(6) A certificate of the substantial performance of a contract under section 32 of the Act shall be in Form 6. R.R.O. 1990, Reg. 175, s. 2 (6).

(7) A certificate of completion of a subcontract under subsection 33 (1) of the Act shall be in Form 7. R.R.O. 1990, Reg. 175, s. 2 (7).

(8) A claim for lien under section 34 of the Act shall be in Form 8. R.R.O. 1990, Reg. 175, s. 2 (8).

(9) REVOKED: O. Reg. 174/11, s. 1.

(10) A certificate of action under section 36 of the Act shall be in Form 10. R.R.O. 1990, Reg. 175, s. 2 (10).

(11) A notice requiring a lien claimant whose lien is sheltered under the statement of claim of some other person to provide further particulars of the claim or of any fact alleged in the claim under paragraph 4 of subsection 36 (4) of the Act may be in Form 11. R.R.O. 1990, Reg. 175, s. 2 (11).

(12) A notice under clause 40 (3) (b), (c) or (d) of the Act may be in Form 12. R.R.O. 1990, Reg. 175, s. 2 (12).

(13) A notice under clause 40 (3) (a) of the Act may be in Form 13. R.R.O. 1990, Reg. 175, s. 2 (13).

(14) A release of lien under section 41 of the Act shall be in Form 14. R.R.O. 1990, Reg. 175, s. 2 (14).

(15) A notice of postponement under section 43 of the Act shall be in Form 15. R.R.O. 1990, Reg. 175, s. 2 (15).

(15.1) A bond posted as security under section 44 of the Act shall be in Form 15.1. O. Reg. 416/93, s. 1.

(16) A judgement under section 58 of the Act directing a reference of the whole action to a master or appointed local master for trial shall be in Form 16. R.R.O. 1990, Reg. 175, s. 2 (16).

(17) A notice of trial under section 60 of the Act may be in Form 17. R.R.O. 1990, Reg. 175, s. 2 (17).

(18) A notice of settlement meeting under section 60 of the Act may be in Form 18. R.R.O. 1990, Reg. 175, s. 2 (18).

(19) A judgement under section 62 of the Act shall be,

(a) in Form 19, where the lien attaches to the premises; or

(b) in Form 20, where the lien does not attach to the premises. R.R.O. 1990, Reg. 175, s. 2 (19).

(20) A report under section 62 of the Act shall be,

(a) in Form 21, where the lien attaches to the premises; or

(b) in Form 22, where the lien does not attach to the premises. R.R.O. 1990, Reg. 175, s. 2 (20).

(21) A financial guarantee bond under subsection 78 (10) of the Act shall be in Form 23. R.R.O. 1990, Reg. 175, s. 2 (21).

(21.1) A notice of intention to register a condominium under section 33.1 of the Act shall be in Form 24. O. Reg. 174/11, s. 2.

(22) Where an affidavit provided for in this Regulation is sworn or affirmed by an illiterate person, the jurat to the affidavit shall be in the form prescribed in the Superior Court of Justice rules of court. R.R.O. 1990, Reg. 175, s. 2 (22); O. Reg. 366/02, s. 1.

3. (1) Copies of certificates of the substantial performance of a contract shall be published in a construction trade newspaper in the following form and manner:

1. In each issue, all certificates shall appear on a single page or consecutive pages, and shall be arranged alphabetically by the upper-tier municipality or single-tier municipality in which the premises are situated.
2. The contents of each certificate of the substantial performance of a contract published in a construction trade newspaper shall be the same as in the original of the certificate, except that the signature of the payment certifier or other persons certifying substantial performance shall be deleted. R.R.O. 1990, Reg. 175, s. 3 (1); O. Reg. 366/02, s. 2.

(2) Declarations of the substantial performance of a contract shall be published in the same form and manner as certificates of the substantial performance of a contract. R.R.O. 1990, Reg. 175, s. 3 (2).

FINANCIAL GUARANTEE BOND UNDER SECTION 44 OF THE ACT

Construction Lien Act

Insert regs\graphics\1990\175\17515aau.tif

Bond No. ..... Amount $ .....

The surety of this bond is ....., an insurer licensed under the *Insurance Act* to write surety and fidelity insurance.

The principal of this bond is .....

The obligee of this bond is the Accountant of the Ontario Court.

WHEREAS .....has registered (or where the lien does not attach to the premises, has preserved the lien by giving to the appropriate office) a claim for lien with respect to an improvement to the premises described in Schedule A to this bond.

AND WHEREAS .....and others may prove liens with respect to the improvement to the premises.

AND WHEREAS this bond is being posted pursuant to section 44 of the *Construction Lien Act*.

THEREFORE, subject to the conditions contained in this bond, the surety and the principal bind themselves, their heirs, executors, successors and assigns, jointly and severally, to the obligee as follows:

1. The principal shall on or before the date specified in the judgment, order or report of the court, in any action to enforce lien claims arising from the improvement, pay to the obligee the amounts for lien(s) and costs as is directed by the court, unless in the meantime an appeal has been taken from the judgment, order or report in which case payment is not required until the final disposition of the appeal.

2. The surety, in default of payment by the principal, shall pay to the obligee within such further time as is specified by the court, the amount of any deficiency in the payment by the principal but the surety is not liable to pay more than a total maximum amount of $ ..... . The surety shall make the payment upon the written demand of the obligee without the right to question the merit of the demand and despite any objection by the principal.

This bond is subject to the following conditions:

1. The total amount of this bond shall be reduced by and to the extent of any payment made under the bond pursuant to an order, report or judgment of the court.

2. The surety shall be entitled to an assignment of the rights of any person who receives a payment or benefit from the proceeds of this bond, to the extent of the payment or benefit received.

Signed and sealed by the principal and the surety on the ..... day of ....., 19.....

Plaintiff(s)

(*court seal*) and

.....

Defendant(s)

JUDGMENT

THIS ACTION was heard on ..... (*date*), at ..... (*place*), in the presence of all parties (*or the solicitors for identified parties,* ..... *appearing in person, no one appearing for* ..... *, or as the case may be*).

ON READING THE PLEADINGS AND HEARINGS THE EVIDENCE and the submissions of the solicitors for the parties (*or* ..... appearing in person, or as the case may be).

(*Use the appropriate paragraphs*)

1. THIS COURT DECLARES AND ADJUDGES that the persons named in Column 1 of Schedule A to this judgment are respectively entitled to a lien under the *Construction Lien Act*, upon the interest of the owner, ... (*name of owner*) in the premises described in Schedule B of this judgment for the amounts set opposite their respective names in Column 5 of Schedule A, and the primary debtors of those persons respectively are as set out in Column 6 of Schedule A.

2. AND THIS COURT DECLARES AND ADJUDGES that the persons mentioned in Column 1 of Schedule C to this judgment are entitled to some charge or encumbrance other than a lien under this Act on the interest of the owner in the premises for the amounts set opposite their respective names in Column 4 of Schedule C.

3. AND THIS COURT ORDERS AND ADJUDGES that the personal liability of the owner ..... to the persons named in Column 1 of Schedule E in respect of the holdbacks the owner was required to retain is $....., and writs of execution may be issued forthwith for the amounts set out opposite their respective names in Column 2 of Schedule E.

4. AND THIS COURT ORDERS AND ADJUDGES that upon the defendant ..... (*the owner*) paying into court to the credit of this action the amount of $ ..... on or before the ..... day of ....., 19....., the liens mentioned in Schedule A are discharged and the registration of those liens and the certificates of action in relation to those liens are vacated and the money paid into court is to be paid in payment of the persons entitled to a lien.

5. AND THIS COURT ORDERS AND ADJUDGES that if the defendant ..... (*owner*)

Insert regs\graphics\1990\175\175019bu.tif

makes default in payment of the money into Court that the owner's interest in the premises be sold under the supervision of the master of this court and that the purchase money be paid into court to the credit of this action.

6. AND THIS COURT ORDERS AND ADJUDGES that the purchase money be applied in or towards payment of the claims mentioned in Schedule(s) A (*and C*) as the master directs, with subsequent interest and subsequent costs to be computed and taxed by the master.

7. AND THIS COURT ORDERS AND ADJUDGES that if the purchase money paid into court is insufficient to pay in full the proven claims of the persons mentioned in Column 1 of Schedule A, the primary debtor of each of those persons, as set out in Column 6 of Schedule A, shall pay the amount remaining due to those persons forthwith after the amount has been ascertained by the master.

8. AND THIS COURT ORDERS AND ADJUDGES that the persons named in Column 1 of Schedule F have not proved any lien under the *Construction Lien Act*, and orders and adjudges that the claims for lien registered by them and the certificates of action related to those claims as set out in Column 2 of Schedule F are vacated against the premises described in Schedule B.

9. AND THIS COURT ORDERS AND ADJUDGES that the persons whose names are set out in Column 1 of Schedule D to this judgment, although they have not proven their claims for lien, are entitled to personal judgment for the amounts set opposite their respective names in Column 4 of Schedule D against their respective debtors as set out in Column 5 opposite their names and the respective debtors shall forthwith pay to their respective judgment creditors the amount found due.

10. AND THIS COURT ORDERS AND ADJUDGES, that since the owner's interest in the premises has been sold by . . . . . , a mortgagee, and it has been determined by this court that the liens were entitled to priority over the mortgage under subsection 78 (2) [*or subsection 78 (5) as the case may be*] of the Act, therefore the mortgagee shall pay to the persons named in Schedule E the amount set out opposite each of their respective names on or before the . . . . . day of . . . . . , 19 . . . .

1. THIS COURT DECLARES AND ADJUDGES that the amount for which the defendant-owner ..... (*owner*)

   is liable under section 21 [*or subsection 17 (4)*] of the *Construction Lien Act* is $ .....

2. AND THIS COURT DECLARES AND ADJUDGES that the persons named in Column 1 of Schedule A to this judgment are respectively entitled to a lien under the *Construction Lien Act* which lien is a charge under section 21 upon the amount for which the defendant-owner is liable; for the amounts set opposite their respective names in Column 4 and the primary debtors of those persons are set out in Column 5 of Schedule A.

3. AND THIS COURT ORDERS AND ADJUDGES that upon the defendant-owner ..... (*owner*)

   paying into court to the credit of this action the amount of $ ..... for which the owner is liable on or before the ....., (*day*)

   ..... (*date*) that the liens mentioned in Schedule A are discharged, that the money paid into court is to be paid in payment of the persons entitled to a lien.

4. AND THIS COURT ORDERS AND ADJUDGES that if the money paid into court is insufficient to pay in full the proven claims of the persons mentioned in Column 1 of Schedule A, the primary debtor of each of those persons as set out in Column 5 of Schedule A shall pay the amount remaining due to those persons forthwith after this amount has been ascertained by the master.

5. AND THIS COURT DECLARES AND ADJUDGES that the following persons have not proved any lien under the *Construction Lien Act*:

   ..... (*names of persons*)

   and are not entitled to a personal judgment against any of the parties to this action.

6. AND THIS COURT ADJUDGES that the persons whose names are set out in Column 1 of Schedule B to this judgment, although they have not proven their claims for lien are entitled to personal judgment for the amounts set opposite their respective name in Column 4 of Schedule B against their respective debtors as set out in Column 5 opposite their names and the respective debtors shall forthwith pay to their respective judgment creditors the amount found due.

REPORT

In accordance with a judgment of reference dated ..... ,

trial of this action was heard on ..... (*date*) , at ..... (*place*) in the presence

of all parties (*or the solicitors for identified parties,* ..... *appearing in person, no one appearing for* ..... , *or as the case may be).*

ON READING THE PLEADINGS AND HEARING THE EVIDENCE and the submissions of the solicitors for the parties (*or as the case may be*).

(*Use the appropriate paragraphs*)

1. I FIND AND DECLARE THAT the persons named in Column 1 of Schedule A to this report are respectively entitled to a lien under the *Construction Lien Act*, upon the interest of the owner, ... (*name of owner*), in the premises described in Schedule B of this report for the amounts set opposite their respective names in Column 5 of Schedule A, and the primary debtors of those persons respectively are as set out in Column 6 of Schedule A.

2. I FIND AND DECLARE THAT the persons mentioned in Column 1 of Schedule C to this report are entitled to some charge or encumbrance other than a lien under this Act on the interest of the owner in the premises for the amounts set opposite their respective names in Column 4 of Schedule C.

3. AND I FIND, DECLARE AND DIRECT that the personal liability of the owner ..... to the persons named in Column 1 of Schedule E in respect of the holdbacks the owner was required to retain is $ ..... and writs of execution may be issued forthwith after confirmation of this order for the amounts set opposite their respective names in Column 2 of Schedule E.

4. AND I DIRECT that upon the defendant ..... (*the owner*) paying into court to the credit of this action the amount of $ ..... on or before the ..... day of ..... , 19..... , the liens mentioned in Schedule A are discharged and the registration of those liens and the certificates of action in relation to those liens are vacated and the money paid into court is to be paid in payment of the persons entitled to a lien.

5. AND I DIRECT that if the defendant ..... (*owner*) makes default in payment of the money into court that the owner's interest in the premises be sold under the supervision of the master of this court and that the purchase money be paid into court to the credit of this action.

6. AND I DIRECT that the purchase money be applied in or towards payment of the claims mentioned in Schedule(s) A (*and C*) as the master directs, with subsequent interest and subsequent costs to be computed and taxed by the master.

7. AND I DIRECT that if the purchase money paid into court is insufficient to pay in full the proven claims of the persons mentioned in Column 1 of Schedule A, the primary debtor of each of those persons, as set out in Column 6 of Schedule A, shall pay the amount remaining due to those persons forthwith after the amount has been ascertained by the master.

Insert regs\graphics\1990\175\175021bu.tif

8. AND I FIND AND DECLARE THAT the persons named in Column 1 of Schedule F have not proved any lien under the *Construction Lien Act*, and I direct that the claims for lien registered by them and the certificates of action related to those claims as set out in Column 2 of Schedule F be vacated against the premises described in Schedule B.

9. AND I FIND AND DECLARE THAT the persons whose names are set out in Column 1 of Schedule D to this report, although they have not proven their claims for lien, are entitled to personal judgment for the amounts set opposite their respective names in Column 4 of Schedule D against their respective debtors as set out in Column 5 opposite their names and the respective debtors shall forthwith after confirmation of this report pay to their respective judgment creditors the amount found due.

10. AND I DIRECT that since the owner's interest in the premises has been sold by .....

..... , a mortgagee, and it has been determined by this court that the lien claimants were entitled to priority over the mortgagee under subsection 78 (2) [*or subsection 78 (5) as the case may be*] of the Act, therefore the mortgagee shall pay to the persons named in Schedule E the amount set out opposite each of their respective names on or before the ..... day of ..... , 19 ....

FORM 23
FINANCIAL GUARANTEE BOND UNDER SUBSECTION 78 (10) OF THE ACT

Construction Lien Act

Insert regs\graphics\1990\175\175023au.tif

The surety of this bond is ..... , an insurer licensed under the *Insurance Act* to write surety and fidelity insurance.

The principal of this bond is ..... ,

a mortgagee of the interest of the owner .....

in the premises described in Schedule A to this bond.

The obligees of this bond are all persons having liens whose liens are entitled to priority over the interest of the principal under subsection 78 (2) or (5) of the Act.

WHEREAS it is the intention of the principal to sell the interest of the owner under a power of sale.

THEREFORE, subject to the conditions contained in this bond, the surety and the principal bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally to the obligees as follows:

1. The principal shall, on or before the date set out in the judgment or report for payment, pay to each obligee who has proved a lien the amount determined by the court to be owing to that obligee under subsection 78 (2) or (5) of the Act by the principal as mortgagee, unless in the meantime an appeal has been taken from the judgment or report in which case payment is not required until the final disposition of all appeals.

2. The surety, in default of payment by the principal shall pay to each obligee the amount owing to him by the principal, but the surety is not liable to pay more than a total maximum amount of $ ..... (*an amount equal to 20 per cent of the amount stated to be the contract price in the affidavit attached as Schedule B to this bond*).

This bond is subject to the following conditions:

1. An obligee shall not make a claim against the surety unless the principal is in default of the principal's obligations under this bond.

2. An obligee shall give the surety thirty days written notice of the claim prior to commencing an action against the surety.

3. The surety is released from its obligation to an obligee unless the obligee has given written notice of the claim to the surety within one year after the default by the principal.

4. The total amount of this bond is reduced by and to the extent of any payment made under the bond.

5. The surety is entitled to an assignment of the rights of an obligee against the principal to the extent of the payment made by the surety.

Signed and sealed by the principal and the surety on the ..... day of ..... 19 ... and registration of this bond on the title to the premises constitutes delivery of this bond to each obligee.

Schedule B

FINANCIAL GUARANTEE BOND

AFFIDAVIT OF GOOD FAITH BY MORTGAGEE

I, ..., make oath and say (*or affirm*) as follows:

1. I am a mortgagee of the interest of .....
(*name of owner*)

   described in Schedule A to the attached bond.

2. Under the terms of the mortgage, or under the *Mortgages Act*, I am entitled to exercise a power of sale with respect to that interest.

3. It is my intention to exercise that power of sale, even though there are claims for lien registered against the interest of the owner under the *Construction Lien Act* that may have priority to the mortgage under the Act.

4. I have inquired of the contractor and the owner with respect to the contract price of the contract to which that improvement relates, and to the best of my information and belief the amount of the contract price (*including the price of all services and materials supplied under all amendments to that contract*) is .....

5. The attached bond has been obtained by me in good faith, without any intention of depriving any lien claimant of their rights under the *Construction Lien Act*.

Sworn (*or affirmed*) before me at the
..... of .....
in the ..... of .....
this ..... day of ....., 19....
.....
A Commissioner, etc.

168.9	Delegation agreement
PART XV.2 SPECIAL PROVISIONS APPLICABLE TO MUNICIPALITIES, SECURED CREDITORS, RECEIVERS, TRUSTEES IN BANKRUPTCY, FIDUCIARIES AND PROPERTY INVESTIGATORS	
INTERPRETATION	
168.10	Definitions, Part XV.2
168.11	Interpretation, effect on cause of action
MUNICIPALITIES	
168.12	Actions taken by municipalities
168.13	Ownership by vesting
168.14	Exceptional circumstances, municipalities
168.15	Notice of prescribed circumstances, municipalities
168.16	Reports of investigations of contaminants, municipalities
SECURED CREDITORS, RECEIVERS AND TRUSTEES IN BANKRUPTCY	
168.17	Actions taken by secured creditors
168.18	Secured creditor becoming owner by foreclosure
168.19	Receivers and trustees in bankruptcy
168.20	Exceptional circumstances, secured creditors, receivers and trustees in bankruptcy
168.21	Notice of prescribed circumstances, secured creditors, receivers and trustees in bankruptcy
168.22	Reports of investigations of contaminants, secured creditors, etc.
FIDUCIARIES	
168.23	Obligations of fiduciaries
168.24	Notice of prescribed circumstances, fiduciaries
168.25	Reports of investigations of contaminants, fiduciaries
INVESTIGATIONS OF PROPERTY AND ACTIONS TO REDUCE CONCENTRATION OF CONTAMINANTS	
168.26	Investigations of property, etc.
PART XVI ENVIRONMENTAL COUNCIL	
169.	Meaning of "Council", Part XVI
170.	Environmental Council established
171.	Duties of Council
PART XVII MISCELLANEOUS	
172.	Where contaminant causes damage to crops or livestock
173.	Agreement by municipality
174.	Unjust dismissal, compliance with Act, etc.
175.	Evidence of documents
175.1	Regulations, general
176.	Regulations, additional
176.1	Regulations, market-based approaches, etc.
177.	Regulations, general rules

177.1	Bar of action
179.	Conflict with other legislation
179.1	Fees
180.	Protection from personal liability
181.	Service on commercial drivers of offence notice or summons
181.1	Service on various entities of offence notice or summons
182.	Service generally
182.1	Environmental penalties
182.2	Special purpose account
182.3	Administrative penalties
182.4	Review of administrative penalty imposed by provincial officer
182.5	Failure to pay administrative penalty when required
183.	Power to restrain
184.	Compliance with investigations, etc.
185.	Presiding judge

186.	Offences
187.	Penalties
188.	Number of convictions
188.1	Sentencing considerations
189.	Penalty re monetary benefit
190.	Order to prevent damage, etc.
190.1	Restitution orders
190.2	Forfeiture on conviction
190.3	Where fine not paid
190.4	Costs of seizure, etc.
191.	Suspension of default in payment of fine
192.	Act of officer, etc.
194.	Duty of director or officer
195.	Limitation on proceedings
196.	Orders, consequential authority
196.1	Administrative changes to environmental compliance approval, etc.
197.	Disclosure of orders and decisions

Interpretation

1. (1) In this Act,

"administrative penalty" means a penalty imposed under section 182.3; (pénalité administrative")

"adverse effect" means one or more of,

(a) impairment of the quality of the natural environment for any use that can be made of it,

(b) injury or damage to property or to plant or animal life,

(c) harm or material discomfort to any person,

(d) an adverse effect on the health of any person,

(e) impairment of the safety of any person,

(f) rendering any property or plant or animal life unfit for human use,

(g) loss of enjoyment of normal use of property, and

(h) interference with the normal conduct of business; ("conséquence préjudiciable")

"air" means open air not enclosed in a building, structure, machine, chimney, stack or flue; ("air")

"analyst" means an analyst appointed under this Act; ("analyste")

"certificate of property use" means a certificate of property use issued under section 168.6; ("certificat d'usage d'un bien")

"certification date" means, in respect of a record of site condition, a date determined in accordance with the regulations that is not later than the date the record of site condition is filed in the Environmental Site Registry; ("date d'attestation")

"contaminant" means any solid, liquid, gas, odour, heat, sound, vibration, radiation or combination of any of them resulting directly or indirectly from human activities that causes or may cause an adverse effect; ("contaminant")

"discharge", when used as a verb, includes add, deposit, leak or emit and, when used as a noun, includes addition, deposit, emission or leak; ("rejet", "rejeter")

"document" includes a sound recording, videotape, film, photograph, chart, graph, map, plan, survey, book of account and information recorded or stored by means of any device; ("document")

"environmental compliance approval" means an approval issued under Part II.1; ("autorisation environnementale")

"environmental penalty" means a penalty imposed under section 182.1; ("pénalité environnementale")

"fiduciary" means an executor, administrator, administrator with the will annexed, trustee, guardian of property or attorney for property, but does not include a trustee in bankruptcy or trustee in bankruptcy representative; ("représentant fiduciaire")

"fiduciary representative" means, with respect to a fiduciary, an officer, director, employee or agent of the fiduciary, or a lawyer, consultant or other advisor of the fiduciary who is acting on behalf of the fiduciary; ("représentant d'un représentant fiduciaire")

Note: On a day to be named by proclamation of the Lieutenant Governor, subsection (1) is amended by adding the following definition:

"greenhouse gas" means,

(a) carbon dioxide,

(b) methane,

(c) nitrous oxide,

(d) hydrofluorocarbons,

(e) perfluorocarbons,

(f) sulphur hexafluoride, or

(g) any other contaminant prescribed as a greenhouse gas by the regulations; ("gaz à effet de serre")

See: 2009, c. 27, ss. 1, 3 (2).

"inspection" includes an audit, examination, survey, test and inquiry; ("inspection")

"justice" means a provincial judge or a justice of the peace; ("juge")

"land" means surface land not enclosed in a building, land covered by water and all subsoil, or any combination or part thereof; ("terrain")

"Minister" means the Minister of the Environment; ("ministre")

"Ministry" means the Ministry of the Environment; ("ministère")

"municipal representative" means, with respect to a municipality, an officer, employee or agent of the municipality, or a lawyer, consultant or other advisor of the municipality who is acting on behalf of the municipality; ("représentant municipal")

"municipality" includes a local board, as defined in the *Municipal Affairs Act*, and a board, commission or other local authority exercising any power with respect to municipal affairs or purposes, including school purposes, in an unorganized township or unsurveyed territory; ("municipalité")

"natural environment" means the air, land and water, or any combination or part thereof, of the Province of Ontario; ("environnement naturel")

"person" includes a municipality as defined in this subsection; ("personne")

"person responsible" means the owner, or the person in occupation or having the charge, management or control of a source of contaminant; ("personne responsable")

"place" includes a building, structure, machine, vehicle or vessel; ("lieu")

"provincial officer" means a person who is designated by the Minister as a provincial officer for the purposes of this Act and the regulations; ("agent provincial")

"receiver" means a person who has been appointed to take or who has taken possession or control of property pursuant to a mortgage, hypothec, pledge, charge, lien, security interest, encumbrance or privilege or pursuant to an order of a court, and includes a receiver-manager and an interim receiver; ("séquestre")

"receiver representative" means, with respect to a receiver, an officer, director, employee or agent of the receiver, or a lawyer, consultant or other advisor of the receiver who is acting on behalf of the receiver; ("représentant d'un séquestre")

"regulated person" means,

(a) a person who belongs to a class of persons prescribed by the regulations and who holds or is required to hold,

(i) an environmental compliance approval, certificate of property use, renewable energy approval, licence or permit under this Act, or

(ii) an approval, licence or permit under the *Ontario Water Resources Act*,

(b) a person who has registered or is required to register an activity under subsection 20.21 (1), or

(c) a corporation that belongs to a class of corporations prescribed by the regulations; ("personne réglementée")

"regulations" means the regulations made under this Act; ("règlements")

"renewable energy generation facility" has the same meaning as in the *Electricity Act, 1998*; ("installation de production d'énergie renouvelable")

"renewable energy project" has the same meaning as in the *Green Energy Act, 2009*; ("projet d'énergie renouvelable")

"secured creditor" means a person who holds a mortgage, hypothec, pledge, charge, lien, security interest, encumbrance or privilege on or against property, but does not include a person who has taken possession or control of the property; ("créancier garanti")

"secured creditor representative" means, with respect to a secured creditor, an officer, director, employee or agent of the secured creditor, or a lawyer, consultant or other advisor of the secured creditor who is acting on behalf of the secured creditor; ("représentant d'un créancier garanti")

"source of contaminant" means anything that discharges into the natural environment any contaminant; ("source de contamination")

"Tribunal" means the Environmental Review Tribunal; ("Tribunal")

"trustee in bankruptcy representative" means, with respect to a trustee in bankruptcy, an officer, director, employee or agent of the trustee in bankruptcy, or a lawyer, consultant or other advisor of the trustee in bankruptcy who is acting on behalf of the trustee in bankruptcy; ("représentant d'un syndic de faillite")

"water" means surface water and ground water, or either of them. ("eau") R.S.O. 1990, c. E.19, s. 1 (1); 1992, c. 1, s. 22; 1998, c. 35, s. 1; 2000, c. 26, Sched. F, s. 12 (1-3); 2001, c. 9, Sched. G, s. 5 (1); 2001, c. 17, s. 2 (1); 2002, c. 17, Sched. F, Table; 2005, c. 12, s. 1 (1-3); 2009, c. 12, Sched. G, s. 1; 2009, c. 19, s. 67 (1); 2010, c. 16, Sched. 7, s. 2 (1, 2).

Idem, Director

(2) In this Act,

"the Director" means a Director appointed under section 5. R.S.O. 1990, c. E.19, s. 1 (2).

Idem, penalties

(3) A municipality that is convicted of an offence under this Act is liable to the penalty provided for a corporation convicted of the offence. R.S.O. 1990, c. E.19, s. 1 (3).

Health or safety

(4) For the purposes of this Act, a danger to existing water supplies that are used for human consumption shall be deemed to be a danger to the health or safety of persons. 2001, c. 17, s. 2 (2).

Secondary discharge within building

2. A contaminant that is discharged into the air within a building or structure as a result of the discharge of the same or another contaminant in another building or structure shall be deemed to be

discharged into the natural environment by the owner or the person who has the charge, management or control of the contaminant discharged in the other building or structure. R.S.O. 1990, c. E.19, s. 2.

Interpretation, environmental compliance approval

2.1 For the purposes of this Act and the regulations made under it and any other Act and the regulations made under any other Act,

(a) any reference to an environmental compliance approval includes,

(i) a certificate of approval or provisional certificate of approval issued under section 9 or 39 before the day this section comes into force, and

(ii) an approval granted under section 53 of the *Ontario Water Resources Act* before the day this section comes into force; and

(b) any certificate of approval, provisional certificate of approval or approval mentioned in subclause (a) (i) or (ii) may be amended, reviewed, suspended and revoked as if it were an environmental compliance approval. 2010, c. 16, Sched. 7, s. 2 (3).

PART I
ADMINISTRATION

Purpose of Act

3. (1) The purpose of this Act is to provide for the protection and conservation of the natural environment. R.S.O. 1990, c. E.19, s. 3.

Extra-provincial environment

(2) No action taken under this Act is invalid by reason only that the action was taken for the purpose of the protection, conservation or management of the environment outside Ontario's borders.

Idem

(3) Subsection (2) applies even if the action was taken before the coming into force of that subsection. 1992, c. 1, s. 23.

Powers and duties of Minister

4. (1) The Minister, for the purposes of the administration and enforcement of this Act and the regulations, may,

(a) investigate problems of pollution, waste management, waste disposal, litter management and litter disposal;

(b) conduct research related to contaminants, pollution, waste management, waste disposal, litter management and litter disposal;

(c) conduct studies of the quality of the natural environment, meteorological studies, and monitoring programs;

(d) conduct studies of environmental planning designed to lead to the wise use of the natural environment;

(e) convene conferences and conduct seminars and educational and training programs relating to contaminants, pollution, waste and litter;

(f) gather, publish and disseminate information relating to contaminants, pollution, waste and litter;

(g) make grants and loans in such amounts and upon such terms as the Minister considers advisable for,

(i) research and training in relation to contaminants, pollution, waste, litter and the reduction of waste and the reuse and recycling of materials that are or could become waste,

(ii) planning, operating, developing, improving and enlarging waste management systems, waste disposal sites and programs to encourage the reduction of waste or the reuse or recycling of materials that are or could become waste, and

(iii) discontinuing waste management systems or reduction, reuse or recycling programs or closing waste disposal sites;

(h) establish and operate demonstration and experimental sewage systems under Part VIII, waste management systems, waste disposal sites and programs concerning the reduction of waste or the reuse or recycling of materials that are or could become waste;

(i) appoint committees to perform such advisory functions as the Minister considers advisable;

(j) with the approval of the Lieutenant Governor in Council, enter into an agreement with any government or person relating to the protection or conservation of the natural environment;

(k) establish and operate, use, alter, enlarge and extend waste management systems or waste disposal sites; and

(l) discontinue systems and close sites referred to in clause (k). R.S.O. 1990, c. E.19, s. 4; 1992, c. 1, s. 24 (1, 2).

Limitation

(2) A waste disposal site or waste management system shall not be established under clause (1) (k) in a municipality for any function relating to waste from a source within the municipality or to existing waste located within the municipality unless,

(a) the municipality does not have a waste disposal site or waste management system that is adequate and available to perform that function for the waste; or

(b) the municipality consents to the establishment of the site or system. 1992, c. 1, s. 24 (3).

Delegation

(3) The Minister may delegate any of his or her powers under subsection (1) to the Director. 1992, c. 1, s. 24 (4).

Appointments

Directors

5. (1) The Minister may in writing appoint as Directors any of the following persons as the Minister considers necessary in respect of the sections of this Act or of the regulations that are set out in the appointments:

1. Public servants employed under Part III of the *Public Service of Ontario Act, 2006* who work in the Ministry or the members of classes of such public servants.
2. Subject to the approval of the Lieutenant Governor in Council, any other persons or the members of any other classes of persons. 2006, c. 35, Sched. C, s. 36 (1).

Analysts and provincial officers

(2) The Minister may in writing appoint as analysts or designate as provincial officers any of the following persons as the Minister considers necessary in respect of the sections of any Act administered by the Minister or of the regulations under such Act that are set out in the appointments or designations:

1. Public servants employed under Part III of the *Public Service of Ontario Act, 2006* who work in the Ministry or the members of classes of such public servants.

2. Any other persons or the members of any other classes of persons. 2006, c. 35, Sched. C, s. 36 (1).

Limitation of authority

(3) The Minister, in an appointment or designation under subsection (1) or (2), may limit the authority of a Director, analyst or provincial officer in such manner as the Minister considers necessary or advisable. R.S.O. 1990, c. E.19, s. 5 (3).

Provincial officers

(4) A provincial officer is a peace officer for the purpose of enforcing this Act. 1998, c. 35, s. 2.

Investigation and prosecution

(5) A provincial officer may investigate offences under this Act and may prosecute any person whom the provincial officer reasonably believes is guilty of an offence under this Act. 1998, c. 35, s. 2.

PART II
GENERAL PROVISIONS

Prohibition, contamination generally

6. (1) No person shall discharge into the natural environment any contaminant, and no person responsible for a source of contaminant shall permit the discharge into the natural environment of any contaminant from the source of contaminant, in an amount, concentration or level in excess of that prescribed by the regulations. R.S.O. 1990, c. E.19, s. 6 (1).

Exception

(2) Subsection (1) does not apply to animal wastes disposed of in accordance with both normal farming practices and the regulations made under the *Nutrient Management Act, 2002*. 2002, c. 4, s. 62 (1).

Control orders

7. (1) When the report of a provincial officer contains a finding that a contaminant discharged into the natural environment is a contaminant the use of which is prohibited by the regulations or is being discharged in contravention of section 14 or the regulations, the Director may issue a control order directed to,

(a) an owner or previous owner of the source of contaminant;

(b) a person who is or was in occupation of the source of contaminant; or

(c) a person who has or had the charge, management or control of the source of contaminant.

Contravention of s. 14

(1.1) No order shall be issued under subsection (1) as a result of a finding that a contaminant is being discharged in contravention of section 14 unless the contravention causes or is likely to cause an adverse effect. 2005, c. 12, s. 1 (4).

Public notice

(2) The Director shall give notice of the control order to every municipality in which the contaminant is discharged and to the public in such manner as the Director considers appropriate. R.S.O. 1990, c. E.19, s. 7.

Stop orders

8. (1) When the Director, upon reasonable and probable grounds, is of the opinion that a source of contaminant is discharging into the natural environment any contaminant that constitutes, or the amount, concentration or level of which constitutes, an immediate danger to human life, the health of any persons, or to property, the Director may issue a stop order directed to,

(a) an owner or previous owner of the source of contaminant;

(b) a person who is or was in occupation of the source of contaminant; or

(c) a person who has or had the charge, management or control of the source of contaminant.

Public notice

(2) The Director shall give notice of the stop order to every municipality in which the contaminant is discharged and to the public in such manner as the Director considers appropriate. R.S.O. 1990, c. E.19, s. 8.

Approval, plant or production process

9. (1) No person shall, except under and in accordance with an environmental compliance approval,

(a) use, operate, construct, alter, extend or replace any plant, structure, equipment, apparatus, mechanism or thing that may discharge or from which may be discharged a contaminant into any part of the natural environment other than water; or

(b) alter a process or rate of production with the result that a contaminant may be discharged into any part of the natural environment other than water or the rate or manner of discharge of a contaminant into any part of the natural environment other than water may be altered. R.S.O. 1990, c. E.19, s. 9 (1); 2010, c. 16, Sched. 7, s. 2 (4).

(2) REPEALED: 2010, c. 16, Sched. 7, s. 2 (5).

Exceptions

(3) Subsection (1) does not apply to,

(a) routine maintenance carried out on any plant, structure, equipment, apparatus, mechanism or thing;

(b) equipment for the combustion of fuel, other than waste incinerators, in buildings or structures designed for the housing of not more than three families;

(c) any equipment, apparatus, mechanism or thing in or used in connection with a building or structure designed for the housing of not more than three families where the only contaminant produced by such equipment, apparatus, mechanism or thing is sound or vibration;

(d) any plant, structure, equipment, apparatus, mechanism or thing that may be a source of contaminant of a class exempted therefrom by the regulations;

(e) any plant, structure, equipment, apparatus, mechanism or thing used in agriculture;

(f) any motor or motor vehicle that is subject to Part III. R.S.O. 1990, c. E.19, s. 9 (3).

Exception, prescribed activities

(4) Subsection (1) does not apply to a person who is engaging in an activity at a site if the activity has been prescribed by the regulations for the purposes of subsection 20.21 (1), unless one of the following circumstances applies:

1. An environmental compliance approval in respect of the activity engaged in at the site has been issued before the day when a regulation prescribing the activity for the purposes of subsection

20.21 (1) comes into force, and the approval has not ceased to have effect as determined under section 20.17.

2. Subject to subsection (5), the Director has issued an order under section 20.18 in respect of the activity at the site. 2010, c. 16, Sched. 7, s. 2 (6).

Same

(5) If a registration under Part II.2 is in effect in respect of an activity engaged in at a site when the Director issues an order under section 20.18 in respect of the activity, subsection (1) applies only once the Director has removed the registration from the Environmental Activity and Sector Registry established under Part II.2. 2010, c. 16, Sched. 7, s. 2 (6).

(6), (7) REPEALED: 2010, c. 16, Sched. 7, s. 2 (6).

(8)-(11) REPEALED: 2010, c. 16, Sched. 7, s. 2 (8).

Program for dealing with contamination

10. (1) A person responsible for a source of contaminant may submit to the Director a program to prevent or to reduce and control the discharge into the natural environment of any contaminant from the source of contaminant.

Referral of program

(2) When a program referred to in subsection (1) is submitted to the Director, the Director may, with the consent of the Minister, refer the program to the Environmental Council for its consideration and advice.

Approval of program

(3) The Director may issue a program approval, directed to the person who submitted the program. R.S.O. 1990, c. E.19, s. 10.

Program approvals

11. (1) The Director shall, in a program approval,

(a) set out the name of the person to whom the approval is directed;

(b) set out the location and nature of the source of contaminant;

(c) set out the details of the program; and

(d) approve the program.

Amendment or revocation

(2) The Director may, by order, amend or revoke a program approval that was issued in error or that no longer adequately provides for the protection and conservation of the natural environment.

Amendment or revocation on consent

(3) The Director may, by order, amend or revoke a program approval with the consent of the person to whom the program approval is directed.

No hearing for amendment or revocation on consent

(4) Subsection 140 (1) does not entitle any person to a hearing in respect of an amendment or revocation of a program approval in accordance with a consent mentioned in subsection (3). R.S.O. 1990, c. E.19, s. 11.

Program approvals, order not to prevent control or stop order

12. Despite the issue of a program approval or order, when the Director is of the opinion, based upon reasonable and probable grounds, that it is necessary or advisable for the protection or conservation of the natural environment, the prevention or control of an immediate danger to human life, the health of any persons or to property, the Director may issue a stop order or a control order directed to the person responsible. R.S.O. 1990, c. E.19, s. 12.

Ministry to be notified when contamination exceeds permitted level

13. (1) Every person,

(a) who discharges into the natural environment; or

(b) who is the person responsible for a source of contaminant that discharges into the natural environment,

any contaminant in an amount, concentration or level in excess of that prescribed by the regulations shall forthwith notify the Ministry of the discharge.

Exception

(2) Subsection (1) does not apply to animal wastes disposed of in accordance with normal farming practices. R.S.O. 1990, c. E.19, s. 13.

Prohibition, discharge of contaminant

14. (1) Subject to subsection (2) but despite any other provision of this Act or the regulations, a person shall not discharge a contaminant or cause or permit the discharge of a contaminant into the natural environment, if the discharge causes or may cause an adverse effect. 2005, c. 12, s. 1 (5).

Exceptions

(2) Subsection (1) does not apply to,

(a) a discharge that is authorized under this Act or the *Ontario Water Resources Act*, if the discharge does not cause and is not likely to cause an adverse effect; or

(b) a discharge of a contaminant that arises when animal wastes are disposed of in accordance with normal farming practices, if the only adverse effect that is caused or that may be caused by the discharge is an adverse effect referred to in clause (a) of the definition of "adverse effect" in subsection 1 (1). 2005, c. 12, s. 1 (5).

When Ministry to be notified, adverse effect

15. (1) Every person who discharges a contaminant or causes or permits the discharge of a contaminant into the natural environment shall forthwith notify the Ministry if the discharge is out of the normal course of events, the discharge causes or is likely to cause an adverse effect and the person is not otherwise required to notify the Ministry under section 92. 2005, c. 12, s. 1 (6).

Same

(1.1) The notice required by subsection (1) shall be given in accordance with any requirements prescribed by the regulations. 2005, c. 12, s. 1 (6).

Exception

(2) Subsection (1) does not apply to animal wastes disposed of in accordance with normal farming practices. R.S.O. 1990, c. E.19, s. 15.

Application of Part not restricted

16. Unless otherwise required by the context, the provisions of this Part also apply to the subject-matter of the individual Parts of this Act. R.S.O. 1990, c. E.19, s. 16.

Remedial orders

17. Where any person causes or permits the discharge of a contaminant into the natural environment, so that land, water, property, animal life, plant life, or human health or safety is injured, damaged or endangered, or is likely to be injured, damaged or endangered, the Director may order the person to,

(a) repair the injury or damage;

(b) prevent the injury or damage; or

(c) where the discharge has damaged or endangered or is likely to damage or endanger existing water supplies, provide temporary or permanent alternate water supplies. R.S.O. 1990, c. E.19, s. 17; 2005, c. 12, s. 1 (7).

Order by Director re preventive measures

18. (1) The Director, in the circumstances mentioned in subsection (2), by a written order may require a person who owns or owned or who has or had management or control of an undertaking or property to do any one or more of the following:

1. To have available at all times, or during such periods of time as are specified in the order, the equipment, material and personnel specified in the order at the locations specified in the order.
2. To obtain, construct and install or modify the devices, equipment and facilities specified in the order at the locations and in the manner specified in the order.
3. To implement procedures specified in the order.
4. To take all steps necessary so that procedures specified in the order will be implemented in the event that a contaminant is discharged into the natural environment from the undertaking or property.
5. To monitor and record the presence or discharge of a contaminant specified in the order and to report thereon to the Director.
6. To study and to report to the Director on,
    i. the presence or discharge of a contaminant specified in the order,
    ii. the effects of the presence or discharge of a contaminant specified in the order,
    iii. measures to control the presence or discharge of a contaminant specified in the order,
    iv. the natural environment into which a contaminant specified in the order may be discharged.
7. To develop and implement plans to,
    i. reduce the amount of a contaminant that is discharged into the natural environment,
    ii. prevent or reduce the risk of a spill of a pollutant within the meaning of Part X, or
    iii. prevent, decrease or eliminate any adverse effects that result or may result from a spill of a pollutant within the meaning of Part X or from any other discharge of a contaminant into the natural environment, including,
        A. plans to notify the Ministry, other public authorities and members of the public who may be affected by a discharge, and

B. plans to ensure that appropriate equipment, material and personnel are available to respond to a discharge.

8. To amend a plan developed under paragraph 7 or section 91.1 in the manner specified in the order. R.S.O. 1990, c. E.19, s. 18 (1); 2005, c. 12, s. 1 (8, 9).

Grounds for order

(2) The Director may make an order under this section if the Director is of the opinion, on reasonable and probable grounds, that the requirements specified in the order are necessary or advisable so as,

(a) to prevent or reduce the risk of a discharge of a contaminant into the natural environment from the undertaking or property; or

(b) to prevent, decrease or eliminate an adverse effect that may result from,

(i) the discharge of a contaminant from the undertaking, or

(ii) the presence or discharge of a contaminant in, on or under the property. 2005, c. 12, s. 1 (10).

Instruments under Act, who is bound

Successors and assigns

19. (1) A certificate of property use, an order or approval of a court, the Minister, the Director or a provincial officer under this Act or a notice of the Director or a provincial officer under section 157.4 is binding on the executor, administrator, administrator with the will annexed, guardian of property or attorney for property of the person to whom it was directed, and on any other successor or assignee of the person to whom it was directed. 2001, c. 17, s. 2 (4); 2010, c. 16, Sched. 7, s. 2 (9).

Limitation

(2) If, pursuant to subsection (1), an order is binding on an executor, administrator, administrator with the will annexed, guardian of property or attorney for property, their obligation to incur costs to comply with the order is limited to the value of the assets they hold or administer, less their reasonable costs of holding or administering the assets. 2001, c. 17, s. 2 (4).

Receivers and trustees

(3) A certificate of property use, an order or approval of a court, the Minister, the Director or a provincial officer under this Act or a notice of the Director or a provincial officer under section 157.4 that relates to property is binding on a receiver or trustee that holds or administers the property. 2001, c. 17, s. 2 (4); 2010, c. 16, Sched. 7, s. 2 (10).

Limitation

(4) If, pursuant to subsection (3), an order or a notice of the Director or a provincial officer under section 157.4 is binding on a trustee, other than a trustee in bankruptcy, the trustee's obligation to incur costs to comply with the order is limited to the value of the assets held or administered by the trustee, less the trustee's reasonable costs of holding or administering the assets. 2001, c. 17, s. 2 (4); 2010, c. 16, Sched. 7, s. 2 (11).

Exception

(5) Subsection (3) does not apply to an order that relates to property held or administered by a receiver or trustee in bankruptcy if,

(a) within 10 days after taking or being appointed to take possession or control of the property, or within 10 days after the issuance of the order, the receiver or trustee in bankruptcy notifies the

Director that they have abandoned, disposed of or otherwise released their interest in the property; or

(b) the order was stayed under Part I of the *Bankruptcy and Insolvency Act* (Canada) and the receiver or trustee in bankruptcy notified the Director, before the stay expired, that they abandoned, disposed of or otherwise released their interest in the property. 2001, c. 17, s. 2 (4).

Extension of period

(6) The Director may extend the 10-day period for giving notice under clause (5) (a), before or after it expires, on such terms and conditions as he or she considers appropriate. 2001, c. 17, s. 2 (4).

Notice under subs. (5)

(7) Notice under clause (5) (a) or (b) must be given in the manner prescribed by the regulations. 2001, c. 17, s. 2 (4).

Holder

(8) For the purposes of this Act, a person who is bound by a certificate of property use or approval under this section shall be deemed to be the holder of the certificate or approval. 2001, c. 17, s. 2 (4).

(9)-(11) REPEALED: 2010, c. 16, Sched. 7, s. 2 (12).

Minister to publish information

(12) The Minister shall publish, by electronic or other means, the following information for the purpose of making it available to the public:

1. Information in respect of environmental compliance approvals issued after this subsection comes into force.
2. Other information that relates to any other instrument created or issued under this Act or the *Ontario Water Resources Act* and that is specified in a regulation made by the Minister. 2010, c. 16, Sched. 7, s. 2 (13).

(13) REPEALED: 2010, c. 16, Sched. 7, s. 2 (14).

Crown bound

20. This Act is binding upon the Crown. R.S.O. 1990, c. E.19, s. 20.

PART II.1
ENVIRONMENTAL COMPLIANCE APPROVALS

Definitions

20.1 In this Part,

"sewage works" has the same meaning as in the *Ontario Water Resources Act*; ("station d'épuration des eaux d'égout")

"waste disposal site" has the same meaning as in section 25; ("lieu d'élimination des déchets")

"waste management system" has the same meaning as in section 25. ("système de gestion des déchets") 2010, c. 16, Sched. 7, s. 2 (15).

APPLICATION FOR APPROVAL

Application for approval

20.2 (1) A person may apply to the Director for approval to engage in an activity mentioned in subsection 9 (1) or 27 (1) of this Act or subsection 53 (1) of the *Ontario Water Resources Act* if the

activity has not been prescribed by the regulations for the purposes of subsection 20.21 (1). 2010, c. 16, Sched. 7, s. 2 (15).

Director's order

(2) Despite subsection (1), a person may apply to the Director for approval to engage at a site in an activity that has been prescribed by the regulations for the purposes of subsection 20.21 (1) if the Director issues an order under section 20.18 in respect of the activity at the site. 2010, c. 16, Sched. 7, s. 2 (15).

Discontinuation of application, Part II.2 activity

(3) If an application for approval to engage in an activity is submitted to the Director and no decision has been made in respect of the application before the day on which a regulation prescribing the activity for the purposes of subsection 20.21 (1) comes into force, the part of the application relating to the activity is discontinued on the day that the regulation comes into force, unless the Director has issued an order under section 20.18 in respect of the activity. 2010, c. 16, Sched. 7, s. 2 (15).

Form

(4) The application shall be prepared and submitted to the Director in accordance with any requirements prescribed by the regulations. 2010, c. 16, Sched. 7, s. 2 (15).

Multiple activities at site

(5) If a person engages in or proposes to engage in more than one activity mentioned in subsection 9 (1) or 27 (1) of this Act or subsection 53 (1) of the *Ontario Water Resources Act* at a site and no environmental compliance approval has previously been issued in respect of any activity at the site, the application may be in respect of all of the activities unless the Director requires otherwise. 2010, c. 16, Sched. 7, s. 2 (15).

Note: On a day to be named by proclamation of the Lieutenant Governor, subsection (5) is repealed and the following substituted:

Multiple activities at site

(5) If a person engages in or proposes to engage in more than one activity mentioned in subsection 9 (1) or 27 (1) of this Act or subsection 53 (1) of the *Ontario Water Resources Act* at a site and no environmental compliance approval has previously been issued in respect of any activity at the site, the application shall be in respect of all of the activities unless the Director permits otherwise. 2010, c. 16, Sched. 7, s. 2 (16).

See: 2010, c. 16, Sched. 7, ss. 2 (16), 9 (2).

Multiple sites

(6) If a person applies for approval to engage in an activity that is to be engaged in at more than one site, the application may be in respect of the activity at more than one site unless the Director requires otherwise. 2010, c. 16, Sched. 7, s. 2 (15).

Sewage works

(7) If a person applies for approval to use, operate, establish, alter, extend or replace a sewage works, the application may also be for approval to engage in any activity that is mentioned in subsection 9 (1) or 27 (1) that is related to the sewage works unless the Director requires otherwise. 2010, c. 16, Sched. 7, s. 2 (15).

Note: On a day to be named by proclamation of the Lieutenant Governor, subsection (7) is repealed and the following substituted:

Sewage works

(7) If a person applies for approval to use, operate, establish, alter, extend or replace a sewage works, the application shall also be for approval to engage in any activity that is mentioned in subsection 9 (1) or 27 (1) that is related to the sewage works unless the Director permits otherwise. 2010, c. 16, Sched. 7, s. 2 (17).

See: 2010, c. 16, Sched. 7, ss. 2 (17), 9 (2).

Waste management systems

(8) If a person applies for approval to use, operate, establish, alter, enlarge or extend a waste management system, the application may also be for approval to engage in any activity that is mentioned in subsection 9 (1) of this Act or subsection 53 (1) of the *Ontario Water Resources Act* that is related to the waste management system unless the Director requires otherwise. 2010, c. 16, Sched. 7, s. 2 (15).

Note: On a day to be named by proclamation of the Lieutenant Governor, subsection (8) is repealed and the following substituted:

Waste management systems

(8) If a person applies for approval to use, operate, establish, alter, enlarge or extend a waste management system, the application shall also be for approval to engage in any activity that is mentioned in subsection 9 (1) of this Act or subsection 53 (1) of the *Ontario Water Resources Act* that is related to the waste management system unless the Director permits otherwise. 2010, c. 16, Sched. 7, s. 2 (18).

See: 2010, c. 16, Sched. 7, ss. 2 (18), 9 (2).

Transition

(9) An application submitted to the Director for approval to engage in activities mentioned in section 9 or 27 of this Act or section 53 of the *Ontario Water Resources Act* before the day this section comes into force is,

(a) continued as an application for approval under subsection (1) if the application complies with any requirements prescribed by the regulations for the purposes of this subsection, unless the Director permits otherwise; or

(b) discontinued. 2010, c. 16, Sched. 7, s. 2 (15).

Powers of Director

20.3 (1) After consideration of an application for approval under section 20.2 in respect of one or more activities, the Director may,

(a) issue or refuse to issue an environmental compliance approval in respect of one or more of the activities;

(b) if the Director issues an environmental compliance approval,

(i) impose terms and conditions in the approval, and

(ii) incorporate any environmental compliance approvals that are in effect into the new approval and revoke the approvals that have been incorporated;

(c) amend an environmental compliance approval that is in effect and impose, alter or revoke terms and conditions or expand the scope of the approval to other activities or sites;

(d) revoke an environmental compliance approval in whole or in part, with or without issuing a new approval; and

(e) suspend an environmental compliance approval in whole or in part. 2010, c. 16, Sched. 7, s. 2 (15).

Limitation

(2) No amendment to an environmental compliance approval may be made if the activity in respect of which the approval has been issued has been prescribed by the regulations for the purposes of subsection 20.21 (1), unless an order under section 20.18 has been issued in respect of the activity and the order includes the information set out in clause 20.18 (2) (b). 2010, c. 16, Sched. 7, s. 2 (15).

APPLICATION FOR REVIEW

Application for review

20.4 (1) A holder of an environmental compliance approval may apply for a review of the approval. 2010, c. 16, Sched. 7, s. 2 (15).

Mandatory review

(2) A holder of an environmental compliance approval shall apply for a review of the approval,

(a) on or before the date specified by the Director, if the Director has specified a date under section 20.12; or

(b) if no date has been specified by the Director, on or before the date prescribed under subsection 176 (2.3). 2010, c. 16, Sched. 7, s. 2 (15).

Form

(3) An application for review shall be prepared and submitted to the Director in accordance with any requirements prescribed by the regulations. 2010, c. 16, Sched. 7, s. 2 (15).

Approval remains in effect

(4) Despite subsections (1) and (2), an environmental compliance approval remains in effect unless it is suspended or revoked by the Director. 2010, c. 16, Sched. 7, s. 2 (15).

Powers of Director

20.5 After consideration of an application for a review of an environmental compliance approval, the Director may,

(a) amend the approval and impose, alter or revoke terms and conditions or expand the scope of the approval to other activities or sites;

(b) revoke the approval in whole or in part, with or without issuing a new approval;

(c) issue a new environmental compliance approval and exercise the powers mentioned in clause 20.3 (1) (b);

(d) suspend the approval in whole or in part; or

(e) give notice that no changes have been made to the approval as a result of the review. 2010, c. 16, Sched. 7, s. 2 (15).

TERMS AND CONDITIONS

Terms and conditions

20.6 (1) In imposing terms and conditions in an environmental compliance approval, the Director may include terms and conditions in respect of, but not limited to,

(a) future specified alterations, extensions, enlargements or replacements, including future specified alterations, extensions, enlargements or replacements to be carried out by persons prescribed by the regulations;

(b) operational parameters, including maximum rates of production, process limits, performance limits and parameters relating to equipment and infrastructure; and

(c) alterations, extensions, enlargements or replacements to be carried out within the operational parameters mentioned in clause (b), including alterations, extensions, enlargements or replacements to be carried out within the operational parameters by persons prescribed by the regulations. 2010, c. 16, Sched. 7, s. 2 (15).

Same

(2) If the Director imposes terms and conditions mentioned in clause (1) (a), (b) or (c) in respect of alterations, extensions, enlargements or replacements to be carried out by persons prescribed by the regulations, the environmental compliance approval shall be deemed to include a condition that the holder of the approval must give the persons notice of the terms and conditions in the approval. 2010, c. 16, Sched. 7, s. 2 (15).

Application of *Environmental Assessment Act*

(3) Subsection 12.2 (2) of the *Environmental Assessment Act* does not prohibit a Director from imposing terms and conditions mentioned in clause (1) (a), (b) or (c) in an environmental compliance approval, but the other applicable provisions of that Act continue to apply to any future alterations, extensions, enlargements or replacements that the Director may approve in an approval. 2010, c. 16, Sched. 7, s. 2 (15).

Prescribed terms and conditions

(4) An environmental compliance approval is subject to any terms and conditions prescribed by the regulations. 2010, c. 16, Sched. 7, s. 2 (15).

Associated works

(5) The Director may, in an environmental compliance approval in respect of any plant, structure, equipment, apparatus, mechanism, thing, waste management system, waste disposal site or sewage works that was established before the day this section comes into force, impose terms and conditions in respect of any associated structure, equipment, apparatus, mechanism, thing or works. 2010, c. 16, Sched. 7, s. 2 (15).

GENERAL POWERS AND DUTIES OF DIRECTOR

Powers of Director, general

20.7 (1) In exercising any of his or her powers under this Part, whether on his or her own initiative or on application, the Director may exercise the power if he or she considers it to be necessary for the purposes of,

(a) this Act, if the power is exercised in respect of an activity for which an environmental compliance approval is required under section 9 or 27; or

(b) the *Ontario Water Resources Act*, if the power is exercised in respect of an activity for which an environmental compliance approval is required under section 53 of that Act. 2010, c. 16, Sched. 7, s. 2 (15).

Past conduct

(2) The Director may suspend, revoke or refuse to issue an environmental compliance approval if the past conduct of the holder of the approval or the applicant, or, if the holder or applicant is a corporation, of its officers and directors, affords reasonable grounds to believe that the person will not engage in the activity in accordance with this Act, the *Ontario Water Resources Act* or the regulations made under either of those Acts. 2010, c. 16, Sched. 7, s. 2 (15).

Director may require information

20.8 The Director may require a person who submits an application under this Part to submit any plans, specifications, technical reports or other information and to carry out and report on any tests or experiments relating to any activity in respect of which the application is made. 2010, c. 16, Sched. 7, s. 2 (15).

Director may require consultation

20.9 The Director may require a person who submits an application under this Part to consult with the persons specified by the Director in a manner specified by the Director before the Director makes a decision in respect of the application. 2010, c. 16, Sched. 7, s. 2 (15).

Combined approval

20.10 The Director may issue an environmental compliance approval in respect of one or more activities at one or more sites. 2010, c. 16, Sched. 7, s. 2 (15).

Sewage works, revocation

20.11 If the Director issues an environmental compliance approval to use, operate, establish, alter, extend or replace a sewage works at a site, the Director may, in issuing the approval, provide in the approval that some or all of the approvals previously issued in respect of the sewage works are revoked on the day when the new environmental compliance approval is issued, and if the Director so provides, those approvals are revoked on that day. 2010, c. 16, Sched. 7, s. 2 (15).

Director may specify review date

20.12 (1) In issuing, amending or reviewing an environmental compliance approval, the Director may specify a date in the approval by which an application for review of the approval must be submitted. 2010, c. 16, Sched. 7, s. 2 (15).

Combined review

(2) The Director may, by written notice, require a person who submits an application under this Part in respect of an activity at a site to submit an application for a review by a date specified by the Director of one or more environmental compliance approvals in respect of the same site that have been issued and the person shall comply with the requirement. 2010, c. 16, Sched. 7, s. 2 (15).

Same

(3) In the event of a conflict between dates mentioned in subsections (1) and (2), the date specified under subsection (2) applies. 2010, c. 16, Sched. 7, s. 2 (15).

Exercise of powers on Director's initiative

20.13 The Director may, on his or her own initiative,

(a) alter or revoke terms and conditions of an environmental compliance approval after it has been issued;

(b) impose new terms and conditions in an environmental compliance approval; or

(c) suspend or revoke all or part of an environmental compliance approval. 2010, c. 16, Sched. 7, s. 2 (15).

Consideration of applications

20.14 (1) Subject to subsection (2), the Director shall consider an application submitted to him or her under this Part. 2010, c. 16, Sched. 7, s. 2 (15).

Exception

(2) The Director is not required to consider an application that has not been prepared and submitted in accordance with any requirements prescribed by the regulations. 2010, c. 16, Sched. 7, s. 2 (15).

HEARINGS

Hearings required by Director

20.15 (1) The Director may, before making a decision on an application under this Part, require the Tribunal, by written notice, to hold a hearing with respect to the application or a matter that relates to the application. 2010, c. 16, Sched. 7, s. 2 (15).

Notice of hearing

(2) If a hearing is required under subsection (1), at least 15 days notice shall be given to any persons specified by the Tribunal and in such manner as the Tribunal may direct. 2010, c. 16, Sched. 7, s. 2 (15).

Same

(3) Upon receipt of a notice from the Director under subsection (1), the Tribunal shall hold a hearing. 2010, c. 16, Sched. 7, s. 2 (15).

Proposed decision

(4) If the Director requires the Tribunal to hold a hearing in respect of a matter that relates to the application, the Director shall inform the Tribunal of decisions that the Director proposes to make on matters not referred to the Tribunal in connection with the application. 2010, c. 16, Sched. 7, s. 2 (15).

Parties

(5) The applicant for approval under this Part, the Director and any other persons specified by the Tribunal shall be parties to the hearing. 2010, c. 16, Sched. 7, s. 2 (15).

Notice of decision

(6) The Tribunal shall serve notice of its decision, together with reasons, on the parties to the hearing, and the Director shall implement the decision. 2010, c. 16, Sched. 7, s. 2 (15).

Costs

(7) The Tribunal may award the costs of a proceeding under this section. 2010, c. 16, Sched. 7, s. 2 (15).

Payment

(8) The Tribunal may order to whom and by whom the costs are to be paid. 2010, c. 16, Sched. 7, s. 2 (15).

Assessment

(9) The Tribunal may fix the amount of the costs or direct that the amount be assessed and it may direct the scale according to which they are to be assessed and by whom they are to be assessed. 2010, c. 16, Sched. 7, s. 2 (15).

Considerations not limited

(10) In awarding costs, the Tribunal is not limited to the considerations that govern awards of costs in any court. 2010, c. 16, Sched. 7, s. 2 (15).

Application

(11) Subsections (7) to (10) apply despite sections 17.1 and 32 of the *Statutory Powers Procedure Act*. 2010, c. 16, Sched. 7, s. 2 (15).

Transition

(12) If, before the day subsection 2 (23) of Schedule 7 to the *Open for Business Act, 2010* comes into force, a hearing has been required by the Director under subsection 30 (1) or 32 (1) of this Act, as those provisions read immediately before that subsection came into force, the Director's notice shall be deemed to have been given under subsection (1) and the hearing shall be held under this section. 2010, c. 16, Sched. 7, s. 2 (15).

Appeal from decision of Tribunal

20.16 (1) A party to a proceeding under this Part before the Tribunal may appeal from its decision,

(a) on a question of law, to the Divisional Court; and

(b) on a question other than a question of law, to the Minister. 2010, c. 16, Sched. 7, s. 2 (15).

Same

(2) An appeal under clause (1) (b) shall be made in writing within 30 days after the party appealing the decision receives the decision of the Tribunal. 2010, c. 16, Sched. 7, s. 2 (15).

Powers of Minister on appeal

(3) In an appeal under clause (1) (b), the Minister shall confirm, alter or revoke the decision of the Tribunal, substitute for the decision of the Tribunal such decision as he or she considers appropriate or, by notice in writing to the Tribunal, require it to hold a new hearing with respect to all or any part of the subject matter of the decision. 2010, c. 16, Sched. 7, s. 2 (15).

APPROVALS RELATING TO ACTIVITIES PRESCRIBED FOR THE PURPOSES OF PART II.2

When approval ceases to have effect

20.17 An environmental compliance approval ceases to apply in respect of an activity at a site on the earlier of,

(a) the date, as set out in a confirmation of registration provided by the Director under Part II.2, on which a registration is in effect in respect of the activity at the site; and

(b) the date prescribed by the regulations in respect of the activity for the purposes of this section. 2010, c. 16, Sched. 7, s. 2 (15).

Director's order

20.18 (1) The Director may issue an order to a person who is engaging in or who proposes to engage in an activity at a site, stating that Part II.2 of the Act does not apply in respect of the activity at the site. 2010, c. 16, Sched. 7, s. 2 (15).

Continuation of approval

(2) If an environmental compliance approval is in effect when the Director issues an order under subsection (1), the Director may specify in the order that,

(a) the approval continues to apply; and

(b) the approval may be amended on application under subsection 20.2 (1). 2010, c. 16, Sched. 7, s. 2 (15).

PART II.2
REGISTRATIONS

Interpretation

20.19 In this Part,

"registration" means a registration in the Registry; ("enregistrement")

"Registry" means the registry established under subsection 20.20 (1). ("Registre") 2010, c. 16, Sched. 7, s. 2 (19).

Registry

20.20 (1) The Director shall establish, maintain and operate a public registry known in English as the Environmental Activity and Sector Registry and in French as Registre environnemental des activités et des secteurs. 2010, c. 16, Sched. 7, s. 2 (19).

Purposes

(2) The purposes of the Registry are the following:

1. To allow persons to register activities prescribed by the regulations for the purposes of subsection 20.21 (1).
2. To provide public access to information contained in the registrations and other information filed in the Registry.
3. Such other purposes as may be prescribed by the regulations. 2010, c. 16, Sched. 7, s. 2 (19).

Delegation agreement

(3) Section 168.9 applies, with necessary modifications, in respect of the Registry and despite subsection 180 (2), no action or other proceeding shall be commenced against the Crown in right of Ontario, a public servant employed under Part III of the *Public Service of Ontario Act, 2006*, a person or body to whom powers and duties of the Director are delegated under section 168.9 or an employee of a person or body to whom powers and duties of the Director are delegated under section 168.9 arising from any inaccuracy contained in a registration. 2010, c. 16, Sched. 7, s. 2 (19).

Prohibition, prescribed activities

20.21 (1) Subject to subsections (2), (3) and (4), no person shall engage in an activity at a site if the activity has been prescribed by the regulations for the purposes of this subsection unless,

(a) the person has registered the activity in the Registry in accordance with the regulations;

(b) the Director has provided the person with a confirmation of registration in respect of the activity;

(c) the person engages in the activity in accordance with the regulations; and

(d) the registration is not suspended and has not been removed from the Registry. 2010, c. 16, Sched. 7, s. 2 (19).

Exception, order under s. 20.18

(2) Subject to subsection (3), subsection (1) does not apply if the Director has issued an order under section 20.18 in respect of the activity and the order has not been revoked. 2010, c. 16, Sched. 7, s. 2 (19).

Same, transition

(3) If a registration is in effect in respect of the activity when the Director issues an order under section 20.18 in respect of the activity, subsection (1) applies until the Director removes the registration from the Registry in accordance with clause 20.23 (1) (e). 2010, c. 16, Sched. 7, s. 2 (19).

Transition

(4) If an environmental compliance approval has been issued in respect of an activity before the day when a regulation prescribing the activity for the purposes of subsection (1) comes into force, subsection (1) does not apply to the holder of the approval until the day the approval ceases to apply to the activity, as determined in accordance with section 20.17. 2010, c. 16, Sched. 7, s. 2 (19).

Mobile activity

(5) If the activity engaged in has been prescribed by the regulations for the purposes of this subsection, a person is not required to register the activity in respect of a specific site, subject to any conditions prescribed by the regulations. 2010, c. 16, Sched. 7, s. 2 (19).

Director to provide confirmation

20.22 (1) If a person registers an activity in the Registry and pays the required fee and provides the required financial assurance, if any, the Director shall provide the person with a confirmation of registration, which may be provided electronically. 2010, c. 16, Sched. 7, s. 2 (19).

Retention of confirmation and maintenance of registration

(2) A person who engages in a registered activity shall ensure that the confirmation of registration is retained and that,

(a) the registration is maintained and updated in accordance with the regulations; and

(b) the registration includes any information, reports, records or documents as may be required by the Director or as may be prescribed by the regulations. 2010, c. 16, Sched. 7, s. 2 (19).

Complete and accurate information, etc.

(3) If the Director is not satisfied that any information, reports, records or documents included in or filed with a registration are complete or accurate, the Director may require the person engaging in the registered activity to file information, reports, records or documents that are complete and accurate and the person shall comply with the requirement. 2010, c. 16, Sched. 7, s. 2 (19).

Suspension or removal of registration

20.23 (1) The Director may suspend a registration in respect of an activity or remove the registration from the Registry if,

(a) the person who is engaging in the activity is in contravention of this Act, the *Ontario Water Resources Act* or the regulations made under either of those Acts;

(b) the confirmation of registration was provided on the basis of mistaken, false or inaccurate information;

(c) the person who is engaging in the activity requests that its registration be removed;

(d) the person who was engaging in the activity is no longer doing so;

(e) the Director has issued an order under section 20.18 to the person who is engaging in the activity and,

(i) if no application for approval has been made under Part II.1,

(A) the period during which a hearing may be required in respect of the order has lapsed, or

(B) if a hearing has been required, the decision of the Tribunal has been issued, all rights of appeal have been exhausted and the order of the Director has not been revoked, or

(ii) if an application for approval under Part II.1 has been made, the decision by the Director in respect of the application has been made; or

(f) the registration is obsolete. 2010, c. 16, Sched. 7, s. 2 (19).

Order

(2) If the Director suspends or removes a registration on the grounds set out in clause (1) (a), (b) or (d), the Director shall do so by order and shall serve the order together with written reasons on the person who is or was engaging in the activity. 2010, c. 16, Sched. 7, s. 2 (19).

End of suspension

(3) The Director may end a suspension of a registration if the Director is satisfied that the reasons for the suspension no longer exist. 2010, c. 16, Sched. 7, s. 2 (19).

Filing of notice or order in Registry

20.24 Any person who gives a notice or issues an order under this Part or a notice under section 157.4 shall file a copy of the notice or order in the Registry. 2010, c. 16, Sched. 7, s. 2 (19).

PART III
MOTORS AND MOTOR VEHICLES

Definitions, Part III

21. In this Part,

"motor" means an internal combustion engine used in a vehicle; ("moteur")

"motor vehicle" means a vehicle that uses or incorporates a motor as a source of power. ("véhicule automobile") R.S.O. 1990, c. E.19, s. 21.

Motors and motor vehicles, environmental controls

Sale of motor vehicle that does not comply with regulations

22. (1) No person shall sell, or offer, expose or advertise for sale, a motor or motor vehicle that does not comply with the regulations.

Where system or device installed on motor vehicle

(2) Where a manufacturer installs on, attaches to or incorporates in any motor or motor vehicle, a system or device to prevent or lessen the discharge of any contaminant, no person shall sell, or offer, expose or advertise for sale, such motor or motor vehicle unless the motor or motor vehicle has such system or device so installed, attached or incorporated and such system or device, when the motor or motor vehicle is operating, complies with the regulations. R.S.O. 1990, c. E.19, s. 22 (1, 2).

Repair or replacement of system or device

(3) Where a manufacturer installs on, attaches to or incorporates in any motor or motor vehicle, a system or device to prevent or lessen the discharge of any contaminant, no person shall remove or cause

or permit the removal of the system or device from the motor or motor vehicle, except as permitted by subsection (4).

Same

(4) A person may repair the system or device or replace the system or device by a system or device of the same type or of a type prescribed by the regulations. 1998, c. 35, s. 3.

Operation of motor or motor vehicle

23. (1) Except where necessary for test or repair purposes, no person shall operate or cause or permit the operation of a motor or motor vehicle or any class or type thereof that does not comply with the regulations.

Where system or device required

(2) Where a manufacturer installs on, attaches to or incorporates in any motor or motor vehicle a system or device to prevent or lessen the discharge of any contaminant, the owner of such motor or motor vehicle shall not operate or cause or permit the operation of such motor or motor vehicle nor shall any person knowingly operate or cause or permit its operation unless such motor or motor vehicle has installed on, attached to or incorporated in it such system or device, and such system or device operates in accordance with the regulations when the motor or motor vehicle is in operation. R.S.O. 1990, c. E.19, s. 23.

PART IV
WATER

Ice shelters

24. (1) In this section,

"ice shelter" means any structure that is located on or over ice over any water for more than one day and that is or may be used for shelter, privacy or the storage or sale of any thing; ("abri sur glace")

"owner", when used in relation to an ice shelter, includes a person who has the right to use or occupy the ice shelter; ("propriétaire")

"waste" means human excrement or any refuse that is discharged or deposited in or from an ice shelter. ("déchets") R.S.O. 1990, c. E.19, s. 24 (1).

Discharge of waste prohibited

(2) No person shall discharge or cause or permit the discharge of any waste on ice over any water except in accordance with the regulations. R.S.O. 1990, c. E.19, s. 24 (2).

Removal of ice shelter by provincial officer

(3) Except as provided in subsection (4), where an ice shelter is placed or allowed to remain on ice over any water in contravention of the regulations, a provincial officer may remove the ice shelter or cause it to be removed,

(a) where the provincial officer is able to determine the name and address of the owner, after service of notice upon the owner at least seven days before the date of the removal; or

(b) where the provincial officer is unable to determine the name and address of the owner, forthwith. R.S.O. 1990, c. E.19, s. 24 (3).

Idem, out of season

(4) Where an ice shelter is placed or allowed to remain on ice over any water beyond the dates prescribed by the regulations within which ice shelters may be placed, allowed to remain or used on or

over ice over any water, a provincial officer may remove the ice shelter or cause it to be removed without serving prior notice upon the owner, but where the provincial officer is able to determine the name and address of the owner, notice of the removal shall be served upon the owner forthwith after the removal. R.S.O. 1990, c. E.19, s. 24 (4).

Where owner may retake possession of ice shelter

(5) Except where an ice shelter has been destroyed in the course of removal, the owner of an ice shelter that has been removed pursuant to subsection (3) or (4) may take possession of the ice shelter within thirty days of the removal or of service of the notice mentioned in subsection (3), whichever is later, or within thirty days after service of the notice mentioned in subsection (4), as the case requires, upon payment to the Minister of Finance of the costs and charges for removal and storage of the ice shelter. R.S.O. 1990, c. E.19, s. 24 (5); 2001, c. 9, Sched. G, s. 5 (22).

Where provincial officer may dispose of ice shelter

(6) Where the owner of an ice shelter that has been removed pursuant to subsection (3) or (4) does not take possession of the ice shelter pursuant to subsection (5),

(a) a provincial officer may dispose of the ice shelter without compensation therefor; and

(b) the owner is divested of ownership of the ice shelter and, where the ice shelter is disposed of to any person, such person shall acquire ownership of the ice shelter free from any right, title or interest of any other person. R.S.O. 1990, c. E.19, s. 24 (6).

Notice

(7) A notice under subsection (3) or (4) shall be in such form as the regulations may prescribe and shall state that the owner may take possession of the ice shelter pursuant to subsection (5) and that, if such owner does not so take possession, the ice shelter may be disposed of without compensation therefor and, where the ice shelter has been removed or caused to be removed pursuant to subsection (4) and has been damaged or destroyed in the course of the removal, the notice shall state the condition of the ice shelter. R.S.O. 1990, c. E.19, s. 24 (7).

Means of removal

(8) A provincial officer shall use due care in removing an ice shelter pursuant to subsection (3) or (4) but may use a means of removal that causes damage to or the destruction of the ice shelter if the use of the means of removal is necessary in order to carry out the removal. R.S.O. 1990, c. E.19, s. 24 (8).

Damage or destruction during removal

(9) Where an ice shelter is removed pursuant to subsection (3) or (4) and the means of removal that is necessary in the circumstances results in damage to or the destruction of the ice shelter, the owner of the ice shelter is not entitled to compensation for the damage or destruction. R.S.O. 1990, c. E.19, s. 24 (9).

PART V
WASTE MANAGEMENT

Definitions, Part V

25. In this Part,

"operator" means the person in occupation or having the charge, management, or control of a waste management system or a waste disposal site; ("exploitant")

"owner" includes,

(a) a person that is responsible for the establishment or operation of a waste management system or waste disposal site, or

(b) the person that owns the land in or on which a waste disposal site is located; ("propriétaire")

"owner", in section 47, means a person that is responsible for the operation of a well that is a waste disposal site; ("propriétaire")

"waste" includes ashes, garbage, refuse, domestic waste, industrial waste, or municipal refuse and such other materials as are designated in the regulations; ("déchets")

"waste disposal site" means,

(a) any land upon, into, in or through which, or building or structure in which, waste is deposited, disposed of, handled, stored, transferred, treated or processed, and

(b) any operation carried out or machinery or equipment used in connection with the depositing, disposal, handling, storage, transfer, treatment or processing referred to in clause (a); ("lieu d'élimination des déchets")

"waste management system" means any facilities or equipment used in, and any operations carried out for, the management of waste including the collection, handling, transportation, storage, processing or disposal of waste, and may include one or more waste disposal sites. ("système de gestion des déchets") R.S.O. 1990, c. E.19, s. 25; 1992, c. 1, s. 25.

Application of Part, domestic waste

26. This Part does not apply to the storage or disposal by any person of the person's domestic wastes on the person's own property unless the Director is of the opinion, based upon reasonable and probable grounds, that such storage or disposal is or is likely to create a nuisance, or to any sewage or other works to which the *Ontario Water Resources Act* or the regulations thereunder apply. R.S.O. 1990, c. E.19, s. 26; 2005, c. 12, s. 1 (11).

Approval, waste management system or waste disposal site

27. (1) No person shall use, operate, establish, alter, enlarge or extend a waste management system or a waste disposal site except under and in accordance with an environmental compliance approval. 2010, c. 16, Sched. 7, s. 2 (20).

Exception, prescribed activities

(1.1) Subsection (1) does not apply to a person who is engaging in an activity at a site if the activity has been prescribed by the regulations for the purposes of subsection 20.21 (1), unless one of the following circumstances applies:

1. An environmental compliance approval in respect of the activity engaged in at the site has been issued before the day when a regulation prescribing the activity for the purposes of subsection 20.21 (1) comes into force, and the approval has not ceased to have effect as determined under section 20.17.

2. Subject to subsection (1.2), the Director has issued an order under section 20.18 in respect of the activity at the site. 2010, c. 16, Sched. 7, s. 2 (20).

Same

(1.2) If a registration under Part II.2 is in effect in respect of an activity engaged in at a site when the Director issues an order under section 20.18 in respect of the activity, subsection (1) applies only once the Director has removed the registration from the Environmental Activity and Sector Registry established under Part II.2. 2010, c. 16, Sched. 7, s. 2 (20).

Exception, routine maintenance

(1.3) Subsection (1) does not apply to routine maintenance carried out on any waste management system or waste disposal site. 2010, c. 16, Sched. 7, s. 2 (21).

Niagara Escarpment Plan Area

(2) Despite subsection (1), no person shall use, operate, establish, alter, enlarge or extend a waste disposal site in the Niagara Escarpment Plan Area as set out in the Niagara Escarpment Plan, unless the Director has issued a certificate of approval or a provisional certificate of approval before this subsection comes into force. 1994, c. 5, s. 1; 2009, c. 12, Sched. L, s. 4.

Exceptions

(3) Subsection (2) does not apply with respect to,

(a) a transfer station or recycling facility, including a composting site, which receives waste only from the local municipality in which it is located; or

(b) in the case of a site approved before this subsection comes into force, a proposed use, operation, alteration, enlargement or extension of a waste disposal site which will not result in a greater area at a waste disposal site being covered with waste than permitted under the existing approval. 1994, c. 5, s. 1.

Lakes

(3.1) Despite subsection (1), no person shall use, operate, establish, alter, enlarge or extend a waste disposal site where waste is deposited in a lake. 2004, c. 6, s. 7 (1).

Same

(3.2) In subsection (3.1),

"lake" includes,

(a) a body of surface water that,

(i) results from human activities, and

(ii) directly influences or is directly influenced by ground water, and

(b) an area of land that was covered by a body of water described in clause (a) or a lake on the day this subsection came into force,

but does not include,

(c) a body of water described in clause (a) or a lake, if the body of water or lake is less than one hectare in area, or

(d) an area of land described in clause (b), if the body of water described in clause (a) or lake that covered the area of land on the day this subsection came into force was, in total, less than one hectare in area on that day. 2004, c. 6, s. 7 (1).

No proceeding

(4) No proceeding directly or indirectly based upon the prohibition in subsection (2) or (3.1) may be brought against the Crown in right of Ontario, the Government of Ontario, any member of the Executive Council or any employee of the Crown or Government. 1994, c. 5, s. 1; 2004, c. 6, s. 7 (2).

Transition, repeal of Part VIII

28. (1) If, except for the operation of Part VIII, a site would have been a waste disposal site under this Part or facilities would have been a waste management system under this Part, those sites and

facilities are, on the day that Part VIII is repealed, continued as a waste disposal site or waste management system under this Part if a certificate of approval under section 77 or a permit under section 78 or both were issued and remain in force in respect of such works. 1997, c. 30, Sched. B, s. 21.

Same

(2) The certificate of approval or permit or both are continued in force as if they were a certificate of approval under section 39, with such changes as necessary. 1997, c. 30, Sched. B, s. 21.

Continuation, orders

(3) An order issued and continuing in force under section 79 in respect of a sewage system which except for the operation of Part VIII would have been a waste disposal site or a waste management system under this Part is, upon the repeal of Part VIII, continued as if it were an order under section 44, with such changes as necessary. 1997, c. 30, Sched. B, s. 21.

(4) REPEALED: 2010, c. 16, Sched. 7, s. 2 (22).

Records

(5) If an agreement under section 81 was in force immediately before the repeal of Part VIII, the party which was administering Part VIII under the agreement shall,

(a) keep all records in their possession or under their control with respect to matters continued under this section for a period of six years from the date of the repeal or as otherwise prescribed under subsection (9);

(b) on the written request of the Director, deliver to the Director a record or certified copy of a record relating to Part VIII as specified in the request;

(c) on the written request of the Director, deliver to the Director a certificate as to the service of any document relating to Part VIII as specified in the request;

(d) on the written request of the Director, deliver to the Director a certificate as to the custody of any document relating to Part VIII as specified in the request; and

(e) on the written request of the Director, deliver to the Director a certificate as to whether or not any document relating to Part VIII as specified in the request was received or issued. 1997, c. 30, Sched. B, s. 21.

Deemed official document

(6) A record, certified copy of a record or a certificate delivered under clause (5) (b) or (c) that is or relates to an approval, certificate, consent, licence, notice, permit, order or return under Part VIII shall be deemed to be an official document signed by an employee in the Ministry for the purpose of section 175. 1997, c. 30, Sched. B, s. 21.

Same

(7) A certificate delivered under clause (5) (d) or (e) shall be deemed to be an official document signed by an employee in the Ministry for the purpose of section 175. 1997, c. 30, Sched. B, s. 21.

References

(8) The references to sections 77, 78, 79 and 81 in this section are references to those provisions as they read immediately before the repeal of Part VIII under Schedule B of the *Services Improvement Act, 1997*. 1997, c. 30, Sched. B, s. 21.

Regulations

(9) The Lieutenant Governor in Council may make regulations prescribing transitional matters necessary to deal with issues arising out of the repeal of Part VIII, which regulations may be general or specific in their application and may be retroactive to the date this section comes into force. 1997, c. 30, Sched. B, s. 21.

Limitation

(10) This section applies only to sewage systems which, except for the operation of Part VIII, would have been waste disposal sites or waste management systems under this Part and to matters and documents related to such sewage systems. 1997, c. 30, Sched. B, s. 21.

Report by Minister

29. (1) Where the Minister reports in writing to the clerk of a municipality that the Minister is of the opinion that it is necessary in the public interest that waste be collected or a waste management system or any part thereof be established, maintained, operated, improved, extended, enlarged, altered, repaired or replaced, it is not necessary to obtain the assent of the electors to any by-law for incurring a debt for any such purpose, and the municipality shall forthwith do every possible act and thing in its power to implement the report of the Minister within the time specified. R.S.O. 1990, c. E.19, s. 29.

Reasons

(2) A report mentioned in subsection (1) must include a statement of the reasons for the Minister's opinion.

What report may require

(3) A report may require a municipality,

(a) to collect or transport such waste as is specified in the report, including such waste from such source outside the boundaries of the municipality as is specified in the report;

(b) to accept, process or otherwise deal with such waste as is specified in the report, including such waste from such source outside the boundaries of the municipality as is specified in the report, in a waste management system or at a waste disposal site located in or owned, operated or controlled by the municipality.

Compensation by persons benefiting

(4) If a report requires a municipality to do anything that will benefit a person, the report may specify compensation to be provided to the municipality by that person for the benefit and the following apply:

1. The person shall provide the compensation if the person has been served with a copy of the report unless the person, within fifteen days after service, gives a written notice to the municipality and the Minister that the person renounces the benefit.

2. If the person renounces the benefit, the municipality is, with respect to the benefit, relieved from its obligation to implement the report.

Waste from outside municipality

(5) Requirements in a report relating to waste from a source outside the boundaries of a municipality are binding on the municipality only during the five-year period following the making of the report or during such shorter period as the report may specify.

Report is an order

(6) A report is an order for the purposes of Part XIV. 1992, c. 1, s. 27.

30.-32. REPEALED: 2010, c. 16, Sched. 7, s. 2 (23).

Hearing before Tribunal

33. (1) Upon receipt of a notice from the Director under section 36, the Tribunal shall hold a hearing with respect to the subject-matter of the notice. R.S.O. 1990, c. E.19, s. 33 (1); 2000, c. 26, Sched. F, s. 12 (12); 2010, c. 16, Sched. 7, s. 2 (24).

Parties

(2) The applicant, the Director and any other persons specified by the Tribunal shall be parties to the hearing. R.S.O. 1990, c. E.19, s. 33 (2); 2000, c. 26, Sched. F, s. 12 (12).

(3) REPEALED: 2000, c. 26, Sched. F, s. 12 (4).

Decision

(4) The Tribunal shall serve notice of its decision, together with reasons therefor, on the parties to the hearing, and the Director shall implement the decision. R.S.O. 1990, c. E.19, s. 33 (4); 2000, c. 26, Sched. F, s. 12 (12).

Costs

(5) The Tribunal may award the costs of a proceeding under this section. 2000, c. 26, Sched. F, s. 12 (5).

Payment

(6) The Tribunal may order to whom and by whom the costs are to be paid. 2000, c. 26, Sched. F, s. 12 (5).

Assessment

(7) The Tribunal may fix the amount of the costs or direct that the amount be assessed and it may direct the scale according to which they are to be assessed and by whom they are to be assessed. 2000, c. 26, Sched. F, s. 12 (5).

Considerations not limited

(8) In awarding costs, the Tribunal is not limited to the considerations that govern awards of costs in any court. 2000, c. 26, Sched. F, s. 12 (5).

Application

(9) Subsections (5) to (8) apply despite sections 17.1 and 32 of the *Statutory Powers Procedure Act*. 2000, c. 26, Sched. F, s. 12 (5).

Appeal from decision of Tribunal

34. A party to a proceeding under this Part before the Tribunal may appeal from its decision on a question of law to the Divisional Court. 2009, c. 33, Sched. 2, s. 28 (1).

34.1, 35. REPEALED: 2010, c. 16, Sched. 7, s. 2 (25).

Hearing as to by-law

36. (1) Where a by-law of a municipality affects the location or operation of a proposed waste disposal site, the Director, upon the application of the person applying for approval under Part II.1 for the waste disposal site, may, by a notice in writing, and on such terms and conditions as he or she may direct, require the Tribunal to hold a public hearing to consider whether or not the by-law should apply to the proposed waste disposal site. R.S.O. 1990, c. E.19, s. 36 (1); 2000, c. 26, Sched. F, s. 12 (12); 2010, c. 16, Sched. 7, s. 2 (26).

When Tribunal to hold public hearing

(2) Upon receipt of notice from the Director, the Tribunal shall hold a public hearing with respect to the subject-matter of the notice. R.S.O. 1990, c. E.19, s. 36 (2); 2000, c. 26, Sched. F, s. 12 (12).

(3) REPEALED: 2000, c. 26, Sched. F, s. 12 (7).

Parties and procedure

(4) Where the Director requires a public hearing under subsection (1),

(a) the applicant, the municipality and any other person specified by the Tribunal shall be given notice of the hearing in such manner as the Tribunal directs; and

(b) the Tribunal shall hold the public hearing within the municipality within which it is proposed to locate the waste disposal site. R.S.O. 1990, c. E.19, s. 36 (4); 2000, c. 26, Sched. F, s. 12 (12).

Order

(5) The Tribunal may order that the by-law referred to in subsection (1) does not apply to the proposed waste disposal site and the by-law shall thereupon be deemed not to apply thereto. R.S.O. 1990, c. E.19, s. 36 (5); 2000, c. 26, Sched. F, s. 12 (12).

37., 38. REPEALED: 2010, c. 16, Sched. 7, s. 2 (27).

39. REPEALED: 2010, c. 16, Sched. 7, s. 2 (29).

Prohibition as to deposit of waste

40. No person shall deposit, or cause, permit or arrange for the deposit of, waste upon, in, into or through any land or land covered by water or in any building that is not a waste disposal site for which an environmental compliance approval or renewable energy approval has been issued or a registration under Part II.2 is in effect and except in accordance with the terms and conditions of the approval or the regulations made for the purposes of Part II.2. 2010, c. 16, Sched. 7, s. 2 (30).

Prohibition as to use of facilities, etc.

41. No person shall use, or cause, permit or arrange for the use of, any facilities or equipment for the storage, handling, treatment, collection, transportation, processing or disposal of waste that is not part of a waste management system for which an environmental compliance approval or renewable energy approval has been issued or a registration under Part II.2 is in effect and except in accordance with the terms and conditions of the approval or the regulations made for the purposes of Part II.2. 2010, c. 16, Sched. 7, s. 2 (30).

Ownership of waste

42. (1) The ownership of waste that is accepted at a waste disposal site by the operator of the site is transferred to the operator upon acceptance. R.S.O. 1990, c. E.19, s. 42 (1).

Where waste not accepted

(2) Where waste is deposited but not accepted at a waste disposal site, the ownership of the waste shall be deemed to be transferred to the operator of the site immediately before the waste is deposited. R.S.O. 1990, c. E.19, s. 42 (2).

Approval

(3) Subsections (1) and (2) apply only in respect of a waste disposal site for which an environmental compliance approval, renewable energy approval or registration under Part II.2 is in effect. 2010, c. 16, Sched. 7, s. 2 (31).

Effect of contract

(4) Subsection (1) applies only in the absence of a contract to the contrary. R.S.O. 1990, c. E.19, s. 42 (4).

Liability

(5) Subsections (1) to (4) do not relieve any person from liability except liability as owner of waste that is delivered to and accepted by the operator of a waste disposal site in accordance with law including an applicable environmental compliance approval, applicable renewable energy approval or applicable regulation made under clause 176 (2.4) (e). 2009, c. 12, Sched. G, s. 3 (2); 2010, c. 16, Sched. 7, s. 2 (32).

Owner of land

(6) Where the operator of a waste disposal site is not the owner of the land on which the site is located, subsections (1) and (2) do not prevent the ownership of waste that is accepted or deposited at the site from being transferred to the owner of the land. R.S.O. 1990, c. E.19, s. 42 (6).

Order for removal of waste

43. Where waste has been deposited upon, in, into or through any land or land covered by water or in any building that has not been approved as a waste disposal site or in respect of which no registration under Part II.2 is in effect, the Director may issue an order to remove the waste and to restore the site to a condition satisfactory to the Director to,

(a) an owner or previous owner or a person who otherwise has or had charge and control of the land or building or waste;

(b) an occupant or previous occupant of the land or building; or

(c) a person that the Director reasonably believes engaged in an activity prohibited by section 40 or 41 that resulted in the deposit of the waste. 1998, c. 35, s. 6; 2010, c. 16, Sched. 7, s. 2 (33).

Order by Director

44. Where a waste management system or a waste disposal site is not in conformity with this Part or the regulations, the Director may order an owner or previous owner to take such action as is required to bring the system or the site into conformity with this Part or the regulations within the time specified in the order. R.S.O. 1990, c. E.19, s. 44.

Right to compensation

45. (1) Within thirty days after the receipt of notice that the Director has refused to renew or has suspended or revoked an environmental compliance approval, any owner who has suffered pecuniary loss as a result of such decision affecting the owner's waste disposal site or waste management system may apply to the Director for compensation for such loss where such owner,

(a) has received an environmental compliance approval for the waste disposal site or waste management system affected by the Director's decision; and

(b) since receiving the environmental compliance approval, has strictly complied with this Act and the regulations. R.S.O. 1990, c. E.19, s. 45 (1); 2010, c. 16, Sched. 7, s. 2 (34-36).

Same

(1.1) Within 30 days after the receipt of notice or an order that the Director has suspended a registration under Part II.2 or removed a registration under Part II.2 from the registry established under that Part, any owner who has suffered pecuniary loss as a result of such decision affecting the owner's waste disposal site or waste management system may apply to the Director for compensation for such loss where such owner,

(a) has received a confirmation of registration under Part II.2 in respect of the waste disposal site or waste management system affected by the Director's decision; and

(b) since registering the activity, has strictly complied with this Act and the regulations. 2010, c. 16, Sched. 7, s. 2 (37).

Exception

(1.2) Subsection (1.1) does not apply if the Director removes the registration from the registry as a result of issuing an order under section 20.18, unless the Director refuses to issue an environmental compliance approval in respect of the waste disposal site or waste management system. 2010, c. 16, Sched. 7, s. 2 (38).

Notice of decision and right to appeal

(2) A notice of the decision of the Director in disposing of the application and a notice stating the right to an appeal under this section shall be served on the owner either personally or by registered mail addressed to the owner at the owner's last known address. R.S.O. 1990, c. E.19, s. 45 (2).

Right to appeal

(3) Within fifteen days after receipt of the notices referred to in subsection (2), the owner may by written notice received by the Ministry and the Tribunal, appeal the amount of compensation, if any, to the Tribunal, and such appeal shall be a new hearing and the Tribunal may dismiss the appeal or alter the decision of the Director establishing the amount of the compensation, if any, and the decision of the Tribunal shall be final. R.S.O. 1990, c. E.19, s. 45 (3); 2000, c. 26, Sched. F, s. 12 (12).

Payment of compensation

(4) Where the Director or the Tribunal, as the case may be, has established the amount of the compensation, if any, the Minister of the Environment shall certify the amount thereof to the Minister of Finance and the Minister of Finance shall pay such amount to the person entitled thereto out of the Consolidated Revenue Fund. R.S.O. 1990, c. E.19, s. 45 (4); 2000, c. 26, Sched. F, s. 12 (12); 2001, c. 9, Sched. G, s. 5 (2).

Former disposal sites

46. No use shall be made of land or land covered by water which has been used for the disposal of waste within a period of twenty-five years from the year in which such land ceased to be so used unless the approval of the Minister for the proposed use has been given. R.S.O. 1990, c. E.19, s. 46.

Security Fund

47. (1) There shall be an account in the Consolidated Revenue Fund to be known in English as "The Waste Well Disposal Security Fund" and in French as "Caisse de garantie des propriétaires de puits d'élimination des déchets", referred to in this section as the "Fund", into which shall be paid the prescribed fees received under this Act. R.S.O. 1990, c. E.19, s. 47 (1).

Interest

(2) Interest shall be credited to the Fund out of the Consolidated Revenue Fund at a rate to be determined from time to time by the Lieutenant Governor in Council, and such interest shall be made up at the close of each fiscal year upon the balance in the Fund at the end of the previous calendar year. R.S.O. 1990, c. E.19, s. 47 (2).

Owner of waste disposal well to pay fee

(3) The owner of every well that is a waste disposal site shall pay a fee calculated upon the amount and type of waste disposed of in the well. R.S.O. 1990, c. E.19, s. 47 (3).

Fee paid to Minister of Finance

(4) The fee shall be paid to the Minister of Finance for payment into the Fund. R.S.O. 1990, c. E.19, s. 47 (4); 2001, c. 9, Sched. G, s. 5 (22).

Calculation and payment of fee

(5) The fee shall be at the rate or rates prescribed by the regulations, shall be paid upon the amount and type of waste disposed of in the well in each calendar year and shall be paid in advance in each calendar year. R.S.O. 1990, c. E.19, s. 47 (5).

Estimate by Director

(6) The Director shall estimate the amount of the fee for each calendar year based upon the amount and type of waste disposed of in the well in the previous calendar year and where waste was not disposed of in the well in the previous calendar year the Director shall estimate the fee on the basis of the amount and type of waste that in the Director's opinion will be disposed of in the well in the current calendar year and may revise such estimate at any time before payment of the estimated fee as required by subsection (7). R.S.O. 1990, c. E.19, s. 47 (6).

Payment of estimated fee

(7) The estimated fee for each calendar year shall be paid within thirty days after receipt of the notice or revised notice by the owner of the well of the amount of the fee estimated by the Director. R.S.O. 1990, c. E.19, s. 47 (7).

Adjustment of fee

(8) At the end of each calendar year, the Director shall calculate the amount of the fee for the year and,

(a) where the fee estimated and paid for the year is less than the calculated fee, the Director shall add the difference to the estimated fee for the next calendar year or may, by a notice in writing, require the owner of the well to pay the difference forthwith to the Minister of Finance; and

(b) where the fee estimated and paid for the year is greater than the calculated fee, the Director shall deduct the difference from the estimated fee for the next calendar year or may certify to the Minister of Finance the amount of such difference and the Minister of Finance shall pay such amount to the owner of the well. R.S.O. 1990, c. E.19, s. 47 (8); 2001, c. 9, Sched. G, s. 5 (22).

Person suffering damage to be compensated

(9) Where the water in any well, lake, river, pond, spring, stream, reservoir or other water or watercourse that any person takes for ordinary household purposes or for the watering of livestock, poultry, home gardens or lawns, or for the watering or irrigation of crops grown for sale, is rendered unfit for such use by reason of the operation of any well that is a waste disposal site, the person is entitled to be compensated out of the Fund so far as the Fund is sufficient for that purpose, having regard to any other charges thereon, if the person gives notice to the Director forthwith after becoming aware that the water has been rendered unfit and makes a claim therefor under subsection (10) within six months, or such longer period of time as may be determined by the Director, from the date that the Director received the notice that the water has been rendered unfit. R.S.O. 1990, c. E.19, s. 47 (9).

Claim for compensation

(10) A person claiming to be entitled to compensation out of the Fund shall make application therefor to the Director in writing, setting out therein the person's full name and address and the particulars of the person's claim and shall furnish to the Director such additional information with respect to the

subject-matter of the claim that the Director may require and that is within the person's knowledge. R.S.O. 1990, c. E.19, s. 47 (10).

Determination by Director

(11) The Director shall investigate or cause an investigation to be made and shall determine whether there are reasonable grounds for believing that the water referred to in subsection (9) has been rendered unfit for any of the purposes set out therein and for which it was used and that it has been rendered unfit by the disposal of waste in any well that is a waste disposal site and in such case shall determine the amount of the claimant's reasonable and necessary expenses incurred in obtaining a temporary or permanent alternate supply of water substantially equivalent in quantity and quality to such water. R.S.O. 1990, c. E.19, s. 47 (11); 2005, c. 12, s. 1 (12).

Director's certificate

(12) The Director shall set out his or her determination in a certificate together with written reasons therefor and send a copy thereof to the claimant by registered mail at the address set out in the application. R.S.O. 1990, c. E.19, s. 47 (12).

When certificate final

(13) The certificate of the Director is final at the end of thirty days from the date of mailing it to the claimant unless notice of appeal is served within that time. R.S.O. 1990, c. E.19, s. 47 (13).

Appeal

(14) The claimant may appeal to the Tribunal at any time before the certificate of the Director becomes final and the procedure thereon shall be the same as upon an appeal from an order of the Director under Part XIII. R.S.O. 1990, c. E.19, s. 47 (14); 2000, c. 26, Sched. F, s. 12 (12).

Payment out of Fund

(15) Where the Director has sent the certificate by registered mail to the claimant and the time for any appeal has expired or, where an appeal is taken, it is disposed of, and it is finally determined that the claimant is entitled to payment of compensation out of the Fund, the Director shall certify to the Minister of Finance the sum found to be payable and the Minister of Finance shall pay such sum to the claimant out of the Fund. R.S.O. 1990, c. E.19, s. 47 (15); 2001, c. 9, Sched. G, s. 5 (22).

Recovery of money

(16) Where a claimant who has received any payment out of the Fund recovers any money directly or indirectly from the owner of a well that is a waste disposal site, in respect of the expenses for which the payment was made out of the Fund, the claimant shall repay to the Minister of Finance for credit to the Fund an amount equal to the payment out of the Fund or the money received from the owner of the well, whichever is the lesser, and such amount may be recovered with costs in any court of competent jurisdiction as a debt due to the Crown. R.S.O. 1990, c. E.19, s. 47 (16); 2001, c. 9, Sched. G, s. 5 (22).

Recovery of fees owing

(17) Any fee or any difference between the estimated fee and the calculated fee referred to in clause (8) (a) that is payable under this section may be recovered in any court of competent jurisdiction as a debt due to the Crown. R.S.O. 1990, c. E.19, s. 47 (17).

PART V.0.1
RENEWABLE ENERGY

Definition

47.1 In this Part,

"environment" has the same meaning as in the *Environmental Assessment Act*. 2009, c. 12, Sched. G, s. 4 (1).

Purpose

47.2 (1) The purpose of this Part is to provide for the protection and conservation of the environment. 2009, c. 12, Sched. G, s. 4 (1).

Application of s. 3 (1)

(2) Subsection 3 (1) does not apply to this Part. 2009, c. 12, Sched. G, s. 4 (1).

Requirement for renewable energy approval

47.3 (1) A person shall not engage in a renewable energy project except under the authority of and in accordance with a renewable energy approval issued by the Director if engaging in the project involves engaging in any of the following activities:

1. An activity for which, in the absence of subsection (2), subsection 9 (1) of this Act would require an environmental compliance approval.
2. An activity for which, in the absence of subsection (2), subsection 27 (1) of this Act would require an environmental compliance approval.
3. An activity for which, in the absence of subsection (2), subsection 34 (3) of the *Ontario Water Resources Act* would require a permit.

Note: On the later of the day subsection 4 (1) of Schedule G to the *Green Energy and Green Economy Act, 2009* comes into force and the day subsection 1 (8) of the *Safeguarding and Sustaining Ontario's Water Act, 2007* comes into force, paragraph 3 is repealed and the following substituted:

3. An activity for which, in the absence of subsection (2), subsection 34 (1) of the *Ontario Water Resources Act* would require a permit, if the activity would not involve a transfer as defined in subsection 34.5 (1) of that Act.

See: 2009, c. 12, Sched. G, ss. 4 (2), 26 (2).

4. An activity for which, in the absence of subsection (2), section 36 of the *Ontario Water Resources Act* would require a well construction permit.
5. An activity for which, in the absence of subsection (2), subsection 53 (1) of the *Ontario Water Resources Act* would require an environmental compliance approval.
6. An activity for which, in the absence of subsection (2), a provision prescribed by the regulations would require an approval, permit or other instrument.
7. Any other activity prescribed by the regulations. 2009, c. 12, Sched. G, s. 4 (1); 2010, c. 16, Sched. 7, s. 2 (39-41).

Exemptions

(2) The following provisions do not apply to a person who is engaging in a renewable energy project:

1. Subsection 9 (1) of this Act.
2. Subsection 27 (1) of this Act.
3. Subsection 34 (3) of the *Ontario Water Resources Act*.

Note: On the later of the day subsection 4 (1) of Schedule G to the *Green Energy and Green Economy Act, 2009* comes into force and the day subsection 1 (8) of the *Safeguarding and*

***Sustaining Ontario's Water Act, 2007* comes into force, paragraph 3 is repealed and the following substituted:**

3. Subsection 34 (1) of the *Ontario Water Resources Act*, if the person engaging in the renewable energy project is not engaged in a taking of water that involves a transfer as defined in subsection 34.5 (1) of that Act.

See: 2009, c. 12, Sched. G, ss. 4 (3), 26 (2).

4. Section 36 of the *Ontario Water Resources Act*.

5. Section 53 of the *Ontario Water Resources Act*.

6. A provision prescribed by the regulations for the purpose of paragraph 6 of subsection (1). 2009, c. 12, Sched. G, s. 4 (1); 2010, c. 16, Sched. 7, s. 2 (42).

Application

47.4 (1) An application for the issue or renewal of a renewable energy approval shall be prepared in accordance with the regulations and submitted to the Director. 2009, c. 12, Sched. G, s. 4 (1).

Director may require information

(2) The Director may require an applicant under subsection (1) to submit any plans, specifications, engineers' reports or other information and to carry out and report on any tests or experiments relating to the renewable energy project. 2009, c. 12, Sched. G, s. 4 (1).

Director's powers

47.5 (1) After considering an application for the issue or renewal of a renewable energy approval, the Director may, if in his or her opinion it is in the public interest to do so,

(a) issue or renew a renewable energy approval; or

(b) refuse to issue or renew a renewable energy approval. 2009, c. 12, Sched. G, s. 4 (1).

Terms and conditions

(2) In issuing or renewing a renewable energy approval, the Director may impose terms and conditions if in his or her opinion it is in the public interest to do so. 2009, c. 12, Sched. G, s. 4 (1).

Other powers

(3) On application or on his or her own initiative, the Director may, if in his or her opinion it is in the public interest to do so,

(a) alter the terms and conditions of a renewable energy approval after it is issued;

(b) impose new terms and conditions on a renewable energy approval; or

(c) suspend or revoke a renewable energy approval. 2009, c. 12, Sched. G, s. 4 (1).

Same

(4) A renewable energy approval is subject to any terms and conditions prescribed by the regulations. 2009, c. 12, Sched. G, s. 4 (1).

Water transfers: Great Lakes-St. Lawrence River, Nelson and Hudson Bay Basins

47.6 A renewable energy approval shall not authorize a person to take water contrary to subsection 34.3 (2) of the *Ontario Water Resources Act*. 2009, c. 12, Sched. G, s. 4 (1).

Policies, renewable energy approvals

47.7 (1) The Minister may, in writing, issue, amend or revoke policies in respect of renewable energy approvals. 2009, c. 12, Sched. G, s. 4 (1).

Same

(2) A policy or the amendment or revocation of a policy takes effect on the later of the following days:

1. The day that notice of the policy, amendment or revocation, as the case may be, is given in the environmental registry established under the *Environmental Bill of Rights, 1993*.
2. The effective day specified in the policy, amendment or revocation, as the case may be. 2009, c. 12, Sched. G, s. 4 (1).

Same

(3) Subject to section 145.2.2, decisions made under this Act in respect of renewable energy approvals shall be consistent with any policies issued under subsection (1) that are in effect on the date of the decision. 2009, c. 12, Sched. G, s. 4 (1).

PART V.1
VEHICLE PERMITS AND NUMBER PLATES

Seizure of permits and number plates

Definitions, ss. 48 to 55

48. (1) In this section and in sections 49 to 55,

"number plates" means number plates issued under the *Highway Traffic Act*; ("plaques d'immatriculation")

"offence" means offence under this Act, the *Nutrient Management Act, 2002*, the *Ontario Water Resources Act*, the *Pesticides Act*, the *Safe Drinking Water Act, 2002* or the *Toxics Reduction Act, 2009*; ("infraction")

"permit" means permit issued under section 7 of the *Highway Traffic Act*; ("certificat d'immatriculation")

"Registrar" means Registrar of Motor Vehicles under the *Highway Traffic Act*. ("registrateur") R.S.O. 1990, c. E.19, s. 48 (1); 1998, c. 35, s. 8 (1, 2); 2002, c. 4, s. 62 (2); 2009, c. 19, s. 67 (2).

Seizure of permit and number plates

(2) A police officer or a provincial officer may seize the permit and the number plates for a vehicle where he or she reasonably believes that the vehicle was used or is being used in connection with the commission of an offence and the seizure is necessary to prevent the continuation or repetition of the offence. 1998, c. 35, s. 8 (3).

Safekeeping

(3) The police officer or provincial officer,

(a) shall deliver the permit and the number plates into the custody of the Registrar pending disposition as provided in sections 49 to 55; and

(b) shall give notice to the Registrar of the date when the permit and the number plates were seized. R.S.O. 1990, c. E.19, s. 48 (3).

Notice by Registrar

(4) The Registrar shall give notice of the delivery into custody and of the date of the seizure to the person to whom the permit and the number plates were issued. R.S.O. 1990, c. E.19, s. 48 (4).

Suspension of permit and detention of number plates

49. (1) Where a person is convicted of an offence, the court may order the suspension of the permit and the detention of the number plates for any vehicle that the court is satisfied was used in connection with the commission of the offence. 1998, c. 35, s. 9 (1).

Term of suspension and detention

(2) The court may fix such period of time, not exceeding five years, for the suspension of the permit and the detention of the number plates as the court considers proper.

Idem

(3) Where the permit and the number plates were seized under section 48, the period of the suspension and detention shall be calculated from the day of the seizure.

Order for seizure

(4) Where the permit and the number plates have not been seized, the court may order that the permit and the number plates shall be seized and delivered to the Registrar.

Out-of-province permit and number plates

(5) Where the permit to drive the vehicle on a highway and the number plates were issued by an authority outside Ontario and not under the *Highway Traffic Act*, the court shall not act under subsection (1) but may order the Registrar to return the permit and the number plates to the authority that issued them.

Order is additional to any other penalty

(6) The court may issue an order under this section in addition to any other penalty imposed.

Notice of commencement of proceeding

(7) The prosecutor shall give to the Registrar and to the person to whom the permit and the number plates were issued notice of the commencement of the proceeding in respect of the offence mentioned in subsection (1).

Notice of intention to seek order

(8) Subsections (1) and (5) do not apply unless the court is satisfied that the person to whom the permit and the number plates were issued was notified, before the defendant entered a plea, that an order would be sought under this section. R.S.O. 1990, c. E.19, s. 49 (2-8).

Right to be added as a party

(9) A person given notice under subsection (8) has the right to be added as a party to the proceeding in respect of the offence for one or both of the following purposes:

1. Satisfying the court that the vehicle was not used in connection with the commission of the offence.
2. Making submissions to the court with respect to the issuance of an order under this section. 1998, c. 35, s. 9 (2).

Duty to give notice

(10) A prosecutor who intends not to seek a penalty under this section shall give notice of that fact to the court, to the Registrar and to the person to whom the permit and the number plates were issued.

Notice of intention not to seek penalty

(11) Subsections (1), (4) and (5) do not apply where the prosecutor gives notice to the person to whom the permit and the number plates were issued that a penalty will not be sought under this section. R.S.O. 1990, c. E.19, s. 49 (10, 11).

Order to detain permit and number plates pending payment of penalty

50. (1) Where,

(a) a person is convicted of an offence; and

(b) the court is satisfied,

(i) that the permit and the number plates for a vehicle used in connection with the commission of the offence are in the possession of the Registrar or are the subject of an order for seizure and delivery to the Registrar, and

(ii) that the person to whom the permit and the number plates were issued was notified that a penalty would be sought under section 49,

the court may order the Registrar to detain the permit and the number plates until any fine imposed upon the conviction mentioned in clause (a) is paid. R.S.O. 1990, c. E.19, s. 50 (1); 1998, c. 35, s. 10.

Duty of court clerk

(2) The clerk of the court shall transmit to the Registrar,

(a) a copy of the order made under subsection (1) together with a certificate as to the issuance of the order; and

(b) upon payment of the fine, a certificate by the clerk as to the payment. R.S.O. 1990, c. E.19, s. 50 (2).

Appeal, order under ss. 49 and 50

51. An appeal lies from an order or a refusal to issue an order under section 49 or 50 in the same manner as an appeal from a conviction or acquittal in respect of an offence mentioned in such section. R.S.O. 1990, c. E.19, s. 51.

Return of permit and number plates

52. (1) Where the Registrar is satisfied as to the circumstances set out in subsection (2), the Registrar upon application by the person to whom the permit and the number plates were issued shall return the permit and the number plates or, upon payment of any fees prescribed therefor under the *Highway Traffic Act*,

(a) shall renew the permit and return or issue new number plates; or

(b) shall issue a new permit and new number plates,

as the case requires. R.S.O. 1990, c. E.19, s. 52 (1).

When return to be made

(2) The circumstances referred to in subsection (1) are that,

(a) the prosecutor has given notice to the Registrar that an order will not be sought,

(i) for the suspension of the permit and the detention of the number plates, or

(ii) for the return of the permit and the number plates to the authority outside Ontario that issued them;

(b) at the conclusion of an investigation, no proceeding is commenced in respect of the offence mentioned in subsection 49 (1);

(c) notice of the commencement of the proceeding in respect of the offence mentioned in subsection 49 (1) is not given to the Registrar or to the person to whom the permit and the number plates were issued within thirty days of the seizure of the permit and the number plates;

(d) every charge that has been laid is withdrawn;

(e) any proceeding that has been commenced is finally disposed of without the issuance of an order,

(i) for the suspension of the permit and the detention of the number plates,

(ii) for the return of the permit and the number plates to the authority outside Ontario that issued them, or

(iii) for the detention of the permit and the number plates pending payment of a fine;

(f) where an order has been issued for the suspension of the permit and the detention of the number plates, the period of the suspension and detention has been completed and, if an order has been issued for the detention of the permit and the number plates pending payment of a fine, the fine has been paid;

(g) where an order has been issued for the detention of the permit and the number plates pending payment of a fine, the fine has been paid; or

(h) except where the permit and number plates are in the custody of the Registrar under a court order, a provincial officer has given notice to the Registrar that the suspension of the permit and number plates is no longer necessary to prevent the continuation or repetition of the offence. R.S.O. 1990, c. E.19, s. 52 (2); 1998, c. 35, s. 11.

Prohibition, applications for permits and number plates

Permits

53. (1) No person whose permit or number plates for a vehicle,

(a) have been seized and are held in custody under section 48;

(b) are under suspension or detention under section 49 or 51; or

(c) are detained under section 50,

shall apply for, procure the issue or renewal of or have possession of a permit for the vehicle.

Number plates

(2) No person whose permit or number plates for a vehicle,

(a) have been seized and are held in custody under section 48;

(b) are under suspension or detention under section 49 or 51; or

(c) are detained under section 50,

shall apply for, procure the issue of or have in the person's possession or on the vehicle number plates for the vehicle. R.S.O. 1990, c. E.19, s. 53.

Transmittal of copy of order

54. Where, under section 49 or 51, an order is made or a charge is dismissed, the clerk or registrar of the court shall transmit to the Registrar a copy of the order or the minute of dismissal certified by the clerk or registrar. R.S.O. 1990, c. E.19, s. 54.

Substituted service

55. (1) On application without notice, a justice who is satisfied that reasonable efforts have been made without success to give a notice, in accordance with section 182, under section 48 or 49, or that such reasonable efforts would not be successful, may order substituted service of the notice in such manner as the justice may direct. 1998, c. 35, s. 12.

Effect

(2) A notice given by substituted service in the manner directed under subsection (1) shall be deemed to be given on the day on which the substituted service is carried out. R.S.O. 1990, c. E.19, s. 55 (2).

PART VI
OZONE DEPLETING SUBSTANCES

Definitions, Part VI

56. In this Part,

"designated" means designated by the regulations; ("désigné")

"ozone depleting substance" means a chlorofluorocarbon, a halon or any other substance that has the potential to destroy ozone in the stratosphere. ("substance appauvrissant la couche d'ozone") R.S.O. 1990, c. E.19, s. 56.

Application

57. Sections 58 and 59 apply only in respect of the following ozone depleting substances:

1. CFC-11, also known as fluorotrichloromethane.
2. CFC-12, also known as dichlorodifluoromethane.
3. CFC-113, also known as 1,1,2-trichloro-1,2,2-trifluoroethane.
4. CFC-114, also known as 1,2-dichloro-1,1,2,2-tetrafluoroethane.
5. CFC-115, also known as 1-chloro-1,1,2,2,2-pentafluoroethane.
6. Halon-1211, also known as bromochlorodifluoromethane.
7. Halon-1301, also known as bromotrifluoromethane.
8. Halon-2402, also known as dibromotetrafluoroethane.
9. Such other ozone depleting substances as may be designated. R.S.O. 1990, c. E.19, s. 57.

Prohibition, ozone depleting substances

58. No person shall make, use, transfer, display, transport, store or dispose of,

(a) any thing, other than a prescription drug, containing an ozone depleting substance that acts as a propellant; or

(b) any designated thing or any thing of a designated class if that thing contains an ozone depleting substance. R.S.O. 1990, c. E.19, s. 58.

Prohibition, manufacture using ozone depleting substances

59. No person shall make, use, transfer, display, transport, store or dispose of,

(a) any packaging, wrapping or container that is made in a manner that uses an ozone depleting substance; or

(b) any designated thing or any thing of a designated class if that thing is made in a manner that uses an ozone depleting substance. R.S.O. 1990, c. E.19, s. 59.

PART VII
ABANDONED MOTOR VEHICLES

Definitions, Part VII

60. In this Part,

"abandoned motor vehicle" means a vehicle that has been left unattended without lawful authority and that appears to an officer, by reason of its age, appearance, mechanical condition or lack of number plates, to be abandoned; ("véhicule automobile abandonné")

"abandoned motor vehicle site" means,

(a) a waste disposal site,

(i) that is classified by the regulations as a derelict motor vehicle site,

(ii) that is not exempt under the regulations relating to Part V or this Part, and

(iii) for which an environmental compliance approval has been issued or a registration under Part II.2 is in effect, or

(b) any place that is approved in writing by the Director for the purpose of receiving and storing abandoned motor vehicles; ("emplacement de véhicules automobiles abandonnés")

"officer" means a provincial officer or a member of the Ontario Provincial Police Force or the police force in the area where an abandoned motor vehicle is found. ("agent") R.S.O. 1990, c. E.19, s. 60; 2010, c. 16, Sched. 7, s. 2 (43).

Removal of abandoned motor vehicle

61. An officer may remove or cause to be removed an abandoned motor vehicle to an abandoned motor vehicle site. R.S.O. 1990, c. E.19, s. 61.

Notice to owner, removal

62. Where an officer has removed an abandoned motor vehicle to an abandoned motor vehicle site, the officer shall forthwith serve notice in writing of the removal on the owner of the vehicle at the latest address shown on the records of the Ministry of Transportation when the officer causes the records to be examined or on the records, if any, on or in the vehicle unless the name and address of the owner cannot be determined. R.S.O. 1990, c. E.19, s. 62.

Contents of notice

63. A notice under section 62 shall,

(a) contain a description of,

(i) the abandoned motor vehicle,

(ii) the place from which and the abandoned motor vehicle site to which the abandoned motor vehicle was removed,

(iii) the date of removal, and

(iv) the identification of the officer who removed or caused the removal of the abandoned motor vehicle; and

(b) state,

(i) that if the abandoned motor vehicle is not claimed by the owner or any other person having a right or interest in the vehicle within thirty days from the date of service of the notice, the abandoned motor vehicle will be sold or otherwise disposed of by the person having the charge and control of the abandoned motor vehicle site, and

(ii) that the owner shall forthwith upon receipt of the notice notify any person having a right or interest in the abandoned motor vehicle, of whom the owner has knowledge, of the receipt and contents of the notice of removal. R.S.O. 1990, c. E.19, s. 63.

Where owner may retake possession

64. The owner or any person having a right or interest in an abandoned motor vehicle may take possession of the abandoned motor vehicle within thirty days after the date of service of the notice referred to in section 62 or, where notice of removal has not been served, within thirty days after the date of removal of the vehicle on payment to the person having the charge and control of the abandoned motor vehicle site of all costs and charges, if any, for removal of the vehicle to and all costs and charges, if any, for storage of the vehicle at the abandoned motor vehicle site. R.S.O. 1990, c. E.19, s. 64.

Disposal of vehicle

65. Where an abandoned motor vehicle has not been claimed by the owner or any person having a right or interest in the abandoned motor vehicle pursuant to section 64, the person having the charge and control of the abandoned motor vehicle site shall sell or otherwise dispose of the vehicle and shall apply the proceeds of the sale or other disposition firstly, in payment of all costs and charges, if any, for removal of the vehicle to the abandoned motor vehicle site, and secondly, in payment of all costs and charges, if any, for storage of the vehicle at the site, and any surplus shall be paid to the Minister of Finance. R.S.O. 1990, c. E.19, s. 65; 2001, c. 9, Sched. G, s. 5 (22).

Ownership of vehicle

66. Where an abandoned motor vehicle is sold or otherwise disposed of pursuant to section 65, the owner or any person having a right or interest in the vehicle is divested of the ownership of or other right or interest in the vehicle and the person who has acquired the vehicle on a disposition pursuant to section 65 acquires the ownership of the vehicle free from any right or interest of any other person in the vehicle. R.S.O. 1990, c. E.19, s. 66.

Compensation, disposal of vehicles

67. Where an owner or other person having a right or interest in an abandoned motor vehicle that is disposed of pursuant to section 65 does not, acting in good faith through any cause beyond the owner or other person's control, receive notice of removal of the vehicle or does not otherwise acquire knowledge of such removal before the disposition and such owner or other person suffers loss as a result of such disposition, such owner or other person may apply to the Director for compensation upon giving notice to the Director forthwith after becoming aware of the disposition and upon applying therefor pursuant to section 68 within six months from the date the notice of removal, if any, is served or, where no notice of removal is served, from the date of removal of the vehicle to an abandoned motor vehicle site. R.S.O. 1990, c. E.19, s. 67.

Claim for compensation

68. A person applying for compensation pursuant to section 67 shall make application therefor to the Director in writing, setting out therein the person's full name and address and the particulars of the person's claim and shall furnish to the Director such additional information with respect to the subject-matter of the claim that the Director may require and that is within the person's knowledge. R.S.O. 1990, c. E.19, s. 68.

Director's certificate, compensation

69. The Director may award compensation under section 67 in such amount and on such terms and conditions as appear just under the circumstances and shall set out the award in a certificate together with written reasons therefor and send a copy thereof to the applicant by registered mail at the address set out in the application. R.S.O. 1990, c. E.19, s. 69.

When certificate final

70. The certificate of the Director is final at the end of thirty days from the date of mailing it to the applicant unless notice of appeal is served within that time. R.S.O. 1990, c. E.19, s. 70.

Appeal, certificate of compensation

71. The applicant may appeal to the Tribunal at any time before the certificate of the Director becomes final and the procedure thereon shall be the same as upon an appeal from an order of the Director under Part XIII. R.S.O. 1990, c. E.19, s. 71; 2000, c. 26, Sched. F, s. 12 (12).

Payment of compensation

72. Where the Director has sent the certificate by registered mail to the applicant and the time for any appeal has expired or, where an appeal is taken, it is disposed of, and it is finally determined that the applicant is entitled to payment of compensation, the Director shall certify to the Minister of Finance the sum found to be payable and the Minister of Finance shall pay such sum to the applicant out of the Consolidated Revenue Fund. R.S.O. 1990, c. E.19, s. 72; 2001, c. 9, Sched. G, s. 5 (22).

Reimbursement of compensation payment

73. Where an applicant who has received any payment out of the Consolidated Revenue Fund pursuant to section 72 recovers any money directly or indirectly from any person in respect of the loss for which the payment was made out of the Consolidated Revenue Fund, the applicant shall repay to the Minister of Finance for credit to the Consolidated Revenue Fund an amount equal to the payment out of the Consolidated Revenue Fund or the money received from such person, whichever is the lesser, and such amount may be recovered with costs in any court of competent jurisdiction as a debt due to the Crown. R.S.O. 1990, c. E.19, s. 73; 2001, c. 9, Sched. G, s. 5 (22).

PART VIII (ss. 74-83) REPEALED: 1997, c. 30, Sched. B, s. 22.

PART IX
LITTER, PACKAGING, CONTAINERS, DISPOSABLE PRODUCTS AND PRODUCTS THAT POSE WASTE MANAGEMENT PROBLEMS

Meaning of "litter", Part IX

84. In this Part,

"litter" includes any material left or abandoned in a place other than a receptacle or place intended or approved for receiving such material and "littering" has a corresponding meaning. R.S.O. 1990, c. E.19, s. 84.

Research and studies, litter, packaging, etc.

85. The Minister, for the purposes of administering and enforcing this Part and the regulations related to it, may conduct research and studies concerning,

(a) the management and disposal of litter;

(b) the reduction of waste from packaging, containers and disposable products and the reuse or recycling of packaging, containers and disposable products;

(c) the degradability of packaging, containers and disposable products;

(d) the environmental appropriateness of packaging, containers and disposable products;

(e) the environmental appropriateness of materials used in packaging, containers and disposable products;

(f) products that pose or that may pose waste management problems. 1992, c. 1, s. 29.

Littering prohibited

86. No person shall abandon any material in a place, manner, receptacle or wrapping such that it is reasonably likely that the material will become litter. R.S.O. 1990, c. E.19, s. 86.

Subsidies and grants

87. The Minister may make grants to persons to assist in the provision of receptacles to receive litter in such amounts and upon such terms and conditions as the regulations may prescribe. R.S.O. 1990, c. E.19, s. 87.

Prohibition, use or sale of packaging, etc.

88. (1) No person shall use, offer for sale or sell any packaging, container or disposable product or any material for use in packaging, containers or disposable products contrary to this Act or the regulations.

Idem

(2) No person shall use, offer for sale or sell any product that is declared in the regulations to be a product that poses waste management problems contrary to this Act or the regulations. 1992, c. 1, s. 30.

Offence, litter

89. (1) Every person who fails to comply with a provision of this Part or a provision of a regulation relating to this Part that relates to litter is guilty of an offence and is liable on conviction to a fine of not more than $1,000 on a first conviction and not more than $2,000 on each subsequent conviction.

Idem, corporation

(2) Where a corporation is convicted of an offence under subsection (1), the maximum fine that may be imposed is $2,000 on a first conviction and $5,000 on each subsequent conviction and not as provided in subsection (1). R.S.O. 1990, c. E.19, s. 89.

90. REPEALED: 2005, c. 12, s. 1 (13).

PART X
SPILLS

Interpretation and application, Part X

91. (1) In this Part,

"municipality" means an upper-tier municipality, a lower-tier municipality or a single-tier municipality; ("municipalité")

"owner of the pollutant" means the owner of the pollutant immediately before the first discharge of the pollutant, whether into the natural environment or not, in a quantity or with a quality abnormal at the location where the discharge occurs, and "owner of a pollutant" has a corresponding meaning; ("propriétaire du polluant", "propriétaire d'un polluant")

"person having control of a pollutant" means the person and the person's employee or agent, if any, having the charge, management or control of a pollutant immediately before the first discharge of the

pollutant, whether into the natural environment or not, in a quantity or with a quality abnormal at the location where the discharge occurs, and "person having control of the pollutant" has a corresponding meaning; ("personne qui exerce un contrôle sur un polluant", "personne qui exerce un contrôle sur le polluant")

"pollutant" means a contaminant other than heat, sound, vibration or radiation, and includes any substance from which a pollutant is derived; ("polluant")

"practicable" means capable of being effected or accomplished; ("réalisable")

"restore the natural environment", when used with reference to a spill of a pollutant, means restore all forms of life, physical conditions, the natural environment and things existing immediately before the spill of the pollutant that are affected or that may reasonably be expected to be affected by the pollutant, and "restoration of the natural environment", when used with reference to a spill of a pollutant, has a corresponding meaning; ("reconstituer l'environnement naturel", "reconstitution de l'environnement naturel")

"spill", when used with reference to a pollutant, means a discharge,

(a) into the natural environment,

(b) from or out of a structure, vehicle or other container, and

(c) that is abnormal in quality or quantity in light of all the circumstances of the discharge,

and when used as a verb has a corresponding meaning; ("déversement", "déverser")

"substance" means any solid, liquid or gas, or any combination of any of them. ("substance") R.S.O. 1990, c. E.19, s. 91 (1); 2001, c. 9, Sched. G, s. 5 (5, 6); 2002, c. 17, Sched. F, Table.

Abnormal discharge

(2) A discharge of a pollutant designated by the regulations at a location designated by the regulations shall be deemed to be in a quantity or with a quality abnormal at the location. R.S.O. 1990, c. E.19, s. 91 (2).

Practicable

(3) In determining what is practicable for the purposes of this Part, regard shall be had to the technical, physical and financial resources that are or can reasonably be made available. R.S.O. 1990, c. E.19, s. 91 (3).

Exception re farming

(4) This Part does not apply to the disposal of animal wastes in accordance with normal farming practices. R.S.O. 1990, c. E.19, s. 91 (4).

Successors, etc.

(5) A reference in this Part, other than in section 92, to an owner of a pollutant or a person having control of a pollutant includes a successor, assignee, executor or administrator of the owner of the pollutant or the person having control of the pollutant. R.S.O. 1990, c. E.19, s. 91 (5).

Spill prevention and spill contingency plans

91.1 Every person who belongs to a class of persons prescribed by the regulations shall, in accordance with the regulations, develop and implement plans to,

(a) prevent or reduce the risk of spills of pollutants; and

(b) prevent, eliminate or ameliorate any adverse effects that result or may result from spills of pollutants, including,

(i) plans to notify the Ministry, other public authorities and members of the public who may be affected by a spill, and

(ii) plans to ensure that appropriate equipment, material and personnel are available to respond to a spill. 2005, c. 12, s. 1 (14).

Notice of spills

92. (1) Every person having control of a pollutant that is spilled and every person who spills or causes or permits a spill of a pollutant shall forthwith notify the following persons of the spill, of the circumstances thereof, and of the action that the person has taken or intends to take with respect thereto,

(a) the Ministry;

(b) any municipality within the boundaries of which the spill occurred or, if the spill occurred within the boundaries of a regional municipality, the regional municipality;

(c) where the person is not the owner of the pollutant and knows or is able to ascertain readily the identity of the owner of the pollutant, the owner of the pollutant; and

(d) where the person is not the person having control of the pollutant and knows or is able to ascertain readily the identity of the person having control of the pollutant, the person having control of the pollutant. R.S.O. 1990, c. E.19, s. 92 (1); 2002, c. 17, Sched. F, Table; 2005, c. 12, s. 1 (15).

When duty effective

(2) The duty imposed by subsection (1) comes into force in respect of each of the persons having control of the pollutant and the person who spills or causes or permits the spill of the pollutant immediately when the person knows or ought to know that the pollutant is spilled. R.S.O. 1990, c. E.19, s. 92 (2); 2005, c. 12, s. 1 (16).

Additional information to Director

(3) The person required by subsection (1) to give notice and the owner of the pollutant shall give to the Director such additional information in respect of the pollutant, the source of the pollutant and the spill of the pollutant as may be required by the Director. R.S.O. 1990, c. E.19, s. 92 (3).

Notice to Ministry by person investigating

(4) A member of a police force or an employee of a municipality or other public authority who is informed of or who investigates the spill of a pollutant shall forthwith notify the Ministry of the spill of the pollutant unless he or she has reasonable grounds for believing that such notice has been given to the Ministry by another person. R.S.O. 1990, c. E.19, s. 92 (4).

Same

(5) The notices required by subsections (1) and (4) shall be given in accordance with any requirements prescribed by the regulations. 2005, c. 12, s. 1 (17).

Duty to mitigate and restore

93. (1) The owner of a pollutant and the person having control of a pollutant that is spilled and that causes or is likely to cause an adverse effect shall forthwith do everything practicable to prevent, eliminate and ameliorate the adverse effect and to restore the natural environment.

When duty effective

(2) The duty imposed by subsection (1) comes into force in respect of each of the owner of the pollutant and the person having control of the pollutant immediately when the owner or person, as the case may be, knows or ought to know that the pollutant is spilled and is causing or is likely to cause an adverse effect. R.S.O. 1990, c. E.19, s. 93.

Directions by Minister, spills

94. (1) Where a pollutant is spilled and the Minister is of the opinion that there is or is likely to be an adverse effect as a result of the spill, the Minister, in the circumstances specified in subsection (2), may give directions in accordance with subsection (3) to the employees in and agents of the Ministry. R.S.O. 1990, c. E.19, s. 94 (1); 2006, c. 35, Sched. C, s. 36 (2).

Where Minister may give directions

(2) The Minister may give directions in accordance with subsection (3) where the Minister is of the opinion that it is in the best interest of the public to do so and,

(a) the Minister is of the opinion that neither the person having control of the pollutant nor the owner of the pollutant will carry out promptly the duty imposed by section 93;

(b) the Minister is of the opinion that the person having control of the pollutant or the owner of the pollutant cannot be readily identified or located and that as a result the duty imposed by section 93 will not be carried out promptly; or

(c) the person having control of the pollutant or the owner of the pollutant requests the assistance of the Minister in order to carry out the duty imposed by section 93. R.S.O. 1990, c. E.19, s. 94 (2).

Contents of directions

(3) Under this section, the Minister may direct the employees in and agents of the Ministry to do everything practicable or to take such action as may be specified in the directions in respect of the prevention, elimination and amelioration of the adverse effect and the restoration of the natural environment. R.S.O. 1990, c. E.19, s. 94 (3); 2006, c. 35, Sched. C, s. 36 (3).

Further directions

(4) The Minister may give directions amending or revoking directions given under this section. R.S.O. 1990, c. E.19, s. 94 (4).

Employees and agents

(5) No Act, regulation, by-law, order, permit, approval or licence bars the employees in and agents of the Ministry from acting in accordance with directions given by the Minister under this section. R.S.O. 1990, c. E.19, s. 94 (5); 2006, c. 35, Sched. C, s. 36 (4).

Hearing

(6) The Minister need not hold or afford to any person an opportunity for a hearing before giving directions under this section. R.S.O. 1990, c. E.19, s. 94 (6); 2006, c. 19, Sched. K, s. 2 (1).

Entry and removal

95. (1) For the purpose of carrying out the duty imposed by section 93 or an order or direction made or given under this Part, any person subject to the duty or to whom the order or direction is made or given and that person’s employees and agents may,

(a) enter any place;

(b) construct structures and use machinery, structures, materials and equipment therein or thereon; and

(c) remove therefrom the pollutant or any matter, thing, plant or animal or any part of the natural environment that is affected or that may reasonably be expected to be affected by the pollutant. R.S.O. 1990, c. E.19, s. 95 (1); 2005, c. 12, s. 1 (18).

Enforcement of right of entry, etc.

(2) The rights set out in subsection (1) may be enforced by application without notice to a judge of the Superior Court of Justice by a person, employee or agent referred to in subsection (1). R.S.O. 1990, c. E.19, s. 95 (2); 2001, c. 9, Sched. G, s. 5 (21).

Order by judge

(3) Where the judge is satisfied that there is reasonable ground for believing that it is necessary to do anything mentioned in subsection (1), the judge may issue an order authorizing the person and the person's employees and agents or any one or more of them to do anything mentioned in subsection (1) and specified in the order. R.S.O. 1990, c. E.19, s. 95 (3).

When to be executed

(4) An order under subsection (3) shall be carried out between 6 a.m. and 9 p.m. standard time, unless the order otherwise authorizes. R.S.O. 1990, c. E.19, s. 95 (4).

Disposal of pollutant, etc.

96. (1) No person, employee or agent exercising any authority under subsection 100 (1) or carrying out any duty imposed or order or direction made or given under this Part shall dispose of or use any pollutant, or any matter, thing, plant or animal or any part of the natural environment that is affected or that may reasonably be expected to be affected by the pollutant except,

(a) in accordance with an order of or direction by the Minister under this or any other Act;

(b) in accordance with a direction by or the approval of the Director, but such a direction or approval shall not be contrary to the regulations; or

(c) in accordance with an approval, order, certificate of property use, requirement or direction by the Director under any other Part of this Act or by a Director or provincial officer under any other Act administered by the Minister, but such an approval, order, certificate of property use, requirement or direction shall not be contrary to the regulations. R.S.O. 1990, c. E.19, s. 96 (1); 2001, c. 17, s. 2 (5).

Direction or approval by Director

(2) The Director may give to any person, employee or agent mentioned in subsection (1), and may amend or revoke, a direction or approval mentioned in clause (1) (b) and may do so despite the terms of or conditions in,

(a) an environmental compliance approval in respect of a waste disposal site; or

(b) a renewable energy approval issued under Part V.0.1 in respect of a waste disposal site. 2009, c. 12, Sched. G, s. 5; 2010, c. 16, Sched. 7, s. 2 (44).

Conditions

(3) The Director may attach such conditions as the Director considers necessary to an approval mentioned in clause (1) (b). R.S.O. 1990, c. E.19, s. 96 (3).

Hearing

(4) The Director need not hold or afford to any person an opportunity for a hearing before giving, amending or revoking a direction or approval referred to in clause (1) (b). R.S.O. 1990, c. E.19, s. 96 (4); 2006, c. 19, Sched. K, s. 2 (2).

Orders by Minister, spills

97. (1) Where a pollutant is spilled and the Minister is of the opinion that there is or is likely to be an adverse effect and that it is in the best interest of the public to make an order under this section, the Minister may make an order directed to one or more of the following:

1. The owner of the pollutant.
2. The person having control of the pollutant.
3. The owner or the person having the charge, management or control of any real property or personal property that is affected or that may reasonably be expected to be affected by the pollutant.
4. The municipality within whose boundaries the spill occurred.
5. Any municipality contiguous to the municipality within whose boundaries the spill occurred.
6. Any municipality that is affected or that may reasonably be expected to be affected by the spill of the pollutant.
7. Any public authority.
8. Any person who is or may be adversely affected by the pollutant or whose assistance is necessary, in the opinion of the Minister, to prevent, eliminate or ameliorate the adverse effects or to restore the natural environment. R.S.O. 1990, c. E.19, s. 97 (1); 2002, c. 17, Sched. F, Table.

Content of orders

(2) In an order under this section, the Minister may require the doing of everything practicable or the taking of such action as may be specified in the order in respect of the prevention, elimination and amelioration of the adverse effects and the restoration of the natural environment within such period or periods of time as may be specified in the order. R.S.O. 1990, c. E.19, s. 97 (2).

Idem

(3) In an order under this section, the Minister may require the doing of everything practicable or the taking of such action as may be specified in the order in respect of the use or disposal of,

(a) the pollutant; or

(b) any matter, thing, plant or animal or any part of the natural environment affected or that may reasonably be expected to be affected by the pollutant,

within such period or periods of time as may be specified in the order. R.S.O. 1990, c. E.19, s. 97 (3).

Amendment or revocation of order

(4) The Minister by an order may amend or revoke an order made under this section. R.S.O. 1990, c. E.19, s. 97 (4).

Effect of any Act, regulation, etc.

(5) The Minister may make an order under this section despite any Act, regulation, by-law, order, permit, approval or licence. R.S.O. 1990, c. E.19, s. 97 (5).

Hearing

(6) The Minister need not hold or afford to any person an opportunity for a hearing before making an order under this section. R.S.O. 1990, c. E.19, s. 97 (6); 2006, c. 19, Sched. K, s. 2 (3).

Notice of order

(7) The Minister may direct, orally or in writing, a representative of the Ministry to give a written notice setting out an order of the Minister made orally or in writing under this section. R.S.O. 1990, c. E.19, s. 97 (7).

Effect of notice

(8) An order of the Minister set out in a notice under subsection (7) is for all purposes an order of the Minister made under this section. R.S.O. 1990, c. E.19, s. 97 (8).

Service of order or notice

(9) Where an order under this section or a notice under subsection (7) that sets out an order is given to an employee or agent of an employer or principal named in the order, the order shall be deemed to be given to the employer or principal. R.S.O. 1990, c. E.19, s. 97 (9).

Writing required

(10) An order under this section is not effective unless it is set out in writing or is set out in a notice referred to in subsection (7). R.S.O. 1990, c. E.19, s. 97 (10).

Effect of compliance with duty, or order, etc.

98. A person who in good faith and in a reasonable manner, in carrying out or attempting to carry out,

(a) a duty imposed by this Part; or

(b) an order or direction by the Minister or a direction or approval by the Director under this Part,

takes or refrains from taking any action shall not be convicted of an offence in respect of such taking or refraining from taking of action. R.S.O. 1990, c. E.19, s. 98.

Compensation, spills

99. (1) In this section,

"loss or damage" includes personal injury, loss of life, loss of use or enjoyment of property and pecuniary loss, including loss of income. R.S.O. 1990, c. E.19, s. 99 (1).

Right to compensation

(2) Her Majesty in right of Ontario or in right of Canada or any other person has the right to compensation,

(a) for loss or damage incurred as a direct result of,

(i) the spill of a pollutant that causes or is likely to cause an adverse effect,

(ii) the exercise of any authority under subsection 100 (1) or the carrying out of or attempting to carry out a duty imposed or an order or direction made under this Part, or

(iii) neglect or default in carrying out a duty imposed or an order or direction made under this Part;

(b) for all reasonable cost and expense incurred in respect of carrying out or attempting to carry out an order or direction under this Part,

from the owner of the pollutant and the person having control of the pollutant. R.S.O. 1990, c. E.19, s. 99 (2).

Exception

(3) An owner of a pollutant or a person having control of a pollutant is not liable under subsection (2) if they establish that they took all reasonable steps to prevent the spill of the pollutant or if they establish that the spill of the pollutant was wholly caused by,

(a) an act of war, civil war, insurrection, an act of terrorism or an act of hostility by the government of a foreign country;

(b) a natural phenomenon of an exceptional, inevitable and irresistible character; or

(c) an act or omission with intent to cause harm by a person other than a person for whose wrongful act or omission the owner of the pollutant or the person having control of the pollutant is by law responsible,

or any combination thereof. R.S.O. 1990, c. E.19, s. 99 (3).

Qualification

(4) Subsection (3) does not relieve the owner of the pollutant or the person having control of the pollutant,

(a) from liability for loss or damage that is a direct result of neglect or default of the owner of the pollutant or the person having control of the pollutant in carrying out a duty imposed or an order or direction made under this Part; or

(b) from liability, under clause (2) (a), for cost and expense incurred or, under clause (2) (b), for all reasonable cost and expense incurred,

(i) to do everything practicable to prevent, eliminate and ameliorate the adverse effect, or

(ii) to do everything practicable to restore the natural environment,

or both. R.S.O. 1990, c. E.19, s. 99 (4).

Enforcement of right

(5) The right to compensation under subsection (2) may be enforced by action in a court of competent jurisdiction. R.S.O. 1990, c. E.19, s. 99 (5).

Liability

(6) Liability under subsection (2) does not depend upon fault or negligence. R.S.O. 1990, c. E.19, s. 99 (6).

Contribution

(7) In an action under this section,

(a) where the plaintiff is an owner of the pollutant or a person having control of the pollutant, the court shall determine the degree, if any, in which the plaintiff would be liable to make contribution or indemnification under subsection (8) if the plaintiff were a defendant; and

(b) where the plaintiff is not an owner or a person having control referred to in clause (a), the court shall determine the degree, if any, in which the plaintiff caused or contributed to the loss, damage, cost or expense by fault or negligence,

and the court shall reduce the compensation by the degree, if any, so determined. R.S.O. 1990, c. E.19, s. 99 (7).

Extent of liability

(8) Where two or more persons are liable to pay compensation under this section, they are jointly and severally liable to the person suffering the loss, damage, cost or expense but as between themselves, in

the absence of an express or implied contract, each is liable to make contribution to and indemnify the other in accordance with the following principles:

1. Where two or more persons are liable to pay compensation under this section and one or more of them caused or contributed to the loss, damage, cost or expense by fault or negligence, such one or more of them shall make contribution to and indemnify,
   i. where one person is found at fault or negligent, any other person liable to pay compensation under this section, and
   ii. where two or more persons are found at fault or negligent, each other and any other person liable to pay compensation under this section in the degree in which each of such two or more persons caused or contributed to the loss, damage, cost or expense by fault or negligence.
2. For the purpose of subparagraph ii of paragraph 1, if it is not practicable to determine the respective degrees in which the fault or negligence of two or more persons liable to pay compensation under this section caused or contributed to the loss, damage, cost or expense, such two or more persons shall be deemed to be equally at fault or negligent.
3. Where no person liable to pay compensation under this section caused or contributed to the loss, damage, cost or expense by fault or negligence, each of the persons liable to pay compensation is liable to make contribution to and indemnify each other in such degree as is determined to be just and equitable in the circumstances. R.S.O. 1990, c. E.19, s. 99 (8).

Enforcement of contribution

(9) The right to contribution or indemnification under subsection (8) may be enforced by action in a court of competent jurisdiction. R.S.O. 1990, c. E.19, s. 99 (9).

Adding parties

(10) Wherever it appears that a person not already a party to an action under this section may be liable in respect of the loss, damage, cost or expense for which compensation is claimed, the person may be added as a party defendant to the action upon such terms as are considered just or may be made a third party to the action in the manner prescribed by the rules of practice for adding third parties. R.S.O. 1990, c. E.19, s. 99 (10).

Settlement and recovery between persons liable

(11) A person liable to pay compensation under this section may recover contribution or indemnity from any other person liable to pay compensation under this section in respect of the loss, damage, cost or expense for which the compensation is claimed by settling with the person suffering the loss, damage, cost or expense and continuing the action or commencing an action against such other person. R.S.O. 1990, c. E.19, s. 99 (11).

Amount of settlement

(12) A person who has settled a claim and continued or commenced an action as mentioned in subsection (11) must satisfy the court that the amount of the settlement was reasonable, and, if the court finds the amount was excessive, the court may fix the amount at which the claim should have been settled. R.S.O. 1990, c. E.19, s. 99 (12).

(13) REPEALED: 2002, c. 24, Sched. B, s. 25.

(14) REPEALED: 2002, c. 24, Sched. B, s. 25.

Director's order for costs and expenses

99.1 (1) If a pollutant is spilled, the Director may issue an order requiring the owner of the pollutant or the person having control of the pollutant to pay to the Minister of Finance any reasonable costs or expenses incurred by Her Majesty in right of Ontario for the following purposes:

1. To prevent, eliminate or ameliorate any adverse effects or to restore the natural environment.
2. To prevent or reduce the risk of future discharges into the natural environment of any pollutant owned by or under the charge, management or control of the person against whom the order is made. 2005, c. 12, s. 1 (19).

Same

(2) If an order to pay costs or expenses is issued under subsection (1) to a receiver or trustee in bankruptcy, the receiver or trustee in bankruptcy is not personally liable for those costs or expenses unless the spill arose from the gross negligence or wilful misconduct of the receiver or trustee in bankruptcy or of a receiver representative or trustee in bankruptcy representative. 2005, c. 12, s. 1 (19).

Contents

(3) An order under subsection (1) shall include,

(a) a statement identifying the spill to which the order relates;

(b) a description of things for which Her Majesty in right of Ontario incurred costs or expenses for a purpose referred to in subsection (1);

(c) a detailed account of the costs and expenses incurred in doing the things; and

(d) a direction that the person to whom the order is issued pay the costs and expenses to the Minister of Finance. 2005, c. 12, s. 1 (19).

Application of ss. 153 and 155

(4) Sections 153 and 155 apply, with necessary modifications, in respect of an order under subsection (1). 2005, c. 12, s. 1 (19).

Joint and several liability

(5) Where two or more persons are liable to pay costs or expenses pursuant to an order under subsection (1), they are jointly and severally liable to Her Majesty in right of Ontario. 2005, c. 12, s. 1 (19).

Contribution and indemnity

(6) Where the Director is entitled to issue an order to two or more persons under subsection (1) in respect of costs or expenses, as between themselves, in the absence of an express or implied contract, each of those persons is liable to make contribution to and indemnify the other in accordance with the following principles:

1. Where the Director is entitled to issue an order to two or more persons under subsection (1) in respect of costs or expenses and one or more of them caused or contributed to the costs or expenses by fault or negligence, such one or more of them shall make contribution to and indemnify,
   i. where one person is found at fault or negligent, any other person to whom the Director is entitled to issue an order under subsection (1), and
   ii. where two or more persons are found at fault or negligent, each other and any other person to whom the Director is entitled to issue an order under subsection (1) in the degree in which

each of such two or more persons caused or contributed to the costs or expenses by fault or negligence.

2. For the purpose of subparagraph 1 ii, if it is not practicable to determine the respective degrees in which the fault or negligence of two or more persons to whom the Director is entitled to issue an order under subsection (1) caused or contributed to the costs or expenses, such two or more persons shall be deemed to be equally at fault or negligent.

3. Where no person to whom the Director is entitled to issue an order under subsection (1) caused or contributed to the costs or expenses by fault or negligence, each of the persons to whom the Director is entitled to issue an order under subsection (1) is liable to make contribution to and indemnify each other in such degree as is determined to be just and equitable in the circumstances. 2005, c. 12, s. 1 (19).

Enforcement of contribution

(7) The right to contribution or indemnification under subsection (6) may be enforced by action in a court of competent jurisdiction. 2005, c. 12, s. 1 (19).

Adding parties

(8) Wherever it appears that a person not already a party to an action under subsection (7) may be a person to whom the Director is entitled to issue an order under subsection (1) in respect of the costs or expenses, the person may be added as a party defendant to the action on such terms as are considered just or may be made a third party to the action in the manner prescribed by the rules of court for adding third parties. 2005, c. 12, s. 1 (19).

Action by municipality or designated persons, spills

100. (1) Where a pollutant is spilled,

(a) a municipality; and

(b) REPEALED: 2002, c. 17, Sched. F, Table.

(c) a person or a member of a class of persons designated by the regulations,

or any one or more of them, may do everything practicable to prevent, eliminate and ameliorate any adverse effects and to restore the natural environment. R.S.O. 1990, c. E.19, s. 100 (1); 2002, c. 17, Sched. F, Table; 2005, c. 12, s. 1 (20).

Right of entry and immunity from prosecution

(2) A municipality or a person or member of a class of persons designated by the regulations acting under subsection (1) or an employee or agent of any of them so acting has the rights of a person under section 95 and, if acting in good faith and in a reasonable manner, the immunity conferred on a person by section 98. R.S.O. 1990, c. E.19, s. 100 (2); 2002, c. 17, Sched. F, Table.

Co-operation with others

(3) A municipality or a person or a member of a class of persons designated by the regulations acting under subsection (1) must,

(a) co-ordinate efforts with;

(b) make use of the expertise of; and

(c) not impede,

a person carrying out a duty, order or direction under this Part. R.S.O. 1990, c. E.19, s. 100 (3); 2002, c. 17, Sched. F, Table.

Right to compensation

(4) A municipality or a person or member of a class of persons designated by the regulations has the right to compensation from the owner of the pollutant and the person having control of the pollutant for all reasonable cost and expense incurred in acting under subsection (1). R.S.O. 1990, c. E.19, s. 100 (4); 2002, c. 17, Sched. F, Table.

Enforcement

(5) The right to compensation under subsection (4) may be enforced by action in a court of competent jurisdiction. R.S.O. 1990, c. E.19, s. 100 (5).

Application of subss. 99 (6) to (12)

(6) Where the right to compensation under subsection (4) arises, subsections 99 (6) to (12) apply with necessary modifications. R.S.O. 1990, c. E.19, s. 100 (6); 2002, c. 24, Sched. B, s. 35.

Municipality's order for costs and expenses

100.1 (1) If a pollutant is spilled, a municipality may issue an order requiring the owner of the pollutant or the person having control of the pollutant to pay to the municipality any reasonable costs or expenses incurred by the municipality, or a local board of the municipality within the meaning of the *Municipal Affairs Act*, to prevent, eliminate or ameliorate any adverse effects or to restore the natural environment. 2005, c. 12, s. 1 (21).

Same

(2) If an order to pay costs or expenses is issued under subsection (1) to a receiver or trustee in bankruptcy, the receiver or trustee in bankruptcy is not personally liable for those costs unless the spill arose from the gross negligence or wilful misconduct of the receiver or trustee in bankruptcy or of a receiver representative or trustee in bankruptcy representative. 2005, c. 12, s. 1 (21).

Contents

(3) An order under subsection (1) shall include,

(a) a statement identifying the spill to which the order relates;

(b) a description of things for which the municipality or local board incurred costs or expenses for a purpose referred to in subsection (1);

(c) a detailed account of the costs and expenses incurred in doing the things; and

(d) a direction that the person to whom the order is issued pay the costs and expenses to the municipality. 2005, c. 12, s. 1 (21).

Application of s. 153

(4) Section 153 applies, with necessary modifications, in respect of an order under subsection (1). 2005, c. 12, s. 1 (21).

Lien

(5) If a municipality issues an order under subsection (1) against a person who owns real property in the municipality and the pollutant was spilled on that property, the municipality shall have a lien on the property for the amount specified in the order and that amount shall have priority lien status, as described in section 1 of the *Municipal Act, 2001* or section 3 of the *City of Toronto Act, 2006*, as the case may be. 2005, c. 12, s. 1 (21); 2006, c. 32, Sched. C, s. 19 (1).

Contribution and indemnity

(6) Subsections 99.1 (5) to (8) apply, with necessary modifications, in respect of orders issued by a municipality under subsection (1) and, for that purpose, a reference in those subsections to Her Majesty in right of Ontario shall be deemed to be a reference to the municipality. 2005, c. 12, s. 1 (21).

Appeals

(7) A person to whom an order of a municipality is directed under subsection (1) may, by written notice served on the municipality and the Tribunal within 15 days after service on the person of a copy of the order, require a hearing by the Tribunal. 2005, c. 12, s. 1 (21).

Extension of time for requiring hearing

(8) The Tribunal shall extend the time in which a person may give a notice under subsection (7) requiring a hearing if, in the Tribunal's opinion, it is just to do so because service of the order on the person did not give the person notice of the order. 2005, c. 12, s. 1 (21).

Contents of notice requiring hearing

(9) A person who gives a notice under subsection (7) shall state in the notice,

(a) the portions of the order in respect of which the hearing is required; and

(b) the grounds on which the person intends to rely at the hearing. 2005, c. 12, s. 1 (21).

Effect of contents of notice

(10) Except with leave of the Tribunal, at a hearing by the Tribunal, the person who required the hearing under subsection (7) is not entitled to appeal a portion of the order, or to rely on a ground, that is not stated in the person's notice requiring the hearing. 2005, c. 12, s. 1 (21).

Leave by Tribunal

(11) The Tribunal may grant the leave referred to in subsection (10) if the Tribunal is of the opinion that to do so is proper in the circumstances, and the Tribunal may give such directions as the Tribunal considers proper consequent on the granting of the leave. 2005, c. 12, s. 1 (21).

Automatic stay on appeal

(12) The commencement of a proceeding before the Tribunal stays the operation of the order made under subsection (1). 2005, c. 12, s. 1 (21).

Parties to hearing

(13) The person requiring the hearing, the municipality and any other person specified by the Tribunal are parties to the hearing. 2005, c. 12, s. 1 (21).

Costs may be increased

(14) At a hearing by the Tribunal under this section, the municipality may, on reasonable notice to all parties, ask the Tribunal to amend the order by adding new costs or expenses or by increasing the amounts set out in the order. 2005, c. 12, s. 1 (21).

What Tribunal may consider

(15) At a hearing by the Tribunal under this section, the Tribunal shall consider only,

(a) whether the person to whom the order was directed was, immediately before the discharge into the natural environment,

(i) the owner of the thing that was discharged,

(ii) the person having charge, management or control of the thing that was discharged, or

(iii) the employee or agent of the person having charge, management or control of the thing that was discharged; or

(b) whether any of the costs or expenses specified in the order,

(i) do not relate to things for which the municipality or local board incurred costs or expenses for a purpose referred to in subsection (1), or

(ii) are unreasonable having regard to what was done. 2005, c. 12, s. 1 (21).

Appeals from Tribunal

(16) Any party to a hearing before the Tribunal under this section may appeal from its decision or order on a question of law to the Divisional Court in accordance with the rules of court. 2005, c. 12, s. 1 (21).

Appeal to Minister

(17) A party to a hearing before the Tribunal under this section may, within 30 days after receipt of the decision of the Tribunal or within 30 days after final disposition of an appeal, if any, under subsection (16), appeal in writing to the Minister on any matter other than a question of law and the Minister shall confirm, alter or revoke the decision of the Tribunal as to the matter in appeal as the Minister considers in the public interest. 2005, c. 12, s. 1 (21).

Decision of Tribunal not automatically stayed on appeal

(18) An appeal of a decision of the Tribunal to the Divisional Court or to the Minister under this section does not stay the operation of the decision, unless the Tribunal orders otherwise. 2005, c. 12, s. 1 (21).

Divisional Court or Minister may grant or set aside stay

(19) If a decision of the Tribunal is appealed to the Divisional Court or to the Minister under this section, the Divisional Court or the Minister may,

(a) stay the operation of the decision; or

(b) set aside a stay ordered by the Tribunal under subsection (18). 2005, c. 12, s. 1 (21).

Right to compensation from Crown

101. (1) A person, other than a person referred to in subsection (2), entitled under clause 99 (2) (b) to compensation for reasonable cost and expense has the right, subject to the conditions prescribed by the regulations, to payment of such compensation from Her Majesty in right of Ontario.

Application of subs. (1)

(2) Subsection (1) does not give a right to payment of compensation to,

(a) the owner of the pollutant;

(b) the person having control of the pollutant;

(c) a person liable at law other than under this Part for loss, damage, cost or expense arising from the spill of the pollutant;

(d) a person that has a right under a contract to payment of the reasonable cost and expense referred to in subsection (1),

or an employee or agent of any of them.

Enforcement of right

(3) The right to payment of compensation under subsection (1) may be enforced by action in a court of competent jurisdiction.

Recovery by Crown

(4) Where compensation has been paid under subsection (1), Her Majesty in right of Ontario has the right to recover in the place of the person to whom the compensation was paid to the extent of the amount of the payment of compensation by and any costs of Her Majesty.

Idem

(5) Her Majesty in right of Ontario is entitled under subsection (4) to all rights of recovery whether under this Part or otherwise that the person has against any other person.

Idem

(6) For the purposes of subsection (4), the payment of compensation by Her Majesty in right of Ontario under subsection (1) shall not be construed to affect the right of the person under subsection 99 (2) to compensation for reasonable cost and expense so paid by Her Majesty.

Enforcement

(7) The right to compensation under subsection (4) may be enforced in a court of competent jurisdiction by Her Majesty in right of Ontario in Her Majesty's name or in the name of the person to whom the compensation has been paid.

Disentitlement

(8) A person that fails to comply with or contravenes a condition prescribed by the regulations that must be complied with before payment of compensation under subsection (1) is disentitled to the payment.

Repayment

(9) Where a person fails to comply with or contravenes a condition prescribed by the regulations that attaches to the payment of compensation under subsection (1), Her Majesty in right of Ontario has the right to recover the amount of the compensation paid and the right may be enforced in a court of competent jurisdiction.

Right of insurer

(10) An insurer as defined in the *Insurance Act* only acquires its subrogated right of recovery under any law, including sections 152 and 278 of the *Insurance Act*, or the provisions of any contract of insurance in respect of a person to whom a payment of compensation has been made under subsection (1) when Her Majesty in right of Ontario consents in writing to a settlement in accordance with which the right of recovery is released or to the bringing of an action to enforce the right of recovery.

Where consent not obtained

(11) If an insurer referred to in subsection (10) purports to make a settlement or brings an action without the consent of Her Majesty, the insurer is liable to Her Majesty in right of Ontario in an amount equal to the amount of the payment of compensation under subsection (1) to the extent of the recovery under the judgment with respect to which the action was brought or the amount paid to the insurer in accordance with the settlement.

Effect of release

(12) A release in furtherance of or in accordance with a purported settlement made without the consent of Her Majesty in right of Ontario is a nullity.

Withholding of consent

(13) Her Majesty shall not unreasonably withhold the consent referred to in subsections (10), (11) and (12), but Her Majesty may attach conditions to the consent and may revoke the consent for breach of such a condition.

Conflict

(14) This section applies despite any other law or any contract of insurance. R.S.O. 1990, c. E.19, s. 101.

Transfer of rights

102. (1) All rights of recovery of compensation of the Environmental Compensation Corporation are transferred to Her Majesty in right of Ontario. 1997, c. 7, s. 2.

Same

(2) All assets, other than rights of recovery of compensation, and liabilities of the Environmental Compensation Corporation are transferred to and assumed by Her Majesty in right of Ontario as represented by the Minister of the Environment. 1997, c. 7, s. 2; 2000, c. 26, Sched. E, s. 3 (1).

Note: No application for payment of a claim that is made to the Environmental Compensation Corporation after June 3, 1996 shall be processed and no payment shall be made pursuant to such an application. See: 1997, c. 7, s. 11.

Right of action preserved

103. (1) Despite the repeal of section 110 by the *Environmental Approvals Improvement Act, 1997*, Her Majesty in right of Ontario may start or continue a proceeding for the recovery of compensation or pursue any action under that section, as if it had not been repealed, in the place of the Environmental Compensation Corporation. 1997, c. 7, s. 2.

Repayment

(2) A person who received payment, pursuant to a certificate of the Environmental Compensation Corporation, from the Minister of Finance of Ontario for loss or damage as a result of a spill and recovers compensation from another person for the same loss or damage shall repay to the Minister of Finance an amount equal to the total amount recovered from the Minister of Finance and the other person less the financial value of the loss or damage suffered, but the amount repayable does not exceed the payment received from the Minister of Finance. 1997, c. 7, s. 2.

Note: No application for payment of a claim that is made to the Environmental Compensation Corporation after June 3, 1996 shall be processed and no payment shall be made pursuant to such an application. See: 1997, c. 7, s. 11.

Testimony

104. Except in a proceeding under this Act or the regulations, no person who obtained information in the course of his or her duties or employment with the Environmental Compensation Corporation in connection with the administration of, or a proceeding under, this Act or the regulations is required to give testimony, other than testimony about a spill of a pollutant, in a civil suit or proceeding with regard to that information. 1997, c. 7, s. 2.

Note: No application for payment of a claim that is made to the Environmental Compensation Corporation after June 3, 1996 shall be processed and no payment shall be made pursuant to such an application. See: 1997, c. 7, s. 11.

Corporation dissolved

105. The Environmental Compensation Corporation is dissolved. 1997, c. 7, s. 2.

Note: No application for payment of a claim that is made to the Environmental Compensation Corporation after June 3, 1996 shall be processed and no payment shall be made pursuant to such an application. See: 1997, c. 7, s. 11.

106.-121. REPEALED: 1997, c. 7, s. 2.

Right of recourse

122. Except as expressly provided in this Part, nothing in this Part limits or restricts any right or remedy that any person may have against another person. R.S.O. 1990, c. E.19, s. 122.

Limitation of farmers' liability

123. The liability under this Part of farmers who are owners of pollutants or persons having control of pollutants and who are members of a class prescribed by the regulations is limited to the amount prescribed by the regulations or the amount calculated in the manner prescribed by the regulations in respect of such farmers. R.S.O. 1990, c. E.19, s. 123.

PART XI
CONTROL ORDERS AND STOP ORDERS

Control orders

124. (1) The Director may, where he or she is authorized by this Act to issue a control order, order the person to whom it is directed to do any one or more of the following, namely,

(a) to limit or control the rate of discharge of the contaminant into the natural environment in accordance with the directions set out in the order;

(b) to stop the discharge of the contaminant into the natural environment,

(i) permanently,

(ii) for a specified period, or

(iii) in the circumstances set out in the order;

(c) to comply with any directions set out in the order relating to the manner in which the contaminant may be discharged into the natural environment;

(d) to comply with any directions set out in the order relating to the procedures to be followed in the control or elimination of the discharge of the contaminant into the natural environment;

(e) to install, replace or alter any equipment or thing designed to control or eliminate the addition, emission or discharge of the contaminant into the natural environment;

(f) to monitor and record, both in the manner specified in the order, the discharge into the natural environment of the contaminant specified in the order and to report thereon to the Director;

(g) to study and to report to the Director upon,

(i) measures to control the discharge into the natural environment of the contaminant specified in the order,

(ii) the effects of the discharge into the natural environment of the contaminant specified in the order,

(iii) the natural environment into which the contaminant specified in the order is being or is likely to be discharged; and

(h) to report to the Director in respect of fuel, materials and methods of production used and intended to be used, and the wastes that will or are likely to be generated.

Report to Director

(2) A person required under subsection (1) to study and to report to the Director on a matter shall report to the Director in the manner, at the times and with the information specified by the Director in the order. R.S.O. 1990, c. E.19, s. 124.

Compliance with control order

125. Subject to section 140, when a copy of a control order is served upon the person to whom it is directed, that person,

(a) shall comply with the order forthwith; or

(b) shall, if the order sets out a future date by which it is to be complied with, comply with the order on or not later than such future date. R.S.O. 1990, c. E.19, s. 125.

Further order

126. The Director may, by a further order, amend, vary or revoke a control order made under this Act and in each case shall cause a copy of the order to be served on the person to whom the order so amended, replaced or revoked was directed. R.S.O. 1990, c. E.19, s. 126.

Where Director proposes to issue control order

127. (1) Where the Director proposes to issue a control order, the Director shall serve notice of his or her intention, together with written reasons therefor and a copy of the report of the provincial officer or other person designated under this Act upon which the reasons are based, and shall not issue the control order until fifteen days after the service thereof.

Submissions to Director

(2) The person to whom the Director intends to issue the control order may make submissions to the Director at any time before the control order is issued. R.S.O. 1990, c. E.19, s. 127.

Content of stop order

128. The Director may, where he or she is authorized by this Act to issue a stop order, order the person to whom it is directed to immediately stop or cause the source of contaminant to stop discharging into the natural environment any contaminant either permanently or for a specific period of time. R.S.O. 1990, c. E.19, s. 128.

Form of stop order

129. A stop order shall be in writing and shall include written reasons for the order. R.S.O. 1990, c. E.19, s. 129.

Stop orders, compliance and revocation

Compliance

130. (1) When a copy of a stop order is served upon the person to whom it is directed, that person shall comply with the order immediately.

Revocation

(2) The Director may by a further order revoke a stop order and in such case shall cause a copy of the order to be served on the person to whom the stop order was directed. R.S.O. 1990, c. E.19, s. 130.

PART XII
FINANCIAL ASSURANCE

Definitions, Part XII

131. In this Part,

"approval" means program approval, environmental compliance approval or renewable energy approval, and includes a permit or approval issued by a Director under the *Ontario Water Resources Act*, but does not include an approval under Part X of this Act; ("autorisation")

"bank" means a bank named in Schedule I or Schedule II to the *Bank Act* (Canada); ("banque")

"environmental measures" means,

(a) one or more of the measures set out in clauses 132 (1) (a) to (c) or 132 (1.1) (a) to (c), or

(b) one or more of the measures prescribed by the regulations under clause 176 (2.4) (i); ("mesures d'ordre environnemental")

"financial assurance" means one or more of,

(a) cash, in the amount specified in the approval, order, certificate of property use or a regulation made under clause 176 (2.4) (i),

(b) a letter of credit from a bank, in the amount and terms specified in the approval, order, certificate of property use or a regulation made under clause 176 (2.4) (i),

(c) negotiable securities issued or guaranteed by the Government of Ontario or the Government of Canada in the amount specified in the approval, order, certificate of property use or a regulation made under clause 176 (2.4) (i),

(d) a personal bond accompanied by collateral security, each in the form, terms and amount specified in the approval, order, certificate of property use or a regulation made under clause 176 (2.4) (i),

(e) the bond of an insurer licensed under the *Insurance Act* to write surety and fidelity insurance in the form, terms and amount specified in the approval, order, certificate of property use or a regulation made under clause 176 (2.4) (i),

(f) a bond of a guarantor, other than an insurer referred to in clause (e), accompanied by collateral security, each in the form, terms and amount specified in the approval, order, certificate of property use or a regulation made under clause 176 (2.4) (i),

(g) an agreement, in the form and terms specified in the approval, order or certificate of property use, and

(h) an agreement, in the form and terms prescribed by the regulations; ("garantie financière")

"order" means an order by the Director under this Act, and includes an order, notice, direction, requirement or report made by a Director under the *Ontario Water Resources Act*, but does not include an order under section 136 (order for performance of environmental measures) of this Act; ("arrêté")

"works" means an activity, facility, thing, undertaking or site in respect of which an approval or order is issued or a registration under Part II.2 is in effect. ("travaux") R.S.O. 1990, c. E.19, s. 131; 1993, c. 27, Sched.; 1997, c. 19, s. 34; 2001, c. 17, s. 2 (6, 7); 2009, c. 12, Sched. G, s. 6; 2010, c. 16, Sched. 7, s. 2 (45-47).

Financial assurance

Approval or order

132. (1) The Director may include in an approval or order in respect of a works a requirement that the person to whom the approval is issued or the order is directed provide financial assurance to the Crown in right of Ontario for any one or more of,

(a) the performance of any action specified in the approval or order;

(b) the provision of temporary or permanent alternate water supplies to replace those that the Director has reasonable and probable grounds to believe are or are likely to be contaminated or otherwise interfered with by the works to which the approval or order is related; and

(c) measures appropriate to prevent adverse effects upon and following the cessation or closing of the works. R.S.O. 1990, c. E.19, s. 132 (1); 2005, c. 12, s. 1 (22).

Certificate of property use

(1.1) The Director may include in a certificate of property use a requirement that the person to whom the certificate is issued provide financial assurance to the Crown in right of Ontario for any one or more of,

(a) the performance of any action specified in the certificate of property use;

(b) the provision of temporary or permanent alternate water supplies to replace those that the Director has reasonable and probable grounds to believe are or are likely to be contaminated or otherwise interfered with by a contaminant on, in or under the property to which the certificate of property use relates; and

(c) measures appropriate to prevent adverse effects in respect of the property to which the certificate of property use relates. 2001, c. 17, s. 2 (8); 2005, c. 12, s. 1 (23).

Changes in amount of financial assurance

(2) A requirement under subsection (1) or (1.1) may provide that the financial assurance may be provided, reduced or released in stages specified in the approval, order or certificate of property use. 2001, c. 17, s. 2 (9).

Amendment of approval, order or certificate of property use

(3) The Director may amend an approval, order or certificate of property use to change a requirement as to financial assurance contained in the approval, order or certificate of property use. 2001, c. 17, s. 2 (9).

Failure to provide financial assurance

133. (1) Failure to provide financial assurance specified in an approval or in accordance with a stage specified in an approval is grounds for revocation of the approval and for an order in writing by the Director prohibiting or restricting the carrying on, operation or use of the works in respect of which the financial assurance is required. R.S.O. 1990, c. E.19, s. 133 (1).

Idem, order

(2) Failure to provide financial assurance specified in an order or in accordance with a stage specified in an order is grounds for an order in writing by the Director prohibiting or restricting the carrying on, operation or use of the works in respect of which the financial assurance is required. R.S.O. 1990, c. E.19, s. 133 (2).

Same, certificate of property use

(3) Failure to provide financial assurance specified in a certificate of property use or in accordance with a stage specified in a certificate of property use is grounds for an order in writing by the Director

prohibiting or restricting the use of the property to which the certificate of property use relates. 2001, c. 17, s. 2 (10).

Return or release of financial assurance

134. (1) Upon request, part or all of the financial assurance given in respect of a works or certificate of property use may be returned or released pursuant to an order in writing by the Director. R.S.O. 1990, c. E.19, s. 134 (1); 2001, c. 17, s. 2 (11).

Grounds for order

(2) The Director may make an order mentioned in subsection (1) if satisfied that the financial assurance returned or released is not required in respect of the works or certificate of property use. R.S.O. 1990, c. E.19, s. 134 (2); 2001, c. 17, s. 2 (12).

Continuation of financial assurance

135. The Director may convert a financial assurance to cash to be held by the Crown to the same purposes as the financial assurance or otherwise realize the financial assurance unless the financial assurance is renewed at least thirty days before it would otherwise expire. R.S.O. 1990, c. E.19, s. 135.

Order for use of financial assurance

136. (1) In the circumstances set out in subsection (2), the Director by order may require the performance of environmental measures for which the Crown holds financial assurance and may require the use of the financial assurance for the performance of the environmental measures. R.S.O. 1990, c. E.19, s. 136 (1).

Basis for order

(2) The Director may make an order mentioned in subsection (1) if the Director has reasonable and probable grounds to believe that any environmental measure required by the approval, order, certificate of property use or a regulation made under clause 176 (2.4) (i) in respect of which the financial assurance was given has not been or will not be carried out in accordance with the requirement. 2010, c. 16, Sched. 7, s. 2 (48).

Parties affected

(3) An order under this section shall be directed to,

(a) the person,

(i) to whom the approval, order or certificate of property use was issued or any other person who is bound by the approval, order or certificate of property use, or

(ii) who registered the activity prescribed by the regulations for the purposes of subsection 20.21 (1), if the financial assurance has been provided pursuant to a regulation made under clause 176 (2.4) (i); and

(b) any person that to the knowledge of the Director has provided the financial assurance for or on behalf of a person referred to in clause (a), or any successor or assignee of a person that to the knowledge of the Director has provided the financial assurance for or on behalf of a person referred to in clause (a). 2001, c. 17, s. 2 (14); 2010, c. 16, Sched. 7, s. 2 (49).

Performance

(4) Upon the issuance of an order by the Director under subsection (1), the Crown may,

(a) use any cash;

(b) realize any bond or other form of security, and use the money derived therefrom; and

(c) enforce any agreement,

provided or obtained as the financial assurance for the performance of the environmental measures and may carry out the environmental measures. R.S.O. 1990, c. E.19, s. 136 (4).

PART XIII
APPEALS TO TRIBUNAL

137. REPEALED: 2000, c. 26, Sched. F, s. 12 (8).

Notice to municipalities, certain orders and decisions

138. When the Director makes an order or decision under this Act of a class prescribed by the regulations, the Director shall serve notice of the order or decision, together with written reasons therefor, on the clerk of any local municipality in which there is land on which the order or decision requires something to be done, permits something to be done or prohibits something from being done. R.S.O. 1990, c. E.19, s. 138.

Notice of decisions, general

When Director refuses approval, etc.

139. (1) When the Director,

(a) refuses to give his or her approval of plans and specifications;

(b) requires a condition precedent to the giving of his or her approval;

(c) refuses to issue an environmental compliance approval or renewable energy approval;

(d) refuses to renew a renewable energy approval;

(e) suspends or revokes an environmental compliance approval or renewable energy approval; or

(f) issues a certificate of property use,

the Director shall serve notice upon the applicant or holder, as the case may be, together with written reasons therefor, and the applicant or holder may, by written notice served upon the Director and the Tribunal within fifteen days after the service of the notice, require a hearing by the Tribunal. R.S.O. 1990, c. E.19, s. 139 (1); 2000, c. 26, Sched. F, s. 12 (12); 2001, c. 17, s. 2 (15); 2009, c. 12, Sched. G, s. 7 (1); 2010, c. 16, Sched. 7, s. 2 (50).

When Director refuses licence, permit or approval

(2) When the Director,

(a) refuses to issue or renew or revokes or suspends a licence, permit or approval;

(b) imposes terms and conditions in issuing an environmental compliance approval;

(c) imposes terms and conditions in issuing or renewing a renewable energy approval, licence, permit or approval;

(d) alters the terms and conditions in an environmental compliance approval, renewable energy approval, certificate of property use, licence or permit or approval after it is issued; or

(e) imposes new terms and conditions in an environmental compliance approval, renewable energy approval or certificate of property use,

the Director shall serve notice together with written reasons therefor upon the applicant or the person to whom the licence, permit, approval, environmental compliance approval, renewable energy approval or certificate of property use is issued, as the case may be, and the applicant or person may, by written notice served upon the Director and the Tribunal within 15 days after the service of the notice, require a

hearing by the Tribunal. 2007, c. 7, Sched. 13, s. 1; 2009, c. 12, Sched. G, s. 7 (2, 3); 2010, c. 16, Sched. 7, s. 2 (51, 52).

Exception

(3) Subsections (1) and (2) do not apply with respect to,

(a) a decision of the Tribunal that is implemented by the Director in accordance with subsection 20.15 (6) or 33 (4); or

(b) terms and conditions in an environmental compliance approval as a result of an application under Part II.1, if the terms and conditions are substantially the same as those contained in an approval that was previously issued and is still in effect at the time that the decision is made in respect of the application. 2010, c. 16, Sched. 7, s. 2 (53).

No hearing, Part II.2 activity

(4) Any hearing required under this section in respect of an environmental compliance approval is discontinued if the activity in respect of which the approval or the part of the approval that is in question is prescribed by the regulations for the purposes of subsection 20.21 (1), unless the Director has issued an order under section 20.18 in respect of the activity. 2010, c. 16, Sched. 7, s. 2 (53).

Appeal of order

140. (1) A person to whom an order of the Director is directed may, by written notice served upon the Director and the Tribunal within fifteen days after service upon the person of a copy of the order, require a hearing by the Tribunal. R.S.O. 1990, c. E.19, s. 140 (1); 2000, c. 26, Sched. F, s. 12 (12).

Failure or refusal to issue, etc., order

(2) No failure or refusal to issue, amend, vary or revoke an order is an order. R.S.O. 1990, c. E.19, s. 140 (2).

Extension of time for requiring hearing

141. The Tribunal shall extend the time in which a person may give a notice under section 139 or 140 requiring a hearing on an order or decision where, in the Tribunal's opinion, it is just to do so because service of the order or decision on the person did not give the person notice of the order or decision. R.S.O. 1990, c. E.19, s. 141; 2000, c. 26, Sched. F, s. 12 (12).

Contents of notice requiring hearing

142. (1) An applicant for a hearing by the Tribunal shall state in the notice requiring the hearing,

(a) the portions of the order, certificate of property use, direction, term, condition, suspension, revocation or licence or other form of permission in respect of which the hearing is required; and

(b) the grounds on which the applicant for the hearing intends to rely at the hearing. R.S.O. 1990, c. E.19, s. 142 (1); 2000, c. 26, Sched. F, s. 12 (12); 2001, c. 17, s. 2 (18).

Effect of contents of notice

(2) Except with leave of the Tribunal, at a hearing by the Tribunal an applicant is not entitled to appeal a portion of the order, certificate of property use, direction, term, condition, suspension, revocation or licence or other form of permission, or to rely on a ground, that is not stated in the applicant's notice requiring the hearing. R.S.O. 1990, c. E.19, s. 142 (2); 2000, c. 26, Sched. F, s. 12 (12); 2001, c. 17, s. 2 (19).

Leave by Tribunal

(3) The Tribunal may grant the leave referred to in subsection (2) where the Tribunal is of the opinion that to do so is proper in the circumstances, and the Tribunal may give such directions as the Tribunal considers proper consequent upon the granting of the leave. R.S.O. 1990, c. E.19, s. 142 (3); 2000, c. 26, Sched. F, s. 12 (12).

Non-application, s. 142.1 hearing

(4) This section does not apply in the case of a hearing required under section 142.1. 2009, c. 12, Sched. G, s. 8.

Hearing re renewable energy approval

142.1 (1) This section applies to a person resident in Ontario who is not entitled under section 139 to require a hearing by the Tribunal in respect of a decision made by the Director under section 47.5. 2009, c. 12, Sched. G, s. 9.

Same

(2) A person mentioned in subsection (1) may, by written notice served upon the Director and the Tribunal within 15 days after a day prescribed by the regulations, require a hearing by the Tribunal in respect of a decision made by the Director under clause 47.5 (1) (a) or subsection 47.5 (2) or (3). 2009, c. 12, Sched. G, s. 9.

Grounds for hearing

(3) A person may require a hearing under subsection (2) only on the grounds that engaging in the renewable energy project in accordance with the renewable energy approval will cause,

(a) serious harm to human health; or

(b) serious and irreversible harm to plant life, animal life or the natural environment. 2009, c. 12, Sched. G, s. 9.

Contents of notice requiring hearing, s. 142.1 hearing

142.2 (1) An applicant for a hearing required under section 142.1 shall state in the notice requiring the hearing,

(a) a description of how engaging in the renewable energy project in accordance with the renewable energy approval will cause,

(i) serious harm to human health, or

(ii) serious and irreversible harm to plant life, animal life or the natural environment;

(b) the portion of the renewable energy approval in respect of which the hearing is required; and

(c) the relief sought. 2009, c. 12, Sched. G, s. 10.

Effect of contents of notice, s. 142.1 hearing

(2) Except with leave of the Tribunal, at a hearing by the Tribunal an applicant mentioned in subsection (1) is not entitled to appeal a portion of the renewable energy approval that is not stated in the applicant's notice requiring the hearing. 2009, c. 12, Sched. G, s. 10.

Leave by Tribunal, s. 142.1 hearing

(3) The Tribunal may grant the leave referred to in subsection (2) where the Tribunal is of the opinion that to do so is proper in the circumstances, and the Tribunal may give such directions as the Tribunal considers proper consequent upon the granting of the leave. 2009, c. 12, Sched. G, s. 10.

No automatic stay on appeal

143. (1) The commencement of a proceeding before the Tribunal under this Part does not stay the operation of a decision or order made under this Act, other than,

(a) an order to pay costs and expenses under section 99.1;

(b) an order to pay the costs of work made under section 150;

(c) an order to pay an environmental penalty; or

(d) an order to pay an administrative penalty. 2005, c. 12, s. 1 (24); 2010, c. 16, Sched. 7, s. 2 (54).

Tribunal may grant stay

(2) The Tribunal may, on the application of a party to a proceeding before it, stay the operation of a decision or order, other than,

(a) an order to monitor, record and report; or

(b) an order issued under section 168.8, 168.14 or 168.20. 2001, c. 17, s. 2 (20).

When stay may not be granted

(3) The Tribunal shall not stay the operation of a decision or order if doing so would result in,

(a) danger to the health or safety of any person;

(b) impairment or serious risk of impairment of the quality of the natural environment for any use that can be made of it; or

(c) injury or damage or serious risk of injury or damage to any property or to any plant or animal life. R.S.O. 1990, c. E.19, s. 143 (3); 2000, c. 26, Sched. F, s. 12 (12).

Right to apply to remove stay: new circumstances

(4) A party to a proceeding may apply for the removal of a stay if relevant circumstances have changed or have become known to the party since the stay was granted, and the Tribunal may grant the application. R.S.O. 1990, c. E.19, s. 143 (4); 2000, c. 26, Sched. F, s. 12 (12).

Right to apply to remove stay: new party

(5) A person who is made a party to a proceeding after a stay is granted may, at the time the person is made a party, apply for the removal of the stay, and the Tribunal may grant the application. R.S.O. 1990, c. E.19, s. 143 (5); 2000, c. 26, Sched. F, s. 12 (12); 2009, c. 19, s. 67 (3).

Removal of stay by Tribunal

(6) The Tribunal, on the application of a party under subsection (4) or (5), shall remove a stay if failure to do so would have one or more of the results mentioned in clauses (3) (a) to (c). R.S.O. 1990, c. E.19, s. 143 (6); 2000, c. 26, Sched. F, s. 12 (12).

144. REPEALED: 2005, c. 12, s. 1 (25).

Parties to hearing

145. (1) The person requiring the hearing, the Director and any other person specified by the Tribunal are parties to the hearing. R.S.O. 1990, c. E.19, s. 145 (1); 2000, c. 26, Sched. F, s. 12 (12).

Same, s. 142.1 hearing

(2) In the case of a hearing required under section 142.1, the holder of the renewable energy approval is a party to the hearing. 2009, c. 12, Sched. G, s. 11.

Costs specified in order to pay may be increased by Tribunal

145.1 At a hearing by the Tribunal under this Part on an order to pay costs or expenses under section 99.1 or 150, the Director may, on reasonable notice to all parties, ask the Tribunal to amend the order by adding new costs or expenses or by increasing the amounts set out in the order. 2005, c. 12, s. 1 (26).

Powers of Tribunal

145.2 (1) Subject to sections 145.3 and 145.4, a hearing by the Tribunal under this Part shall be a new hearing and the Tribunal may confirm, alter or revoke the action of the Director that is the subject-matter of the hearing and may by order direct the Director to take such action as the Tribunal considers the Director should take in accordance with this Act and the regulations, and, for such purposes, the Tribunal may substitute its opinion for that of the Director. 2005, c. 12, s. 1 (26).

Non-application of subs. (1)

(2) Subsection (1) does not apply in respect of a hearing required under section 142.1. 2009, c. 12, Sched. G, s. 12.

Hearing required under s. 142.1

145.2.1 (1) This section applies to a hearing required under section 142.1. 2009, c. 12, Sched. G, s. 13.

What Tribunal must consider

(2) The Tribunal shall review the decision of the Director and shall consider only whether engaging in the renewable energy project in accordance with the renewable energy approval will cause,

(a) serious harm to human health; or

(b) serious and irreversible harm to plant life, animal life or the natural environment. 2009, c. 12, Sched. G, s. 13.

Onus of proof

(3) The person who required the hearing has the onus of proving that engaging in the renewable energy project in accordance with the renewable energy approval will cause harm referred to in clause (2) (a) or (b). 2009, c. 12, Sched. G, s. 13.

Powers of Tribunal

(4) If the Tribunal determines that engaging in the renewable energy project in accordance with the renewable energy approval will cause harm referred to in clause (2) (a) or (b), the Tribunal may,

(a) revoke the decision of the Director;

(b) by order direct the Director to take such action as the Tribunal considers the Director should take in accordance with this Act and the regulations; or

(c) alter the decision of the Director, and, for that purpose, the Tribunal may substitute its opinion for that of the Director. 2009, c. 12, Sched. G, s. 13.

Same

(5) The Tribunal shall confirm the decision of the Director if the Tribunal determines that engaging in the renewable energy project in accordance with the renewable energy approval will not cause harm described in clause (2) (a) or (b). 2009, c. 12, Sched. G, s. 13.

Deemed confirmation of decision

(6) The decision of the Director shall be deemed to be confirmed by the Tribunal if the Tribunal has not disposed of the hearing in respect of the decision within the period of time prescribed by the regulations. 2009, c. 12, Sched. G, s. 13.

Consistency with policies

145.2.2 A decision or order of the Tribunal under this Part in respect of a renewable energy approval shall be consistent with any policies issued by the Minister under section 47.7 that are in effect on the date of the Director's decision. 2009, c. 12, Sched. G, s. 13.

What Tribunal may consider at hearing to pay costs

145.3 (1) At a hearing by the Tribunal on an order under subsection 99.1 (1) to a person to pay the costs and expenses of doing things, the Tribunal shall consider only,

(a) whether the person to whom the order was directed was, immediately before the discharge into the natural environment,

(i) the owner of the thing that was discharged,

(ii) the person having charge, management or control of the thing that was discharged, or

(iii) the employee or agent of the person having charge, management or control of the thing that was discharged; or

(b) whether any of the costs or expenses specified in the order,

(i) do not relate to things for which Her Majesty in right of Ontario incurred costs or expenses for a purpose referred to in subsection 99.1 (1), or

(ii) are unreasonable having regard to what was done. 2005, c. 12, s. 1 (26).

Same

(2) At a hearing by the Tribunal on an order under subsection 150 (1) or (2.1) to a person to pay the costs of doing things, the Tribunal shall consider only whether any of the costs specified in the order,

(a) do not relate to a thing that the person was required to do by an order or decision made under this Act, as amended by any Tribunal decision or on any appeal from a Tribunal decision; or

(b) are unreasonable having regard to what was done. 2005, c. 12, s. 1 (26).

Same, receiver or trustee in bankruptcy

(3) For the purpose of subsection (2), if the order under subsection 150 (1) or (2.1) was issued to a receiver or trustee in bankruptcy,

(a) the receiver or trustee in bankruptcy shall be deemed to have been required to do any thing that was required to be done by the person whose property the receiver or trustee in bankruptcy holds or administers; and

(b) the receiver or trustee in bankruptcy shall be deemed to have been required to do a thing that, pursuant to subsection 19 (5) or 168.20 (7), the receiver or trustee in bankruptcy was not required to do. 2005, c. 12, s. 1 (26).

Amount of environmental penalties

145.4 (1) For greater certainty, if a hearing by the Tribunal is required under section 140 in respect of an order to pay an environmental penalty, the regulations made under clause 182.1 (15) (d) governing the determination of the amounts of environmental penalties apply to the Tribunal. 2005, c. 12, s. 1 (27).

Amount of administrative penalties

(1.1) For greater certainty, if a hearing by the Tribunal is required under section 140 in respect of an order to pay an administrative penalty, the regulations made under clause 182.3 (13) (b) governing the determination of the amounts of administrative penalties apply to the Tribunal. 2010, c. 16, Sched. 7, s. 2 (55).

Same

(2) Subject to subsection (1), if a hearing by the Tribunal is required under section 140 in respect of an order to pay an environmental penalty or an administrative penalty, the Tribunal shall not substitute its opinion for that of the Director with respect to the amount of the penalty unless the Tribunal considers the amount to be unreasonable. 2005, c. 12, s. 1 (27); 2010, c. 16, Sched. 7, s. 2 (56).

Onus for certain proceedings that relate to discharges

145.5 (1) This section applies to a hearing by the Tribunal under this Part if,

(a) the hearing was required by a regulated person;

(b) the order that is the subject of the hearing is,

(i) an order made under subsection 182.1 (1), or

(ii) an order made under section 157, an order made under section 157.2 that amends an order made under section 157, or an order made under section 157.3 that confirms or alters an order made under section 157, unless the contravention in respect of which the order is made is prescribed by the regulations made under section 182.1 as a contravention in respect of which an order may not be issued under subsection 182.1 (1); and

(c) the order that is the subject of the hearing relates to a contravention described in clause 182.1 (1) (a). 2005, c. 12, s. 1 (27).

Contraventions of s. 14

(2) If this section applies to a hearing and the order that is the subject of the hearing relates to a contravention of section 14, the person who required the hearing has the onus of proving that the discharge of the contaminant into the natural environment did not cause and could not have caused an adverse effect. 2005, c. 12, s. 1 (27).

Contraventions of s. 93

(3) If this section applies to a hearing and the order that is the subject of the hearing relates to a contravention of section 93, the person who required the hearing has the onus of proving that,

(a) the discharge of the pollutant was not abnormal in quality or quantity in light of all the circumstances of the discharge;

(b) the pollutant that was spilled did not cause and was not likely to cause an adverse effect; or

(c) forthwith after the pollutant was spilled, the person did everything practicable to prevent, eliminate and ameliorate the adverse effect and to restore the natural environment. 2005, c. 12, s. 1 (27).

Contraventions of other discharge provisions

(4) If this section applies to a hearing and the order that is the subject of the hearing relates to a discharge into the natural environment in contravention of a provision referred to in subclause 182.1 (1) (a) (iii), (iv) or (v), the person who required the hearing has the onus of proving that the person did not contravene the provision. 2005, c. 12, s. 1 (27).

Appeals from Tribunal

145.6 (1) Any party to a hearing before the Tribunal under this Part may appeal from its decision or order on a question of law to the Divisional Court in accordance with the rules of court. 2005, c. 12, s. 1 (28).

Appeal to Minister

(2) A party to a hearing before the Tribunal under this Part may, within 30 days after receipt of the decision of the Tribunal or within 30 days after final disposition of an appeal, if any, under subsection (1), appeal in writing to the Minister on any matter other than a question of law and the Minister shall confirm, alter or revoke the decision of the Tribunal as to the matter in appeal as the Minister considers in the public interest. 2005, c. 12, s. 1 (28).

Decision of Tribunal not automatically stayed on appeal

(3) An appeal of a decision of the Tribunal to the Divisional Court or to the Minister under this section does not stay the operation of the decision, unless the Tribunal orders otherwise. 2005, c. 12, s. 1 (28).

Divisional Court or Minister may grant or set aside stay

(4) If a decision of the Tribunal is appealed to the Divisional Court or to the Minister under this section, the Divisional Court or the Minister may,

(a) stay the operation of the decision; or

(b) set aside a stay ordered by the Tribunal under subsection (3). 2005, c. 12, s. 1 (28).

PART XIV
WORK DONE BY MINISTRY

Minister may cause things to be done

146. Where an order or decision made under this Act is stayed, the Minister may cause to be done any thing required by the order or decision. R.S.O. 1990, c. E.19, s. 146.

Director may cause things to be done

147. (1) Where an order or decision made under this Act is not stayed, the Director may cause to be done any thing required by it if,

(a) a person required by the order or decision to do the thing,

(i) has refused to comply with or is not complying with the order or decision,

(ii) is not likely, in the Director's opinion, to comply with the order or decision promptly,

(iii) is not likely, in the Director's opinion, to carry out the order or decision competently, or

(iv) requests the assistance of the Director in complying with the order or decision;

(a.1) a receiver or trustee in bankruptcy is not required to do the thing because of subsection 19 (5) or 168.20 (7); or

(b) in the Director's opinion, it would be in the public interest to do so. R.S.O. 1990, c. E.19, s. 147 (1); 2001, c. 17, s. 2 (21).

Notice of intent to cause things to be done

(2) The Director shall give notice of an intention to cause a thing to be done under subsection (1),

(a) to each person required by an order or decision made under this Act to do the thing; and

(b) if a receiver or trustee in bankruptcy is not required to do the thing because of subsection 19 (5) or 168.20 (7), to the receiver or trustee in bankruptcy. 2001, c. 17, s. 2 (22).

Idem

(3) A person who receives a notice under subsection (2) shall not do the thing referred to in the notice without the permission of the Director. R.S.O. 1990, c. E.19, s. 147 (3).

Person liable unknown: Director may cause things to be done

148. Where the Director is authorized by this Act to make a decision or order requiring a person to do a thing and the identity of the person cannot be ascertained, the Director may cause the thing to be done. R.S.O. 1990, c. E.19, s. 148.

Parts XV.1 and XV.2: Director may cause things to be done

148.1 (1) If, but for Part XV.1 or XV.2, the Minister, the Director or a provincial officer would be authorized by this Act to make an order requiring a person to do a thing, the Director may cause the thing to be done. 2001, c. 17, s. 2 (23).

Same

(2) Subsection (1) applies even if the Director is authorized to make an order requiring another person to do the thing. 2001, c. 17, s. 2 (23).

Powers of entry for ss. 146 to 148.1

Entry without judicial order

149. (1) A person who is responsible for doing a thing under section 146, 147, 148 or 148.1 may, for the purpose, enter on or into any land or place on or in which the thing is to be done and any adjacent land or place without an order if,

(a) the entry is made with the consent of an occupier or owner of the land or place; or

(b) the delay necessary to obtain an order under subsection (2) would result in,

(i) danger to the health or safety of any person,

(ii) impairment or serious risk of impairment of the quality of the natural environment for any use that can be made of it, or

(iii) injury or damage or serious risk of injury or damage to any property or to any plant or animal life. 1998, c. 35, s. 13 (1); 2001, c. 17, s. 2 (24).

Order authorizing entry

(2) A justice who is satisfied on evidence under oath that there is reasonable ground to believe that entry on land or into or on a place is necessary for the purpose of doing a thing under section 146, 147, 148 or 148.1, may issue an order authorizing the person named in the order to make the entry and do the thing. 1998, c. 35, s. 13 (1); 2001, c. 17, s. 2 (25).

Execution and expiry of order

(3) An order issued under subsection (2) shall,

(a) specify the times, which may be 24 hours each day, during which the order may be carried out; and

(b) state when the order expires. 1998, c. 35, s. 13 (1).

Renewal

(4) Before or after the order expires, a justice may renew the order, for such additional periods as the justice considers necessary. 1998, c. 35, s. 13 (1).

Use of force

(5) A person authorized under clause (1) (b) or subsection (2) to enter land or a place for the purpose of doing a thing may call on police officers as necessary and may use force as necessary to make the entry and do the thing. R.S.O. 1990, c. E.19, s. 149 (5); 1998, c. 35, s. 13 (2).

Assistance

(6) A person named in an order issued under subsection (2) may call on any other persons he or she considers advisable to execute the order. R.S.O. 1990, c. E.19, s. 149 (6); 1998, c. 35, s. 13 (3).

Application without notice

(7) A justice may receive and consider an application for an order or renewal of an order under this section without notice to the owner or occupier of the land or place. 1998, c. 35, s. 13 (4).

Identification

(8) On the request of an owner or occupier of the land or place, a person who exercises a power conferred under subsection (1) or (2) shall identify himself or herself and shall explain the purpose of the entry. R.S.O. 1990, c. E.19, s. 149 (8); 1998, c. 35, s. 13 (5).

Order to pay

150. (1) The Director may issue an order to pay the costs of doing any thing caused to be done by the Minister or Director under this Act to any person required by an order or decision made under this Act to do the thing. R.S.O. 1990, c. E.19, s. 150 (1).

Idem

(2) If, after the Minister or Director causes any thing to be done under this Act, the Director ascertains the identity of a person to whom a decision or order requiring the thing to be done could have been issued under this Act, the Director may issue an order to pay the costs of doing the thing to that person. R.S.O. 1990, c. E.19, s. 150 (2).

Same

(2.1) If the Minister or Director has caused any thing to be done under this Act in circumstances where, pursuant to subsection 19 (5) or 168.20 (7) or a stay granted under Part I of the *Bankruptcy and Insolvency Act* (Canada), a receiver or trustee in bankruptcy was not required to do the thing, the Director may issue an order to the receiver or trustee in bankruptcy to pay the costs of doing the thing. 2001, c. 17, s. 2 (26).

Same

(2.2) If an order to pay the costs of doing a thing is issued under subsection (1), (2) or (2.1) to a receiver or trustee in bankruptcy, the receiver or trustee in bankruptcy is not personally liable for those costs unless the order or decision that required the thing to be done arose from the gross negligence or wilful misconduct of the receiver or trustee in bankruptcy or of a receiver representative or trustee in bankruptcy representative. 2001, c. 17, s. 2 (26).

Order to pay: contents

(3) An order under subsection (1), (2) or (2.1) to pay costs shall include,

(a) a description of things that the Minister or Director caused to be done under this Act;

(b) a detailed account of the costs incurred in doing the things; and

(c) a direction that the person to whom the order is issued pay the costs to the Minister of Finance. R.S.O. 1990, c. E.19, s. 150 (3); 2001, c. 9, Sched. G, s. 5 (22); 2001, c. 17, s. 2 (27).

Idem

(4) An order under subsection (2) to pay costs shall also include a brief statement of the circumstances giving rise to the decision to cause the things to be done. R.S.O. 1990, c. E.19, s. 150 (4).

Joint and several liability

(5) Where two or more persons are liable to pay costs pursuant to an order under subsection (1), (2) or (2.1), they are jointly and severally liable to Her Majesty in right of Ontario. 2005, c. 12, s. 1 (29).

Contribution and indemnity

(6) Where the Director is entitled to issue an order to two or more persons under subsection (1), (2) or (2.1) in respect of costs, as between themselves, in the absence of an express or implied contract, each of those persons is liable to make contribution to and indemnify the other in accordance with the following principles:

1. Where the Director is entitled to issue an order to two or more persons under subsection (1), (2) or (2.1) in respect of costs and one or more of them caused or contributed to the costs by fault or negligence, such one or more of them shall make contribution to and indemnify,
   i. where one person is found at fault or negligent, any other person to whom the Director is entitled to issue an order under subsection (1), (2) or (2.1), and
   ii. where two or more persons are found at fault or negligent, each other and any other person to whom the Director is entitled to issue an order under subsection (1), (2) or (2.1) in the degree in which each of such two or more persons caused or contributed to the costs by fault or negligence.
2. For the purpose of subparagraph 1 ii, if it is not practicable to determine the respective degrees in which the fault or negligence of two or more persons to whom the Director is entitled to issue an order under subsection (1), (2) or (2.1) caused or contributed to the costs, such two or more persons shall be deemed to be equally at fault or negligent.
3. Where no person to whom the Director is entitled to issue an order under subsection (1), (2) or (2.1) caused or contributed to the costs by fault or negligence, each of the persons to whom the Director is entitled to issue an order under subsection (1), (2) or (2.1) is liable to make contribution to and indemnify each other in such degree as is determined to be just and equitable in the circumstances. 2005, c. 12, s. 1 (29).

Enforcement of contribution

(7) The right to contribution or indemnification under subsection (6) may be enforced by action in a court of competent jurisdiction. 2005, c. 12, s. 1 (29).

Adding parties

(8) Wherever it appears that a person not already a party to an action under subsection (7) may be a person to whom the Director is entitled to issue an order under subsection (1), (2) or (2.1) in respect of the costs, the person may be added as a party defendant to the action on such terms as are considered just or may be made a third party to the action in the manner prescribed by the rules of court for adding third parties. 2005, c. 12, s. 1 (29).

151. REPEALED: 2005, c. 12, s. 1 (30).

152. REPEALED: 2005, c. 12, s. 1 (31).

Order to pay may be enforced as judgment of the Superior Court of Justice

153. (1) An order to pay costs may be filed with a local registrar of the Superior Court of Justice and enforced as if it were an order of the court. R.S.O. 1990, c. E.19, s. 153 (1); 2001, c. 9, Sched. G, s. 5 (21).

Interest

(2) Section 129 of the *Courts of Justice Act*, applies in respect of an order filed with the Superior Court of Justice under subsection (1) and, for the purpose, the date of filing shall be deemed to be the date of the order. R.S.O. 1990, c. E.19, s. 153 (2); 2001, c. 9, Sched. G, s. 5 (21).

Collection of costs as tax lien

154. (1) For the purposes of subsections (2) and (8), a thing done as a result of activities or conditions on real property is a thing done in connection with that property, whether or not the work is done on that property. R.S.O. 1990, c. E.19, s. 154 (1).

Lien

(2) If an order to pay costs is directed to a person who owns real property in a local municipality, and the Director instructs the municipality to recover amounts specified in the order that relate to things done in connection with that property, the municipality shall have a lien on the property for those amounts and they shall have priority lien status, as described in section 1 of the *Municipal Act, 2001* or section 3 of the *City of Toronto Act, 2006*, as the case may be, in respect of the property and shall be added by the treasurer of the municipality to the tax roll. 2002, c. 17, Sched. F, Table; 2006, c. 32, Sched. C, s. 19 (2).

Same

(3) A lien created under subsection (2) in favour of a municipality is not an estate or interest of the Crown within the meaning of clause 379 (7) (b) of the *Municipal Act, 2001* or clause 350 (7) (b) of the *City of Toronto Act, 2006*, as the case may be. 2002, c. 17, Sched. F, Table; 2006, c. 32, Sched. C, s. 19 (3).

Idem

(4) Subject to subsection (6), money collected in accordance with subsection (2), less the costs reasonably attributable to the collection, shall be paid by the municipality to the Minister of Finance. R.S.O. 1990, c. E.19, s. 154 (4); 2001, c. 9, Sched. G, s. 5 (22).

Interpretation

(5) In subsections (6) and (7),

"cancellation price" has the same meaning as in Part XI of the *Municipal Act, 2001* or Part XIV of the *City of Toronto Act, 2006*, as the case may be. 2006, c. 32, Sched. C, s. 19 (4).

Proceeds of tax sale

(6) Where there is a sale of land under Part XI of the *Municipal Act, 2001* or Part XIV of the *City of Toronto Act, 2006* and amounts are payable out of the proceeds to the Minister of Finance under this Act, the *Fire Protection and Prevention Act, 1997* or the *Ontario Water Resources Act*, those amounts shall not be paid until after payment of all other amounts payable out of the proceeds in respect of the cancellation price of the land. R.S.O. 1990, c. E.19, s. 154 (6); 2001, c. 9, Sched. G, s. 5 (7); 2002, c. 17, Sched. F, Table; 2006, c. 32, Sched. C, s. 19 (5).

Cancellation price

(7) Despite Part XI of the *Municipal Act, 2001* or Part XIV of the *City of Toronto Act, 2006*, the treasurer of a municipality may sell land under those Parts for less than the cancellation price, so long as the land is not sold for less than what the cancellation price would have been but for this Act, the *Fire Protection and Prevention Act, 1997* and the *Ontario Water Resources Act*, and the purchaser may be declared to be the successful purchaser under Part XI of the *Municipal Act, 2001* or Part XIV of the *City of Toronto Act, 2006*, as the case may be. 2006, c. 32, Sched. C, s. 19 (6).

Collection, territory without municipal organization

(8) If an order to pay costs is directed to a person who owns real property in territory without municipal organization and if the Director gives written notice to the Minister of Finance of the amounts specified in the order that relate to things done in connection with the property and requests that the amounts be collected under the *Provincial Land Tax Act, 2006*, the amounts may be collected under that Act as if they were taxes imposed under it. 2006, c. 33, Sched. Z.3, s. 10.

Identification of amounts

(9) An instruction under subsection (2) or a notice under subsection (8) shall state which of the amounts specified in the applicable order relate to things done in connection with the property. 2006, c. 33, Sched. Z.3, s. 10.

Costs may be recovered from deposit or financial assurance

155. Where an order to pay costs is directed to a person who has given a deposit under a regulation or is in respect of works or property for which financial assurance is required under Part XII or a regulation made under clause 176 (2.4) (i), the deposit or financial assurance may be used to recover amounts specified in the order to pay costs. 2010, c. 16, Sched. 7, s. 2 (57).

PART XV
PROVINCIAL OFFICERS

Inspection by provincial officer

156. (1) For the administration of this Act or the regulations, a provincial officer may, without a warrant or court order, at any reasonable time and with any reasonable assistance, make inspections, including,

(a) entering any part of the natural environment to ascertain the extent, if any, to which contaminants have caused an adverse effect, the causes for any adverse effect, and how any adverse effect may be prevented, eliminated or ameliorated and the natural environment restored;

(b) entering any place in which the provincial officer reasonably believes can be found anything that is governed or regulated under this Act or anything the dealing with which is governed or regulated under this Act;

(c) entering any place in or from which the provincial officer reasonably believes a contaminant is being, has been or may be discharged into the natural environment;

(d) entering any place that the provincial officer reasonably believes is likely to contain documents related to,

(i) an activity or undertaking that is, or is required to be the subject of a permit, licence, approval, environmental compliance approval, certificate of property use, renewable energy approval, program approval, agreement or order under this Act,

(ii) an activity that is or is required to be registered under Part II.2,

(ii.1) an activity or undertaking that is exempted by a regulation from any requirement to have a permit, licence, environmental compliance approval or renewable energy approval under this Act that is regulated by the provisions of the regulation, or

(iii) the discharge of a contaminant into the natural environment;

(e) entering any place that the provincial officer reasonably believes,

(i) is, or is required to be, subject to or referred to in a permit, licence, approval, environmental compliance approval, certificate of property use, renewable energy approval, program approval, agreement or order under this Act,

(ii) is or is required to be subject to or referred to in a registration under Part II.2, or

(iii) is subject to or referred to in a regulation that provides for an exemption from any requirement to have a permit, licence, environmental compliance approval or renewable energy approval under this Act where the regulation includes provisions that regulate the place;

(e.1) entering any property for which a record of site condition has been submitted for filing or has been filed in the Environmental Site Registry established under section 168.3 for the purpose of sampling, testing or examining anything referred to in the record of site condition;

(f) entering any place where a motor, motor vehicle or beverage container regulated under this Act is stocked, displayed, sold or offered for sale, to carry out his or her duties under Part III or IX, as the case may be;

(g) entering any establishment for the repair of motors or motor vehicles, to carry out his or her duties under Part III;

(h) entering any ice shelter to carry out his or her duties under Part IV;

(i) entering any abandoned motor vehicle to carry out his or her duties under Part VII;

(j) entering any place where the provincial officer reasonably believes the permit and plates of a vehicle may be found, in order to seize them in accordance with section 48 or 49; and

(k) entering any place where a pollutant as defined in Part X is spilled. 1998, c. 35, s. 14 (1); 2001, c. 17, s. 2 (30-32); 2005, c. 12, s. 1 (32, 33); 2007, c. 7, Sched. 13, s. 2; 2009, c. 12, Sched. G, s. 14; 2010, c. 16, Sched. 7, s. 2 (58, 59).

Same

(2) During an inspection under subsection (1), the provincial officer may,

(a) make necessary excavations;

(b) require that any thing be operated, used or set in motion under conditions specified by the provincial officer;

(c) take samples for analysis;

(d) conduct tests or take measurements;

(e) examine, record or copy any document or data, in any form, by any method;

(f) record the condition of a place or the natural environment by means of photograph, video recording or other visual recording;

(g) require the production of any document or data, in any form, required to be kept under this Act and of any other document or data, in any form, related to the purposes of the inspection;

(h) remove from a place documents or data, in any form, produced under clause (g) for the purpose of making copies; and

(i) make reasonable inquiries of any person, orally or in writing. 1998, c. 35, s. 14 (2).

Limitation re records

(3) A record made under clause (2) (f) must be made in a manner that does not intercept any private communication and that accords with reasonable expectations of privacy. 1998, c. 35, s. 14 (2).

Limitation re removal of documents, data

(3.1) A provincial officer shall not remove documents or data under clause (2) (h) without giving a receipt for them and shall promptly return the documents or data to the person who produced them. 1998, c. 35, s. 14 (2).

Power to exclude persons

(4) A provincial officer who exercises the power set out in clause (2) (i) may exclude from the questioning any person except counsel for the individual being questioned. R.S.O. 1990, c. E.19, s. 156 (4); 1998, c. 35, s. 14 (3); 2009, c. 33, Sched. 15, s. 5 (1).

Entry to dwellings

(5) A person shall not exercise a power conferred by this Act to enter a room actually used as a dwelling without the consent of the occupier except under the authority of an order under section 158. R.S.O. 1990, c. E.19, s. 156 (5).

(6) REPEALED: 1998, c. 35, s. 14 (4).

Power to inspect vehicle or vessel

156.1 (1) In this section,

"vehicle" includes a trailer or other equipment attached to the vehicle. 1998, c. 35, s. 15.

Requirement to stop

(2) For the administration of this Act or the regulations, a provincial officer may signal a vehicle or vessel to stop. 1998, c. 35, s. 15.

Same

(3) On the provincial officer's signal to stop, the operator of the vehicle or vessel shall immediately come to a safe stop. 1998, c. 35, s. 15.

Same

(4) For the purposes of this section, a signal to stop includes,

(a) intermittent flashes of red light, in the case of a vehicle;

(b) intermittent flashes of blue light, in the case of a vessel; and

(c) a hand signal to stop by a provincial officer who is readily identifiable as a provincial officer. 1998, c. 35, s. 15.

Sign to report

(5) Where a clearly marked sign is posted indicating that a class of vehicles or vessels should report to a certain place in the vicinity of the sign, the operator of a vehicle or vessel that passes the sign and that falls within the class of vehicles or vessels indicated shall report forthwith to the place the sign directs. 1998, c. 35, s. 15.

Same

(6) Where the operator of a vehicle or vessel stops under subsection (3) or reports under subsection (5), the provincial officer may make any reasonable inquiries of the operator and the operator shall produce for inspection any documents related to the operation or ownership of the vehicle or vessel, including licenses, permits and any documents that are required to be kept by the law of any jurisdiction in relation to the carriage of any cargo or container. 1998, c. 35, s. 15.

Inspection powers

(7) Based on questioning or examination of documents conducted under subsection (6), the provincial officer may, without warrant or court order, inspect any means of containment that the provincial officer reasonably believes is being used for the handling or transportation of a thing the handling or transportation of which is governed or regulated under this Act, the *Dangerous Goods Transportation Act* or the *Transportation of Dangerous Goods Act, 1992*, (Canada). 1998, c. 35, s. 15; 2009, c. 19, s. 67 (4).

Same

(8) As part of an inspection under subsection (7), the provincial officer may open or require the operator to open any cargo hold, container or other means of containment. 1998, c. 35, s. 15.

Same

(9) During an inspection conducted under subsection (6) or (7), the provincial officer may exercise such powers under subsection 156 (2) as are reasonably required for the administration of this Act or the regulations. 1998, c. 35, s. 15.

Same

(10) Subsections 156 (3), (3.1), (4) and (5) apply to the exercise of a power under subsection (9). 1998, c. 35, s. 15.

Power to administer other Acts

156.2 A provincial officer who exercises any power set out in section 156, 156.1, 160, 161 or 161.1 may, if the provincial officer is designated as such under the *Nutrient Management Act, 2002*, the *Ontario Water Resources Act* or the *Pesticides Act*, as the case may be, do anything authorized by,

(a) section 13, 14 or 23 of the *Nutrient Management Act, 2002*;

(b) section 15, 15.1, 19, 20 or 20.1 of the *Ontario Water Resources Act*;

(c) section 19, 19.1, 22, 23 or 23.1 of the *Pesticides Act*;

(d) section 81, 82, 91, 92 or 93 of the *Safe Drinking Water Act, 2002*; or

(e) section 15, 20 or 21 of the *Toxics Reduction Act, 2009*. 2002, c. 4, s. 62 (3); 2009, c. 19, s. 67 (5).

Note: On the day the Statutes of Ontario, 2009, chapter 19, section 65 comes into force, clause (e) is amended by striking out "section 15, 20 or 21" at the beginning and substituting "section 15, 20, 20.1 or 21". See: 2009, c. 19, ss. 67 (6), 73 (2).

Identification

156.3 On request, a provincial officer who exercises a power under this Act shall identify himself or herself as a provincial officer either by the production of a copy of his or her designation or in some other manner and shall explain the purpose of the exercise of the power. 1998, c. 35, s. 15.

Entry, etc., may be prohibited

156.4 (1) A provincial officer may by order prohibit entry into all or part of any land or place or prohibit the use of, interference with, disruption of, or destruction of any thing in any of the following circumstances:

1. During an inspection under section 156, 156.1 or 158.
2. During a search under section 161.
3. During the time required for the provincial officer to obtain an order under section 158 of this Act or a warrant under section 158 of the *Provincial Offences Act*.
4. During a search carried out under a warrant issued under section 158 of the *Provincial Offences Act*.

Requirements for order

(2) An order under subsection (1) shall not be issued unless the provincial officer reasonably believes that,

(a) in the case of an order prohibiting entry, there is on the land or in the place a thing that will afford evidence of an offence under this Act;

(b) in the case of an order prohibiting the use of, interference with, disruption of, or destruction of a thing, the thing will afford evidence of an offence under this Act; or

(c) in the case of an order prohibiting entry or an order prohibiting the use of, interference with, disruption of, or destruction of a thing, there is a discharge or a likelihood of discharge of a contaminant into the natural environment from the land, place or thing and an adverse effect has resulted or is likely to result from the discharge.

Notice of order

(3) The provincial officer shall give notice of the order in the manner that he or she considers appropriate in the circumstances.

Contents of notice

(4) Notice of the order shall include an explanation of the rights provided by subsections (6) and (7).

Order not effective where no notice

(5) An order under subsection (1) is not effective in any court proceeding against a person where the person satisfies the court that the person neither knew nor should have known of the order.

Request for rescission

(6) A person aggrieved by the order may make an oral or written request to the Director to rescind it and may make oral or written submissions to the Director in support of the request.

Powers of Director

(7) The Director shall give prompt consideration to any request or submissions made under subsection (6) and may rescind the order.

Same

(8) For the purposes of subsection (7), the Director may substitute his or her own opinion for that of the provincial officer.

Same

(9) A Director who rescinds an order under subsection (7) shall give such directions to a provincial officer as the Director considers appropriate to bring the rescission to the attention of persons affected.

No stay

(10) A request for rescission of an order under subsection (1) does not stay the order, unless the Director orders otherwise in writing.

Duration of order

(11) An order under subsection (1) shall,

(a) subject to clause (b), be effective for the shorter of the length of time necessary to complete the inspection or search referred to in that subsection or a period not exceeding two days excluding holidays; or

(b) where the inspection or search referred to in subsection (1) is under an order under section 158 of this Act or under a warrant issued under section 158 of the *Provincial Offences Act* and a time limit for the inspection or search is specified in the order or warrant, be effective until the expiration of that time. 1998, c. 35, s. 15.

Order of justice prohibiting entry

156.5 (1) Where a justice is satisfied, on evidence under oath by a provincial officer, that there is reasonable ground for believing that it is appropriate for the administration of this Act or the regulations or necessary to protect human health or safety or to protect property, the justice may issue an order prohibiting entry into all or part of any land or place or prohibiting the use of, interference with, disruption of, or destruction of any thing. 1998, c. 35, s. 15.

Same

(2) The prohibition under the justice's order shall, subject to subsection (3), be for such period of time as is set out in the order. 1998, c. 35, s. 15.

Expiry

(3) Unless renewed, an order under this section expires on the earlier of the day specified for the purpose in the order or the day that is 30 days after the date on which the order is made. 1998, c. 35, s. 15; 2009, c. 33, Sched. 15, s. 5 (2).

Renewal

(4) An order under this section may be renewed for any reason set out in subsection (1), before or after expiry, for one or more periods each of which is not more than 30 days. 1998, c. 35, s. 15.

Notice of application

(5) An initial order under subsection (1) may be issued on application without notice. 1998, c. 35, s. 15.

Same

(6) A renewal order under subsection (4) may be issued on application made with such notice, if any, as is specified for the purpose under subsection (7). 1998, c. 35, s. 15.

Same

(7) In an order under subsection (1) or (4), a justice may specify notice requirements that must be met by a person applying for a renewal of the order or for a further renewal of the order, as the case may be. 1998, c. 35, s. 15.

Notice of order

(8) A provincial officer may give notice of an order under subsection (1) or (4) in the manner that he or she considers appropriate in the circumstances. 1998, c. 35, s. 15.

Order not effective where no notice

(9) An order under subsection (1) or (4) is not effective in any court proceeding against a person where the person satisfies the court that the person neither knew nor should have known of the order. 1998, c. 35, s. 15.

Securing of place, thing

156.6 Where an order under section 156.4 or 156.5 is in effect, a provincial officer may take measures to secure the land, place or thing to which the order relates by means of locks, gates, fences, security guards or such other means as the provincial officer deems necessary to prevent entry into the land or place or to prevent the use of, interference with, disruption of, or destruction of the thing. 1998, c. 35, s. 15.

Order by provincial officer: contraventions

157. (1) A provincial officer may issue an order to any person that the provincial officer reasonably believes is contravening or has contravened,

(a) a provision of this Act or the regulations;

(b) a provision of an order under this Act, other than an order under section 99.1, 100.1, 150 or 182.1 or an order of a court; or

(c) a term or condition of an environmental compliance approval, certificate of property use, renewable energy approval, licence or permit under this Act. 1998, c. 35, s. 16; 2001, c. 17, s. 2 (33); 2005, c. 12, s. 1 (34); 2009, c. 12, Sched. G, s. 15 (1); 2009, c. 33, Sched. 15, s. 5 (3); 2010, c. 16, Sched. 7, s. 2 (60).

Contravention of s. 14

(1.1) Subsection (1) does not apply to a contravention of section 14 unless,

(a) an order to pay an environmental penalty could be issued in respect of the contravention; or

(b) the contravention involves a discharge that causes or is likely to cause an adverse effect. 2005, c. 12, s. 1 (35).

Information to be included in order

(2) The order shall,

(a) specify the provision, term or condition that the provincial officer believes is being or has been contravened;

(b) briefly describe the nature and, where applicable, the location of the contravention;

(b.1) in the case of a contravention of section 14 for which an order to pay an environmental penalty could be issued, describe the adverse effects that were caused by or that may be caused by the contravention; and

(c) state that a review of the order may be requested in accordance with section 157.3. 1998, c. 35, s. 16; 2005, c. 12, s. 1 (36).

What order may require

(3) The order may require the person to whom it is directed to comply with any directions set out in the order within the time specified relating to,

(a) achieving compliance with the provision, term or condition;

(b) preventing the continuation or repetition of the contravention;

(c) securing, whether through locks, gates, fences, security guards or other means, any land, place or thing;

(d) where the contravention is related to the deposit of waste, removing the waste;

(e) where the contravention has injured, damaged or endangered animal life, plant life, human health or safety, or the natural environment or is likely to injure, damage or endanger animal life, plant life, human health or safety, or the natural environment,

(i) repairing the injury or damage,

(ii) preventing the injury or damage,

(iii) decreasing, eliminating or ameliorating the effects of the damage, and

(iv) restoring the natural environment;

(f) where the contravention has caused damage to or endangered or is likely to cause damage to or endanger existing water supplies, providing temporary or permanent alternate water supplies;

(g) submitting a plan for achieving compliance with the provision, term or condition, including the engagement of contractors or consultants satisfactory to a provincial officer;

(h) submitting an application for an environmental compliance approval, renewable energy approval, licence or permit;

(h.1) registering an activity under Part II.2;

(i) monitoring and recording in relation to the natural environment and reporting on the monitoring and recording;

(j) posting notice of the order; and

(k) if the provincial officer reasonably believes that a term or condition of a renewable energy approval is being or has been contravened, doing any other thing referred to in subsection 16 (3) of the *Ontario Water Resources Act*. 1998, c. 35, s. 16; 2005, c. 12, s. 1 (37); 2009, c. 12, Sched. G, s. 15 (2, 3); 2010, c. 16, Sched. 7, s. 2 (61, 62).

Power to require response to inquiries

157.0.1 (1) For the purposes of determining compliance of a person with this Act or the regulations, a provincial officer may, at any reasonable time and with any reasonable assistance, require the person, or any person employed by or providing services to the person, to respond to reasonable inquiries. 2010, c. 16, Sched. 7, s. 2 (63).

Same

(2) For the purposes of subsection (1), a provincial officer may make inquiries by telephone or by any other means of communication. 2010, c. 16, Sched. 7, s. 2 (63).

Order by provincial officer re preventive measures

157.1 (1) A provincial officer may issue an order to any person who owns or who has management or control of an undertaking or property if the provincial officer reasonably believes that the requirements specified in the order are necessary or advisable so as,

(a) to prevent or reduce the risk of a discharge of a contaminant into the natural environment from the undertaking or property; or

(b) to prevent, decrease or eliminate an adverse effect that may result from,

(i) the discharge of a contaminant from the undertaking, or

(ii) the presence or discharge of a contaminant in, on or under the property. 2005, c. 12, s. 1 (38).

Information to be included in order

(2) The order shall,

(a) briefly describe the reasons for the order and the circumstances on which the reasons are based; and

(b) state that a review of the order may be requested in accordance with section 157.3. 1998, c. 35, s. 16.

What the order may require

(3) The order may require the person to whom it is directed to comply with any directions specified under subsection (4), within the time specified. 1998, c. 35, s. 16.

Same

(4) The following directions may be specified in the order:

1. Any direction listed in subsection 18 (1).
2. A direction to secure, by means of locks, gates, fences, security guards or other means, any land, place or thing. 1998, c. 35, s. 16.

Where order requires report

(5) Where the order requires a person to make a report, the report shall be made to a provincial officer. 1998, c. 35, s. 16.

Amendment or revocation of orders under ss. 157 and 157.1

157.2 (1) An order issued under section 157 or 157.1 may, by order, be amended or revoked by the provincial officer who issued it or by the Director.

Same

(2) A provincial officer or Director who amends or revokes an order shall give written notice of the amendment or revocation to the person to whom the order is directed. 1998, c. 35, s. 16.

Request for review, orders under ss. 157 to 157.2

157.3 (1) A person to whom an order under section 157, 157.1 or 157.2 is directed may, within seven days after being served with a copy of the order, request that the Director review the order. 1998, c. 35, s. 16.

Manner of making request

(2) The request may be made orally, with written confirmation served on the Director within the time specified in subsection (1), or in writing. 1998, c. 35, s. 16.

Contents of request for review

(3) A written request for review under subsection (1) or a written confirmation of an oral request under subsection (2) shall include,

(a) the portions of the order in respect of which the review is requested;

(b) any submissions that the applicant for the review wishes the Director to consider; and

(c) for the purpose of subsection (7), an address for service by mail or by electronic facsimile transmission or by such other means of service as the regulations may prescribe. 1998, c. 35, s. 16.

No automatic stay

(4) The request for review does not stay the order, unless the Director orders otherwise in writing. 1998, c. 35, s. 16.

Decision of Director

(5) A Director who receives a request for review may,

(a) revoke the order of the provincial officer; or

(b) by order directed to the person requesting the review, confirm or alter the order of the provincial officer. 1998, c. 35, s. 16.

Same

(6) For the purposes of subsection (5), the Director may substitute his or her own opinion for that of the provincial officer. 1998, c. 35, s. 16.

Notice of decision

(7) The Director shall serve the person requesting the review with a copy of,

(a) a decision to revoke the order of the provincial officer; or

(b) an order to confirm or amend the order of the provincial officer, together with reasons. 1998, c. 35, s. 16.

Automatic confirmation of order

(8) If, within seven days of receiving a written request for review or a written confirmation of an oral request for review, the Director does not make a decision under subsection (5) and give oral or written notice of the decision to the person requesting the review, the order in respect of which the review is sought shall be deemed to have been confirmed by order of the Director. 1998, c. 35, s. 16.

Same

(9) For the purpose of section 140 and a hearing required under that section, a confirming order deemed to have been made by the Director under subsection (8),

(a) shall be deemed to be directed to each person to whom the order of the provincial officer was directed; and

(b) shall be deemed to have been served, on each person to whom the order of the provincial officer was directed, at the expiry of the time period referred to in subsection (8). 1998, c. 35, s. 16; 2000, c. 26, Sched. F, s. 12 (12); 2005, c. 12, s. 1 (39).

Same

(10) Subsections (8) and (9) do not apply if, within seven days of receiving the request for review, the Director stays the order under subsection (4) and gives written notice to the person requesting the review that the Director requires additional time to make a decision under subsection (5). 2005, c. 12, s. 1 (40).

Notice by provincial officer re Part II.2

157.4 (1) A provincial officer may give a notice in writing to a person who is engaging in an activity prescribed by the regulations for the purposes of subsection 20.21 (1) stating that the provincial officer reasonably believes that the person is contravening or has contravened a provision of a regulation made for the purposes of Part II.2 in respect of the activity. 2010, c. 16, Sched. 7, s. 2 (64).

Contents of notice

(2) A notice given under subsection (1) may set out one or more measures that have been prescribed by the regulations for the purposes of this section and require the person to carry out the measures within a time specified in the notice. 2010, c. 16, Sched. 7, s. 2 (64).

Amendment or revocation of notice

(3) A notice given under subsection (1) may be amended or revoked by the provincial officer who gave it or by the Director by giving written notice of the amendment or revocation to the person to whom the notice given under subsection (1) is directed. 2010, c. 16, Sched. 7, s. 2 (64).

Review of notice

(4) A person to whom a notice is given under subsection (1) may, within seven days after being served with a copy of the notice, request that the Director review the notice. 2010, c. 16, Sched. 7, s. 2 (64).

Same

(5) Subsections 157.3 (2) to (8) and (10) apply, with necessary modifications, in respect of a review of a notice under this section. 2010, c. 16, Sched. 7, s. 2 (64).

Entry or inspection order

158. (1) A justice may issue an order authorizing a provincial officer to do anything set out in subsection 156 (1) or (2) or section 156.1 if the justice is satisfied, on evidence under oath by a provincial officer, that there is reasonable ground to believe that it is appropriate for the administration of this Act or the regulations for the provincial officer to do anything set out in subsection 156 (1) or (2) or section 156.1 and that the provincial officer may not be able to effectively carry out his or her duties without an order under this section because,

(a) no occupier is present to grant access to a place that is locked or otherwise inaccessible;

(b) a person has prevented the provincial officer from doing anything set out in subsection 156 (1) or (2) or section 156.1;

(c) there is reasonable ground to believe that a person may prevent a provincial officer from doing anything set out in subsection 156 (1) or (2) or section 156.1;

(d) it is impractical, because of the remoteness of the place to be inspected or because of any other reason, for the provincial officer to obtain an order under this section without delay if access is denied; or

(e) there is reasonable ground to believe that an attempt by the provincial officer to do anything set out in subsection 156 (1) or (2) or section 156.1 without the order,

(i) might not achieve its purpose, or

(ii) might endanger human health or safety, property or the natural environment. 1998, c. 35, s. 17.

Same

(2) Subsections 156 (3), (3.1), (4) and (5) apply to an inspection under an order under this section. 1998, c. 35, s. 17.

Expiry

(3) Unless renewed, an order under this section expires on the earlier of the day specified for the purpose in the order and the day that is 30 days after the date on which the order is made. 1998, c. 35, s. 17; 2009, c. 33, Sched 15, s. 5 (4).

Renewal

(4) An order under this section may be renewed in the circumstances in which an order may be made under subsection (1), before or after expiry, for one or more periods each of which is not more than 30 days. 1998, c. 35, s. 17.

When to be executed

(5) An order under this section shall be carried out between 6 a.m. and 9 p.m., unless the order otherwise authorizes. 1998, c. 35, s. 17.

Application without notice

(6) An order under this section may be issued or renewed on application without notice. 1998, c. 35, s. 17.

Samples and copies

159. A provincial officer may detain samples and copies obtained under section 156, 156.1 or 158 for any period and for any of the purposes of this Act and the regulations. R.S.O. 1990, c. E.19, s. 159; 1998, c. 35, s. 18.

Seizure during inspection

160. During an inspection under section 156, 156.1 or 158, a provincial officer may, without a warrant or court order, seize any thing that is produced to the provincial officer or that is in plain view, if,

(a) the provincial officer reasonably believes that the thing will afford evidence of an offence under this Act;

(b) the provincial officer reasonably believes that the thing was used or is being used in connection with the commission of an offence under this Act and that the seizure is necessary to prevent the continuation or repetition of the offence; or

(c) the thing is discharging or is likely to discharge a contaminant into the natural environment and an adverse effect has resulted or is likely to result from the discharge. 1998, c. 35, s. 19.

Warrantless search, exigent circumstances

161. (1) In this section,

"offence" means an offence under this Act related to,

(a) the discharge of a contaminant into the natural environment that causes or is likely to cause an adverse effect, or

(b) hazardous waste or hauled liquid industrial waste.

Search by provincial officer re actual pollution

(2) A provincial officer may, without a search warrant, search any place other than a room actually used as a dwelling if the provincial officer has reasonable ground to believe,

(a) that an offence has been committed;

(b) that there is in such place any thing that will afford evidence as to the commission of the offence; and

(c) that there are exigent circumstances that make it impractical to obtain a search warrant. R.S.O. 1990, c. E.19, s. 161 (1, 2).

Seizure during search

(3) During a search under subsection (2), a provincial officer may, without warrant or court order, seize any thing if,

(a) the provincial officer reasonably believes that the thing will afford evidence of an offence; or

(b) the provincial officer reasonably believes that the thing was used or is being used in connection with the commission of an offence and that the seizure is necessary to prevent the continuation or repetition of the offence. 1998, c. 35, s. 20.

(4) REPEALED: 1998, c. 35, s. 20.

Detention or removal, things seized

161.1 (1) A provincial officer who seizes any thing under section 160 or 161 may remove the thing or may detain it in the place where it is seized.

Receipt

(2) Where possible, the provincial officer shall inform the person from whom a thing is seized under section 160 or 161 as to the reason for the seizure and shall give the person a receipt for the thing seized. 1998, c. 35, s. 21.

Report to justice, things seized

162. (1) A provincial officer who seizes any thing during an inspection or search under section 160 or 161 shall bring the thing seized before a justice or, if that is not reasonably possible, shall report the seizure to a justice. 1998, c. 35, s. 22.

Application of *Provincial Offences Act*

(2) Sections 159 and 160 of the *Provincial Offences Act* apply with necessary modifications in respect of a thing seized by a provincial officer during an inspection or search under section 160 or 161. R.S.O. 1990, c. E.19, s. 162 (2).

Disposition of things seized

162.1 (1) Where the Director believes that, given the nature of a thing seized under section 160 or 161, the thing may pose a risk to human health or safety or to property, the Director may direct the person having custody of the thing, to dispose of the thing in a manner satisfactory to the Director.

Disposition of seized perishables

(2) Where the person having custody of any thing seized under section 160 or 161 believes that the thing will rot, spoil or otherwise perish, the person may dispose of the thing.

Non-application of provision

(3) Section 162 does not apply to a thing disposed of in accordance with this section.

Forfeiture

(4) A thing disposed of in accordance with this section is forfeited to the Crown. 1998, c. 35, s. 23.

Notice of disposal of things seized

162.2 (1) Where a thing has been disposed of in accordance with section 162.1, the Director shall ensure that a provincial officer gives written notice of the seizure and disposal, within 15 days of the disposal,

(a) to every person whom the provincial officer knows or has reason to believe is an owner of the thing seized; and

(b) to every person who has a security interest in the thing that is perfected by registration under the *Personal Property Security Act* against the name of any person whom the provincial officer knows or has reason to believe is the owner. 1998, c. 35, s. 23.

Contents of notice

(2) Notice under subsection (1) shall include,

(a) a description of the thing seized sufficient to enable it to be identified;

(b) the location at which the thing was seized;

(c) the date of the seizure and disposal;

(d) the name and telephone number of the provincial officer who seized the thing or of his or her delegate;

(e) a statement of the reason for the seizure and disposal;

(f) a reference to the statutory provision authorizing the seizure and disposal; and

(g) a reference to the statutory provision permitting the person to apply to the Superior Court of Justice for relief against the forfeiture. 1998, c. 35, s. 23; 2001, c. 9, Sched. G, s. 5 (21).

Forfeiture may be ordered

162.3 (1) On the application of the Director, the Superior Court of Justice may order that a thing seized under section 160 or 161 or under a warrant issued under the *Provincial Offences Act* in connection with the commission or suspected commission of an offence under this Act be forfeited to the Crown. 1998, c. 35, s. 23; 2001, c. 9, Sched. G, s. 5 (21).

Where no order to be made

(2) No order shall be made under subsection (1) unless the court is satisfied that,

(a) the seizure was lawful; and

(b) no later than seven days before the hearing of the application, written notice was provided by a provincial officer,

(i) to every person whom the provincial officer knows or has reason to believe is an owner of the thing seized,

(ii) to every person who has a security interest in the thing that is perfected by registration under the *Personal Property Security Act* against the name of any person whom the provincial officer knows or has reason to believe is the owner,

(iii) where the thing seized is a vehicle, to every person who has a security interest in the vehicle that is perfected by registration under the *Personal Property Security Act* against the vehicle identification number of the vehicle, and

(iv) where the thing seized is a vehicle and the vehicle is registered under the *Highway Traffic Act*, to the registered owner. 1998, c. 35, s. 23.

Contents of notice

(3) Notice under subsection (2) shall include,

(a) a description of the thing seized sufficient to enable it to be identified;

(b) the location at which the thing was seized;

(c) the date of the seizure;

(d) the name and telephone number of the provincial officer who seized the thing or of his or her delegate;

(e) a statement of the reason for the seizure;

(f) a reference to the statutory provision authorizing the seizure;

(g) a statement that an order for forfeiture of the thing is being sought under this section; and

(h) a statement that the person to whom the notice is provided may make submissions to the Superior Court of Justice with respect to the issuance of an order under this section. 1998, c. 35, s. 23; 2001, c. 9, Sched. G, s. 5 (21).

Disposition of things forfeited

(4) A thing forfeited under this section may be disposed of as the Director directs. 1998, c. 35, s. 23.

Relief against forfeiture

(5) A person who had an interest in a thing forfeited under section 162.1 or this section may apply to the Superior Court of Justice for relief against the forfeiture and the court may make an order providing for any relief that it considers appropriate, including, but not limited to, one or more of the following orders:

1. An order directing that the thing or any part of the thing be returned to the applicant.
2. An order directing that any interest in the thing be vested in the applicant.
3. An order directing that an amount be paid by the Crown to the applicant by way of compensation for the forfeiture. 1998, c. 35, s. 23; 2001, c. 9, Sched. G, s. 5 (21).

When relief not to be ordered

(6) The court shall not make an order for relief under subsection (5) in respect of a thing forfeited where the person applying for the relief,

(a) has been served with an order requiring the person to pay an environmental penalty in connection with a matter that was associated with the seizure of the thing, unless the order has been revoked; or

(b) has been charged with an offence that was associated with the seizure of the thing, unless the charge has been withdrawn or dismissed. 1998, c. 35, s. 23; 2005, c. 12, s. 1 (41).

Use of force

163. A provincial officer may use such force as is reasonably necessary,

(a) to carry out an order or direction issued under Part X;

(b) to carry out a court order issued under this Part;

(c) to execute a warrant issued under the *Provincial Offences Act*; or

(d) to prevent the destruction of any thing that the provincial officer reasonably believes may afford evidence of an offence under this Act. 1998, c. 35, s. 24.

Order by justice, use of devices, etc.

163.1 (1) In this section,

"device" means a substance or tracking device that, when placed or installed in or on any place, land or thing, may be used to help ascertain, by electronic or other means, the origin, identity or location of anything.

Order may be issued

(2) On application without notice, a justice may issue an order in writing authorizing a provincial officer, subject to this section, to use any device, investigative technique or procedure or to do any thing described in the order if the justice is satisfied by evidence under oath that there are reasonable grounds to believe that an offence against this Act has been or will be committed and that information concerning the offence will be obtained through the use of the device, technique or procedure or the doing of the thing.

Limitation

(3) An order under this section shall not authorize the interception of any private communication.

Same

(4) No device, technique or procedure shall be used to intercept any private communication under an order issued under this section.

Terms and conditions of order

(5) An order issued under this section shall contain such terms and conditions as the justice considers advisable in the circumstances.

Activities under order

(6) An order issued under this section may authorize a provincial officer,

(a) to place, install, maintain or remove a device in or on any land, place or thing; and

(b) to monitor, or to have monitored, a device or information from a device placed or installed in or on any land, place or thing.

Duration of order

(7) An order issued under this section is valid for a period of 60 days or for such shorter period as may be specified in the order.

Further orders

(8) A justice may issue further orders under subsection (2). 1998, c. 35, s. 24.

Restoration of property

164. A provincial officer who makes or causes the making of an excavation in the course of his or her duties under this Act shall restore the property, so far as is reasonably possible, to the condition it was in before the excavation was made. R.S.O. 1990, c. E.19, s. 164; 2005, c. 12, s. 1 (42).

Licence, etc., condition, permission to inspect

165. It is a condition of every licence, permit, environmental compliance approval, certificate of property use or renewable energy approval under this Act that the holder must forthwith on request permit provincial officers to carry out inspections authorized by the following provisions of any place, other than any room actually used as a dwelling, to which the licence, permit, environmental compliance approval, certificate of property use or renewable energy approval relates:

1. Section 156, 156.1 or 158 of this Act.

2. Section 13, 14 or 16 of the *Nutrient Management Act, 2002*.

3. Section 15, 15.1 or 17 of the *Ontario Water Resources Act*.
4. Section 19, 19.1 or 20 of the *Pesticides Act*.
5. Section 81, 82 or 89 of the *Safe Drinking Water Act, 2002*.
6. Section 15 or 18 of the *Toxics Reduction Act, 2009*. 2009, c. 19, s. 67 (15); 2010, c. 16, Sched. 7, s. 2 (65).

Note: On the later of the day the Statutes of Ontario, 2009, chapter 19, section 65 comes into force and the day the Statutes of Ontario, 2009, chapter 19, subsection 67 (15) comes into force, paragraph 6 is amended by striking out "Section 15 or 18" at the beginning and substituting "Section 15, 15.1 or 18". See: 2009, c. 19, ss. 67 (16), 73 (3).

Records

165.1 (1) Every person required by this Act or the regulations to retain a record shall make it available to a provincial officer for inspection upon his or her request. 1992, c. 1, s. 33; 2009, c. 33, Sched. 15, s. 5 (5).

Copies or extracts

(2) The provincial officer may, on giving a receipt, remove any record referred to in subsection (1) for the purpose of making copies or extracts and shall promptly return the record. 2001, c. 17, s. 2 (35).

Records in electronic form

(3) If a record is retained in electronic form, the provincial officer may require that a copy of it be provided to him or her on paper or in a machine-readable medium or both. 2001, c. 17, s. 2 (35).

Police assistance and motor vehicle inspections

Calling for assistance of member of police force

166. (1) Whenever a provincial officer is required or empowered by this Act or the regulations to do or direct the doing of anything, such provincial officer may take such steps and employ such assistance as is necessary to accomplish what is required, and may, when obstructed in so doing, call for the assistance of any member of the Ontario Provincial Police Force or the police force in the area where the assistance is required and it is the duty of every member of a police force to render such assistance. R.S.O. 1990, c. E.19, s. 166 (1).

Stop and inspect powers: motor vehicle emissions

(2) For the purpose of ascertaining whether a system or device installed on, attached to or incorporated in any motor vehicle to prevent or lessen the discharge of any emission is operating in compliance with this Act and the regulations, a provincial officer or a police officer may stop and inspect the motor vehicle.

Same

(3) An inspection under subsection (2) shall be limited to what is reasonably required to ascertain whether the system or device is operating in compliance with this Act and the regulations.

Same

(4) In an inspection under subsection (2), the provincial officer or police officer may,

(a) require the driver of the motor vehicle to submit the motor vehicle to such tests at such places and times as the provincial officer or police officer considers reasonable;

(b) require the driver of the motor vehicle to produce any documents, including licenses and permits, related to the operation or ownership of the motor vehicle; and

(c) require the driver of the motor vehicle to operate, use or set in motion the vehicle or any part of the vehicle, under the conditions specified by the provincial officer or police officer.

Police assistance

(5) Where a provincial officer considers it necessary or expedient to do so, he or she may call for the assistance of any member of the Ontario Provincial Police Force or the police force in the area where the assistance is required for an inspection under subsection (2), and it is the duty of every member of a police force to render the assistance. 1998, c. 35, s. 26.

167. REPEALED: 1998, c. 35, s. 27.

Matters confidential

168. (1) Except as to information in respect of the deposit, addition, emission or discharge of a contaminant into the natural environment, every provincial officer shall preserve secrecy in respect of all matters that come to his or her knowledge in the course of any survey, examination, test or inquiry under this Act or the regulations and shall not communicate any such matters to any person except,

(a) as may be required in connection with the administration of this Act and the regulations or any proceeding under this Act or the regulations;

(a.1) as authorized under the *Regulatory Modernization Act, 2007*;

(b) to the provincial officer's counsel; or

(c) with the consent of the person to whom the information relates. R.S.O. 1990, c. E.19, s. 168 (1); 2007, c. 4, s. 30 (2); 2009, c. 19, s. 67 (9).

Testimony in civil suit

(2) Except in a proceeding under this Act or the regulations, no provincial officer shall be required to give testimony, other than testimony in respect of the deposit, addition, emission or discharge of a contaminant into the natural environment, in any civil suit or proceeding with regard to information obtained by him or her in the course of any survey, examination, test or inquiry under this Act or the regulations. R.S.O. 1990, c. E.19, s. 168 (2); 2009, c. 19, s. 67 (9).

PART XV.1
RECORDS OF SITE CONDITION

Definitions, Part XV.I

168.1 In this Part,

"building" has the same meaning as in the *Building Code Act, 1992*; ("bâtiment")

"construct" has the same meaning as in the *Building Code Act, 1992*; ("construire")

"owner" includes a person prescribed by the regulations; ("propriétaire")

"phase one environmental site assessment" means an assessment of property conducted in accordance with the regulations by or under the supervision of a qualified person to determine the likelihood that one or more contaminants have affected any land or water on, in or under the property; ("évaluation environnementale de site de phase I")

"phase two environmental site assessment" means an assessment of property conducted in accordance with the regulations by or under the supervision of a qualified person to determine the location and

concentration of one or more contaminants in the land or water on, in or under the property; ("évaluation environnementale de site de phase II")

"qualified person" means a person who meets the qualifications prescribed by the regulations; ("personne compétente")

"Registry" means the Environmental Site Registry; ("Registre")

"risk assessment" means an assessment of risks prepared in accordance with the regulations by or under the supervision of a qualified person. ("évaluation des risques") 2001, c. 17, s. 2 (36); 2007, c. 7, Sched. 13, s. 3.

Interpretation, effect on cause of action

168.2 (1) Except as provided in subsections 168.3 (3) and (4) and 168.9 (12), this Part shall not be construed as affecting any cause of action that a person would have in the absence of this Part. 2001, c. 17, s. 2 (36); 2006, c. 19, Sched. K, s. 2 (4); 2007, c. 7, Sched. 13, s. 4 (1).

Interpretation, meeting standards

(2) For purposes of this Part, a property meets the applicable site condition standards prescribed by the regulations for all contaminants prescribed by the regulations or the standards specified in a risk assessment for a contaminant if the concentration of the contaminants in the land and water on, in or under the property does not exceed the standards. 2007, c. 7, Sched. 13, s. 4 (2).

Environmental Site Registry

168.3 (1) The Director shall establish, maintain and operate a registry known in English as the Environmental Site Registry and in French as Registre environnemental des sites. 2001, c. 17, s. 2 (36).

Purposes

(2) The purposes of the Registry are:

1. To allow the filing of records of site condition for the purposes of this Part.
2. To facilitate public access to information contained in records of site condition that have been filed under this Part and to other information filed in accordance with this Act and the regulations.
3. Such other purposes as are prescribed. 2001, c. 17, s. 2 (36); 2007, c. 7, Sched. 13, s. 5 (1).

Protection from liability

(3) Despite subsection 180 (2), no action or other proceeding shall be commenced against the Crown in right of Ontario, a public servant employed under Part III of the *Public Service of Ontario Act, 2006*, a person or body to whom powers and duties of the Director are delegated under section 168.9 or an employee of a person or body to whom powers and duties of the Director are delegated under section 168.9 arising from any inaccuracy contained in a record of site condition that is filed in the Registry under this Act. 2001, c. 17, s. 2 (36); 2006, c. 35, Sched. C, s. 36 (6).

Same

(4) No action or other proceeding shall be commenced against a municipality or a conservation authority or against an officer, employee or agent of a municipality or conservation authority in relation to the following, if the action or proceeding arises from any inaccuracy contained in a record of site condition that is filed in the Registry under this Act:

1. The issuance of a permit under section 8 or 10 of the *Building Code Act, 1992*.
2. Any act done in the execution or intended execution of any power or duty under the *Planning Act* or any alleged neglect or default in the execution of any such power or duty.

3. Any act done in the execution or intended execution of any power or duty under any other prescribed Act or any prescribed provisions under a prescribed Act or any alleged neglect or default in the execution of any such power or duty. 2007, c. 7, Sched. 13, s. 5 (2).

Prohibition on certain changes of use

168.3.1 (1) Subject to subsection (2), a person shall not,

(a) change the use of a property from industrial or commercial use to residential or parkland use;

(b) change the use of a property in a manner prescribed by the regulations; or

(c) construct a building if the building will be used in connection with a change of use that is prohibited by clause (a) or (b). 2001, c. 17, s. 2 (37).

Exception

(2) Subsection (1) does not apply if,

(a) a record of site condition has been filed in the Registry in respect of the property under section 168.4; and

(b) the use specified under paragraph 3 of subsection 168.4 (2) in the record of site condition is the use to which the property is changed under clause (1) (a) or (b). 2001, c. 17, s. 2 (37).

Submission for filing, record of site condition

168.4 (1) An owner of a property may submit for filing in the Registry a record of site condition in respect of the property if all of the following criteria are satisfied:

1. A qualified person has certified in the record of site condition that a phase one environmental site assessment of the property has been conducted.
2. A qualified person has certified in the record of site condition that,
   i. a phase two environmental site assessment of all or part of the property was conducted with respect to one or more contaminants, or
   ii. as of the certification date, no phase two environmental site assessment is required by the regulations for any part of the property and, in the opinion of the qualified person, it is not necessary for any other reason to conduct a phase two environmental site assessment for any part of the property.
3. If a phase two environmental site assessment was conducted but for only part of the property, a qualified person has certified in the record of site condition that, as of the certification date,
   i. no phase two environmental site assessment was required by the regulations for any other part of the property, and
   ii. in the opinion of the qualified person, it was not necessary for any other reason to conduct a phase two environmental site assessment for any other part of the property.
4. If a phase two environmental site assessment was conducted for all or part of the property, a qualified person has certified in the record of site condition that,
   i. as of the certification date, the property for which the phase two environmental site assessment was conducted meets,
      A. the applicable full depth background site condition standards prescribed by the regulations for all contaminants prescribed by the regulations, except for those contaminants specified by the qualified person,

B. the applicable full depth generic site condition standards prescribed by the regulations for all contaminants prescribed by the regulations, except for those contaminants specified by the qualified person, or

C. the applicable stratified site condition standards prescribed by the regulations for all contaminants prescribed by the regulations, except for those contaminants specified by the qualified person, and

ii. for each contaminant excepted by the qualified person from the certification under subparagraph i,

A. a risk assessment was prepared for the contaminant with respect to the property for which the phase two environmental site assessment was conducted,

B. the Director has accepted the risk assessment under clause 168.5 (1) (a), and

C. as of the certification date, the property for which the phase two environmental site assessment was conducted meets the standards specified in the risk assessment for the contaminant.

5. The record of site condition contains everything required by subsection (2) and has been completed in accordance with the regulations. 2001, c. 17, s. 2 (36); 2007, c. 7, Sched. 13, s. 6 (1).

Contents of record of site condition

(2) The person who submits for filing a record of site condition in respect of a property shall ensure that, in accordance with the regulations, the record of site condition contains the following:

1. A description of the property.
2. The name of the person submitting the record of site condition for filing and the names of any other owners of the property.
3. The type of property use to which the property for which the record of site condition is submitted for filing is to be put.
4. Which standards prescribed by the regulations were applied for the purpose of the record of site condition.
5. A description of any soil removals or other action taken to reduce the concentration of contaminants on, in or under the property.
6. For each contaminant for which sampling and analysis has been performed, the maximum known concentration of the contaminant on, in or under the property as of the certification date.
7. A statement indicating whether a certificate of property use has been issued in respect of the property.
8. A list of all reports relied on by qualified persons in making the certifications referred to in subsection (1).
9. Such other certifications, information and documents as are prescribed by the regulations. 2001, c. 17, s. 2 (36); 2007, c. 7, Sched. 13, s. 6 (2-5).

Submitting a record of site condition

(3) If a record of site condition is submitted for filing under this section in respect of a property, the Director shall,

(a) give a notice of receipt to the owner who submitted the record of site condition, once the Director is satisfied that everything required by subsection (2) has been submitted for filing; and

(b) within the time prescribed by the regulations from the date set out in the notice of receipt given under clause (a), give a notice or acknowledgement under subsection (3.1) to the owner who submitted the record of site condition. 2007, c. 7, Sched. 13, s. 6 (6).

Same

(3.1) The Director shall give one of the following to the person to whom the Director has given a notice of receipt under clause (3) (a):

1. Written notice that the record of site condition cannot be filed because it has not been completed in accordance with the regulations.
2. Written notice stating that the Director intends to conduct a review in relation to the record of site condition before the record of site condition can be filed in the Registry.
3. Written acknowledgement, specifying the date, that the record of site condition has been filed in the Registry. 2007, c. 7, Sched. 13, s. 6 (6).

Notice that a record of site condition cannot be filed

(3.2) A notice given under paragraph 1 of subsection (3.1) shall identify the manner in which the record of site condition has not been completed in accordance with the regulations. 2007, c. 7, Sched. 13, s. 6 (6).

Notice after review relating to record of site condition

(3.3) If a notice is given under paragraph 2 of subsection (3.1), after conducting the review, the Director shall,

(a) give a notice to the owner indicating that a defect prescribed by the regulations has been found in relation to the record of site condition; or

(b) give a written acknowledgment to the owner, specifying the date, that the record of site condition has been filed in the Registry. 2007, c. 7, Sched. 13, s. 6 (6).

Correction of defect

(3.4) If an owner to whom notice has been given under clause (3.3) (a),

(a) submits for filing a new record of site condition in respect of the property under subsection (1); or

(b) submits further information or documents to the Director in relation to the original record of site condition that was submitted under subsection (1),

and the Director is satisfied that, as a result of the submission, there is no defect prescribed by the regulations in relation to the record of site condition, the Director shall give a written acknowledgment to the owner, specifying the date, that the record of site condition has been filed in the Registry. 2007, c. 7, Sched. 13, s. 6 (6).

Date of filing

(4) A record of site condition is deemed to have been filed in the Registry under this section on the date specified in the acknowledgement given by the Director under this section. 2007, c. 7, Sched. 13, s. 6 (7).

Retention of reports

(5) If a qualified person has relied on a report in making a certification referred to in subsection (1) or (2) in a record of site condition that has been filed under this section, the following persons shall retain a copy of the report for the period prescribed by the regulations:

1. The owner of the property who submitted the record of site condition for filing or who filed the record of site condition.
2. The qualified person who made the certification. 2007, c. 7, Sched. 13, s. 6 (8, 9).

Transition

(6) If, pursuant to the Ministry publication entitled "Guideline for Use at Contaminated Sites in Ontario", originally dated June 1996 and later revised, a record of site condition in respect of a property was submitted to the Ministry before this section came into force, the owner of the property may, despite subsections (1) and (2), file the record of site condition in the Registry if both of the following criteria are satisfied:

1. The Ministry has acknowledged in writing receipt of the record of site condition.
2. The owner of the property files a notice in the Registry certifying that the requirements prescribed by the regulations have been complied with. 2001, c. 17, s. 2 (36).

Same

(7) If a record of site condition is filed in the Registry under subsection (6),

(a) the notice referred to in paragraph 2 of subsection (6) shall be deemed to be part of the record of site condition;

(b) the land use specified in the record of site condition shall be deemed to have been specified as the type of property use under paragraph 3 of subsection (2); and

(c) the record of site condition shall be deemed to contain,

(i) a certification under sub-subparagraph 4 i A of subsection (1), if the record of site condition indicates that a background assessment or restoration approach was used,

(ii) a certification under sub-subparagraph 4 i B of subsection (1), if the record of site condition indicates that a generic full depth assessment or restoration approach was used,

(iii) a certification under sub-subparagraph 4 i C of subsection (1), if the record of site condition indicates that a generic stratified assessment or restoration approach was used, or

(iv) a certification under subparagraph 4 ii of subsection (1), if the record of site condition indicates that a site specific risk assessment approach was used. 2001, c. 17, s. 2 (36).

Acknowledgment of filing

(8) If a record of site condition is filed in the Registry under subsection (6), the Director shall promptly give the person who filed the record of site condition a written acknowledgment. 2007, c. 7, Sched. 13, s. 6 (10).

Date of filing

(9) A record of site condition that is filed in the Registry under subsection (6) shall be deemed to have been filed in the Registry on the date specified in the acknowledgment given under subsection (8). 2007, c. 7, Sched. 13, s. 6 (10).

Note: On a day to be named by proclamation of the Lieutenant Governor, section 168.4 is amended by the Statutes of Ontario, 2007, chapter 7, Schedule 13, subsection 6 (11) by adding the following subsection:

Correction of errors

(10) If an owner of property for which a record of site condition has been filed in the Registry under this section requests the Director to correct an error in the record of site condition, the Director shall correct the error in the record of site condition if the error is of a prescribed type and if the correction is made in the circumstances that satisfy the criteria, if any, prescribed by the regulations and does not contravene any prohibition, if any, prescribed by the regulations. 2007, c. 7, Sched. 13, s. 6 (11).

See: 2007, c. 7, Sched. 13, ss. 6 (11), 14 (2).

Director's response to risk assessment

168.5 (1) If an owner of property submits a risk assessment relating to a contaminant and the property to the Director, the Director shall, within the time prescribed by the regulations,

(a) give the person notice in writing that the Director accepts the risk assessment; or

(b) give the person notice in writing that the Director does not accept the risk assessment for reasons specified by the Director in the notice. 2001, c. 17, s. 2 (36).

Validity of decision

(2) A decision of the Director to accept or not accept a risk assessment is not invalid solely on the ground that the decision was not made within the time prescribed by the regulations. 2001, c. 17, s. 2 (36).

Certificate of property use

168.6 (1) If a risk assessment relating to a property has been accepted under clause 168.5 (1) (a), the Director may issue a certificate of property use to the owner of the property, requiring the owner to do any of the following things:

1. Take any action that is specified in the certificate and that, in the Director's opinion, is necessary to prevent, eliminate or ameliorate any adverse effect that has been identified in the risk assessment, including installing any equipment, monitoring any contaminant or recording or reporting information for that purpose.
2. Refrain from using the property for any use specified in the certificate or from constructing any building specified in the certificate on the property. 2001, c. 17, s. 2 (36); 2006, c. 19, Sched. K, s. 2 (5, 6); 2007, c. 7, Sched. 13, s 7.

Restriction

(2) A certificate of property use shall not require an owner of property to take any action that would have the effect of reducing the concentration of a contaminant on, in or under the property to a level below the level that is required to meet the standards specified for the contaminant in the risk assessment. 2001, c. 17, s. 2 (36).

Revocation or amendment

(3) The Director may, on his or her own initiative or on application by the owner of the property in respect of which a certificate has been issued under subsection (1),

(a) alter any terms and conditions in the certificate or impose new terms and conditions; or

(b) revoke the certificate. 2001, c. 17, s. 2 (36).

Occupants

(4) If a certificate of property use contains a provision requiring the owner of property to refrain from using the property for a specified use or from constructing a specified building on the property,

(a) the owner of the property shall ensure that a copy of the provision is given to every occupant of the property;

(b) the provision applies, with necessary modifications, to every occupant of the property who receives a copy of the provision; and

(c) the owner of the property shall ensure that every occupant of the property complies with the provision. 2001, c. 17, s. 2 (36).

Notice to prescribed persons

(5) If a certificate of property use is issued, altered or revoked under this section, the Director shall give notice of the certificate, alteration or revocation to the persons prescribed by the regulations. 2001, c. 17, s. 2 (38).

Prohibition on construction or use

(6) Despite any other Act, if a certificate of property use contains a provision requiring the owner of property to refrain from using the property for a specified use or from constructing a specified building on the property, no permit, licence, approval or other instrument shall be issued to any person, under any provision prescribed by the regulations, that would authorize the person to use the property for the specified use, to construct the specified building or to construct a building that will be used for the specified use. 2001, c. 17, s. 2 (38).

Consequences of filing record of site condition

168.7 (1) If a record of site condition is filed in the Registry in accordance with section 168.4 with respect to a property, no order shall be issued to any of the following persons under section 7, 8, 12, 17, 18, 97, 157 or 157.1 in respect of a contaminant that was discharged into the natural environment before the certification date and was on, in or under the property as of the certification date:

1. The person who filed or who submitted for filing the record of site condition or a subsequent owner of the property.
2. A person who is in occupation of the property or who was in occupation of the property at any time after the record of site condition was filed.
3. A person who has charge, management or control of the property or who had charge, management or control of the property at any time after the record of site condition was filed.
4. A person who meets the requirements prescribed by the regulations and who, before the certification date,
   i. owned the property,
   ii. was in occupation of the property, or
   iii. had charge, management or control of the property. 2001, c. 17, s. 2 (36); 2007, c. 7, Sched. 13, s. 8 (1, 2).

False or misleading information, etc.

(2) Subsection (1) does not apply if the record of site condition contains false or misleading information or false or misleading certifications. 2007, c. 7, Sched. 13, s. 8 (3).

Contaminants that move to other property

(3) Subsection (1) does not apply if, after the certification date, any of the contaminant moved from the property to which the record of site condition relates to another property. 2001, c. 17, s. 2 (36).

Note: On a day to be named by proclamation of the Lieutenant Governor, subsection (3) is repealed by the Statutes of Ontario, 2007, chapter 7, Schedule 13, subsection 8 (4) and the following substituted:

Contaminants that move to other property

(3) Subject to section 168.7.1, subsection (1) does not apply if, after the certification date, any of the contaminant moved from the land or water on, in or under the property for which a record of site condition has been filed to another property. 2007, c. 7, Sched. 13, s. 8 (4).

See: 2007, c. 7, Sched. 13, ss. 8 (4), 14 (2).

Different use

(4) If the actual use of the property is different from the use specified under paragraph 3 of subsection 168.4 (2) in the record of site condition, subsection (1) does not apply to a person who causes or permits the change in use and who owns, occupies or has charge, management or control of the property at the time of the change unless,

(a) the record of site condition did not contain any certification under subparagraph 4 ii of subsection 168.4 (1);

(b) all of the full depth background site condition standards that are applicable under the regulations to the actual use are the same as or less stringent than the full depth background site condition standards that are applicable to the use specified in the record of site condition, if the record of site condition contained a certification under sub-subparagraph 4 i A of subsection 168.4 (1);

(c) all of the full depth generic site condition standards that are applicable under the regulations to the actual use are the same as or less stringent than the full depth generic site condition standards that are applicable to the use specified in the record of site condition, if the record of site condition contained a certification under sub-subparagraph 4 i B of subsection 168.4 (1); and

(d) all of the stratified site condition standards that are applicable under the regulations to the actual use are the same as or less stringent than the stratified site condition standards that are applicable to the use specified in the record of site condition, if the record of site condition contained a certification under sub-subparagraph 4 i C of subsection 168.4 (1). 2007, c. 7, Sched. 13, s. 8 (5).

Contravention of certificate of property use, etc.

(5) Despite subsection (1), an order may be issued under section 157 against a person who contravenes a term or condition of,

(a) a certificate of property use; or

(b) an order made under this Act in respect of risk management measures described in a record of site condition filed in the Registry under subsection 168.4 (6). 2001, c. 17, s. 2 (36).

Contravention of soil management or disposal regulations

(6) Despite subsection (1), an order may be issued under section 157 against a person who contravenes a provision of a regulation made under clause 176 (1) (g) or 176 (10) (m). 2001, c. 17, s. 2 (36).

Order if contaminant moves

(6.1) Despite subsection (3), if, after the certification date, any of the contaminant moved from the land or water on, in or under the property for which a record of site condition has been filed to another property as a result of a person contravening,

(a) a term or condition of a certificate of property use or of an order referred to in clause (5) (b); or

(b) a provision of a regulation referred to in subsection (6),

subsection (1) does not apply, but solely in respect of that person. 2007, c. 7, Sched. 13, s. 8 (6).

Consent order

(7) Subsection (1) does not apply if the person to whom the order is issued consents in writing to the order. 2001, c. 17, s. 2 (36).

Note: On a day to be named by proclamation of the Lieutenant Governor, the Act is amended by the Statutes of Ontario, 2007, chapter 7, Schedule 13, section 9 by adding the following section:

Contaminants moving to other property

Application

168.7.1 (1) This section applies to a property for which a record of site condition has been filed in the Registry in accordance with section 168.4 when, after the certification date, a contaminant has moved from the land or water on, in or under the property to another property, and the certifications described in this section, if applicable, are made. 2007, c. 7, Sched. 13, s. 9.

Assessment, all property

(2) This section applies if a qualified person has, in accordance with the regulations, certified in the record of site condition that an assessment of the contaminants that were discharged into the natural environment and that were on, in or under the property for which the record of site condition has been filed, as of the certification date, has been conducted by or under the supervision of a qualified person in accordance with the regulations. 2007, c. 7, Sched. 13, s. 9.

Assessment of ground water

(3) The assessment of contaminants referred to subsection (2) must include an assessment of contaminants in the ground water in or under the property. 2007, c. 7, Sched. 13, s. 9.

Exception, full depth background site condition standards

(4) Subsection 168.7 (3) does not apply to a contaminant that has moved from the land or water on, in or under the property for which a record of site condition has been filed to another property at a concentration that does not exceed the applicable full depth background site condition standard for that contaminant, if the record of site condition contains a certification under sub-subparagraph 4 i A of subsection 168.4 (1). 2007, c. 7, Sched. 13, s. 9.

Exception, sensitive property use

(5) Subsection 168.7 (3) does not apply to a contaminant that has moved from the land or water on, in or under the property for which a record of site condition has been filed to another property at a concentration that does not exceed the applicable site condition standard for that contaminant if the record of site condition contains a certification under sub-subparagraph 4 i B or 4 i C of subsection 168.4 (1) and the type of property use specified under paragraph 3 of subsection 168.4 (2) in the record of site condition is a sensitive property use. 2007, c. 7, Sched. 13, s. 9.

Application, not a sensitive property use

(6) If the record of site condition contains a certification under sub-subparagraph 4 i B or 4 i C of subsection 168.4 (1) and the type of property use specified under paragraph 3 of subsection 168.4 (2) in the record of site condition is not a sensitive property use, this section applies if a qualified person has, in accordance with the regulations, made the following certifications in the record of site condition, in addition to the certification referred to in subsection (2):

1. The phase one environmental site assessment of the property referred to in paragraph 1 of subsection 168.4 (1) included an investigation of the existing and permitted land uses within the vicinity of the property in accordance with the regulations to determine whether a sensitive property use is located or permitted within the vicinity of the property.
2. A certification that, as of the date prescribed by the regulations, there is no sensitive property use located or permitted within the vicinity of the property or a certification that, as of the date prescribed by the regulations, there is a sensitive property use located or permitted within the vicinity of the property. 2007, c. 7, Sched. 13, s. 9.

Exception, not a sensitive property use

(7) If a record of site condition contains a certification under sub-subparagraph 4 i B or 4 i C of subsection 168.4 (1) and the type of property use specified under paragraph 3 of subsection 168.4 (2) in the record of site condition is not a sensitive property use, subsection 168.7 (3) does not apply to a contaminant that has moved from the land or water on, in or under the property for which a record of site condition has been filed to another property at a concentration that,

(a) does not exceed the applicable site condition standard for that contaminant if the record of site condition contains a certification that, as of the date prescribed by the regulations, there is no sensitive property use located or permitted within the vicinity of the property; or

(b) does not exceed the applicable site condition standard for that contaminant that would have applied to the property if the type of property use specified under paragraph 3 of subsection 168.4 (2) in the record of site condition were a sensitive property use, if the record of site condition contains a certification that, as of the date prescribed by the regulations, there is a sensitive property use located or permitted within the vicinity of the property. 2007, c. 7, Sched. 13, s. 9.

Prescribed date

(8) A date prescribed by the regulations for the purposes of paragraph 2 of subsection (6) and clauses (7) (a) and (b) shall not be a date that is after the certification date that applies to the record of site condition. 2007, c. 7, Sched. 13, s. 9.

Reference to site condition standard

(9) A reference in this section to an applicable site condition standard for a contaminant means the site condition standard that applied to the contaminant as of the certification date set out in the record of site condition or, in the case of a reference in clause (7) (b), means the site condition standard that would have applied to the contaminant as of the certification date set out in the record of site condition. 2007, c. 7, Sched. 13, s. 9.

Non-application to person who causes or permits discharge

(10) This section does not apply to a person who, before the certification date, caused or permitted the discharge into the natural environment of the contaminant referred to in subsection (1). 2007, c. 7, Sched. 13, s. 9.

Definition

(11) In this section,

"sensitive property use" means one or more types of property uses prescribed by the regulations for the purposes of this section. 2007, c. 7, Sched. 13, s. 9.

See: 2007, c. 7, Sched. 13, ss. 9, 14 (2).

Notice of order to be filed in Registry

168.7.2 (1) The Director shall file notice of the order in the Registry in accordance with the regulations if an order is issued under section 7, 8, 12, 17, 18, 97, 157 or 157.1 with respect to a property for which a record of site condition has been filed in accordance with section 168.4 and if,

(a) pursuant to subsection 168.7 (2), (3), (4) or (6.1), subsection 168.7 (1) does not apply; or

(b) subsection 168.7 (5) or (6) applies. 2007, c. 7, Sched. 13, s. 10.

Notice of compliance with order

(2) If the Director is satisfied that an order referred to in subsection (1) has been complied with, the Director shall file notice of the compliance in the Registry in accordance with the regulations. 2007, c. 7, Sched. 13, s. 10.

Filing of new record of site condition

(3) If the Director is satisfied that an order referred to in subsection (1) has been complied with, but the Director is of the opinion that a certification contained in the record of site condition filed in the Registry does not accurately reflect the current state of the property, subsection (2) does not apply until a new record of site condition is filed in accordance with section 168.4. 2007, c. 7, Sched. 13, s. 10.

Emergencies relating to old contaminants

168.8 (1) If a record of site condition is filed in the Registry in accordance with section 168.4 with respect to a property, the Director may issue an order described in subsection (2) to the person who owns the property if the Director has reasonable grounds to believe that, as a result of the presence of a contaminant that was on, in or under the property as of the certification date, there is danger to the health or safety of any person. 2001, c. 17, s. 2 (36); 2007, c. 7, Sched. 13, s. 11.

Scope of order

(2) An order under subsection (1) may only require the owner, within such times as are specified in the order, to comply with such directions specified in the order as are reasonably necessary to ensure that there is no danger to the health or safety of any person. 2001, c. 17, s. 2 (36).

Same

(3) The directions referred to in subsection (2) may include the following:

1. A direction requiring the doing of anything mentioned in section 124.
2. A direction requiring the removal or disposal of the contaminant or anything affected by the contaminant.
3. A direction to secure, by means of locks, gates, fences, security guards or other means, any land, place or thing.
4. If the presence or discharge of the contaminant has damaged or endangered or is likely to damage or endanger existing water supplies, a direction to provide temporary or permanent alternate water supplies. 2001, c. 17, s. 2 (36); 2005, c. 12, s. 1 (43).

Information to be included in order

(4) An order under subsection (1) shall briefly describe the reasons for the order and the circumstances on which the reasons are based. 2001, c. 17, s. 2 (36).

Notice of order to be filed in Registry

(5) The Director shall file notice of an order under subsection (1) in the Registry in accordance with the regulations. 2001, c. 17, s. 2 (36).

Notice of compliance with order

(6) If the Director is satisfied that an order under subsection (1) has been complied with, the Director shall file notice of the compliance in the Registry in accordance with the regulations. 2001, c. 17, s. 2 (36).

Filing of new record of site condition

(7) If the Director is satisfied that an order under subsection (1) has been complied with but the Director is of the opinion that a certification contained in the record of site condition filed in the Registry does not accurately reflect the current state of the property, subsection (6) does not apply until a new record of site condition is filed in accordance with section 168.4. 2001, c. 17, s. 2 (36).

Delegation agreement

168.9 (1) The Minister may enter into an agreement with an individual, partnership or corporation, delegating to the individual, partnership or corporation any of the Director's powers and duties relating to the establishment, maintenance and operation of the Registry, including the Director's duties under subsection 168.4 (3). 2001, c. 17, s. 2 (36).

Contents of agreement

(2) A delegation agreement shall contain any limitations, conditions and requirements applicable to the delegation and such other provisions as the Minister considers advisable in the public interest, including provisions,

(a) requiring that the delegate comply with applicable Ministry standards and policies, including standards and policies relating to quality assurance and audits;

(b) setting the financial terms of the delegation;

(c) requiring the delegate to obtain and maintain specified kinds and amounts of insurance;

(d) providing that the Minister may appoint persons to the board of directors of the delegate, if the delegate is a corporation without share capital;

(e) authorizing the delegate to carry on other activities unrelated to the delegated powers and duties. 2001, c. 17, s. 2 (36).

Regulation

(3) A delegation under a delegation agreement is not effective unless the Minister makes a regulation,

(a) prescribing the powers and duties that are to be delegated by the agreement; and

(b) specifying the individual, partnership or corporation to which the powers and duties are to be delegated. 2001, c. 17, s. 2 (36).

Revocation of delegation

(4) The Minister may by regulation revoke a delegation if, in the opinion of the Minister,

(a) the delegate has contravened or failed to comply with this Act or the regulations;

(b) the delegate has contravened or failed to comply with the delegation agreement; or

(c) it is in the public interest to do so. 2001, c. 17, s. 2 (36).

Effect of regulation

(5) The delegation is revoked by a regulation made under subsection (4) on the day specified in the regulation or, if no day is specified in the regulation, on the day the regulation comes into force. 2001, c. 17, s. 2 (36).

Notice

(6) The Minister may give the delegate such notice of the intention to make a regulation under subsection (4) as the Minister considers reasonable in the circumstances. 2001, c. 17, s. 2 (36).

Other remedies not affected

(7) The power to revoke a delegation is in addition to and does not bar or affect the Minister's right to exercise any other remedy under the delegation agreement or at law. 2001, c. 17, s. 2 (36).

Obligations of delegate

(8) The delegate shall exercise and perform the powers and duties delegated to the delegate in accordance with the law and, in particular, in accordance with this Act, the regulation prescribing the delegated powers and duties and the delegation agreement. 2001, c. 17, s. 2 (36).

Minister may appoint directors

(9) If a delegation agreement with a corporation without share capital so provides, the Minister may appoint one or more persons to the board of directors of the delegate, as specified in the agreement, for such terms of office as the Minister considers appropriate. 2001, c. 17, s. 2 (36).

Remuneration, expenses of Ministerial appointees

(10) The remuneration and expenses of the directors appointed by the Minister shall be the responsibility of the delegate. 2001, c. 17, s. 2 (36).

Delegate not a Crown agency

(11) A delegate is not an agent of Her Majesty for any purpose, despite the *Crown Agency Act*, and shall not hold itself out as such. 2001, c. 17, s. 2 (36).

Crown not liable for delegate's acts

(12) No action or other proceeding shall be instituted against the Crown, the Minister or any employee in the Ministry,

(a) for any act done in the execution or intended execution of a power or duty delegated under this section or for an alleged neglect or default in the execution of a power or duty delegated under this section; or

(b) for any tort committed by a delegate or an employee or agent of a delegate in relation to a power or duty delegated under this section. 2001, c. 17, s. 2 (36); 2006, c. 35, Sched. C, s. 36 (7).

Annual report

(13) A delegate shall report annually to the Minister on its activities over the previous year with respect to the delegated powers and duties. 2001, c. 17, s. 2 (36).

Additional reports

(14) A delegate shall provide additional reports to the Minister as may be required by the delegation agreement or requested by the Minister. 2001, c. 17, s. 2 (36).

Regulations

(15) The Minister may make regulations,

(a) prescribing the powers and duties of the Director that are to be delegated under a delegation agreement;

(b) specifying the individual, partnership or corporation to whom such powers and duties are to be delegated;

(c) respecting any matter that the Minister considers advisable to carry out effectively the intent and purpose of this section. 2001, c. 17, s. 2 (36).

General or particular

(16) A regulation made under subsection (15) may be general or particular in its application. 2001, c. 17, s. 2 (36).

Definition

(17) In this section,

"delegation agreement" means an agreement under subsection (1). 2001, c. 17, s. 2 (36).

PART XV.2
SPECIAL PROVISIONS APPLICABLE TO MUNICIPALITIES, SECURED CREDITORS, RECEIVERS, TRUSTEES IN BANKRUPTCY, FIDUCIARIES AND PROPERTY INVESTIGATORS

INTERPRETATION

Definitions, Part XV.2

168.10 In this Part,

"contaminant" means,

(a) a contaminant as defined in section 1, or

(b) waste as defined in Part V; ("contaminant")

"fiduciary property" means property held or administered by a fiduciary in the capacity of fiduciary, or property in respect of which a fiduciary has powers or duties in the capacity of fiduciary; ("bien fiduciaire")

"non-municipal property" means, with respect to a municipality, property that is not owned, leased or occupied by the municipality. ("bien non municipal") 2001, c. 17, s. 2 (39).

Interpretation, effect on cause of action

168.11 This Part shall not be construed as affecting any cause of action that a person would have in the absence of this Part. 2001, c. 17, s. 2 (39).

MUNICIPALITIES

Actions taken by municipalities

168.12 (1) A municipality or a municipal representative who takes an action described in subsection (2) is not, for that reason alone,

(a) a person who is or was in occupation of a source of contaminant for the purpose of subsection 7 (1) or 8 (1);

(b) a person who has or had the charge, management or control of a source of contaminant for the purpose of subsection 7 (1) or 8 (1);

(c) a person responsible for the purpose of section 12;

(d) a person who has or had management or control of an undertaking or property for the purpose of subsection 18 (1);

(e) a person who has or had charge and control of land, a building or waste for the purpose of section 43;

(f) an occupant or previous occupant of land or a building for the purpose of section 43;

(g) a person having control of a pollutant for the purpose of subsection 97 (1);

(h) a person having the charge, management or control of any real property or personal property for the purpose of subsection 97 (1); or

(i) a person who has management or control of an undertaking or property for the purpose of subsection 157.1 (1). 2001, c. 17, s. 2 (39); 2005, c. 12, s. 1 (44).

Actions

(2) The actions referred to in subsection (1) are the following:

1. Any action taken for the purpose of conducting, completing or confirming an investigation relating to non-municipal property.
2. Any action taken for the purpose of preserving or protecting non-municipal property, including action to,
   i. ensure the supply of water, sewage services, electricity, artificial or natural gas, steam, hot water, heat or maintenance,
   ii. secure the property by means of locks, gates, fences, security guards or other means, or
   iii. ensure that the property is insured under a contract of insurance.
3. Any action taken on non-municipal property for the purpose of responding to,
   i. any danger to the health or safety of any person that results from the presence or discharge of a contaminant on, in or under the property,
   ii. any impairment or serious risk of impairment of the quality of the natural environment for any use that can be made of it that results from the presence or discharge of a contaminant on, in or under the property, or
   iii. any injury or damage or serious risk of injury or damage to any property or to any plant or animal life that results from the presence or discharge of a contaminant on, in or under the property.
4. Any action taken with respect to non-municipal property to exercise a right under any Act to collect rent or levy by distress in relation to an unpaid amount.
5. Any action taken on non-municipal property under or for the purpose of Part XI of the *Municipal Act, 2001* or Part XIV of the *City of Toronto Act, 2006*.
6. Any action taken on non-municipal property under or for the purpose of the *Building Code Act, 1992*, the *Fire Protection and Prevention Act, 1997* or an Act prescribed by the regulations.
7. Any other action prescribed by the regulations. 2001, c. 17, s. 2 (39); 2002, c. 17, Sched. C, s. 11 (1); 2006, c. 32, Sched. C, s. 19 (7).

Ownership by vesting

168.13 (1) If a municipality becomes the owner of property by virtue of the registration of a notice of vesting under Part XI of the *Municipal Act, 2001* or Part XIV of the *City of Toronto Act, 2006*, the Minister, the Director or a provincial officer shall not, in respect of the period described in subsection (4), issue any order under this Act to the municipality or a municipal representative with respect to the property unless the order arises from,

(a) the gross negligence or wilful misconduct of the municipality or municipal representative; or

(b) circumstances prescribed by the regulations. 2006, c. 32, Sched. C, s. 19 (8).

Exception

(2) Subsection (1) does not apply to an order under paragraph 4, 5 or 6 of subsection 97 (1). 2001, c. 17, s. 2 (39).

Consent order

(3) Subsection (1) does not apply to an order issued with the written consent of the municipality or municipal representative. 2001, c. 17, s. 2 (39).

Time period

(4) Subsection (1) only applies to the municipality or municipal representative in respect of the period that begins on the day the municipality became the owner of the property by virtue of the registration of the notice of vesting and ends on the earlier of the following days:

1. The fifth anniversary of the day the municipality became the owner of the property by virtue of the registration of the notice of vesting.
2. The day the municipality ceases to be the owner of the property. 2006, c. 19, Sched. K, s. 2 (7).

Extension of period

(5) The Director may extend the period referred to in subsection (4), before or after it expires, on such terms and conditions as he or she considers appropriate, but the period may not be extended beyond the day the municipality ceases to be the owner of the property. 2006, c. 19, Sched. K, s. 2 (7).

Exceptional circumstances, municipalities

168.14 (1) Despite section 168.13, the Director may issue an order described in subsection (3) to a municipality if the municipality has become the owner of property by virtue of the registration of a notice of vesting under Part XI of the *Municipal Act, 2001* or Part XIV of the *City of Toronto Act, 2006* and the Director has reasonable grounds to believe that, as a result of the presence or discharge of a contaminant on, in or under the property, any of the following circumstances exist:

1. There is danger to the health or safety of any person.
2. There is impairment or serious risk of impairment of the quality of the natural environment for any use that can be made of it.
3. There is injury or damage or serious risk of injury or damage to any property or to any plant or animal life. 2001, c. 17, s. 2 (39); 2002, c. 17, Sched. C, s. 11 (3); 2006, c. 32, Sched. C, s. 19 (9).

Restriction if record of site condition

(2) If a record of site condition has been filed in the Environmental Site Registry under section 168.4 with respect to the property, no order shall be issued under subsection (1) unless the Director has reasonable grounds to believe that, as a result of the presence of a contaminant that was on, in or under the property as of the certification date, there is danger to the health or safety of any person. 2001, c. 17, s. 2 (39).

Scope of order

(3) An order under subsection (1) may only require the municipality, within such times as are specified in the order, to comply with such directions specified in the order as are reasonably necessary to ensure that,

(a) none of the circumstances listed in subsection (1) exist, if no record of site condition has been filed in the Environmental Site Registry under section 168.4 with respect to the property; or

(b) there is no danger to the health or safety of any person, if a record of site condition has been filed in the Environmental Site Registry under section 168.4 with respect to the property. 2001, c. 17, s. 2 (39).

Same

(4) The directions referred to in subsection (3) may include the following:

1. A direction requiring the doing of anything mentioned in section 124.
2. A direction requiring the removal or disposal of the contaminant or anything affected by the contaminant.
3. A direction to secure, by means of locks, gates, fences, security guards or other means, any land, place or thing.
4. If the presence or discharge of the contaminant has damaged or endangered or is likely to damage or endanger existing water supplies, a direction to provide temporary or permanent alternate water supplies. 2001, c. 17, s. 2 (39); 2005, c. 12, s. 1 (45).

Information to be included in order

(5) An order under subsection (1) shall briefly describe the reasons for the order and the circumstances on which the reasons are based, including the circumstances listed in subsection (1) that exist. 2001, c. 17, s. 2 (39).

When notice of order filed in Registry

(6) The Director shall file notice of an order under subsection (1) in the Environmental Site Registry in accordance with the regulations if a record of site condition has been filed in the Registry under section 168.4 with respect to the property. 2001, c. 17, s. 2 (39).

Notice of compliance with order

(7) If notice of an order has been filed in the Registry under subsection (6) and the Director is satisfied that the order has been complied with, the Director shall file notice of the compliance in the Registry in accordance with the regulations. 2001, c. 17, s. 2 (39).

Filing of new record of site condition

(8) If notice of an order has been filed in the Registry under subsection (6) and the Director is satisfied that the order has been complied with but the Director is of the opinion that a certification contained in the record of site condition filed in the Registry does not accurately reflect the current state of the property, subsection (7) does not apply until a new record of site condition is filed in accordance with section 168.4. 2001, c. 17, s. 2 (39).

Notice of prescribed circumstances, municipalities

168.15 (1) If, in the course of or as a result of taking any action described in subsection 168.12 (2), a municipality or municipal representative becomes aware of circumstances prescribed by the regulations, the municipality shall give notice to a provincial officer in the manner prescribed by the regulations. 2001, c. 17, s. 2 (39).

Same

(2) If a municipality became the owner of property by virtue of the registration of a notice of vesting under Part XI of the *Municipal Act, 2001* or Part XIV of the *City of Toronto Act, 2006* and, during the period described in subsection 168.13 (4), the municipality or a municipal representative becomes aware of circumstances prescribed by the regulations, the municipality shall give notice to a provincial officer

in the manner prescribed by the regulations. 2001, c. 17, s. 2 (39); 2002, c. 17, Sched. C, s. 11 (4); 2006, c. 32, Sched. C, s. 19 (10).

Reports of investigations of contaminants, municipalities

168.16 On the written request of the Director, a municipality shall, within the time specified in the request, provide the Director with a copy of any report that is in the possession or control of the municipality and that was prepared in the course of or as a result of an investigation to determine whether a contaminant is present or is being discharged on, in or under property. 2001, c. 17, s. 2 (39).

SECURED CREDITORS, RECEIVERS AND TRUSTEES IN BANKRUPTCY

Actions taken by secured creditors

168.17 (1) A secured creditor or a secured creditor representative who takes an action described in subsection (2) is not, for that reason alone,

(a) a person who is or was in occupation of a source of contaminant for the purpose of subsection 7 (1) or 8 (1);

(b) a person who has or had the charge, management or control of a source of contaminant for the purpose of subsection 7 (1) or 8 (1);

(c) a person responsible for the purpose of section 12;

(d) a person who has or had management or control of an undertaking or property for the purpose of subsection 18 (1);

(e) a person who has or had charge and control of land, a building or waste for the purpose of section 43;

(f) an occupant or previous occupant of land or a building for the purpose of section 43;

(g) a person having control of a pollutant for the purpose of subsection 97 (1);

(h) a person having the charge, management or control of any real property or personal property for the purpose of subsection 97 (1); or

(i) a person who has management or control of an undertaking or property for the purpose of subsection 157.1 (1). 2001, c. 17, s. 2 (39); 2005, c. 12, s. 1 (46).

Actions

(2) The actions referred to in subsection (1) are the following:

1. Any action taken for the purpose of conducting, completing or confirming an investigation relating to the secured property.
2. Any action taken for the purpose of preserving or protecting the secured property, including action to,
   i. ensure the supply of water, sewage services, electricity, artificial or natural gas, steam, hot water, heat or maintenance,
   ii. secure the property by means of locks, gates, fences, security guards or other means,
   iii. ensure that the property is insured under a contract of insurance, or
   iv. pay taxes due or collect rents owing with respect to the property.
3. Any action taken on the secured property for the purpose of responding to,

i. any danger to the health or safety of any person that results from the presence or discharge of a contaminant on, in or under the property,

ii. any impairment or serious risk of impairment of the quality of the natural environment for any use that can be made of it that results from the presence or discharge of a contaminant on, in or under the property, or

iii. any injury or damage or serious risk of injury or damage to any property or to any plant or animal life that results from the presence or discharge of a contaminant on, in or under the property.

4. Any other action prescribed by the regulations. 2001, c. 17, s. 2 (39).

Secured creditor becoming owner by foreclosure

168.18 (1) If a secured creditor becomes the owner of the secured property by virtue of a foreclosure, the Minister, the Director or a provincial officer shall not, in respect of the period described in subsection (3), issue any order under any provision of this Act to the secured creditor or a secured creditor representative with respect to the property unless the order arises from,

(a) the gross negligence or wilful misconduct of the secured creditor or secured creditor representative; or

(b) circumstances prescribed by the regulations. 2001, c. 17, s. 2 (39).

Consent order

(2) Subsection (1) does not apply to an order issued with the written consent of the secured creditor or secured creditor representative. 2001, c. 17, s. 2 (39).

Time period

(3) Subsection (1) only applies to the secured creditor or secured creditor representative in respect of the period that begins on the day the secured creditor became the owner of the property by virtue of a foreclosure and ends on the earlier of the following days:

1. The fifth anniversary of the day the secured creditor became the owner of the property by virtue of a foreclosure.

2. The day the secured creditor ceases to be the owner of the property. 2006, c. 19, Sched. K, s. 2 (8).

Extension of period

(4) The Director may extend the period referred to in subsection (3), before or after it expires, on such terms and conditions as he or she considers appropriate, but the period may not be extended beyond the day the secured creditor ceases to be the owner of the property. 2006, c. 19, Sched. K, s. 2 (8).

Receivers and trustees in bankruptcy

168.19 (1) The Minister, the Director or a provincial officer shall not issue any order under any provision of this Act to a receiver, receiver representative, trustee in bankruptcy or trustee in bankruptcy representative with respect to the property held or administered by the receiver or trustee in bankruptcy unless the order arises from,

(a) the gross negligence or wilful misconduct of the receiver, receiver representative, trustee in bankruptcy or trustee in bankruptcy representative; or

(b) circumstances prescribed by the regulations. 2001, c. 17, s. 2 (39).

Consent order

(2) Subsection (1) does not apply to an order issued with the written consent of the receiver, receiver representative, trustee in bankruptcy or trustee in bankruptcy representative. 2001, c. 17, s. 2 (39).

Exceptional circumstances, secured creditors, receivers and trustees in bankruptcy

Secured creditors

168.20 (1) Despite section 168.18, the Director may issue an order described in subsection (4) to a secured creditor who has become the owner of the secured property by virtue of a foreclosure if the Director has reasonable grounds to believe that, as a result of the presence or discharge of a contaminant on, in or under the property, any of the following circumstances exist:

1. There is danger to the health or safety of any person.
2. There is impairment or serious risk of impairment of the quality of the natural environment for any use that can be made of it.
3. There is injury or damage or serious risk of injury or damage to any property or to any plant or animal life. 2001, c. 17, s. 2 (39).

Receivers and trustees in bankruptcy

(2) Despite section 168.19, the Director may issue an order described in subsection (4) to a receiver or trustee in bankruptcy if the Director has reasonable grounds to believe that, as a result of the presence or discharge of a contaminant on, in or under the property held or administered by the receiver or trustee in bankruptcy, any of the circumstances listed in subsection (1) exist. 2001, c. 17, s. 2 (39).

Restriction if record of site condition

(3) If a record of site condition has been filed in the Environmental Site Registry under section 168.4 with respect to the property, no order shall be issued under subsection (1) or (2) unless the Director has reasonable grounds to believe that, as a result of the presence of a contaminant that was on, in or under the property as of the certification date, there is danger to the health or safety of any person. 2001, c. 17, s. 2 (39).

Scope of order

(4) An order under subsection (1) or (2) may only require the secured creditor, receiver or trustee in bankruptcy, within such times as are specified in the order, to comply with such directions specified in the order as are reasonably necessary to ensure that,

(a) none of the circumstances listed in subsection (1) exist, if no record of site condition has been filed in the Environmental Site Registry under section 168.4 with respect to the property; or

(b) there is no danger to the health or safety of any person, if a record of site condition has been filed in the Environmental Site Registry under section 168.4 with respect to the property. 2001, c. 17, s. 2 (39).

Same

(5) The directions referred to in subsection (4) may include the following:

1. A direction requiring the doing of anything mentioned in section 124.
2. A direction requiring the removal or disposal of the contaminant or anything affected by the contaminant.
3. A direction to secure, by means of locks, gates, fences, security guards or other means, any land, place or thing.

4. If the presence or discharge of the contaminant has damaged or endangered or is likely to damage or endanger existing water supplies, a direction to provide temporary or permanent alternate water supplies. 2001, c. 17, s. 2 (39); 2005, c. 12, s. 1 (47).

Information to be included in order

(6) An order under subsection (1) or (2) shall briefly describe the reasons for the order and the circumstances on which the reasons are based, including the circumstances listed in subsection (1) that exist. 2001, c. 17, s. 2 (39).

Exception

(7) A receiver or trustee in bankruptcy is not required to comply with an order under subsection (2) if the order did not arise from the gross negligence or wilful misconduct of the receiver or trustee in bankruptcy, or of a receiver representative or trustee in bankruptcy representative, and,

(a) not later than 10 days after being served with the order, or within such longer period as may be specified by the Director in the order, the receiver or trustee in bankruptcy notifies the Director that they have abandoned, disposed of or otherwise released their interest in the property to which the order relates; or

(b) the order was stayed under Part I of the *Bankruptcy and Insolvency Act* (Canada) and the receiver or trustee in bankruptcy notified the Director, before the stay expired, that they abandoned, disposed of or otherwise released their interest in the property. 2001, c. 17, s. 2 (39).

Notice under subs. (7)

(8) Notice under clause (7) (a) or (b) must be given in the manner prescribed by the regulations. 2001, c. 17, s. 2 (39).

When notice of order filed in Registry

(9) The Director shall file notice of an order under subsection (1) or (2) in the Environmental Site Registry in accordance with the regulations if a record of site condition has been filed in the Registry under section 168.4 with respect to the property. 2001, c. 17, s. 2 (39).

Notice of compliance with order

(10) If notice of an order has been filed in the Registry under subsection (9) and the Director is satisfied that the order has been complied with, the Director shall file notice of the compliance in the Registry in accordance with the regulations. 2001, c. 17, s. 2 (39).

Filing of new record of site condition

(11) If notice of an order has been filed in the Registry under subsection (9) and the Director is satisfied that the order has been complied with but the Director is of the opinion that a certification contained in the record of site condition filed in the Registry does not accurately reflect the current state of the property, subsection (10) does not apply until a new record of site condition is filed in accordance with section 168.4. 2001, c. 17, s. 2 (39).

Notice of prescribed circumstances, secured creditors, receivers and trustees in bankruptcy

Secured creditors

168.21 (1) If, in the course of or as a result of taking any action described in subsection 168.17 (2), a secured creditor or secured creditor representative becomes aware of circumstances prescribed by the regulations, the secured creditor shall give notice to a provincial officer in the manner prescribed by the regulations. 2001, c. 17, s. 2 (39).

Same

(2) If a secured creditor became the owner of the secured property by virtue of a foreclosure and, during the period described in subsection 168.18 (3), the secured creditor or a secured creditor representative becomes aware of circumstances prescribed by the regulations, the secured creditor shall give notice to a provincial officer in the manner prescribed by the regulations. 2001, c. 17, s. 2 (39).

Receivers and trustees in bankruptcy

(3) If a receiver, trustee in bankruptcy, receiver representative or trustee in bankruptcy representative becomes aware, during the period that the receiver or trustee in bankruptcy holds or administers property, of circumstances prescribed by the regulations, the receiver or trustee in bankruptcy shall give notice to a provincial officer in the manner prescribed by the regulations. 2001, c. 17, s. 2 (39).

Reports of investigations of contaminants, secured creditors, etc.

168.22 On the written request of the Director, a secured creditor, receiver or trustee in bankruptcy shall, within the time specified in the request, provide the Director with a copy of any report that is in the possession or control of the secured creditor, receiver or trustee in bankruptcy and that was prepared in the course of or as a result of an investigation to determine whether a contaminant is present or is being discharged on, in or under property. 2001, c. 17, s. 2 (39).

FIDUCIARIES

Obligations of fiduciaries

168.23 If the Minister, the Director or a provincial officer issues an order under any provision of this Act to a fiduciary or fiduciary representative with respect to fiduciary property, the obligation of the fiduciary or fiduciary representative to incur costs to comply with the order is limited to the value of the assets they hold or administer on the date they are served with the order, less their reasonable costs of holding or administering the assets, unless the order arose from the gross negligence or wilful misconduct of the fiduciary or fiduciary representative. 2001, c. 17, s. 2 (39).

Notice of prescribed circumstances, fiduciaries

168.24 If, in the course of or as a result of exercising or performing the fiduciary's powers or duties with respect to fiduciary property, a fiduciary or fiduciary representative becomes aware of circumstances prescribed by the regulations, the fiduciary shall give notice to a provincial officer in the manner prescribed by the regulations. 2001, c. 17, s. 2 (39).

Reports of investigations of contaminants, fiduciaries

168.25 On the written request of the Director, a fiduciary shall, within the time specified in the request, provide the Director with a copy of any report that is in the possession or control of the fiduciary and that was prepared in the course of or as a result of an investigation to determine whether a contaminant is present or is being discharged on, in or under property. 2001, c. 17, s. 2 (39).

INVESTIGATIONS OF PROPERTY AND ACTIONS TO REDUCE CONCENTRATION OF CONTAMINANTS

Investigations of property, etc.

168.26 A person who conducts, completes or confirms an investigation in relation to property or a person who takes any action to reduce the concentration of contaminants on, in or under a property is not, for that reason alone,

(a) a person who is or was in occupation of a source of contaminant for the purpose of subsection 7 (1) or 8 (1);

(b) a person who has or had the charge, management or control of a source of contaminant for the purpose of subsection 7 (1) or 8 (1);

(c) a person responsible for the purpose of section 12;

(d) a person who has or had management or control of an undertaking or property for the purpose of subsection 18 (1);

(e) a person who has or had charge and control of land, a building or waste for the purpose of section 43;

(f) an occupant or previous occupant of land or a building for the purpose of section 43;

(g) a person having control of a pollutant for the purpose of subsection 97 (1);

(h) a person having the charge, management or control of any real property or personal property for the purpose of subsection 97 (1); or

(i) a person who has management or control of an undertaking or property for the purpose of subsection 157.1 (1). 2001, c. 17, s. 2 (39); 2005; c. 12, s. 1 (48); 2007, c. 7, Sched. 13, s. 12 (2).

PART XVI
ENVIRONMENTAL COUNCIL

Meaning of "Council", Part XVI

169. In this Part,

"Council" means the Environmental Council. R.S.O. 1990, c. E.19, s. 169.

Environmental Council established

170. (1) A council to be known in English as the Environmental Council and in French as Conseil de l'environnement may be established and shall consist of not fewer than seven and not more than eleven persons appointed by the Lieutenant Governor in Council, each to hold office for a term of not more than three years.

Chair and vice-chair

(2) The Lieutenant Governor in Council may appoint one of the members of the Council as chair and another of the members as vice-chair.

Members

(3) The composition of the Council shall be such as to provide for competent and knowledgeable persons in matters relating to the natural environment.

Vacancies

(4) Vacancies in the membership of the Council may be filled by the Lieutenant Governor in Council.

Remuneration

(5) The members of the Council shall be paid such remuneration and expenses as the Lieutenant Governor in Council from time to time may determine. R.S.O. 1990, c. E.19, s. 170.

Duties of Council

171. The Council, through its chair, shall,

(a) advise the Minister as to the results of current research related to,

(i) pollution, and

(ii) the natural environment; and

(b) consider any matter affecting the quality of the environment which the Council or the Minister deems advisable and advise the Minister thereon through its chair. R.S.O. 1990, c. E.19, s. 171.

PART XVII
MISCELLANEOUS

Where contaminant causes damage to crops or livestock

172. (1) Where a person complains that a contaminant is causing or has caused injury or damage to livestock or to crops, trees or other vegetation which may result in economic loss to such person, the person may, within fourteen days after the injury or damage becomes apparent, request the Minister to conduct an investigation.

Request for investigation

(2) Upon receipt of a request, the Minister may cause an investigation to be made and a report prepared of the findings of the investigation.

Report of investigation

(3) A copy of the report shall be given to the claimant and to the person responsible for the source of contaminant alleged to be the cause of the injury or damage.

Right of person responsible to view damage, etc.

(4) The claimant shall permit the person responsible for such source of contaminant or the person's agent to view the injury or damage and to remove samples and conduct tests and examinations as may be reasonably necessary to establish the cause of the injury or damage.

Board of negotiation

(5) A board of negotiation shall be established consisting of two or more members appointed by the Lieutenant Governor in Council, one of whom may be designated as chair.

Quorum

(6) Any two members of the board of negotiation constitutes a quorum and are sufficient to perform all the functions of the board on behalf of the board.

Place of sitting

(7) The board of negotiation may sit at any place in Ontario.

Notice of amount of claim

(8) If a claimant who has requested an investigation under subsection (1) desires to have his or her claim for injury or damage negotiated by the board of negotiation, the claimant shall notify the Minister and the person responsible for the source of contaminant alleged to be the cause of the injury or damage of the amount of the claimant's claim within a reasonable time after the amount can be determined.

Notice of negotiation

(9) If the claimant and the person responsible are not able to settle the claim within thirty days after notice of the claim is given to the Minister under subsection (8), the claimant or the person responsible may serve notice of negotiation upon the other of them and upon the board of negotiation stating that he or she requires a settlement of the claim to be negotiated by the board of negotiation.

Negotiation procedures

(10) Upon receipt of a notice of negotiation, the board of negotiation shall assess the injury or damage in respect of which the claim is made and, upon reasonable notice to the claimant and to the person

responsible, shall meet with them and, without prejudice to any subsequent procedure, proceed in a summary and informal manner to negotiate a settlement of the claim. R.S.O. 1990, c. E.19, s. 172.

Agreement by municipality

173. A municipality may enter into an agreement with the Minister under clause 4 (1) (j) and a municipality that enters into such an agreement has all the powers necessary to carry out the agreement. 1998, c. 35, s. 28.

Unjust dismissal, compliance with Act, etc.

174. (1) In this section,

"Board" means the Ontario Labour Relations Board. R.S.O. 1990, c. E.19, s. 174 (1).

Unjust dismissal

(2) No employer shall,

(a) dismiss an employee;

(b) discipline an employee;

(c) penalize an employee; or

(d) coerce or intimidate or attempt to coerce or intimidate an employee,

because the employee has complied or may comply with,

(e) the *Environmental Assessment Act*;

(f) the *Environmental Protection Act*;

(g) the *Fisheries Act* (Canada);

(g.1) the *Nutrient Management Act, 2002*;

(h) the *Ontario Water Resources Act*;

(i) the *Pesticides Act*;

(j) the *Safe Drinking Water Act, 2002*; or

(k) the *Toxics Reduction Act, 2009*,

or a regulation under one of those Acts or an order, term or condition, environmental compliance approval, certificate of property use, renewable energy approval, licence, permit or direction under one of those Acts or because the employee has sought or may seek the enforcement of one of those Acts or a regulation under one of those Acts or has given or may give information to the Ministry or a provincial officer or has been or may be called upon to testify in a proceeding related to one of those Acts or a regulation under one of those Acts. R.S.O. 1990, c. E.19, s. 174 (2); 2001, c. 17, s. 2 (40); 2002, c. 4, s. 62 (5); 2009, c. 12, Sched. G, s. 17; 2009, c. 19, s. 67 (10); 2010, c. 16, Sched. 7, s. 2 (66).

Complaint

(3) A person complaining of a contravention of subsection (2) may file the complaint in writing with the Board. R.S.O. 1990, c. E.19, s. 174 (3).

Where complaint referred to O.L.R.B.

(4) Where a complaint is filed in writing with the Board,

(a) the Board may authorize a labour relations officer to inquire into the complaint; or

(b) the Board may inquire into the complaint. R.S.O. 1990, c. E.19, s. 174 (4).

Labour relations officer

(5) A labour relations officer who is authorized to inquire into the complaint shall make an inquiry forthwith and shall endeavour to effect a settlement of the matter complained of and shall report the results of the inquiry and endeavours to the Board. R.S.O. 1990, c. E.19, s. 174 (5).

Where settlement not reached

(6) Where the labour relations officer is unable to effect a settlement of the matter complained of, the Board may inquire into the complaint. R.S.O. 1990, c. E.19, s. 174 (6).

Inquiry by O.L.R.B.

(7) Where the Board inquires into the complaint and is satisfied that an employer has contravened subsection (2), the Board shall determine what, if anything, the employer shall do or refrain from doing with respect thereto. R.S.O. 1990, c. E.19, s. 174 (7).

Determination

(8) A determination under subsection (7) may include, but is not limited to, one or more of,

(a) an order directing the employer to cease doing the act or acts complained of;

(b) an order directing the employer to rectify the act or acts complained of; or

(c) an order directing the employer to reinstate in employment the complainant, with or without compensation, or to compensate in lieu of hiring or reinstatement for loss of earnings or other employment benefits in an amount that may be assessed by the Board against the employer. R.S.O. 1990, c. E.19, s. 174 (8).

Application

(9) A determination by the Board under subsection (7) applies despite a provision of an agreement. R.S.O. 1990, c. E.19, s. 174 (9).

Burden of proof

(10) On an inquiry under this section, the burden of proof that an employer did not contravene subsection (2) lies upon the employer. R.S.O. 1990, c. E.19, s. 174 (10).

Failure to comply

(11) Where there is a failure to comply with a term of the determination made under subsection (7), the complainant, after the expiration of fourteen days from the date of the release of the determination by the Board or from the date provided in the determination for compliance, whichever is later, may notify the Board in writing of the failure. R.S.O. 1990, c. E.19, s. 174 (11).

Filing of determination

(12) Where the Board receives notice in accordance with subsection (11), the Board shall file in the office of the local registrar of the Superior Court of Justice a copy of the determination, exclusive of the reasons therefor, if any, and the determination shall be entered in the same way as a judgment or order of the court and is enforceable as such. R.S.O. 1990, c. E.19, s. 174 (12); 2001, c. 9, Sched. G, s. 5 (21).

Compliance with settlement

(13) Where the matter complained of has been settled, whether through the endeavours of the labour relations officer or otherwise, and the terms of the settlement have been put in writing and signed, the settlement is binding and shall be complied with according to its terms, and a complaint that a settlement has not been complied with shall be deemed to be a complaint under subsection (3). R.S.O. 1990, c. E.19, s. 174 (13).

Application of *Labour Relations Act, 1995*

(14) The *Labour Relations Act, 1995* and the regulations under that Act apply with necessary modifications in respect of a proceeding under subsections (2) to (13). R.S.O. 1990, c. E.19, s. 174 (14); 2006, c. 19, Sched. K, s. 2 (9).

Act performed on behalf of employer

(15) For the purposes of subsections (2) to (14), an act mentioned in subsection (2) that is performed on behalf of an employer shall be deemed to be the act of the employer. R.S.O. 1990, c. E.19, s. 174 (15).

Evidence of documents

175. (1) In this section,

"official document" means,

(a) an approval, consent, licence, notice, permit, order, return, certificate of property use or other certificate, environmental compliance approval or renewable energy approval under this Act or the regulations or a confirmation of registration under Part II.2,

(b) a certificate as to service of a document mentioned in clause (a),

(c) a certificate or report as to the analysis, description, ingredients, quality, quantity or temperature of any solid, liquid or gas or any combination of any of them,

(d) a certificate or report as to the analysis, description, quality or quantity of any odour, heat, sound, vibration, radiation or any combination of any of them,

(e) a certificate or report as to the custody of any solid, liquid or gas or any combination of any of them,

(f) a certificate as to the custody of any book, record or report or as to the custody of any other document, or

(g) a certificate as to whether or not any document or notification was received or issued by the Minister or the Ministry under this Act or the regulations. R.S.O. 1990, c. E.19, s. 175 (1); 2001, c. 17, s. 2 (41); 2009, c. 12, Sched. G, s. 18; 2010, c. 16, Sched. 7, s. 2 (67).

Official documents as evidence

(2) An official document, other than an official document mentioned in clause (1) (c) or (d), that purports to be signed by the Minister, the Director or an employee in the Ministry shall be received in evidence in any proceeding as proof, in the absence of evidence to the contrary, of the facts stated in the official document without proof of the signature or position of the person appearing to have signed the official document. R.S.O. 1990, c. E.19, s. 175 (2).

Idem

(3) An official document mentioned in clause (1) (c), (d) or (e) that purports to be signed by an analyst shall be received in evidence in any proceeding as proof, in the absence of evidence to the contrary, of the facts stated in the official document without proof of the signature or position of the person appearing to have signed the official document. R.S.O. 1990, c. E.19, s. 175 (3).

Regulations, general

175.1 (1) The Lieutenant Governor in Council may make regulations,

(a) exempting any person, licence holder, insurer, industry, contaminant, source of contaminant, motor vehicle, motor, waste, waste disposal site, waste management system, activity, area, location,

matter, substance, sewage system, product, material, beverage, packaging, container, discharge, spill, pollutant or thing from any provision of this Act and the regulations and prescribing conditions for the exemptions from this Act and the regulations;

(b) prohibiting, regulating or controlling, (including prescribing conditions for the prohibition, regulation or control) the making, use, sale, display, advertising, transfer, transportation, operation, maintenance, storage, recycling, disposal, or discharge, or manner thereof, of any contaminant, source of contaminant, motor vehicle, motor, waste, waste disposal site, waste management system, activity, area, location, matter, substance, sewage system, product, material, beverage, packaging, container, discharge, spill, pollutant or thing;

(c) governing and requiring the payment of fees to the Crown or to any other person or body specified by the regulations, including prescribing the amounts or the method of calculating the amounts of the fees, and governing the procedure for the payment,

(i) in respect of a certificate of approval, provisional certificate of approval, permit, licence or renewal of licence, examination, inspection or certification,

(ii) in respect of any registration or record required by this Act or the regulations,

(iii) in respect of an activity pursuant to a provision of a regulation that exempts a person from the requirement to obtain a certificate of approval, provisional certificate of approval or permit, or

(iv) in respect of the supply of information, services, or copies of documents, maps, plans, recordings or drawings;

(d) providing for the retention by a person or body specified by the regulations of all or part of the fees paid, under this Act, to the person or body;

(e) providing for refunds of fees paid under this Act to the Crown or to a person or body specified by the regulations;

(f) providing for the issue, review, suspension and revocation of environmental compliance approvals and prescribing conditions for the issuing, reviewing, suspending and revoking;

(f.1) subject to subsection (3), governing applications for the issue, review and revocation of environmental compliance approvals;

(f.2) providing for the issue, renewal, suspension and revocation of certificates of property use, renewable energy approvals, permits and licences, and prescribing conditions for the issuing, renewing, suspending and revoking;

(f.3) governing applications for the issue, renewal and revocation of certificates of property use, renewable energy approvals, permits and licences;

(f.4) requiring persons with qualifications specified in the regulations to provide certifications as part of applications mentioned in clauses (f.1) and (f.3);

(f.5) governing certifications mentioned in clause (f.4);

(f.6) governing the inclusion of terms and conditions in environmental compliance approvals, certificates of property use, renewable energy approvals, permits and licences;

(g) defining the desirable quality criteria of the natural environment;

(h) prescribing documents or data required to be created, stored and submitted by any person and the methods of creating, storing and submitting the documents and data;

(h.1) prescribing the location at which documents or data must be created or stored;

(h.2) providing for the inspection and examination of documents and data;

(h.3) providing for the preparation and signing of documents by electronic means, the filing of documents by direct electronic transmission and the printing of documents filed by direct electronic transmission;

(i) providing for forms and their use;

(j) providing for the method of service of any document given or served under this Act;

(j.1) deeming a person to be a person involved in carrying out a program of the Ministry for the purpose of subsection 184 (2);

(k) designating any matter required to be designated or authorized by or referred to in this Act as designated;

(l) subject to subsection (5), prescribing or respecting any matter that this Act refers to as a matter prescribed by the regulations or as otherwise dealt with by the regulations. 1997, c. 7, s. 3; 1998, c. 35, s. 30; 2001, c. 9, Sched. G, s. 5 (10); 2001, c. 17, s. 2 (42); 2009, c. 12, Sched. G, s. 19; 2009, c. 33, Sched. 15, s. 5 (6); 2010, c. 16, Sched. 7, s. 2 (68, 69).

Regulation under cl. (1) (f)

(2) For the purposes of clause (1) (f), a regulation prescribing conditions for the issuing of an environmental compliance approval may include conditions that specify that a person other than a municipality who submits an application for approval under Part II.1 in respect of an activity mentioned in subsection 27 (1) must deposit a sum of money or furnish a surety bond or personal sureties for the purposes of assuring satisfactory maintenance of the waste management system or the waste disposal site or the removal of waste from the site. 2010, c. 16, Sched. 7, s. 2 (70).

Regulation under cl. (1) (f.1)

(3) The power to make regulations under clause (1) (f.1) does not include the power to make regulations specifying the date on or before which an application for review of an environmental compliance approval in respect of an activity must be submitted. 2010, c. 16, Sched. 7, s. 2 (70).

Same

(4) A regulation mentioned in subsection (2) may prescribe terms and conditions upon which a deposit mentioned in subsection (2) may be returned to the depositor. 2010, c. 16, Sched. 7, s. 2 (70).

Minister's regulations

(5) The Minister may make regulations specifying anything that this Act describes as being specified in a regulation made by the Minister. 2010, c. 16, Sched. 7, s. 2 (70).

Regulations, additional

176. (1) The Lieutenant Governor in Council may make regulations,

(a) REPEALED: 1997, c. 7, s. 4 (1).

(b) requiring the persons responsible for sources of contaminants in a class of sources of contaminants to monitor, record and report to the Ministry or to the persons specified in the regulations on the sources of contaminants including, but not limited to, fuel, materials and methods of production used and intended to be used, the wastes and contaminants that will or are likely to be generated, the natural environment that may be affected by the discharge of the contaminants and the effects of the discharge of the contaminants, and to perform and report to the Ministry on research respecting methods of reducing or preventing the generation of wastes and contaminants from the sources of contaminants;

(c), (d) REPEALED: 1997, c. 7, s. 4 (1).

(e) prescribing maximum permissible amounts, concentrations or levels of any contaminant or combination of contaminants and any class of either of them;

(f) prescribing methods or standards, or both, for determining the amount, concentration or level of any contaminant, combination of contaminants or any class of either of them;

(g) governing the disposal of soil, rock or related material from property;

(h) governing the discharge of any contaminant and prescribing requirements for any plant, structure, equipment, apparatus, mechanism or thing that may discharge a contaminant or from which a contaminant may be discharged in relation to,

(i) planning, design, siting, public notification and consultation, establishment, insurance, facilities, staffing, operation, maintenance, monitoring, record-keeping, submission of reports to the Director and improvement, and

(ii) the discontinuance of the operation of any plant, structure, equipment, apparatus, mechanism or thing;

(h.1) governing the alteration or cessation of a process, rate of production or a rate or manner of discharge of contaminants into the natural environment;

(h.2) deeming an environmental compliance approval to exist in respect of any plant, structure, equipment, apparatus, mechanism, thing, process, rate of production or rate or manner of discharge of a contaminant to which subsection 9 (1) would apply but for an exemption from the requirement to obtain an environmental compliance approval set out in a regulation;

(h.3) deeming a renewable energy approval to exist in respect of a renewable energy project to which subsection 47.3 (1) would apply but for an exemption from the requirement to obtain a renewable energy approval set out in a regulation;

(i) classifying plants, structures and things, prescribing classes thereof that shall not be constructed, altered or modified unless the plans and specifications thereof are approved by the Director, and prescribing classes thereof for which the approval of the Director as to the plans and specifications is not required;

(j) prescribing the details that shall be set out in plans and specifications submitted to the Director for approval;

(k) prescribing the amounts of grants and loans and the terms and conditions of such grants and loans;

(l) prescribing the maximum permissible concentration or level in water of any contaminant either generally or with respect to any part of the water of Ontario specified in the regulations;

(m) prescribing methods for determining the concentration or level in water of any contaminant, either generally or with respect to any part of the water of Ontario specified in the regulations, for the purposes of the regulations;

(n) prescribing maximum permissible changes in temperatures of water, either generally or with respect to any part of the water of Ontario specified in the regulations;

(o)-(r) REPEALED: 1997, c. 7, s. 4 (1).

(s) regulating the quality of fuels that may be used for heating, generating steam or electricity, industrial processes or incineration;

(t) requiring and regulating the storage, treatment and disposal of sewage in vessels and the equipment therefor, and prohibiting the use and installation of equipment for the storage, treatment

or disposal of sewage in vessels unless the equipment and installation thereof conform to the regulations, and providing for and requiring the approval of the Director for any such equipment and prohibiting and regulating the discharge of sewage from such vessels;

(u) regulating and controlling, for the purpose of preventing or reducing the pollution of any water or places located on or adjacent to any water where moorings are provided for vessels or where any services are provided for vessels or the occupants thereof, and regulating and governing persons providing such moorings or services;

(v) defining sewage for the purposes of regulations made under clauses (t) and (u);

(w) governing payments out of the account referred to in section 182.2, including governing the circumstances in which payments may be made, governing the amounts of payments and governing procedures for determining what payments are made;

(x) governing the development and implementation of plans required under paragraph 7 of subsection 18 (1) or section 91.1, including,

(i) regulations requiring procedures to be followed, including procedures involving public consultation,

(ii) regulations establishing time limits related to the development and implementation of the plans,

(iii) regulations governing the contents of the plans, including requirements for provisions relating to updating the plans and testing compliance with the plans. R.S.O. 1990, c. E.19, s. 176 (1); 1997, c. 7, s. 4 (1); 2001, c. 17, s. 2 (43); 2005, c. 12, s. 1 (49, 50); 2009, c. 12, Sched. G, s. 20 (1); 2010, c. 16, Sched. 7, s. 2 (71).

Regulations relating to Part III

(2) The Lieutenant Governor in Council may make regulations relating to Part III,

(a), (b) REPEALED: 1997, c. 7, s. 4 (2).

(c) requiring motors or motor vehicles or any class or type of motor or motor vehicle to have installed thereon or incorporated therein one or more systems or devices to prevent or lessen the discharge of any contaminant into the natural environment, prescribing the standards and specifications of any such system or device, prescribing the standards of discharge of any contaminant into the natural environment with which any such system or device shall comply and providing for testing and inspection of any such system or device;

(d) prescribing the standards of emission into the natural environment of any contaminant or any by-product or product of combustion with which any motor or motor vehicle or any class or type of motor or motor vehicle shall comply and providing for the testing and inspection of any such motor, motor vehicle, class or type;

(e) regulating the quality of motor fuels and additives used or intended for use in motor fuels in Ontario;

(f) prescribing types of systems and types of devices for the purposes of subsections 22 (3) and (4). R.S.O. 1990, c. E.19, s. 176 (2); 1997, c. 7, s. 4 (2); 1998, c. 35, s. 31 (1, 2).

Regulations under clause (2) (d)

(2.1) A regulation under clause (2) (d) may prescribe standards of emission with reference to any criteria that the Lieutenant Governor in Council considers appropriate, including but not limited to standards prescribed with reference to the visibility or opacity of emissions. 1998, c. 35, s. 31 (3).

Regulations relating to Part II.1

(2.2) The Lieutenant Governor in Council may make regulations relating to Part II.1 requiring persons prescribed by the regulations to carry insurance, specifying the insurance that is required to be carried and specifying limits and conditions respecting insurance coverage. 2010, c. 16, Sched. 7, s. 2 (72).

Same, Minister's regulations

(2.3) The Minister may make regulations relating to Part II.1 specifying the date on or before which an application for review of an environmental compliance approval in respect of an activity must be submitted. 2010, c. 16, Sched. 7, s. 2 (72).

Regulations relating to Part II.2

(2.4) The Lieutenant Governor in Council may make regulations relating to Part II.2,

(a) governing the establishment, operation and maintenance of the Registry, including requiring electronic registrations;

(b) governing registrations and procedures for registering, which may include designating a person responsible for establishing procedures;

(c) governing the maintenance of registrations and prescribing any information, reports, records or documents to be included in registrations;

(d) prescribing the timing and requirements relating to periodic updating of registrations;

(e) governing activities prescribed by the regulations for the purposes of subsection 20.21 (1);

(f) prescribing measures that a provincial officer may require in a notice issued under section 157.4;

(g) requiring persons with qualifications specified in the regulations to provide certifications as part of registrations;

(h) governing certifications mentioned in clause (g);

(i) governing requirements for financial assurance and methods of calculating financial assurance in respect of activities prescribed by the regulations for the purposes of subsection 20.21 (1) and prescribing environmental measures for which financial assurance may be required;

(j) requiring persons prescribed by the regulations to carry insurance, specifying the insurance that is required to be carried and specifying limits and conditions respecting insurance coverage. 2010, c. 16, Sched. 7, s. 2 (72).

Regulations relating to Part IV

(3) The Lieutenant Governor in Council may make regulations relating to Part IV,

(a) REPEALED: 1997, c. 7, s. 4 (3).

(b) providing for the issue of permits and identification plates for ice shelters and requiring and governing their use;

(c) regulating the placing, construction and standard of repair of ice shelters and requiring and regulating the storage, treatment and disposal of waste and requiring the approval of the Director for any equipment and things related thereto by any person or class of persons and prohibiting the placing, allowing to remain or use of an ice shelter contrary to or in a condition that is contrary to the regulations or without any equipment or facilities required by the regulations;

(d) prescribing the dates within which ice shelters may be placed, allowed to remain or used on or over the ice over any water. R.S.O. 1990, c. E.19, s. 176 (3); 1997, c. 7, s. 4 (3).

Regulations relating to Part V

(4) The Lieutenant Governor in Council may make regulations relating to Part V,

(a)-(c) REPEALED: 1997, c. 7, s. 4 (4).

(d) governing the management of waste and prescribing requirements for waste management systems and waste disposal sites in relation to,

(i) planning, design, siting, buffer zones, public notification and consultation, establishment, insurance, facilities, staffing, operation, maintenance, monitoring, record-keeping, submission of reports to the Director and improvement,

(ii) the discontinuance of systems,

(iii) the closure of sites;

(e) governing the location of waste disposal sites and designating parts of Ontario in which no waste disposal sites shall be established or operated;

(f) REPEALED: 2010, c. 16, Sched. 7, s. 2 (73).

(g) REPEALED: 1997, c. 7, s. 4 (6).

(h) prescribing the form of application and the procedure to be followed in applying for any compensation under Part V;

(i) prescribing the rates of the fees for the disposal of any type of waste in a well that is a waste disposal site that shall be paid into the fund known in English as The Waste Well Disposal Security Fund and in French as Caisse de garantie des propriétaires de puits d'élimination des déchets;

(j) for the purpose of furthering the diversion of waste from final disposal, requiring municipalities and such other persons as may be specified in the regulation to establish such waste disposal sites or waste management systems as may be specified in the regulation;

(k) requiring the persons referred to in clause (j) to maintain, operate, improve, enlarge, alter, repair or replace the waste disposal sites or waste management systems in such manner as may be specified in the regulation;

(l) requiring municipalities and waste generators to conduct such studies in relation to waste management as may be specified in the regulation and requiring them to submit reports concerning the studies to the Director;

(m) requiring municipalities and waste generators to submit to the Director plans concerning waste management;

(n) prescribing plans concerning waste management;

(o) requiring municipalities and waste generators to seek any approval required for the plans referred to in clause (m) or (n) or required for the implementation of those plans and to implement the plans;

(p) requiring waste generators to achieve such objectives relating to waste management as are specified in the regulation;

(q) regulating, with respect to the diversion of waste from final disposal, the waste management activities of such owners of premises housing generators of waste or persons responsible for the management of those premises as are specified in the regulation;

(r) requiring persons referred to in clause (q) to prepare, implement and maintain a program under which such classes of waste as are specified in the regulation are kept separate in the manner specified in the regulation;

(s) deeming an environmental compliance approval to exist in respect of a waste management system or waste disposal site. R.S.O. 1990, c. E.19, s. 176 (4); 1992, c. 1, s. 34 (1, 2); 1997, c. 7, s. 4 (4-6); 2010, c. 16, Sched. 7, s. 2 (73, 74).

Regulations relating to Part V.0.1

(4.1) The Lieutenant Governor in Council may make regulations relating to Part V.0.1,

(a) governing the preparation and submission of applications for the issue, renewal or revocation of renewable energy approvals and applications to alter the terms and conditions of renewable energy approvals or to impose conditions on renewable energy approvals;

(b) governing eligibility requirements relating to applications for the issue, renewal or revocation of renewable energy approvals, applications to alter the terms and conditions of renewable energy approvals or to impose conditions on renewable energy approvals, including requirements for consultation;

(c) governing renewable energy generation facilities in relation to,

(i) planning, design, siting, buffer zones, notification and consultation, establishment, insurance, facilities, staffing, operation, maintenance, monitoring, record-keeping, submission of reports to the Director and improvement,

(ii) the discontinuance of the operation of any plant, structure, equipment, apparatus, mechanism or thing at a renewable energy generation facility,

(iii) the closure of renewable energy generation facilities;

(d) governing the location of renewable energy generation facilities, including prohibiting or regulating the construction, installation, use, operation or changing of renewable energy generation facilities in parts of Ontario;

(e) prohibiting the transfer of a renewable energy approval or prescribing requirements for transferring a renewable energy approval, including requiring the written consent of the Director;

(f) providing for transitional matters that, in the opinion of the Lieutenant Governor in Council, are necessary or desirable to facilitate the implementation of Part V.0.1. 2009, c. 12, Sched. G, s. 20 (2).

Regulations relating to Part VI

(5) The Lieutenant Governor in Council may make regulations relating to Part VI,

(a)-(c) REPEALED: 1997, c. 7, s. 4 (7).

(d) prescribing that designated industries devote a designated percentage of their budget to undertake research and development to develop substitutes for ozone depleting substances. R.S.O. 1990, c. E.19, s. 176 (5); 1997, c. 7, s. 4 (7).

(6) REPEALED: 1997, c. 30, Sched. B, s. 23.

Regulations relating to Part IX

(7) The Lieutenant Governor in Council may make regulations relating to Part IX,

(a) defining standard, refillable, returnable, non-refillable or non-returnable in respect of containers and returnable or non-returnable in respect of packaging or defining any product for the purposes of the regulations;

(b) requiring payment of a deposit at the time of purchase of any material or any beverage packaged or contained in any class of packaging or container and regulating the amount, terms and conditions of deposits;

(b.1) requiring the payment of a deposit at the time of purchase of any material or any product, including any beverage, and regulating the amount, terms and conditions of deposits;

(c) requiring and regulating the stocking, display, sale, advertising or offering for sale of any product,

(i) in any class of container in relation to the stocking, display, sale, advertising or offering for sale of the product in any other class of container, or

(ii) only in a class of container that may be prescribed;

(d) prohibiting the sale, stocking, display, advertising or offering for sale in Ontario of any product in any class of container or in or by means of a vending machine;

(e) requiring and regulating the advertising or display of,

(i) the price of a product that is sold or offered for sale exclusive of the amount of any deposit payable on the purchase of the product,

(ii) the amount of any deposit payable on the purchase of a product,

(iii) the amount payable in return for any container,

(iii.1) the amount payable in return for any packaging or product,

(iv) copies of the regulations or portions of the regulations or a summary thereof in such form as may be prescribed by the regulations;

(f) requiring or authorizing the placement of a notice or mark on products, containers, packaging or labels on products, containers or packaging to indicate such matters of waste management or environmental concern as are specified in the regulation;

(f.1) requiring the placement of a notice or mark on products, containers, packaging or labels on products, containers or packaging respecting any payment to be made for their return;

(f.2) governing the size, form, content and position of the notice or mark referred to in clause (f) or (f.1);

(f.3) prohibiting the unauthorized use of a notice or mark referred to in clause (f);

(g) requiring and regulating the payment of an amount in return for any packaging or container, prescribing the amount to be paid and requiring and regulating the acceptance and collection of any packaging or container by such classes of persons as may be designated by the regulations;

(g.1) requiring and regulating the payment of an amount in return for any product, prescribing the amount to be paid and requiring and regulating the acceptance and collection of any product by such classes of persons as may be designated by the regulations;

(h), (i) REPEALED: 1997, c. 7, s. 4 (13).

(j) requiring, regulating and prohibiting the use, advertising, offering for sale or sale in Ontario of any packaging or container, or any material or combination of materials used as packaging or a container;

(k) providing a schedule for the regulation and the prohibition within five years of the use, offering for sale or sale in Ontario of non-refillable or non-returnable containers for any beverage;

(l) regulating or prohibiting the sale and use of disposable products and of products that pose waste management problems;

(l.1) requiring that disposable products and products that pose waste management problems be capable of being reused or recycled;

(m) requiring and governing the placing of receptacles to receive litter and governing the capacity, design and construction of such receptacles;

(n) prescribing the amounts of grants to persons to assist in the provision of receptacles to receive litter, and the terms and conditions of such grants;

(o) requiring persons who manufacture, package, offer for sale or sell a packaged product to examine the impact of the packaging on the waste management needs, activities and opportunities of other persons and governments and requiring them to submit reports concerning the examination to the Director;

(p) requiring persons who manufacture, package, offer for sale or sell a packaged product to conduct such examinations in relation to the packaging and waste management as may be specified in the regulation and requiring them to submit reports concerning the examinations to the Director;

(q) requiring persons who manufacture, package, offer for sale or sell a packaged product to submit to the Director waste management plans in relation to the packaging of the products they manufacture, package, offer for sale or sell or any waste generated by their activities;

(r) prescribing plans concerning waste management in relation to the packaging of packaged products;

(s) requiring persons who manufacture, package, offer for sale, sell or purchase a packaged product to implement the plans referred to in clauses (q) and (r);

(t) requiring persons who manufacture, package, offer for sale or sell a packaged product to achieve such waste management objectives in relation to the packaging of the products they manufacture, package, offer for sale or sell or any waste generated by their activities as are specified in the regulation;

(u) declaring a product to be a product that poses waste management problems. R.S.O. 1990, c. E.19, s. 176 (7); 1992, c. 1, s. 34 (3-16); 1997, c. 7, s. 4 (13).

Regulations relating to Part X

(8) The Lieutenant Governor in Council may make regulations relating to Part X,

(a) designating persons for the purposes of subsection 100 (1) and prescribing limitations that shall attach to any such designation;

(b) prescribing conditions that must be complied with by applicants for payment of compensation under subsection 101 (1) before payment of the compensation;

(c) prescribing conditions that shall attach to the payment of compensation under subsection 101 (1);

(d) designating discharges of pollutants and locations of discharges for the purposes of subsection 91 (2), but no discharge of pollutant shall be designated that is in accordance with an approval, licence, permit, order, certificate of property use or regulation under this Act or an approval, direction, notice, order, regulation or report under the *Ontario Water Resources Act* or a licence, order, permit or regulation under the *Pesticides Act*. R.S.O. 1990, c. E.19, s. 176 (8); 1997, c. 7, s. 4 (14, 15); 2001, c. 17, s. 2 (44); 2005, c. 12, s. 1 (51).

Regulations relating to Part XII

(9) The Lieutenant Governor in Council may make regulations relating to Part XII prescribing requirements for financial assurance in respect of the classes of approvals, orders or certificates of property use specified in the regulations. R.S.O. 1990, c. E.19, s. 176 (9); 2001, c. 17, s. 2 (45).

Regulations relating to Part XIII

(9.1) The Lieutenant Governor in Council may make regulations relating to Part XIII,

(a) governing procedures for hearings required under section 142.1 and for applications to stay the operation of a decision made in respect of a renewable energy approval;

(b) providing that section 142.1 does not apply in respect of a renewable energy approval, or prescribing circumstances in which section 142.1 does not apply in respect of a renewable energy approval, if,

(i) under Part II or II.1 of the *Environmental Assessment Act*, the holder of the renewable energy approval is authorized to proceed with the renewable energy project or was authorized, immediately before Part V.0.1 of this Act came into force, to proceed with the project,

(ii) pursuant to an exempting regulation made under the *Environmental Assessment Act*, a statement of completion in respect of the renewable energy project was filed with the Director appointed under that Act before Part V.0.1 of this Act came into force, or

(iii) all the approvals, permits and other instruments required under this Act and the *Ontario Water Resources Act* to engage in the renewable energy project were obtained before Part V.0.1 of this Act came into force. 2009, c. 12, Sched. G, s. 20 (3).

Same

(9.2) A regulation made under clause (9.1) (a) may provide that it prevails over a provision of the *Statutory Powers Procedure Act*, despite anything in that Act. 2009, c. 12, Sched. G, s. 20 (3).

Regulations relating to Part XV.1

(10) The Lieutenant Governor in Council may make regulations relating to Part XV.1,

(a) governing the establishment, operation and maintenance of the Registry, including the information that may be submitted for filing or filed in the Registry and the Director's powers and duties relating to the establishment, operation and maintenance of the Registry;

(b) governing the conduct of phase one environmental site assessments, including in respect of the conduct of an investigation of the existing and permitted land uses within the vicinity of a property for which a record of site condition is to be filed and in respect of what constitutes an existing or permitted land use and of what is within the vicinity of the property;

(c) prescribing circumstances in which phase two environmental site assessments are required;

(d) governing the conduct of phase two environmental site assessments;

(e) prescribing the qualifications of qualified persons, including requiring approval of qualified persons by a person or body specified in the regulations, and governing the approval process and the terms and conditions that may be imposed when issuing or amending an approval;

(e.1) governing the payment of fees in respect of any approval required by a regulation made under clause (e);

(e.2) providing for and governing the revocation or suspension, by a person or body specified in the regulations, of any approval required by a regulation made under clause (e), and providing for and

governing appeals to a person or body specified in the regulations of decisions to revoke or suspend an approval;

(e.3) requiring qualified persons to carry insurance specified in the regulations;

(e.4) delegating to a person or body specified in the regulations any power to make regulations under clauses (e), (e.1), (e.2) and (e.3);

(f) governing the form, content and completion of records of site condition;

(g) governing the determination of the certification date applicable to a record of site condition;

(h) prescribing full depth background site condition standards, full depth generic site condition standards and stratified site condition standards for property, including standards related to maximum contaminant amounts, concentrations or levels;

(i) governing the determination of which full depth background site condition standards, full depth generic site condition standards or stratified site condition standards are applicable to a property;

(i.1) governing the circumstances in which full depth background site condition standards, full depth generic site condition standards or stratified site condition standards must be applied to a property;

(j) prescribing the methods to be used in determining whether property meets standards prescribed by the regulations or standards specified in a risk assessment;

(k) governing the preparation of risk assessments, the form and content of risk assessments, and procedures relating to the submission of risk assessments to the Director under subsection 168.5 (1);

(l) prescribing a dispute resolution system, including mediation and conciliation, that may be used in connection with risk assessments that are submitted to, but not accepted by, the Director under subsection 168.5 (1);

(m) governing the management of soil on, in or under property for which a record of site condition has been filed in the Registry;

(m.1) governing the assessment of contaminants that were discharged into the natural environment and that are on, in or under a property for which a record of site condition is to be filed;

(n) governing the filing in the Registry of notices under sections 168.7.2 and 168.8;

(o) defining any word or expression used in Part XV.1 that is not already defined;

(p) respecting any matter that the Lieutenant Governor in Council considers advisable to carry out effectively the intent and purpose of Part XV.1. 2001, c. 17, s. 2 (46); 2007, c. 7, Sched. 13, s. 13.

Regulations, market-based approaches, etc.

176.1 (1) The Lieutenant Governor in Council may make regulations establishing programs and other measures for the use of economic and financial instruments and market-based approaches, including without being limited to emissions trading, for the purposes of maintaining or improving existing environmental standards, protecting the environment and achieving environmental quality goals in a cost effective manner. 2009, c. 27, s. 2 (1).

Same, included powers

(2) Without limiting the generality of subsection (1), the power to make regulations under subsection (1) includes the power to make regulations,

(a) prescribing the persons, entities and facilities to which programs and other measures established under subsection (1) apply;

(b) governing the economic and financial instruments to be used in programs and other measures established under subsection (1), including,

(i) providing for the instruments to be created by or in accordance with the regulations and governing the creation of those instruments,

(ii) providing for instruments created by the regulations under subclause (i) to be distributed free of charge, and governing the distribution of those instruments,

(iii) governing the use, trading and retirement of instruments created by or in accordance with the regulations under subclause (i),

(iv) governing the use and trading, for the purpose of programs and other measures established under subsection (1), of instruments created in other jurisdictions, and

(v) requiring notice to be given to other jurisdictions of the use or trading, for the purpose of programs and other measures established under subsection (1), of instruments created in those jurisdictions;

(c) prescribing requirements that must be met by persons, entities and facilities to which programs and other measures established under subsection (1) apply, including requirements related to the emission, monitoring and reporting of contaminants;

(d) attributing emissions to a person, entity or facility for the purpose of programs and other measures established under subsection (1);

(e) providing for or designating a person or body to administer programs and other measures established under subsection (1). 2009, c. 27, s. 2 (1).

Same, powers under ss. 175.1 and 176 (1)

(3) Without limiting the generality of subsection (1), with respect to programs and other measures established by regulations made under that subsection, the power to make regulations under subsection (1) includes the power to make any regulation that may be made under section 175.1 or subsection 176 (1). 2009, c. 27, s. 2 (1).

Note: On a day to be named by proclamation of the Lieutenant Governor, section 176.1 is amended by adding the following subsections:

Same, greenhouse gases

(4) A regulation under this section that relates to greenhouse gases may,

(a) provide for instruments created by the regulations under subclause (2) (b) (i) to be distributed free of charge, or by auction, sale or other means that are not free of charge, and governing the distribution of those instruments;

(b) authorize a person or body to prescribe, govern or otherwise determine any matter that may be prescribed, governed or otherwise determined by the Lieutenant Governor in Council under this section. 2009, c. 27, s. 2 (2).

Same

(5) Without limiting the generality of clause (4) (a), a regulation under that clause may,

(a) prescribe objectives and other matters that must be considered in setting the percentages of instruments to be distributed by any of the means referred to in clause (4) (a);

(b) prescribe objectives and other matters that must be considered in setting reserve bids for instruments distributed by auction or sale prices for instruments distributed by sale. 2009, c. 27, s. 2 (2).

Greenhouse Gas Reduction Account

(6) Any amount paid to the Minister of Finance from the distribution of instruments under the regulations made under clause (4) (a) shall be deposited in a separate account in the Consolidated Revenue Fund to be known in English as the Greenhouse Gas Reduction Account and in French as Compte de réduction des gaz à effet de serre. 2009, c. 27, s. 2 (2).

Same

(7) For the purpose of the *Financial Administration Act*, money deposited in the Greenhouse Gas Reduction Account shall be deemed to be money paid to Ontario for the special purpose described in subsection (8). 2009, c. 27, s. 2 (2).

Payments out of account

(8) Money may be paid out of the Greenhouse Gas Reduction Account for the purpose of reimbursing the Crown in right of Ontario for costs incurred by the Crown in administering the regulations under this section that relate to greenhouse gases and in carrying out or supporting greenhouse gas reduction initiatives, particularly initiatives that relate to the sectors of the Ontario economy to which the regulations apply. 2009, c. 27, s. 2 (2).

Same

(9) Without limiting the generality of subsection (8), money may be paid out of the account under that subsection with respect to the following costs:

1. The costs of research into or the development or deployment of lower greenhouse gas emitting technologies in a sector of the Ontario economy to which the regulations under clause (4) (a) apply.
2. The costs of programs to reduce greenhouse gas emissions in a sector of the Ontario economy to which the regulations under clause (4) (a) apply.
3. The costs of infrastructure or equipment to reduce greenhouse gas emissions in a sector of the Ontario economy to which the regulations under clause (4) (a) apply.
4. If the regulations made under clause (4) (a) apply to the electricity sector of the Ontario economy, costs of any greenhouse gas reduction initiative that would otherwise be borne by electricity consumers. 2009, c. 27, s. 2 (2).

See: 2009, c. 27, ss. 2 (2), 3 (2).

Regulations, general rules

177. (1) A regulation may be general or particular in its application, may be limited as to time or place or both and may exclude any place from the application of the regulation. 1997, c. 7, s. 5.

Classes

(2) A regulation may apply in respect of any class of activity, matter, person or thing. 1997, c. 7, s. 5.

Same

(3) A class under this Act or the regulations may be defined with respect to any attribute, quality or characteristic or combination thereof and may be defined to consist of or to include or exclude any specified member whether or not with the same attributes, qualities or characteristics. 1997, c. 7, s. 5.

Adoption of documents in regulations

(4) A regulation may adopt by reference, in whole or in part, with such changes as the Lieutenant Governor in Council considers necessary, any document, including a code, formula, standard, protocol or procedure, and may require compliance with any document so adopted. 2010, c. 16, Sched. 7, s. 2 (75).

Rolling incorporation by reference

(5) The power to adopt by reference and require compliance with a document in subsection (4) includes the power to adopt a document as it may be amended from time to time. 2010, c. 16, Sched. 7, s. 2 (76).

When effective

(6) The adoption of an amendment to a document that has been adopted by reference comes into effect upon the Ministry publishing notice of the amendment in *The Ontario Gazette* or in the registry under the *Environmental Bill of Rights, 1993*. 1997, c. 7, s. 5; 2010, c. 16, Sched. 7, s. 2 (77).

Bar of action

177.1 No action or other proceeding shall be brought against the Crown, the Minister or an employee or agent of the Crown because of anything arising out of or in relation to a matter carried on or purported to be carried on pursuant to a regulation that exempts a person from the requirement to obtain a licence, environmental compliance approval, renewable energy approval or permit. 1997, c. 7, s. 5; 2009, c. 12, Sched. G, s. 21; 2010, c. 16, Sched. 7, s. 2 (78).

178. REPEALED: 2001, c. 25, s. 484 (2).

Conflict with other legislation

179. (1) Where a conflict appears between any provision of this Act or the regulations and any other Act or regulation in a matter related to the natural environment or a matter specifically dealt with in this Act or the regulations, the provision of this Act or the regulations shall prevail.

Idem

(2) Subsection (1) does not apply in respect of section 178 and the enactment of section 178 or a by-law pursuant to section 178 does not affect the validity of an Act that was in force immediately before the 8th day of October, 1975. R.S.O. 1990, c. E.19, s. 179.

Fees

179.1 The Minister may establish and require the payment of fees in respect of any matter under this Act, specify to whom the fees are paid, provide for the retention of all or part of the fees by the person to whom they are paid and provide for the refund of fees. 2001, c. 9, Sched. G, s. 5 (12).

Protection from personal liability

180. (1) No action or other proceeding may be instituted against the following persons for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of such a duty or authority:

1. REPEALED: 2009, c. 33, Sched. 2, s. 28 (2).
2. An employee in the Ministry.
3. A provincial officer employed under Part III of the *Public Service of Ontario Act, 2006*.

4. A public servant employed under Part III of the *Public Service of Ontario Act, 2006* who is acting under the direction of a person described in paragraph 2 or 3. 2006, c. 35, Sched. C, s. 36 (8); 2009, c. 33, Sched. 2, ss. 28 (2, 3).

Exception

(1.1) Subsection (1) does not apply in the case of an application for judicial review or an action or proceeding that is specifically provided for under this or any other Act with respect to a person referred to in that subsection. 2006, c. 35, Sched. C, s. 36 (8).

Crown not relieved of liability

(2) Subsection (1) does not, by reason of subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, relieve the Crown of liability in respect of a tort committed by an agent or servant of the Crown to which it would otherwise be subject and the Crown is liable under that Act for any such tort in a like manner as if subsection (1) had not been enacted. R.S.O. 1990, c. E.19, s. 180 (2); 2009, c. 33, Sched. 15, s. 5 (7).

Service on commercial drivers of offence notice or summons

181. (1) In this section,

"commercial motor vehicle" and "motor vehicle" have the same meanings as in the *Highway Traffic Act*; ("véhicule utilitaire", "véhicule automobile")

"offence notice or summons" means,

(a) an offence notice or summons under Part I of the *Provincial Offences Act*, or

(b) a summons under Part III of the *Provincial Offences Act*. ("avis d'infraction ou assignation") R.S.O. 1990, c. E.19, s. 181 (1); 1998, c. 35, s. 32 (1).

Same

(2) Delivery of an offence notice or summons to the operator of a commercial motor vehicle in respect of an offence under this Act related to the use of the vehicle shall be deemed to be personal service of the offence notice or summons on the owner or lessee of the vehicle who is named in the offence notice or summons.

Employer

(3) Delivery of an offence notice or summons to the operator of a motor vehicle in respect of an offence under this Act related to the use of the vehicle in the course of the operator's employment shall be deemed to be personal service of the offence notice or summons on the employer of the operator of the vehicle. R.S.O. 1990, c. E.19, s. 181 (2, 3).

(4) REPEALED: 1998, c. 35, s. 32 (2).

Exception

(5) Subsection (2) does not apply if, at the time of the offence, the vehicle was in the possession of the operator without the consent of the owner or lessee of the vehicle, as the case may be, but the burden of proof of that shall be on the owner or lessee of the vehicle.

Permit holder deemed owner

(6) For the purposes of this section, the holder of a permit under Part II of the *Highway Traffic Act* shall be deemed to be the owner of the vehicle referred to in the permit if a number plate under that Part bearing a number that corresponds to the permit was displayed on the vehicle at the time the offence was committed.

Application of subs. (6)

(7) Subsection (6) does not apply if the number plate was displayed on the vehicle without the consent of the holder of the permit, but the burden of proof of that shall be on the holder of the permit. R.S.O. 1990, c. E.19, s. 181 (5-7).

Service on various entities of offence notice or summons

Municipal corporations

181.1 (1) Service of an offence notice or summons on a municipal corporation may be effected by delivering it personally to the mayor, warden, reeve or other chief officer of the municipal corporation or to the clerk of the municipal corporation.

Other corporations

(2) Service of an offence notice or summons on a corporation other than a municipal corporation may be effected by delivering it personally to the manager, secretary or other officer of the corporation or to a person apparently in charge of a branch office of the corporation.

Partnership

(3) Service of an offence notice or summons on a partnership may be effected by delivering it personally to a partner or to a person apparently in charge of an office of the partnership.

Sole proprietorship

(4) Service of an offence notice or summons on a sole proprietorship may be effected by delivering it personally to the sole proprietor or to a person apparently in charge of an office of the sole proprietorship.

Substituted service

(5) On application without notice, a justice, on being satisfied that service cannot be made effectively in accordance with subsections (1) to (4), may by order authorize another method of service that has a reasonable likelihood of coming to the attention of the municipal corporation, other corporation, partnership or sole proprietorship. 1998, c. 35, s. 33.

Service generally

182. (1) Any document given or served under this Act or the regulations is sufficiently given or served if it is,

(a) delivered personally;

(b) sent by mail addressed to the person to whom delivery or service is required to be made at the latest address for the person appearing on the records of the Ministry; or

(c) given or served in accordance with regulations respecting service.

When service deemed made

(2) Where service is made by mail, the service shall be deemed to be made on the fifth day after the day of mailing unless the person on whom service is being made establishes that the person did not, acting in good faith, through absence, accident, illness or other cause beyond the person's control receive the notice or order until a later date. R.S.O. 1990, c. E.19, s. 182.

Environmental penalties

182.1 (1) Subject to the regulations, the Director may issue an order requiring a regulated person to pay a penalty if,

(a) the regulated person contravenes,

(i) section 14,

(ii) section 93,

(iii) a provision of the regulations that establishes or has the effect of establishing a numerical limit, including a limit of zero, on the amount, concentration or level of anything that may be discharged to the natural environment,

(iv) a provision of an order under this Act that establishes or has the effect of establishing a numerical limit, including a limit of zero, on the amount, concentration or level of anything that may be discharged to the natural environment, or

(v) a provision of an environmental compliance approval, certificate of property use, renewable energy approval, licence or permit under this Act that establishes or has the effect of establishing a numerical limit, including a limit of zero, on the amount, concentration or level of anything that may be discharged to the natural environment; or

(b) the regulated person contravenes a provision, other than a provision referred to in clause (a), of,

(i) this Act or the regulations,

(ii) an order under this Act, other than an order under section 99.1, 100.1 or 150 or an order of a court,

(iii) an environmental compliance approval, certificate of property use, renewable energy approval, licence or permit under this Act,

(iv) a report under section 29, or

(v) an agreement under subsection (9). 2005, c. 12, s. 1 (52); 2009, c. 12, Sched. G, s. 22 (1, 2); 2010, c. 16, Sched. 7, s. 2 (79, 80).

Exceptions

(2) Subsection (1) does not apply to,

(a) a contravention of section 14, if,

(i) neither this Act nor the *Ontario Water Resources Act* requires the regulated person to notify the Ministry of the discharge to which the contravention relates, or

(ii) the discharge to which the contravention relates was authorized under this Act or the *Ontario Water Resources Act*; or

(b) a contravention of section 184. 2005, c. 12, s. 1 (52).

Contents of order

(3) The order shall be served on the person who is required to pay the penalty and shall,

(a) contain a description of the contravention to which the order relates, including, where appropriate, the date and location of the contravention;

(b) in the case of a contravention of section 14, contain a description of the adverse effects that were caused by or that may be caused by the contravention;

(c) specify the amount of the penalty;

(d) give particulars respecting the time for paying the penalty and the manner of payment; and

(e) provide information to the person as to the person's rights under section 140. 2005, c. 12, s. 1 (52).

Amount

(4) The amount of the penalty shall be determined in accordance with the regulations. 2005, c. 12, s. 1 (52).

Maximum penalty

(5) The amount of the penalty shall not exceed $100,000 for each day or part of a day on which the contravention occurred or continued. 2005, c. 12, s. 1 (52).

Absolute liability

(6) A requirement that a person pay an environmental penalty applies even if,

(a) the person took all reasonable steps to prevent the contravention; or

(b) at the time of the contravention, the person had an honest and reasonable belief in a mistaken set of facts that, if true, would have rendered the contravention innocent. 2005, c. 12, s. 1 (52).

Same

(7) For greater certainty, nothing in subsection (6) affects the prosecution of an offence. 2005, c. 12, s. 1 (52).

Limitation

(8) An order requiring payment of an environmental penalty shall be served not later than the first anniversary of the later of the following dates:

1. The date the contravention occurred.
2. The date on which the evidence of the contravention first came to the attention of the Director or a provincial officer. 2005, c. 12, s. 1 (52).

Agreements

(9) The Director and a person against whom an order may be or has been made under subsection (1) may enter into an agreement that,

(a) identifies the contravention in respect of which the order may be or has been made;

(b) requires the person against whom the order may be or has been made to take steps specified in the agreement within the time specified in the agreement; and

(c) provides that the obligation to pay the penalty may be cancelled in accordance with the regulations or the amount of the penalty may be reduced in accordance with the regulations. 2005, c. 12, s. 1 (52).

Publication of agreements

(10) The Ministry shall publish every agreement entered into under subsection (9) in the environmental registry established under section 5 of the *Environmental Bill of Rights, 1993*. 2005, c. 12, s. 1 (52).

Penalty does not prevent prosecution

(11) A person may be charged, prosecuted and convicted of an offence under this Act in respect of a contravention referred to in subsection (1) even if an environmental penalty has been imposed on or paid by the person or another person in respect of the contravention. 2005, c. 12, s. 1 (52).

No admission

(12) If a person pays a penalty imposed under subsection (1) in respect of a contravention or enters into an agreement under subsection (9) in respect of a contravention, the payment or entering into of the agreement is not, for the purposes of any prosecution in respect of the contravention, an admission that the person committed the contravention. 2005, c. 12, s. 1 (52).

Failure to pay when required

(13) If a person who is required to pay an environmental penalty fails to comply with the requirement,

(a) the order or decision that requires the payment may be filed with a local registrar of the Superior Court of Justice and may be enforced as if it were an order of the court;

(b) the Director may by order suspend any environmental compliance approval, renewable energy approval, licence or permit that has been issued to the person under this Act until the environmental penalty is paid; and

(c) the Director may refuse to issue any environmental compliance approval, renewable energy approval, licence or permit to the person under this Act until the environmental penalty is paid. 2005, c. 12, s. 1 (52); 2009, c. 12, Sched. G, s. 22 (3, 4); 2010, c. 16, Sched. 7, s. 2 (81, 82).

Same

(14) Section 129 of the *Courts of Justice Act* applies in respect of an order or decision filed with the Superior Court of Justice under subsection (13) and, for that purpose, the date on which the order or decision is filed under subsection (13) shall be deemed to be the date of the order that is referred to in section 129 of the *Courts of Justice Act*. 2005, c. 12, s. 1 (52).

Regulations

(15) The Lieutenant Governor in Council may make regulations,

(a) specifying the form and content of orders under subsection (1);

(b) specifying types of contraventions or circumstances in respect of which an order may not be issued under subsection (1);

(c) requiring and governing public consultation before an agreement is entered into under subsection (9) and, subject to that subsection and to any regulations made under subclause (d) (iv), governing the contents of agreements under that subsection;

(d) governing the determination of the amounts of environmental penalties, including,

(i) prescribing criteria to be considered in the exercise of any discretion,

(ii) providing that the total amount of the penalty for a contravention that occurs or continues for more than one day not exceed a maximum prescribed by the regulations,

(iii) providing for different amounts depending on when an environmental penalty is paid,

(iv) with respect to agreements under subsection (9), governing the cancellation of the obligation to pay an environmental penalty or the reduction of the amount of an environmental penalty;

(e) prescribing circumstances in which a person is not required to pay an environmental penalty;

(f) prescribing procedures related to environmental penalties;

(g) respecting any other matter necessary for the administration of a system of penalties provided for by this section. 2005, c. 12, s. 1 (52).

General or particular

(16) A regulation under subsection (15) may be general or particular in its application. 2005, c. 12, s. 1 (52).

Regulations governing determination of amounts

(17) The regulations made under clause (15) (d) must, with respect to a contravention referred to in clause (1) (a), provide for the following matters:

1. The person who is required to pay the penalty must be entitled,
   i. to seek and obtain a reduction in the amount of the penalty if the person took steps prescribed by the regulations to prevent the contravention in respect of which the penalty is imposed, and
   ii. to seek and obtain a reduction in the amount of the penalty if the person took steps prescribed by the regulations to mitigate the effects of the contravention in respect of which the penalty is imposed.
2. The determination of the amount of the penalty must take into account factors prescribed by the regulations that relate to the seriousness of the contravention in respect of which the penalty is imposed.
3. If the Director is of the opinion that, as a result of the contravention in respect of which the penalty is imposed, a monetary benefit prescribed by the regulations was acquired by the person who is required to pay the penalty, the amount of the benefit must be considered in determining the amount of the penalty. 2005, c. 12, s. 1 (52).

Environmental management systems

(18) The regulations made under clause (15) (d) must provide for a reduction in the amount of an environmental penalty if, at the time the contravention to which the penalty relates occurred, the person who is required to pay the penalty had in place an environmental management system specified by the regulations. 2005, c. 12, s. 1 (52).

Annual report

(19) The Minister shall, not later than March 31 in each year, publish a report that sets out the following information for each contravention in respect of which an order was made under this section during the previous year:

1. The name of the person against whom the order was made.
2. The amount of the penalty.
3. A description of the contravention.
4. An indication of whether an agreement was entered into under subsection (9) in respect of the order and, if an agreement was entered into, the effect of the agreement on the obligation to pay the penalty or on the amount of the penalty. 2005, c. 12, s. 1 (52).

Five-year review

(20) At least once every five years, the Minister shall cause a report to be prepared and published on the operation of this section, including the effect of this section on prosecutions under this Act and including recommendations on the contraventions to which and circumstances in which orders should be issued under subsection (1). 2005, c. 12, s. 1 (52).

Application

(21) This section does not apply to contraventions that occurred before this section came into force. 2005, c. 12, s. 1 (52).

Special purpose account

182.2 (1) Environmental penalties paid under this Act shall be deposited in a separate account in the Consolidated Revenue Fund. 2005, c. 12, s. 1 (53).

Same

(2) For the purpose of the *Financial Administration Act*, money deposited in the account referred to in subsection (1) shall be deemed to be money paid to Ontario for a special purpose. 2005, c. 12, s. 1 (53).

Payments out of account

(3) Subject to the regulations, if money is deposited in the account referred to in subsection (1), the Minister of the Environment may direct that money be paid out of the account for the following purposes:

1. To compensate persons or bodies who incurred costs or expenses or suffered other losses as a result of a spill of a pollutant within the meaning of Part X, including providing funds for making compensation payments under section 101.
2. To provide financial assistance to persons or bodies who undertake environmental remediation projects.
3. Such other purposes as are prescribed by the regulations. 2005, c. 12, s. 1 (53).

Administrative penalties

182.3 (1) The purpose of an administrative penalty issued under this section is,

(a) to ensure compliance with,

(i) the requirement to apply for a review under subsection 20.4 (2),

(ii) the requirement to register an activity under subsection 20.21 (1),

(iii) the requirement to maintain and update a registration under subsection 20.22 (2), or

(iv) the requirement to carry out measures set out in a notice under section 157.4; or

(b) to prevent a person or entity from deriving, directly or indirectly, any economic benefit as a result of contravening the requirements mentioned in clause (a). 2010, c. 16, Sched. 7, s. 2 (83).

Order by provincial officer

(2) A provincial officer may, subject to the regulations, issue an order requiring a person to pay an administrative penalty if,

(a) the provincial officer is of the opinion that the person has contravened any of the requirements mentioned in clause (1) (a); and

(b) the regulations authorize the issue of the order by a provincial officer. 2010, c. 16, Sched. 7, s. 2 (83).

Order by Director

(3) The Director may, subject to the regulations, issue an order requiring a person to pay an administrative penalty if the Director is of the opinion that the person has contravened any of the requirements mentioned in clause (1) (a). 2010, c. 16, Sched. 7, s. 2 (83).

Limitation

(4) An order mentioned in subsection (2) or (3) shall be served not later than one year after the day on which evidence of the contravention first came to the attention of a provincial officer or the Director. 2010, c. 16, Sched. 7, s. 2 (83).

Orders not to be issued to employees, officers, directors or agents

(5) If a person who is required to comply with a requirement mentioned in subsection (1) is a corporation, an order under subsection (2) or (3) shall not be issued to an employee, officer, director or agent of the corporation. 2010, c. 16, Sched. 7, s. 2 (83).

Amount of penalty

(6) The amount of the administrative penalty for each day or part of a day on which a contravention occurred or continues to occur shall be determined by the provincial officer or the Director in accordance with the regulations. 2010, c. 16, Sched. 7, s. 2 (83).

Total penalty

(7) Subject to subsection (8), the amount of the administrative penalty shall not exceed $100,000 for each contravention. 2010, c. 16, Sched. 7, s. 2 (83).

Same, provincial officer

(8) The amount of the administrative penalty specified in an order issued by a provincial officer shall not exceed $5,000 for each contravention. 2010, c. 16, Sched. 7, s. 2 (83).

Contents of notice

(9) An order mentioned in subsection (2) or (3) shall be served on the person who is required to pay the administrative penalty and shall,

(a) contain a description of the contravention to which the order relates, including, if appropriate, the date of the contravention;

(b) specify the amount of the penalty;

(c) give particulars respecting the time for paying the penalty and the manner of payment; and

(d) provide information to the person as to the person's right to require,

(i) a hearing under section 140, if the order is issued by the Director, or

(ii) a review under section 182.4, if the order is issued by a provincial officer. 2010, c. 16, Sched. 7, s. 2 (83).

Absolute liability

(10) A requirement that a person pay an administrative penalty applies even if,

(a) the person took all reasonable steps to prevent the contravention; or

(b) at the time of the contravention, the person had an honest and reasonable belief in a mistaken set of facts that, if true, would have rendered the contravention innocent. 2010, c. 16, Sched. 7, s. 2 (83).

Same

(11) For greater certainty, nothing in subsection (10) affects the prosecution of an offence. 2010, c. 16, Sched. 7, s. 2 (83).

Payment prevents conviction

(12) A person who pays an administrative penalty in respect of a contravention and has remedied the contravention shall not be convicted of an offence under this Act in respect of the same contravention. 2010, c. 16, Sched. 7, s. 2 (83).

Regulations

(13) The Lieutenant Governor in Council may make regulations,

(a) specifying the form and content of orders under this section;

(b) governing the determination of the amount of administrative penalties;

(c) respecting any matter necessary for the administration of the system of administrative penalties. 2010, c. 16, Sched. 7, s. 2 (83).

Review of administrative penalty imposed by provincial officer

182.4 (1) A person who is required by an order issued by a provincial officer to pay an administrative penalty may, within seven days after being served with the order, request that the Director review the order. 2010, c. 16, Sched. 7, s. 2 (83).

Request for review

(2) A request for a review shall be made in writing and shall include,

(a) a statement of whether the review applies to the liability to pay the penalty, the amount of the penalty or both;

(b) any submissions that the person requesting the review wishes the Director to consider; and

(c) for the purposes of subsection (7), an address for service by mail, fax or such other means of service as the regulations may prescribe. 2010, c. 16, Sched. 7, s. 2 (83).

Stay

(3) If a person requests a review, the requirement to pay the administrative penalty is stayed until the disposition of the matter. 2010, c. 16, Sched. 7, s. 2 (83).

Decision of Director

(4) A Director who receives a request for a review may,

(a) revoke the order of the provincial officer; or

(b) by order directed to the person who requested the review, confirm or alter the order of the provincial officer. 2010, c. 16, Sched. 7, s. 2 (83).

Same

(5) For the purposes of subsection (4), the Director may substitute his or her opinion for that of the provincial officer. 2010, c. 16, Sched. 7, s. 2 (83).

Amount of penalty

(6) For greater certainty, if the review applies to the amount of the penalty, the regulations made under clause 182.3 (13) (b) apply for the purposes of the review. 2010, c. 16, Sched. 7, s. 2 (83).

Notice of decision

(7) The Director shall serve a person requesting a review with a copy of,

(a) the Director’s decision or order under subsection (4); and

(b) if the Director issues an order under clause (4) (b), the reasons for the order. 2010, c. 16, Sched. 7, s. 2 (83).

Automatic confirmation of order

(8) If the Director does not comply with subsection (7) within seven days after receiving a request for a review, the order in respect of which the review was requested shall be deemed to have been confirmed by order of the Director. 2010, c. 16, Sched. 7, s. 2 (83).

Same

(9) For the purposes of section 140, a deemed confirmation by order of the Director under subsection (8) shall be,

(a) deemed to be directed to the person to whom the order of the provincial officer was directed; and

(b) deemed to have been served on the person mentioned in clause (a) on the last day of the time period mentioned in subsection (8). 2010, c. 16, Sched. 7, s. 2 (83).

Exception

(10) Subsections (8) and (9) do not apply if, within seven days after receiving the request for a review, the Director gives written notice to the person requesting the review stating that the Director requires additional time to make a decision. 2010, c. 16, Sched. 7, s. 2 (83).

Regulations

(11) The Lieutenant Governor in Council may make regulations specifying the form and content of orders under this section. 2010, c. 16, Sched. 7, s. 2 (83).

Failure to pay administrative penalty when required

182.5 (1) If a person who is required to pay an administrative penalty fails to comply with the requirement,

(a) the order that requires payment may be filed with a local registrar of the Superior Court of Justice and the order may be enforced as if it were an order of the court;

(b) the Director may, by order, suspend any registration filed under Part II.2 or any permit, licence or environmental compliance approval issued to the person under this Act until the administrative penalty is paid; and

(c) the Director may refuse to issue any permit, licence or environmental compliance approval to the person or refuse to amend any permit, licence or environmental compliance approval issued to the person under this Act until the administrative penalty is paid. 2010, c. 16, Sched. 7, s. 2 (83).

Same

(2) Section 129 of the *Courts of Justice Act* applies in respect of an order filed under clause (1) (a) and, for that purpose, the date on which the order is filed under clause (1) (a) shall be deemed to be the date of the order that is referred to in section 129 of the *Courts of Justice Act*. 2010, c. 16, Sched. 7, s. 2 (83).

Power to restrain

By action

183. (1) Where this Act or the regulations or any direction, order, certificate of property use, approval, notice or permit, made, granted, given, served or issued by the Minister, the Director or a provincial officer under this Act is contravened, in addition to any other remedy and to any penalty

imposed by law, such contravention may be restrained by action at the instance of the Minister. R.S.O. 1990, c. E.19, s. 183 (1); 2001, c. 17, s. 2 (48).

By order upon conviction

(2) On its own initiative or on application by counsel for the prosecutor, the court that convicts a person of an offence under this Act, in addition to any other remedy and to any other penalty imposed by law, may make an order prohibiting the continuation or repetition by the person of the act or omission for which the person is convicted. R.S.O. 1990, c. E.19, s. 183 (2).

Compliance with investigations, etc.

Obstruction

184. (1) No person shall hinder or obstruct any provincial officer or any employee in or agent of the Ministry in the performance of his or her duties under this Act. 1998, c. 35, s. 35; 2006, c. 35, Sched. C, s. 36 (9); 2009, c. 33, Sched. 15, s. 5 (8).

False information

(2) No person shall orally, in writing or electronically, give or submit false or misleading information in any statement, document or data, to any provincial officer, the Minister, the Ministry, any employee in or agent of the Ministry or any person involved in carrying out a program of the Ministry in respect of any matter related to this Act or the regulations. 1998, c. 35, s. 35; 2001, c. 9, Sched. G, s. 5 (15); 2006, c. 35, Sched. C, s. 36 (10); 2009, c. 33, Sched. 15, s. 5 (9).

Same

(3) No person shall include false or misleading information in any document or data required to be created, stored or submitted under this Act. 1998, c. 35, s. 35.

Refusal to furnish information

(4) No person shall refuse to furnish any provincial officer, the Minister, the Ministry or any employee in or agent of the Ministry with information required for the purposes of this Act and the regulations. 1998, c. 35, s. 35; 2006, c. 35, Sched. C, s. 36 (11); 2009, c. 33, Sched. 15, s. 5 (10).

Presiding judge

185. The Crown, by notice to the clerk of the Ontario Court of Justice, may require that a provincial judge preside over a proceeding in respect of an offence under this Act. R.S.O. 1990, c. E.19, s. 185; 2001, c. 9, Sched. G, s. 5 (16); 2006, c. 21, Sched. C, s. 108 (1).

Offences

General

186. (1) Every person who contravenes this Act or the regulations is guilty of an offence. R.S.O. 1990, c. E.19, s. 186 (1).

Exception

(1.1) Subsection (1) does not apply to a contravention of section 14 unless the contravention causes or is likely to cause an adverse effect. 2005, c. 12, s. 1 (54).

Offence re order

(2) Every person who fails to comply with an order under this Act, other than an order under section 99.1, 100.1, 150 or 182.1, is guilty of an offence. R.S.O. 1990, c. E.19, s. 186 (2); 2005, c. 12, s. 1 (55).

Offence re approval, licence or permit, etc.

(3) Every person who fails to comply with the terms and conditions of an environmental compliance approval, certificate of property use or renewable energy approval or of a licence or permit under this Act or who fails to comply with the terms of a report under section 29 is guilty of an offence. 2010, c. 16, Sched. 7, s. 2 (84).

Offence re fees

(3.1) Every person who fails to pay a fee that the person is required to pay under section 179.1 is guilty of an offence. 2001, c. 9, Sched. G, s. 5 (17).

Exception when order or program approval complied with

(4) Despite subsections (1), (2) and (3), a person to whom an order of the Minister, the Director or a provincial officer or a program approval of the Director is directed who complies fully with the order or approval shall not be prosecuted for or convicted of an offence in respect of the matter or matters dealt with in the order or approval that occurs during the period within which the order or program approval is applicable. 1998, c. 35, s. 36.

Same

(5) The protection from prosecution under subsection (4) does not include protection from the imposition of an environmental penalty. 1998, c. 35, s. 36; 2005, c. 12, s. 1 (56).

(6) REPEALED: 1998, c. 35, s. 36.

Penalties

187. (1) Every individual convicted of an offence under section 186, other than an offence described in subsection (3), is liable,

(a) on a first conviction, for each day or part of a day on which the offence occurs or continues, to a fine of not more than $50,000; and

(b) on each subsequent conviction,

(i) for each day or part of a day on which the offence occurs or continues, to a fine of not more than $100,000,

(ii) to imprisonment for a term of not more than one year, or

(iii) to both such fine and imprisonment. 2005, c. 12, s. 1 (57).

Same: corporations

(2) Every corporation convicted of an offence under section 186, other than an offence described in subsection (3), is liable,

(a) on a first conviction, for each day or part of a day on which the offence occurs or continues, to a fine of not more than $250,000; and

(b) on each subsequent conviction, for each day or part of a day on which the offence occurs or continues, to a fine of not more than $500,000. 2005, c. 12, s. 1 (57).

Application of subss. (4) and (5)

(3) Subsections (4) and (5) apply to the following offences:

1. An offence under subsection 186 (1) of,

i. contravening section 14 or 15,

ii. contravening section 27, 40, 41 or 47.3 in respect of hauled liquid industrial waste or hazardous waste as designated in the regulations relating to Part V,

iii. contravening section 92 or 184, or

iv. contravening a provision of the regulations that establishes or has the effect of establishing a numerical limit, including a limit of zero, on the amount, concentration or level of anything that may be discharged to the natural environment.

2. An offence under subsection 186 (2) of failing to comply with an order under this Act that establishes or has the effect of establishing a numerical limit, including a limit of zero, on the amount, concentration or level of anything that may be discharged to the natural environment.

3. An offence under subsection 186 (3) of failing to comply with a term or condition of an environmental compliance approval, certificate of property use, renewable energy approval, licence or permit under this Act, or a report under section 29, that establishes or has the effect of establishing a numerical limit, including a limit of zero, on the amount, concentration or level of anything that may be discharged to the natural environment.

4. An offence under subsection 194 (2) that relates to a contravention or failure to comply referred to in paragraph 1, 2 or 3. 2005, c. 12, s. 1 (57); 2009, c. 12, Sched. G, s. 24; 2010, c. 16, Sched. 7, s. 2 (85).

Certain offences: corporations

(4) Every corporation convicted of an offence described in subsection (3) is liable, for each day or part of a day on which the offence occurs or continues, to a fine of,

(a) not less than $25,000 and not more than $6,000,000 on a first conviction;

(b) not less than $50,000 and not more than $10,000,000 on a second conviction; and

(c) not less than $100,000 and not more than $10,000,000 on each subsequent conviction. 2005, c. 12, s. 1 (57).

Certain offences: individuals

(5) Every individual convicted of an offence described in subsection (3) is liable,

(a) for each day or part of a day on which the offence occurs or continues, to a fine of,

(i) not less than $5,000 and not more than $4,000,000 on a first conviction,

(ii) not less than $10,000 and not more than $6,000,000 on a second conviction, and

(iii) not less than $20,000 and not more than $6,000,000 on each subsequent conviction;

(b) to imprisonment for a term of not more than five years less one day; or

(c) to both such fine and imprisonment. 2005, c. 12, s. 1 (57).

Number of convictions

188. In determining the number of a person's previous convictions for the purpose of section 187, the court shall include previous convictions of the person under,

(a) this Act, other than for an offence related to Part IX;

(a.1) the *Nutrient Management Act, 2002*;

(b) the *Ontario Water Resources Act*;

(c) the *Pesticides Act*;

(d) the *Safe Drinking Water Act, 2002*; or

(e) the *Toxics Reduction Act, 2009*. 1998, c. 35, s. 38; 2002, c. 4, s. 62 (6); 2005, c. 12, s. 1 (58); 2009, c. 19, s. 67 (11).

Sentencing considerations

188.1 (1) Subject to subsection (3), in determining a penalty under section 187, the court shall consider each of the following circumstances to be aggravating factors:

1. The offence caused an adverse effect.
2. The defendant committed the offence intentionally or recklessly.
3. In committing the offence, the defendant was motivated by a desire to increase revenue or decrease costs.
4. The defendant committed the offence despite having been warned by the Ministry of circumstances that subsequently became the subject of the offence.
5. After the commission of the offence, the defendant,
   i. attempted to conceal the commission of the offence from the Ministry or other public authorities,
   ii. failed to co-operate with the Ministry or other public authorities,
   iii. failed to take prompt action to mitigate the effects of the offence, including action to compensate persons for loss or damage that resulted from the commission of the offence, or
   iv. failed to take prompt action to reduce the risk of similar offences being committed in the future.
6. The defendant previously contravened legislation of Ontario or another jurisdiction that is intended to prevent or minimize harm to the natural environment.
7. Any other circumstance that is prescribed by the regulations as an aggravating factor. 2005, c. 12, s. 1 (59).

Severity of penalty

(2) Subject to subsection (3), the severity of a penalty under section 187 shall reflect the number of aggravating factors that apply under subsection (1) and the seriousness of the particular circumstances of each of those aggravating factors. 2005, c. 12, s. 1 (59).

Reasons

(3) If the court decides that an aggravating factor that applies under subsection (1) does not warrant a more severe penalty, the court shall give reasons for that decision. 2005, c. 12, s. 1 (59).

Compliance with order not a mitigating factor

(4) Subject to subsection (5), in determining a penalty under section 187, the court shall not consider compliance with an order issued under this Act in response to the offence to be a mitigating factor. 2005, c. 12, s. 1 (59).

Reasons

(5) If the court decides that compliance with an order issued under this Act in response to the offence warrants a less severe penalty, the court shall give reasons for that decision. 2005, c. 12, s. 1 (59).

Environmental penalty

(6) If an order is made requiring a person to pay an environmental penalty in respect of a contravention and the person is also convicted of an offence in respect of the same contravention, the

court, in determining a penalty under section 187, shall consider the order to pay the environmental penalty to be a mitigating factor and, if subsection 187 (4) or (5) applies, may impose a fine of less than the minimum fine provided for in that subsection. 2005, c. 12, s. 1 (59).

Penalty re monetary benefit

189. The court that convicts a person of an offence under this Act, in addition to any other penalty imposed by the court, may increase a fine imposed upon the person by an amount equal to the amount of the monetary benefit acquired by or that accrued to the person as a result of the commission of the offence, despite any maximum fine elsewhere provided. R.S.O. 1990, c. E.19, s. 189.

Order to prevent damage, etc.

190. (1) On its own initiative or on the request of the prosecutor, the court that convicts a person of an offence under this Act, in addition to any other penalty imposed by the court, may order the person,

(a) to take such action, including but not limited to providing a temporary or permanent alternate water supply, as the court directs within the time specified in the order to prevent, eliminate or ameliorate damage that results from or is in any way connected to the commission of the offence;

(b) where the offence is in relation to a waste management system or waste disposal site, to take such action as is required to bring the system or site into conformity with Part V or the regulations within the time specified in the order; and

(c) to comply with any order issued under this Act to the person in relation to damage that results from or is in any way connected to the commission of the offence. 1998, c. 35, s. 39 (1); 2005, c. 12, s. 1 (60, 61).

Other conditions

(2) An order under subsection (1) may contain such other conditions relating to the circumstances of the offence and of the person that contributed to the commission of the offence as the court considers appropriate to prevent similar unlawful conduct or to contribute to rehabilitation. R.S.O. 1990, c. E.19, s. 190 (2); 2006, c. 19, Sched. K, s. 2 (10).

Variation of order

(3) The court that made an order under subsection (1) may make any changes in or additions to the conditions prescribed in the order that in the opinion of the court are rendered desirable by a change in circumstances,

(a) on its own initiative at any time; or

(b) on application by counsel for the prosecutor, by the person convicted or by the person authorized under the *Law Society Act* to represent the person convicted, with notice to the other party, after a hearing or, with the consent of the parties, without a hearing. 2006, c. 21, Sched. C, s. 108 (2).

Conflict

(4) Nothing in subsection (1) authorizes the making of an order that conflicts with an order previously made under this Act by the Minister or the Director, but an order may be made under subsection (1) supplementing the provisions of an order in respect of the prevention, decrease or elimination of harm to the natural environment and the restoration of the natural environment. R.S.O. 1990, c. E.19, s. 190 (4).

(5) REPEALED: 1998, c. 35, s. 39 (2).

Continuation in force

(6) Where a person bound by an order under subsection (1) is imprisoned, the order continues in force except in so far as the imprisonment renders it impossible for the person to comply for the time being with the order. R.S.O. 1990, c. E.19, s. 190 (6).

Restitution orders

190.1 (1) On its own initiative or on the request of the prosecutor, the court that convicts a person of an offence under this Act, in addition to any other penalty imposed by the court, may make an order for restitution against the person convicted of the offence, requiring the person to pay another person for reasonable expenses actually incurred by the other person on account of damage to property in which the other person has an interest that results from or is in any way connected to the commission of the offence, in such amount and on such terms and conditions as the court considers just. 1998, c. 35, s. 40.

Expenses incurred, interpretation

(2) For the purposes of subsection (1), expenses are incurred on account of damage to property if they are incurred,

(a) to prevent, eliminate or ameliorate the damage;

(b) to replace the property that suffered the damage; or

(c) to restore the property to the state that it was in before the damage. 1998, c. 35, s. 40.

Same

(3) For greater certainty, for the purposes of clause (2) (a), expenses incurred to provide a temporary or permanent alternate water supply may be expenses incurred to prevent, eliminate or ameliorate damage. 1998, c. 35, s. 40; 2005, c. 12, s. 1 (62).

Amount of order

(4) The amount of the order for restitution shall not exceed the replacement value of the property as of the date the order is issued. 1998, c. 35, s. 40.

No restitution to person who committed offence

(5) The court shall not make an order for restitution in favour of any person on account of damage that is the result of,

(a) the commission of an offence by the person; or

(b) a contravention in respect of which an order has been served on the person requiring the person to pay an environmental penalty, unless the order has been revoked. 1998, c. 35, s. 40; 2005, c. 12, s. 1 (63).

Notification of order

(6) Where a court makes an order for restitution, it shall cause a copy of the order or a notice of the content of the order to be given to the person to whom the restitution is ordered to be paid. 1998, c. 35, s. 40.

Filing of order in court

(7) An order for restitution may be filed with a local registrar of the Superior Court of Justice and the responsibility for filing shall be on the person to whom the restitution is ordered to be paid. 1998, c. 35, s. 40; 2001, c. 9, Sched. G, s. 5 (21).

Enforcement of order

(8) An order for restitution filed under subsection (7) may be enforced as if it were an order of the court. 1998, c. 35, s. 40.

Same

(9) Section 129 of the *Courts of Justice Act* applies in respect of an order for restitution filed under subsection (7) and, for the purpose, the date of filing shall be deemed to be the date of the order. 1998, c. 35, s. 40.

Civil remedy

(10) A civil remedy for an act or omission is not affected by reason only that an order for restitution under this section has been made in respect of that act or omission. 1998, c. 35, s. 40.

Forfeiture on conviction

190.2 (1) On its own initiative or on the request of the prosecutor, the court that convicts a person of an offence under this Act, in addition to any other penalty imposed by the court, may, if conviction is in relation to an offence in connection with which a thing has been seized under section 160 or 161 or under a warrant issued under the *Provincial Offences Act*, order that the thing be forfeited to the Crown. 1998, c. 35, s. 40.

Same

(2) The court shall not make an order under subsection (1) unless the court is satisfied that,

(a) the seizure of the thing was lawful; and

(b) no later than seven days before the hearing of the request, written notice was provided by a provincial officer,

(i) to every person whom the provincial officer knows or has reason to believe is an owner of the thing seized,

(ii) to every person who has a security interest in the thing that is perfected by registration under the *Personal Property Security Act* against the name of any person whom the provincial officer knows or has reason to believe is the owner,

(iii) where the thing seized is a vehicle, to every person who has a security interest in the vehicle that is perfected by registration under the *Personal Property Security Act* against the vehicle identification number of the vehicle, and

(iv) where the thing seized is a vehicle and the vehicle is registered under the *Highway Traffic Act*, to the registered owner. 1998, c. 35, s. 40.

Contents of notice

(3) Notice under subsection (2) shall include,

(a) a description of the thing seized sufficient to enable it to be identified;

(b) the location at which the thing was seized;

(c) the date of the seizure;

(d) the name and telephone number of the provincial officer who seized the thing or of his or her delegate;

(e) a statement of the reason for the seizure;

(f) a reference to the statutory provision authorizing the seizure;

(g) a statement that an order for forfeiture of the thing is being sought under this section; and

(h) a statement that the person to whom the notice is provided may make submissions to the court with respect to the issuance of an order under this section. 1998, c. 35, s. 40.

Disposition of things forfeited

(4) A thing forfeited under this section may be disposed of as the Director directs. 1998, c. 35, s. 40.

Relief against forfeiture

(5) A person who had an interest in a thing forfeited under this section may apply to the Superior Court of Justice for relief against the forfeiture and the court may make an order providing for any relief that it considers appropriate, including, but not limited to, one or more of the following orders:

1. An order directing that the thing or any part of the thing be returned to the applicant.
2. An order directing that any interest in the thing be vested in the applicant.
3. An order directing that an amount be paid by the Crown to the applicant by way of compensation for the forfeiture. 1998, c. 35, s. 40; 2001, c. 9, Sched. G, s. 5 (21).

When relief not to be ordered

(6) The court shall not make an order for relief under subsection (5) in respect of a thing forfeited where the person applying for the relief,

(a) has been served with an order requiring the person to pay an environmental penalty in connection with a matter that was associated with the seizure of the thing, unless the order has been revoked; or

(b) has been charged with an offence that was associated with the seizure of the thing, unless the charge has been withdrawn or dismissed. 1998, c. 35, s. 40; 2005, c. 12, s. 1 (64).

Where fine not paid

190.3 (1) Where a person is convicted of an offence under this Act and a fine is imposed,

(a) a thing seized in connection with the offence and not forfeited to the Crown under section 162.1, 162.3 or 190.2 shall not be returned until the fine has been paid; and

(b) if payment of the fine is in default within the meaning of section 69 of the *Provincial Offences Act*, a justice may order that the thing be forfeited to the Crown.

Application of subss. 190.2 (2) to (6)

(2) Subsections 190.2 (2) to (6) apply with necessary modifications in relation to an order under clause (1) (b). 1998, c. 35, s. 40.

Costs of seizure, etc.

190.4 If a person is convicted of an offence under this Act, the justice may, in addition to any other penalty, order the person to pay all or part of the expenses incurred by the Ministry with respect to the seizure, storage or disposition of any thing seized in connection with the offence. 1998, c. 35, s. 40.

Suspension of default in payment of fine

191. (1) Where a person is in default of payment of a fine imposed upon conviction for an offence against this Act, the *Nutrient Management Act, 2002*, the *Ontario Water Resources Act*, the *Pesticides Act*, the *Safe Drinking Water Act, 2002*, the *Toxics Reduction Act, 2009* or the regulations made under any of them, on the application of the Director, an order may be made under subsection 69 (2) of the *Provincial Offences Act* directing that, until the fine is paid,

(a) one or more of the person's licences be suspended;

(b) no licence be issued to the person, or

(c) the person's registration under Part II.2 be suspended. 2010, c. 16, Sched. 7, s. 2 (86).

Duty of Director

(2) The Director shall,

(a) on being informed of an outstanding order referred to in subsection (1), suspend the person's licence or registration, if it is not already suspended under another order referred to in subsection (1); and

(b) on being informed that the fine and any applicable administrative fee for the reinstatement of the licence or registration are paid, reinstate the licence or registration, unless the Director has been informed that,

(i) there is another outstanding order referred to in subsection (1) directing that the licence or registration be suspended, or

(ii) the licence or registration is suspended under any other order or under another statute. 2010, c. 16, Sched. 7, s. 2 (87).

Regulations

(3) The Lieutenant Governor in Council may make regulations prescribing forms and procedures and respecting any matter considered necessary or advisable to carry out effectively the intent and purpose of this section. R.S.O. 1990, c. E.19, s. 191 (3).

Definition

(4) In this section,

"licence" means an environmental compliance approval or a licence issued under this Act. 1998, c. 35, s. 41; 2010, c. 16, Sched. 7, s. 2 (88).

Act of officer, etc.

192. For the purposes of this Act and the regulations, an act or thing done or omitted to be done by an officer, official, employee or agent of a corporation in the course of his or her employment or in the exercise of his or her powers or the performance of his or her duties shall be deemed to be also an act or thing done or omitted to be done by the corporation. R.S.O. 1990, c. E.19, s. 192.

193. REPEALED: 1998, c. 35, s. 42.

Duty of director or officer

194. (1) Every director or officer of a corporation has a duty to take all reasonable care to prevent the corporation from,

(a) discharging or causing or permitting the discharge of a contaminant, in contravention of,

(i) this Act or the regulations, or

(ii) an environmental compliance approval, certificate of property use, renewable energy approval, licence or permit under this Act;

(b) failing to notify the Ministry of a discharge of a contaminant, in contravention of,

(i) this Act or the regulations, or

(ii) an environmental compliance approval, certificate of property use, renewable energy approval, licence or permit under this Act;

(c) contravening section 27, 40, 41 or 47.3 in respect of hauled liquid industrial waste or hazardous waste as designated in the regulations relating to Part V;

(d) contravening section 93 or 184;

(e) failing to install, maintain, operate, replace or alter any equipment or other thing, in contravention of an environmental compliance approval, certificate of property use, renewable energy approval, licence or permit under this Act; or

(f) contravening an order under this Act, other than an order under section 99.1, 100.1, 150 or 182.1. 2005, c. 12, s. 1 (65); 2009, c. 12, Sched. G, s. 25; 2010, c. 16, Sched. 7, s. 2 (89-91).

Contraventions of s. 14

(1.1) Clause (1) (a) does not apply to a contravention of section 14 unless the contravention causes or is likely to cause an adverse effect. 2005, c. 12, s. 1 (65).

Offence

(2) Every person who has a duty under subsection (1) and who fails to carry out that duty is guilty of an offence. R.S.O. 1990, c. E.19, s. 194 (2).

Onus

(2.1) If a director or officer of a corporation is charged with an offence under subsection (2) in connection with a specific contravention of the corporation, the director or officer has the onus, in the trial of the offence, of proving that he or she carried out the duty under subsection (1) in connection with that contravention. 2005, c. 12, s. 1 (66).

Liability to conviction

(3) A director or officer of a corporation is liable to conviction under this section whether or not the corporation has been prosecuted or convicted. R.S.O. 1990, c. E.19, s. 194 (3).

Limitation on proceedings

195. (1) Proceedings for an offence under this Act or the regulations shall not be commenced later than two years after the later of,

(a) the day on which the offence was committed; and

(b) the day on which evidence of the offence first came to the attention of a person appointed under section 5.

Idem

(2) Clause (1) (b) does not apply in respect of offences committed before the 28th day of June, 1988. R.S.O. 1990, c. E.19, s. 195.

Orders, consequential authority

196. (1) The authority to make an order under this Act includes the authority to require the person or body to whom the order is directed to take such intermediate action or such procedural steps or both as are related to the action required or prohibited by the order and as are specified in the order.

Same, authority to order access

(2) A person who has authority under this Act to order that a thing be done on or in any place also has authority to order any person who owns, occupies or has the charge, management or control of the place to permit access to the place for the purpose of doing the thing.

Application

(3) Subsection (1) applies in respect of every order made under this Act whether or not the order was made before the 1st day of January, 1984. R.S.O. 1990, c. E.19, s. 196.

Administrative changes to environmental compliance approval, etc.

196.1 The Director may revoke an environmental compliance approval, alter the terms and conditions of an environmental compliance approval or make an order revoking or amending a program approval or order issued by the Director under this Act if the Director is satisfied that the revocation, alteration or amendment is in the public interest and is desirable for administrative reasons to,

(a) reflect changes that have occurred with respect to the identity or description of any person or place; or

(b) eliminate provisions that are spent or obsolete. 2010, c. 16, Sched. 7, s. 2 (92).

Disclosure of orders and decisions

197. (1) A person who has authority under this Act to make an order or decision affecting real property also has authority to make an order requiring any person with an interest in the property, before dealing with the property in any way, to give a copy of the order or decision affecting the property to every person who will acquire an interest in the property as a result of the dealing. 2001, c. 17, s. 2 (50).

Registration of requirement

(2) A certificate setting out a requirement imposed under subsection (1) may be registered in the proper land registry office on the title of the real property to which the requirement relates, if the certificate is in a form approved by the Minister, is signed or authorized by a person who has authority to make orders imposing requirements under subsection (1) and is accompanied by a registrable description of the property. 2001, c. 17, s. 2 (50).

Same

(3) A requirement imposed under subsection (1) that is set out in a certificate registered under subsection (2) is, from the time of registration, deemed to be directed to each person who subsequently acquires an interest in the real property. 2001, c. 17, s. 2 (50).

Dealings voidable

(4) A dealing with real property by a person who is subject to a requirement imposed under subsection (1) or (3) is voidable at the instance of a person who was not given the copy of the order or decision in accordance with the requirement. 2001, c. 17, s. 2 (50).

Registration of withdrawal of requirement

(5) A certificate of withdrawal of a requirement imposed under subsection (1) or (3) may be registered in the proper land registry office on the title of the real property to which the requirement relates, if the certificate is in a form approved by the Minister, is signed or authorized by a person who has authority to make orders imposing requirements under subsection (1) and is accompanied by a registrable description of the property. 2001, c. 17, s. 2 (50).

Same

(6) On the registration under the *Registry Act* of a certificate of withdrawal of a requirement in accordance with subsection (5), the land registrar may delete the entries in the abstract index of the certificate setting out the requirement and the certificate of withdrawal of the requirement. 2001, c. 17, s. 2 (50).

Same

(7) Registration of a certificate of withdrawal of a requirement in accordance with subsection (5) has the effect of revoking the requirement. 2001, c. 17, s. 2 (50).

Transition

(8) This section, as it read immediately before the day subsection 2 (50) of the *Brownfields Statute Law Amendment Act, 2001* came into force, continues to apply in respect of prohibitions issued under this section before that day. 2001, c. 17, s. 2 (50).

PART I
MUNICIPALITIES

Protected actions by municipalities etc.

1. (1) The following Acts are prescribed for paragraph 6 of subsection 168.12 (2) of the Act:

1. *Drainage Act*.
2. *Health Protection and Promotion Act*.
3. *Snow Roads and Fences Act*.
4. *Weed Control Act*.

(2) The following actions are prescribed for the purposes of paragraph 7 of subsection 168.12 (2) of the Act:

1. An action under or for the purpose of a by-law of a municipality in relation to either or both of the following:
   i. The suppression or prevention of fire, or the preservation of property threatened or affected by fire.
   ii. The removal, repair or renewal of any building or other structure.
2. For the purposes of any Act, causing work (including installation, construction or maintenance) to be done on non-municipal property in relation to a public utility as defined in subsection 1 (1) of the *Municipal Act, 2001*.
3. Causing work to be done on non-municipal property because of a person's failure to comply with any of the following:
   i. An Act, regulation or by-law.
   ii. An approval or order made under an Act, regulation or by-law.
   iii. An agreement made by the municipality under an Act, regulation or by-law.

Ownership by vesting under municipal tax law

2. The circumstances prescribed for the purposes of clause 168.13 (1) (b) of the Act are that the municipality or municipal representative has contravened section 27, 40 or 41 of the Act.

Notices of danger to health and safety (municipalities)

3. (1) The circumstances prescribed for giving notice under subsection 168.15 (1) or 168.15 (2) of the Act are that the municipality or municipal representative becomes aware that as a result of the presence or discharge of a contaminant on, in or under the property, there is a danger to the health or safety of any person.

(2) The notice must be given by speaking directly or by telephone with a provincial officer on duty at the Ministry's Spills Action Centre about the danger.

(3) The notice must be given within 24 hours after the municipality or municipal representative becomes aware of the danger.

PART II
SECURED CREDITORS

Secured creditor becoming owner by foreclosure

4. (1) The contravention by a secured creditor or secured creditor representative of a provision of the Act, a regulation under the Act, an approval, a certificate of property use, a licence or a permit is prescribed as a circumstance for the purposes of clause 168.18 (1) (b) of the Act, if the contravention occurred more than 90 days after the secured creditor became the owner of the property.

(2) In this section,

"approval" means a program approval, certificate of approval or provisional certificate of approval, or an approval under Part X of the Act;

"provision", in relation to an approval, licence or permit, includes a condition of the approval, licence or permit.

Notice of danger to health or safety (secured creditors)

5. (1) The circumstances prescribed for giving notice under subsection 168.21 (1) or 168.21 (2) of the Act are that the secured creditor or secured creditor representative becomes aware that as a result of the presence or discharge of a contaminant on, in or under the property, there is a danger to the health or safety of any person.

(2) The notice must be given by speaking directly or by telephone with a provincial officer on duty at the Ministry's Spills Action Centre about the danger.

(3) The notice must be given within 24 hours after the secured creditor or secured creditor representative becomes aware of the danger.

Reports of investigations of contaminants (secured creditors)

6. A secured creditor is exempt from the application of section 168.22 of the Act if,

(a) the request relates to a report that was not prepared by a secured creditor representative for the secured creditor;

(b) the secured creditor has not become the owner of the property to which the report relates by virtue of a foreclosure; and

(c) the secured creditor has not become a receiver in respect of the property to which the report relates.

PART III
RECEIVERS AND TRUSTEES IN BANKRUPTCY

Prescribed contraventions by receivers and trustees

7. (1) The contravention by a receiver, receiver representative, trustee in bankruptcy or trustee in bankruptcy representative of a provision of the Act, a regulation under the Act, an approval, a certificate of property use, a licence or a permit is prescribed as a circumstance for the purposes of clause 168.19 (1) (b) of the Act if,

(a) the contravention occurred more than 90 days after the receiver or trustee was appointed to take possession or control of the property or (if no appointment was made) actually took possession or control of the property; and

(b) the provision contravened does not relate to any of the following:

(i) the quantity, type or quality of any discharge of a contaminant (as defined in subsection 1 (1) of the Act) into the natural environment,

(ii) financial assurance (as defined in Part XII of the Act),

(iii) the decommissioning of works (as defined in Part XII of the Act) and associated environmental restoration.

(2) Without limiting subsection (1), the contravention by a receiver, receiver representative, trustee in bankruptcy or trustee in bankruptcy representative of a provision of an approval, a certificate of property use, a licence or a permit is prescribed as a circumstance for the purposes of clause 168.19 (1) (b) of the Act if,

(a) the approval, certificate, licence or permit was applied for by or on behalf of the receiver or trustee in bankruptcy; or

(b) the provision was included in the approval, certificate, licence or permit as a result of an amendment applied for by or on behalf of the receiver or trustee in bankruptcy.

(3) In this section,

"approval" means a program approval, certificate of approval or provisional certificate of approval, or an approval under Part X of the Act;

"provision", in relation to an approval, licence or permit, includes a condition of the approval, licence or permit.

Notice of abandonment etc. by receivers and trustees

8. (1) A notice under clause 19 (5) (a) or (b) or 168.20 (7) (a) or (b) of the Act must set out the following:

1. The name of the receiver or trustee in bankruptcy.
2. The date the receiver or trustee abandoned or disposed of the property, or released their interest in the property.
3. The municipal address of the property to which the notice relates or, if there is no such address, a legally sufficient description of the property.

(2) The notice must be given by fax or by a method described in subsection 182 (1) of the Act.

Notice of danger to health and safety (receivers and trustees)

9. (1) The circumstances prescribed for giving notice under subsection 168.21 (3) of the Act are that the receiver, trustee in bankruptcy, receiver representative or trustee in bankruptcy representative becomes aware that as a result of the presence or discharge of a contaminant on, in or under the property, there is a danger to the health or safety of any person.

(2) The notice must be given by speaking directly or by telephone with a provincial officer on duty at the Ministry's Spills Action Centre about the danger.

(3) The notice must be given within 24 hours after the receiver, trustee in bankruptcy, receiver representative or trustee in bankruptcy representative becomes aware of the danger.

PART IV
FIDUCIARIES

Notice of danger to health and safety (fiduciaries)

10. (1) The circumstances prescribed for giving notice under section 168.24 of the Act are that the fiduciary or fiduciary representative becomes aware that as a result of the presence or discharge of a contaminant on, in or under the property, there is a danger to the health or safety of any person.

(2) The notice must be given by speaking directly or by telephone with a provincial officer on duty at the Ministry's Spills Action Centre about the danger.

(3) The notice must be given within 24 hours after the fiduciary or representative becomes aware of the danger.

ENVIRONMENTAL PROTECTION ACT

ONTARIO REGULATION 153/04

RECORDS OF SITE CONDITION — PART XV.1 OF THE ACT

CONTENTS

PART I DEFINITIONS, INTERPRETATION AND APPLICATION	
1.	Definitions and application
2.	Unused property, most recent use
3.	Mixed use property, most sensitive use
PART II DEFINED PERSONS	
4.	Owner of property
5.	Qualified persons, other than risk assessment
6.	Qualified persons, risk assessment
6.1	Qualified persons, conflict of interest
6.2	Qualified persons as employee
7.	Qualified persons, insurance
PART III ENVIRONMENTAL SITE REGISTRY	
7.1	Additional purpose of Registry
8.	Contents public
9.	Notice to users
10.	Notice of order in Registry
PART IV CHANGE OF PROPERTY USE	
11.	Definitions for the Act, industrial, commercial, residential and parkland use
12.	Exemption, construction, s. 168.3.1 of the Act
13.	Exemptions, change of use, s. 168.3.1 (1) (a) of the Act
14.	Changes of use, s. 168.3.1 (1) (b) of the Act
15.	Exemption, change in use

PART V RECORDS OF SITE CONDITION	
16.	Records of site condition, requirements
16.1	Prescribed time for notice or acknowledgement
16.2	Prescribed defects
17.	Certification date
18.	Retention and storage of reports
19.	Transition, requirements for filing old records of site condition
20.	Past owners, immunity
21.	Soil Management
21.1	Transition
PART VI DEFINITIONS FOR AND INTERPRETATION OF PHASE ONE AND PHASE TWO ENVIRONMENTAL SITE ASSESSMENTS	
22.	Definitions and interpretation
PART VII PHASE ONE ENVIRONMENTAL SITE ASSESSMENTS	
23.	Phase one environmental site assessment, requirements
24.	Phase one environmental site assessment, general objectives
25.	Phase one environmental site assessment, components
26.	Responsibilities of qualified persons, general
27.	Responsibilities of qualified person, impediments
28.	Requirement that phase one site assessment report be based on current

	work
29.	Responsibilities of qualified person re reports and data
30.	Responsibilities of newly retained qualified person
31.	Transition
PART VIII PHASE TWO ENVIRONMENTAL SITE ASSESSMENTS	
32.	When phase two assessment required to file record of site condition
33.	Phase two environmental site assessments, requirements
33.1	Phase two environmental site assessments, general objectives
33.2	Phase two environmental site assessment, components
33.3	Responsibilities of qualified persons, general
33.4	Responsibilities of a qualified person, impediments
33.5	Requirement that phase two environmental site assessment report be based on current work
33.6	Responsibilities of qualified person re reports and data
33.7	Responsibilities of newly retained qualified person
33.8	Transition
PART IX SITE CONDITION STANDARDS AND RISK ASSESSMENTS	
SITE CONDITION STANDARDS	
34.	Full depth background site condition standards
35.	Non-potable and potable ground water conditions
36.	Full depth generic site condition
37.	Full depth generic site condition standards, non-potable ground water
38.	Stratified site condition standards, potable ground water
39.	Stratified site condition standards, non-potable ground water
40.	Stratified site condition standards not applicable to certain uses
41.	Site condition standards, environmentally sensitive areas
42.	Soil textures, applicable standards
43.	Applicable site condition standard: “N/A”, “N/V” or not listed
43.1	Site condition standards, shallow soil property or water body
RISK ASSESSMENTS	
44.	Risk assessment form
45.	Transition
46.	Time to respond to risk assessment
MEETING SITE CONDITION AND RISK ASSESSMENT STANDARDS	
47.	Analytical procedures
48.	Meeting standards
49.	Meeting petroleum hydrocarbon standards
PART X CERTIFICATES OF PROPERTY USE	
50.	Certificate of property use, notice
51.	Certificate of property use, prohibition on construction or use
PART XI NOTICES OF ORDERS	
51.1	Notice of an order
52.	Emergencies relating to old contaminants
53.	Exceptional circumstances,

	municipalities
54.	Exceptional circumstances, secured creditors, receivers and trustees in bankruptcy
PART XII SOIL	
55.	Soil brought from another property
Schedule A	Record of site condition
Schedule B	Transition notice
Schedule C	Risk assessments
Schedule D	Phase one environmental site assessments
Schedule E	Phase two environmental site assessments
Schedule F	Requirements for soil re paragraph 2 of subsection 55 (3) of the regulation

Part I Definitions, Interpretation and Application

Definitions and application

1. (1) In this Regulation, and in any document or provision of a document adopted by reference by this Regulation,

"area of natural significance" means any of the following:

1. An area reserved or set apart as a provincial park or conservation reserve under the *Provincial Parks and Conservation Reserves Act, 2006*.
2. An area of natural and scientific interest (life science or earth science) identified by the Ministry of Natural Resources as having provincial significance.
3. A wetland identified by the Ministry of Natural Resources as having provincial significance.
4. An area designated by a municipality in its official plan as environmentally significant, however expressed, including designations of areas as environmentally sensitive, as being of environmental concern and as being ecologically significant.
5. An area designated as an escarpment natural area or an escarpment protection area by the Niagara Escarpment Plan under the *Niagara Escarpment Planning and Development Act*.
6. An area identified by the Ministry of Natural Resources as significant habitat of a threatened or endangered species.
7. An area which is habitat of a species that is classified under section 7 of the *Endangered Species Act, 2007* as a threatened or endangered species.
8. Property within an area designated as a natural core area or natural linkage area within the area to which the Oak Ridges Moraine Conservation Plan under the *Oak Ridges Moraine Conservation Act, 2001* applies.
9. An area set apart as a wilderness area under the *Wilderness Areas Act*;

"areas of potential environmental concern" means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,

(a) identification of past or present uses on, in or under the phase one property, and

(b) identification of potentially contaminating activity;

"associated product" means any product of petroleum or any other liquid product used as a fuel, other than gasoline, wax and asphalt;

"bulk liquid dispensing facility" means premises at which solvents, gasoline or associated products are stored in one or more storage tanks and dispensed for sale;

"Cleanup Guideline 1996" means the Ministry publication entitled "Guideline for Use at Contaminated Sites in Ontario" originally dated June 1996 and later revised;

"contaminants of concern" means,

(a) one or more contaminants found on, in or under a property at a concentration that exceeds the applicable site condition standards for the property, or

(b) one or more contaminants found on, in or under a property for which no applicable site condition standard is prescribed under Part IX (Site Condition Standards and Risk Assessment) and which are associated with potentially contaminating activity;

"description", in reference to a description approved by the Surveyor General, means a plan of survey prepared, signed and sealed by a surveyor or a descriptive map of a property;

"dry cleaning equipment" means dry cleaning equipment as defined in Ontario Regulation 323/94 made under the Act;

"garage" means a place or premises where motor vehicles are received for maintenance or repairs for compensation;

"gasoline" means a product of petroleum that may include oxygenates and gasoline additives that has a flash point below 37.8°C, that is a liquid at standard temperature and pressure and that is designed for use in an engine;

"gasoline outlet" means any premises to which the public is invited, at which gasoline or an associated product is sold and is put into the fuel tanks of motor vehicles or floating motorized watercraft, or into portable containers;

"lawyer" means a person authorized under the *Law Society Act* to practise law in Ontario;

"medium" means soil, ground water or sediment;

"phase one property" means the property that is the subject of a phase one environmental site assessment;

"phase one study area" means the area that includes a phase one property, any other property that is located, wholly or partly, within 250 metres from the nearest point on a boundary of the phase one property and any property that the qualified person determines should be included as a part of the phase one study area under clause 3 (1) (a) of Schedule D;

"phase two property" means the property that is the subject of a phase two environmental site assessment;

"potentially contaminating activity" means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area;

"RA property" means a property that is the subject of a risk assessment;

"road" means the part of a common or public highway, street, avenue, parkway, square, place, bridge, viaduct or trestle that is improved, designed or ordinarily used for regular traffic and includes the shoulder;

"rock" means a naturally occurring aggregation of one or more naturally occurring minerals that is 2 millimetres or larger in size or that does not pass the US #10 sieve;

"RSC property", in relation to a record of site condition, means the property in respect of which the record of site condition is submitted for filing or is filed;

"sediment" means the soil, to a maximum depth of 0.15 metres, located at the base of a water body;

"sewage treatment facility" means that part of a sewage works as defined in the *Ontario Water Resources Act* that treats or disposes of sewage but does not include the part of the sewage works that collects or transmits sewage;

"site condition standards" means the full depth background site condition standards, full depth generic site condition standards and stratified site condition standards;

"soil" means, except for the purposes of shallow soil property as defined in section 43.1, unconsolidated naturally occurring mineral particles and other naturally occurring material resulting from the natural breakdown of rock or organic matter by physical, chemical or biological processes that are smaller than 2 millimetres in size or that pass the US #10 sieve;

"Soil, Ground Water and Sediment Standards" means the "Soil, Ground Water and Sediment Standards for Use under Part XV.1 of the *Environmental Protection Act*" published by the Ministry and dated April 15, 2011;

"solvent" means any volatile organic compound that is used as a cleaning agent, diluent, dissolver, thinner, or viscosity reducer, or for a similar purpose;

"subsurface soil" means soil that is more than 1.5 metres beneath the soil surface, including the bottom .5 metres of any non-soil surface treatment such as asphalt, concrete or aggregate above the soil surface, but excluding the thickness of any such non-soil surface treatment that is greater than .5 metres;

"surface soil" means soil that is no more than 1.5 metres beneath the soil surface, including the bottom .5 metres of any non-soil surface treatment such as asphalt, concrete or aggregate above the soil surface, but excluding the thickness of any such non-soil surface treatment that is greater than .5 metres;

"surveyor" means a person licensed under the *Surveyors Act* to practice cadastral surveying in Ontario;

"transition notice" means the notice referred to in paragraph 2 of subsection 168.4 (6) of the Act;

"waste disposal site", as used in this Regulation, means a waste disposal site as defined in section 25 of the Act;

"water body" means a permanent stream, river or similar watercourse or a pond or lake, but does not include a pond constructed on the property for the purpose of controlling surface water drainage;

"water treatment facility" means, in respect of a drinking water system that is a large municipal residential system or a small municipal residential system as defined in subsection 1 (1) of Ontario Regulation 170/03 made under the *Safe Drinking Water Act, 2002*, a facility that is used in relation to the treatment of water and includes any equipment related to the management of residue from the treatment process or the management of a substance into the natural environment from the system. O. Reg. 153/04, s. 1 (1); O. Reg. 366/05, s. 1; O. Reg. 511/09, s. 1 (1-3), (5, 6); O. Reg. 179/11, s. 1 (1).

(2) For the purposes of this Regulation, the following are the types of property uses:

1. Agricultural or other use.
2. Commercial use.
3. Community use.
4. Industrial use.
5. Institutional use.
6. Parkland use.
7. Residential use. O. Reg. 153/04, s. 1 (2).

(3) In this Regulation, in relation to a use of property,

"agricultural or other use" means,

(a) the use of land, or a building on the property for an agricultural purpose, including, but not limited to, animal husbandry, aquaculture, beekeeping, dairying, field crops, forestry, fruit farming, horticulture, market gardening, poultry raising and the operation of glass- or plastic-covered greenhouses, or

(b) any other use of land or a building on the property, other than a commercial use, community use, industrial use, institutional use, parkland use or residential use;

"commercial use" means any use of land or a building on the property for an enterprise or activity involving the exchange of goods or services, including the following uses:

1. Use as a hotel, motel, hostel or similar accommodation.
2. Use as an office building.
3. In respect of the classification of occupancies in Table 3.1.2.1. of Division B of Ontario Regulation 332/12 (Building Code) made under the *Building Code Act, 1992*, use that falls within,
   i. Group D, business and personal services occupancies, or
   ii. Group E, mercantile occupancies.

"community use" means use of land for a road or any of the following uses in a building on the property:

1. Use of a building for,
   i. indoor recreational activities,
   ii. travel purposes, such as use for a railway station or an airport passenger terminal, or like purposes,
   iii. an indoor gathering of people for civic, religious or social purposes.
2. In respect of the classification of occupancies in Table 3.1.2.1. of Division B of Ontario Regulation 332/12 (Building Code) made under the *Building Code Act, 1992*, use that falls within,
   i. Group A, Division 1, assembly occupancies intended for the production and viewing of the performing arts,
   ii. Group A, Division 3, assembly occupancies of the arena type, or
   iii. Group A, Division 4, assembly occupancies in which occupants are gathered in the open air and that is used for a stadium.
3. Use of a classroom in a building by a,
   i. a university that is authorized to operate pursuant to section 3 of the *Post-secondary Education Choice and Excellence Act, 2000*,
   ii. a college established under the *Ontario Colleges of Applied Arts and Technology Act, 2002*,
   iii. any other institution with authority to grant a degree or part of a degree under the *Post-secondary Education Choice and Excellence Act, 2000*,
   iv. a private career college as defined and approved under the *Private Career Colleges Act*;

"industrial use" means any of the following uses of land or of a building on the property:

1. Use for an enterprise or activity involving assembling, fabricating, manufacturing, processing, producing, storing, warehousing or distributing goods or raw materials.
2. In respect of the classification of occupancies in Table 3.1.2.1. of Division B of Ontario Regulation 332/12 (Building Code), use that falls within,
   i. Group F, Division 1, high hazard industrial occupancies,
   ii. Group F, Division 2, medium hazard industrial occupancies, or
   iii. Group F, Division 3, low hazard industrial occupancies.

3. Use for research or development in association with an enterprise or activity described in paragraph 1.
4. Use for the transportation of goods or people by railway or by airplane, but not including use for a gathering of people for travel purposes, such as use as a railway station or an airport passenger terminal.
5. Use as a waste disposal site as defined in section 25 of the Act, except a site for organic soil conditioning as defined in Regulation 347 of the Revised Regulations of Ontario, 1990 made under the Act.
6. Use in connection with sewage works described in subsection 53 (6.1) of the *Ontario Water Resources Act*.
7. Use for the production of oil or gas, or for mining or quarrying.
8. Use in connection with a water treatment facility.
9. Use in connection with a sewage treatment facility.
10. Use for the generation or transformation of electricity.
11. Use for the storage, maintenance, fuelling or repair of equipment, vehicles or material used to maintain transportation systems.
12. Use as a salvage yard, including an automobile wrecking yard or premises;

"institutional use" means any of the following uses of land or a building on the property:

1. Use as a day-care centre.
2. Use as a school as defined in the *Education Act*.
3. Use as a private school as defined in the *Education Act*;

"parkland use" means the use of land or a building on the property for,

(a) outdoor recreational activities, including use for a playground or a playing field,

(b) a day camp, an overnight camp or an overnight camping facility,

(c) an outdoor gathering of people for civic or social purposes, or

(d) in respect of the classification of occupancies in Table 3.1.2.1. of Division B of Ontario Regulation 332/12 (Building Code), use that falls within Group A, Division 4, assembly occupancies in which occupants are gathered in the open air other than use for a stadium;

"residential use" means any of the following uses of land or a building on the property:

1. Use as a home or mobile home, or as a residence not otherwise described in this definition, but not including use as a hotel, motel, hostel or similar accommodation.
2. In respect of the classification of occupancies in Table 3.1.2.1. of Division B of Ontario Regulation 332/12 (Building Code), use that falls within,
   i. Group B, Division 1, detention occupancies,
   ii. Group B, Division 2, care and treatment occupancies, or
   iii. Group B, Division 3, care occupancies.
3. Use as a health care facility as defined in Ontario Regulation 170/03 made under the *Safe Drinking Water Act, 2002*.

4. Use as a place of custody or detention for the purposes of the *Youth Criminal Justice Act* (Canada) or a correctional institution established or continued under section 14 of the *Ministry of Correctional Services Act*, whether the institution is operated or maintained by the Crown or any other person.
5. Use as a penitentiary as defined in the *Corrections and Conditional Release Act* (Canada) or as a prison as defined in the *Prisons and Reformatories Act* (Canada).
6. Use as a residence associated with any of the following:
   i. A university that is authorized to operate pursuant to section 3 of the *Post-secondary Education Choice and Excellence Act, 2000.*
   ii. A college established under the *Ontario Colleges of Applied Arts and Technology Act, 2002*.
   iii. Any other institution with authority to grant a degree or part of a degree under the *Post-secondary Education Choice and Excellence Act, 2000.*
   iv. A private career college as defined and approved under the *Private Career Colleges Act*. O. Reg. 153/04, s. 1 (3); O. Reg. 511/09, s. 1 (7, 10, 11, 13); O. Reg. 179/11, s. 1 (2, 3); O. Reg. 333/13, s. 1.

Unused property, most recent use

2. For the purposes of this Regulation, if property is unused, the property is deemed to have the type of property use to which the property was most recently put. O. Reg. 153/04, s. 2.

Mixed use property, most sensitive use

3. (1) If a property is used for more than one type of property use, the site condition standards that are applicable to the property are the standards that are applicable to the most sensitive type of property use. O. Reg. 153/04, s. 3 (1).

(2) The following rules apply in determining which type of property use is the most sensitive type of property use:

1. An agricultural or other use is the most sensitive of any type of property use.
2. A residential use, parkland use or institutional use is more sensitive than an industrial use, commercial use or community use. O. Reg. 153/04, s. 3 (2).

PART II
DEFINED PERSONS

Owner of property

4. For the purposes of Part XV.1 of the Act,

"owner", in relation to a record of site condition or risk assessment, includes a beneficial owner of or receiver in respect of the property for which the record of site condition is submitted for filing, is to be submitted for filing or is filed or for which the risk assessment is submitted. O. Reg. 511/09, s. 2.

Qualified persons, other than risk assessment

5. (1) A person referred to in subsection (2) meets the qualifications to be a qualified person for the purposes of,

(a) conducting or supervising a phase one environmental site assessment;

(b) conducting or supervising a phase two environmental site assessment; and

(c) completing the certifications that must be completed by a qualified person in a record of site condition in respect of a property. O. Reg. 66/08, s. 2.

(2) A person meets the qualifications to be a qualified person for the purposes of subsection (1) if,

(a) the person holds a licence, limited licence or temporary licence under the *Professional Engineers Act*; or

(b) the person holds a certificate of registration under the *Professional Geoscientists Act, 2000* and is a practising member, temporary member or limited member of the Association of Professional Geoscientists of Ontario. O. Reg. 66/08, s. 2.

Qualified persons, risk assessment

6. (1) A person meets the qualifications to be a qualified person for the purposes of section 168.1 of the Act in relation to the preparation or supervision of a risk assessment if,

(a) the person holds a bachelor's degree in science, engineering or applied technology from a post-secondary institution;

(b) the person has experience in the conduct or supervision of environmental site assessments, or in the conduct, supervision or review of assessment of risk described in clause (c), or in any combination of both, as follows:

(i) if the person holds a doctoral degree in science or engineering from a university, five years' experience,

(ii) if the person holds a master's degree in science or engineering from a university, seven years' experience,

(iii) in any other case, eight years' experience; and

(c) within the period of experience required by clause (b), the person has two years' experience,

(i) in the conduct or supervision of an assessment of risk, or

(ii) in the technical or scientific review of an assessment of risk on behalf of a public authority. O. Reg. 153/04, s. 6 (1).

(2) In this section,

"assessment of risk" means an assessment of human health risks and ecological risks associated with the presence or discharge of contaminants on, in or under property, and includes the preparation of a risk assessment or a site specific risk assessment under the Cleanup Guideline 1996;

"environmental site assessment" means an investigation in relation to land to determine the environmental condition of property, and includes a phase one environmental site assessment and a phase two environmental site assessment;

"university" means a university within or outside of Ontario. O. Reg. 153/04, s. 6 (2); O. Reg. 366/05, s. 2.

Qualified persons, conflict of interest

6.1 (1) No qualified person mentioned in section 5 or 6 shall, in respect of a RSC property or RA property in which the qualified person or his or her employer holds a direct or indirect interest,

(a) conduct or supervise a phase one or phase two environmental site assessment;

(b) complete the certifications that must be completed by a qualified person in a record of site condition in respect of a property; or

(c) prepare or supervise a risk assessment. O. Reg. 511/09, s. 3.

(2) Nothing in subsection (1) shall be construed so as to derogate from any obligations imposed on the qualified person under the *Professional Engineers Act* or the *Professional Geoscientists Act, 2000*. O. Reg. 511/09, s. 3.

Qualified persons as employee

6.2 (1) A qualified person mentioned in section 5 or 6 who is the employee, shareholder, director, partner or principal of a firm, company or partnership and who wishes to submit a record of site condition or risk assessment,

(a) shall file with the Director the document referred to in subsection (2), if the qualified person has not previously filed the document with the Director; and

(b) shall, within 12 months after filing the document with the Director under clause (a) and annually thereafter for as long as the qualified person remains an employee, shareholder, director, partner or principal of the firm, company or partnership, file the document referred to in subsection (2) with the Director. O. Reg. 511/09, s. 3.

(2) The document the qualified person who is the employee, shareholder, director, partner or principal of a firm, company or partnership shall file with the Director is,

(a) a copy of the Certificate of Status, in the case of a corporation incorporated under the *Business Corporations Act*; or

(b) an equivalent document in the case of any other type of corporation or of a firm or partnership. O. Reg. 511/09, s. 3.

(3) The document referred to in subsection (2),

(a) shall be dated no earlier than one month before the date on which the qualified person first submits a record of site condition or risk assessment, where the qualified person is submitting the document for the first time; and

(b) shall be dated no earlier than one month before the date on which the qualified person first submits a record of site condition or risk assessment during the 12-month period applicable to the qualified person submitting the document. O. Reg. 511/09, s. 3.

Qualified persons, insurance

7. (1) Subject to subsection (3), every qualified person mentioned in sections 5 and 6 shall maintain insurance coverage under an insurance policy that satisfies the requirements in subsection (2),

(a) at all times when the person,

(i) undertakes or supervises any work in their capacity as a qualified person, including any work associated with a phase one environmental site assessment, a phase two environmental site assessment or a risk assessment that is completed for the purposes of filing a record of site condition under section 168.4 of the Act, or

(ii) makes a statement required by this Regulation; and

(b) for a period of two years after the date the qualified person ceases to act in his or her capacity as a qualified person, including doing anything described in clause (a). O. Reg. 153/04, s. 7 (1).

(2) The insurance policy must satisfy the following criteria:

1. The policy shall indemnify the qualified person against liability imposed by law arising out of the performance of or the failure to perform any activity described in subsection (1) for claims whenever occurring that are first made and reported to the insurer during the period of insurance coverage.

2. The insurance policy shall, at a minimum, specify an indemnity limit of $1,000,000 per claim and $1,000,000 in the aggregate during the period of the insurance.

3. The insurance policy shall provide for the continuation of coverage if the insured is adjudged as bankrupt, insolvent, incompetent or dies during the period of insurance. O. Reg. 153/04, s. 7 (2); O. Reg. 366/05, s. 3 (1).

(3) This section does not apply to a qualified person who undertakes the work described in section 5 or 6 on behalf of his or her employer. O. Reg. 153/04, s. 7 (3); O. Reg. 511/09, s. 4.

(4) A qualified person shall be deemed to be maintaining the insurance coverage required by this section if his or her employer maintains an insurance policy that covers the activities of the qualified person in accordance with subsection (1) and the policy satisfies the requirements in subsection (2). O. Reg. 366/05, s. 3 (2).

PART III
ENVIRONMENTAL SITE REGISTRY

Additional purpose of Registry

7.1 For the purpose of paragraph 3 of subsection 168.3 (2) of the Act, the Registry has the purpose of facilitating public access to information respecting qualified persons. O. Reg. 66/08, s. 3.

Contents public

8. (1) The Director shall ensure that records of site condition, notices and other documents that are filed in the Registry are available for examination by the public. O. Reg. 153/04, s. 8 (1).

(2) If the Director becomes aware of a clerical, grammatical or typographical error in a record of site condition, notice or other document that has been filed in the Registry, the Director may cause the error to be corrected and the correction shall not require a new filing. O. Reg. 153/04, s. 8 (2).

(3) The Director may cause a record of site condition, notice, certificate of property use or other document that has been filed in the Registry to be updated to add new information and remove previous information and the change shall not require a new filing, if the Director becomes aware of, and the update relates to, a change to,

(a) a mailing address, fax number, postal code or e-mail address or a change in the mailing address, fax number, postal code or e-mail address of the owner of an RSC property who has submitted the record of site condition for filing or on whose behalf the record of site condition was submitted for filing;

(b) a municipal address or a change in the municipal address of an RSC property;

(c) a notice of a certificate of property use or an altered or revoked certificate of property use related to an RSC property; or

(d) the mailing address for an owner of the RSC property at the time the record of site condition was filed, other than an owner referenced in clause (a). O. Reg. 511/09, s. 5.

Notice to users

9. The Director shall ensure that the Registry contains a notice advising users of the Registry who have dealings with any property to consider conducting their own due diligence with respect to the environmental condition of the property, in addition to reviewing information in the Registry. O. Reg. 153/04, s. 9.

Notice of order in Registry

10. (1) The Director may require that the Registry contain notice of a certificate of property use issued, altered or revoked pursuant to section 168.6 of the Act, with respect to a property for which a record of site condition has been filed. O. Reg. 511/09, s. 6.

(2) REVOKED: O. Reg. 511/09, s. 6.

(3) The Director may require that the Registry contain notice of a proceeding commenced under the *Provincial Offences Act*, if the proceeding relates to a false or misleading statement made in a record of site condition or a risk assessment. O. Reg. 153/04, s. 10 (3).

(4) If the Director requires that a notice be contained in the Registry under this section and the circumstances giving rise to the notice no longer exist, the Director may require that the notice be withdrawn from the Registry. O. Reg. 153/04, s. 10 (4).

PART IV
CHANGE OF PROPERTY USE

Definitions for the Act, industrial, commercial, residential and parkland use

11. (1) For the purposes of section 168.3.1 of the Act, "industrial use", "commercial use", "residential use" and "parkland use", in relation to the use of property, have the meanings given by subsection 1 (3) of this Regulation. O. Reg. 153/04, s. 11 (1).

(2) For the purposes of the Act and this Regulation, a reference to a change in the use of a property does not include a reference to a change in the zoning of the property under a municipal by-law. O. Reg. 153/04, s. 11 (2).

Exemption, construction, s. 168.3.1 of the Act

12. Despite clause 168.3.1 (1) (c) of the Act, subsection 168.3.1 (1) of the Act does not apply to the issuance of a building permit under section 8 of the *Building Code Act, 1992* if the only construction authorized by the permit is,

(a) the removal of soil, rock or fill for the purpose of making an excavation; or

(b) the erection of a retaining structure or other structure,

(i) to support the sides of the excavation,

(ii) that are erected to assist in the conduct of an investigation in relation to property, or

(iii) for any other activity necessary for the purpose of filing a record of site condition. O. Reg. 153/04, s. 12.

Exemptions, change of use, s. 168.3.1 (1) (a) of the Act

13. (1) Despite clause 168.3.1 (1) (a) of the Act, a person may change the use of a property from a railway line to a trail used for recreational activities, subject to subsection (2). O. Reg. 153/04, s. 13 (1).

(2) Clause 168.3.1 (1) (a) of the Act applies to a change of use of a portion of a property described in subsection (1), if the use of the portion is changed to a playground, a playing field, a day camp, an overnight camp or an overnight camping facility, whether the use of the portion is for the use of trail users only or for the general public. O. Reg. 153/04, s. 13 (2).

(3) Despite clause 168.3.1 (1) (a) of the Act, a person may change the use of a property from a landfilling site that is subject to an environmental compliance approval to any property use. O. Reg. 153/04, s. 13 (3); O. Reg. 269/11, s. 1.

Changes of use, s. 168.3.1 (1) (b) of the Act

14. A person shall not change the use of property for the purposes of clause 168.3.1 (1) (b) of the Act in any of the following manners:

1. A change from an industrial use to an agricultural or other use or to an institutional use.
2. A change from an industrial use to more than one type of property use, including any or all of the following:
    i. Agricultural or other use.
    ii. Institutional use.
    iii. Parkland use.
    iv. Residential use.
3. If the property is used for an industrial use as well as any other type or types of property use, a change in the use of part or all of the property used for industrial use to any or all of the following types of property uses:
    i. Agricultural or other use.
    ii. Institutional use.
    iii. Parkland use.
    iv. Residential use.
4. A change from a commercial use to an agricultural or other use or to an institutional use.
5. A change from a commercial use to more than one type of property use including any or all of the following types of property use:
    i. Agricultural or other use.
    ii. Institutional use.
    iii. Parkland use.
    iv. Residential use.
6. If the property is used for a commercial use as well as any other type or types of property use, a change in the use of part or all of the property used for commercial use to any or all of the following types of property uses:
    i. Agricultural or other use.
    ii. Institutional use.
    iii. Parkland use.
    iv. Residential use.
7. A change from a community use to an agricultural or other use or to an institutional use, a parkland use or a residential use.
8. A change from a community use to more than one type of property use, including any or all of the following types of property use:
    i. Agricultural or other use.
    ii. Institutional use.
    iii. Parkland use.
    iv. Residential use.

9. If the property is used for a community use as well as any other type or types of property use, a change in the use of part or all of the property used for community use to any or all of the following types of property uses:
   i. Agricultural or other use.
   ii. Institutional use.
   iii. Parkland use.
   iv. Residential use.
10. A change from an industrial use, a commercial use or a community use, other than a community use described in subparagraphs i and ii, to a community use,
   i. that falls within the classification of occupancies in Group A of Table 3.1.2.1. of Division B of Ontario Regulation 332/12 (Building Code) made under the *Building Code Act, 1992*, and
   ii. that is an indoor swimming pool, an indoor ice rink, an indoor arena, an enclosed stadium, an indoor sports field or an indoor gymnasium. O. Reg. 153/04, s. 14; O. Reg. 179/11, s. 2; O. Reg. 333/13, s. 2.

Exemption, change in use

15. If a part of a building on a property is used for a residential use or institutional use and another part of the building is used for a commercial use, a community use or an industrial use, section 168.3.1 of the Act and section 14 do not apply to,

(a) a change in the use of the property that is substantially restricted to the part of the property where the building is located; or

(b) the construction of a building, if the building will be used in connection with a change in use described in clause (a). O. Reg. 153/04, s. 15.

PART V
RECORDS OF SITE CONDITION

Records of site condition, requirements

16. (1) A record of site condition shall be completed and submitted for filing in accordance with the requirements set out in Schedule A. O. Reg. 153/04, s. 16 (1); O. Reg. 511/09, s. 7 (1).

(2) Paragraph 4 of subsection 168.4 (2) of the Act does not apply to a record of site condition filed in respect of a property if a phase two environmental site assessment has not been conducted for the property. O. Reg. 153/04, s. 16 (2); O. Reg. 511/09, s. 7 (2).

(3) A transition notice shall be completed and filed in accordance with the requirements set out in Schedule B. O. Reg. 153/04, s. 16 (3).

Prescribed time for notice or acknowledgement

16.1 Thirty days, excluding holidays and Saturdays, is the time prescribed for the purposes of clause 168.4 (3) (b) of the Act. O. Reg. 511/09, s. 8.

Prescribed defects

16.2 (1) The following are prescribed defects for the purposes of clause 168.4 (3.3) (a) of the Act:

1. Failure to comply with a requirement of this Regulation for a phase one environmental site assessment or a phase two environmental site assessment.

2. Failure to comply with any requirement referred to in paragraph 1 because the manner in which the requirement is addressed fails to achieve the general or specific objectives of the assessment.

3. Failure to complete a record of site condition in accordance with the Act or this Regulation. O. Reg. 511/09, s. 8.

(2) The notice of a defect provided by the Director shall be of sufficient detail so as to alert the owner to the nature of the defect. O. Reg. 511/09, s. 8.

Certification date

17. (1) This section applies to the certification date of a record of site condition filed in the Registry under section 168.4 of the Act in relation to a property. O. Reg. 153/04, s. 17 (1).

(2) If a phase two environmental site assessment is not conducted for the property, the certification date is the day on which the qualified person forms the conclusion that the certifications made in the record of site condition are true. O. Reg. 153/04, s. 17 (2); O. Reg. 511/09, s. 9 (1).

(3) If a phase two environmental site assessment is conducted for the property, the certification date is the last day on which sampling was done that confirms that the property meets any applicable site condition standards, or any standard specified in a risk assessment, in relation to a contaminant. O. Reg. 153/04, s. 17 (3); O. Reg. 511/09, s. 9 (2).

(4) For the purposes of a record of site condition filed in the Registry under subsection 168.4 (6) of the Act, the certification date is the date set out in Part 5 (Affidavit of Principal Consultant) of the record of site condition that was acknowledged by the Ministry under the Cleanup Guideline 1996. O. Reg. 153/04, s. 17 (4).

Retention and storage of reports

18. (1) For the purposes of subsection 168.4 (5) of the Act, the prescribed period for the retention of a report is seven years after the date the record of site condition listing the report is filed in the Registry. O. Reg. 511/09, s. 10.

(2) Subsection (1) and subsection 168.4 (5) of the Act do not apply in respect of a qualified person if a qualified person takes all reasonable steps to ensure that a copy of the report is stored for the period referred to in subsection (1) in the offices of the firm, company or partnership where the qualified person was employed at the time when the record of site condition was completed. O. Reg. 511/09, s. 10.

Transition, requirements for filing old records of site condition

19. (1) The following are the requirements that an owner shall certify as having been complied with in the notice filed in the Registry for the purposes of paragraph 2 of subsection 168.4 (6) of the Act:

1. The property in respect of which the notice is to be filed is the same property or entirely within the property in respect of which the record of site condition was submitted to the Ministry.

2. A qualified person has certified to the owner that he or she has reviewed the following:

   i. A copy of the record of site condition that has been acknowledged as received by the Ministry under the Cleanup Guideline 1996.

   ii. The environmental reports listed in Part 2 of the record of site condition that was acknowledged by the Ministry under the Cleanup Guideline 1996.

3. The qualified person has made the following certifications to the owner on the basis of that review:

   i. The information in the record of site condition that was acknowledged by the Ministry under the Cleanup Guideline 1996 is consistent with the environmental reports listed in Part 2 of the record of site condition.

ii. The record of site condition was properly completed in accordance with the Cleanup Guideline 1996.

iii. At the time of the certification date, the record of site condition indicates that the property met the appropriate environmental site conditions for the land use specified in Part 3 of the record of site condition that was acknowledged by the Ministry under the Cleanup Guideline 1996. O. Reg. 153/04, s. 19 (1).

(2) This section and subsection 168.4 (6) of the Act do not apply if a detailed site assessment as referred to in section 8.2 of the Cleanup Guideline 1996, was not completed and, before the record of site condition was submitted to the Ministry, the property to which the record of site condition relates was,

(a) used at any time, in whole or in part, for an industrial use; or

(b) used at any time, in whole or in part, for any of the following commercial uses:

(i) As a garage.

(ii) As a bulk liquid dispensing facility, including a gasoline outlet.

(iii) For the operation of dry cleaning equipment. O. Reg. 153/04, s. 19 (2).

Past owners, immunity

20. (1) This section applies to a person who, before the certification date of a record of site condition filed in the Registry, owned the property for which the record of site condition was filed. O. Reg. 153/04, s. 20 (1).

(2) A person meets the requirements for the purposes of paragraph 4 of subsection 168.7 (1) of the Act if the person satisfies one of the following requirements:

1. The person sold the property to a purchaser pursuant to an agreement for the purchase and sale of land that included a condition, covenant or term that the purchaser would file a record of site condition for the property in the Registry under section 168.4 of the Act and the purchaser has filed a record of site condition for the property in the Registry.

1.1 The person sold the property to a purchaser pursuant to an agreement for the purchase and sale of land that included a condition, covenant or term that the purchaser would submit a record of site condition for filing in the Registry under section 168.4 of the Act and the filing of a record of site condition by the purchaser in respect of the property has been acknowledged by the Director under section 168.4 of the Act.

2. The person was the owner of the property at the time that a record of site condition in respect of the property was submitted to the Ministry pursuant to the Cleanup Guideline 1996, if the record of site condition was filed pursuant to subsection 168.4 (6) of the Act. O. Reg. 153/04, s. 20 (2); O. Reg. 511/09, s. 11 (1, 2).

(3) If an agreement mentioned in paragraph 1 of subsection (2) is made before the day subsection 6 (1) of Schedule 13 to the *Budget Measures and Interim Appropriation Act, 2007* comes into force, it is sufficient for the purpose of satisfying the requirement in that paragraph if the purchaser has submitted for filing a record of site condition in respect of the property that was the subject of the agreement and the filing of the record of site condition by the purchaser in respect of the property has been acknowledged by the Director under section 168.4 of the Act. O. Reg. 511/09, s. 11 (3).

Soil Management

21. (1) This section applies in relation to a property if a record of site condition has been filed in the Registry containing a certification under sub-subparagraph 4 i C of subsection 168.4 (1) of the Act by a

qualified person that the property meets the applicable stratified site condition standards for all prescribed contaminants subject to any exceptions specified by the qualified person. O. Reg. 511/09, s. 12.

(2) A person who owns or occupies the property, or a person who has charge, management or control of the property, shall ensure that surface soil and subsurface soil on, in or under the property meets the applicable stratified site condition standards for all prescribed contaminants subject to any exceptions specified by the qualified person in the certification referred to in subsection (1). O. Reg. 511/09, s. 12.

Transition

21.1 (1) This section applies to a record of site condition if,

(a) the record of site condition, together with the acknowledgment referred to in clause (d), is submitted for filing on a day that is later than the latest of the days referred to in subsections 32 (2) and (3) of Ontario Regulation 511/09, but is before January 1, 2013;

(b) a notice of receipt has been given pursuant to clause 168.4 (3) (a) of the Act with respect of the record of site condition before January 1, 2013;

(c) the owner of the property in respect of which the record of site condition is being submitted for filing has, before January 1, 2011, submitted a notice in the form approved by the Director; and

(d) the owner has received from the Ministry a written acknowledgment in the form approved by the Director of the notice referred to in clause (c). O. Reg. 511/09, s. 13; O. Reg. 245/10, s. 1 (1).

(2) The notice under clause (1) (c) shall,

(a) contain, in the language specified in the form of notice approved by the Director, either or both of, as applicable,

(i) a certification by the owner that a risk assessment with respect to a contaminant at the property has been submitted, together with the date of the submission and the number of the risk assessment, or

(ii) a certification by the owner that action to reduce the concentration of a contaminant on, in or under the property in order to meet a standard specified in a risk assessment accepted by the Director for the contaminant with respect to the property or, where none exists, the applicable site condition standard for the contaminant, has begun; and

(b) contain a certification by a qualified person with respect to the property in the following language:

A phase one environmental site assessment of the property, which includes the evaluation of the information gathered from a records review, site visit and interviews, has been conducted in accordance with the regulation by or under the supervision of a qualified person as required by the regulation. O. Reg. 245/10, s. 1 (2).

(3) This section applies to a risk assessment if,

(a) notice has been given under subclause (2) (a) (i) in respect of the risk assessment;

(b) a record of site condition to which this section applies contains a certification mentioned in subparagraph 4 ii of subsection 168.4 (1) of the Act in respect of the risk assessment; and

(c) the risk assessment has been accepted by the Director on or after July 1, 2011. O. Reg. 245/10, s. 1 (2).

(4) Where this section applies to a record of site condition or a risk assessment,

(a) the definition of "Soil, Ground Water and Sediment Standards" in subsection 1 (1), as it read immediately before the date on which subsection 1 (4) of Ontario Regulation 511/09 came into force, applies;

(b) sections 36, 37, and 41, as they read immediately before the date on which sections 16, 17 and 18 of Ontario Regulation 511/09 came into force, apply;

(c) section 43.1 and all references to section 43.1 do not apply; and

(d) all references to sections 36, 37 and 41 of the regulation are deemed to be references to sections 36, 37 and 41 as they read immediately before the date on which sections 16, 17 and 18 of Ontario Regulation 511/09 came into force. O. Reg. 245/10, s. 1 (2).

PART VI
DEFINITIONS FOR AND INTERPRETATION OF PHASE ONE AND PHASE TWO ENVIRONMENTAL SITE ASSESSMENTS

Definitions and interpretation

22. (1) In Parts VII and VIII and Schedules D and E,

"all reasonable inquiries" means review of current and historical sources of reasonably accessible information about a property to determine uses and occupancies of the property since the property's first developed use;

"building" means a building as defined in subsection 1 (1) of the *Building Code Act, 1992*;

"contaminant of potential concern" includes a contaminant identified as potentially present on, in or under a phase one property in a phase one environmental site assessment report;

"enhanced investigation property" means a property that is being used or has been used, in whole or in part, in a manner described in clause 32 (1) (b) to which subsection 32 (2) does not apply;

"first developed use" means the earlier of,

(a) the first use of a phase one property in or after 1875 that resulted in the development of a building or structure on the property, and

(b) the first potentially contaminating use or activity on the phase one property;

"monitoring well" means a well that is a test hole as defined in Regulation 903 of the Revised Regulations of Ontario 1990 (Wells) made under the *Ontario Water Resources Act*;

"PCB" means PCB as defined in Regulation 362 of the Revised Regulations of Ontario, 1990 (Waste Management — PCB's) made under the Act;

"PCB waste" means PCB waste as defined in Regulation 362 of the Revised Regulations of Ontario, 1990 (Waste Management — PCB's) made under the Act;

"record", when used as a noun, has the same meaning as "document" in subsection 1 (1) of the Act;

"site", when used in the phrase "site reconnaissance" means phase one study area;

"spill" means spill as defined in subsection 91 (1) of the Act, other than a spill of a pollutant comprised solely of odour;

"test hole" means a test hole as defined in Regulation 903 of the Revised Regulations of Ontario 1990 (Wells) made under the *Ontario Water Resources Act*;

"waste" means waste as defined in section 25 of the Act;

"waste generator" means a generator as defined in Regulation 347 of the Revised Regulations of Ontario, 1990 (General — Waste Management) made under the Act;

"waste receiver" means a receiver as defined in Regulation 347 of the Revised Regulations of Ontario, 1990 (General — Waste Management) made under the Act. O. Reg. 511/09, s. 14.

(2) For purposes of Parts VII and VIII and Schedules D and E, information is reasonably accessible if,

(a) the information is provided by an owner of a phase one property or other person to a qualified person or someone supervised by a qualified person;

(b) subject to subsection (3), the information is relevant to the environmental condition of a phase one property, including the objectives and requirements of a phase one environmental site assessment or phase two environmental site assessment of the property, and the information is within the possession or control of any of the owners of the property or any other person funding the phase one environmental site assessment;

(c) the information is publicly available; or

(d) the information is available from government sources through access to information legislation. O. Reg. 511/09, s. 14.

(3) For the purposes of clause (2) (b), it is sufficient if an owner of the phase one property or any person funding the phase one environmental assessment provides a written statement to the qualified person,

(a) stating that the information referred to in clause (2) (b) has been provided to the qualified person or someone supervised by the qualified person in respect of the phase one environmental site assessment;

(b) detailing the information provided;

(c) providing details of any other information of which the owner or person is aware; and

(d) stating that all the information referred to in clause (c) of which the owner or person is aware has been included in the statement. O. Reg. 511/09, s. 14.

(4) The provisions of the *Ontario Water Resources Act* and of Regulation 903 of the Revised Regulations of Ontario, 1990 (Wells) made under that Act, that would apply to a test hole but for section 1.1, and subsections 13 (2), 14.1 (2), 14.2 (3), 14.3 (2), 14.4 (4) and 14.5 (3) of that regulation, apply to a monitoring well installed for the purpose of,

(a) a phase one environmental site assessment; and

(b) a phase two environmental site assessment. O. Reg. 511/09, s. 14.

PART VII
PHASE ONE ENVIRONMENTAL SITE ASSESSMENTS

Phase one environmental site assessment, requirements

23. A phase one environmental site assessment shall be conducted in accordance with this Part and shall meet the requirements set out in Schedule D. O. Reg. 511/09, s. 14.

Phase one environmental site assessment, general objectives

24. The general objectives of a phase one environmental site assessment are to do the following:

1. To develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the phase one property.
2. To determine the need for a phase two environmental site assessment.

3. To provide a basis for carrying out any phase two environmental site assessment required.
4. To provide adequate preliminary information about environmental conditions in the land or water on, in or under the phase one property for the conduct of a risk assessment following completion of a phase two environmental site assessment. O. Reg. 511/09, s. 14.

Phase one environmental site assessment, components

25. Subject to section 31, a phase one environmental site assessment of a property shall include the following components:

1. A records review.
2. Interviews.
3. Site reconnaissance.
4. An evaluation of the information gathered from the records review, interviews and site reconnaissance.
5. A phase one environmental site assessment report.
6. The submission of the phase one environmental site assessment report to the owner of the phase one property. O. Reg. 511/09, s. 14.

Responsibilities of qualified persons, general

26. (1) A qualified person shall conduct or supervise a phase one environmental site assessment. O. Reg. 511/09, s. 14.

(2) Where this Regulation or Schedule D specifies that an aspect of a phase one environmental site assessment is to be conducted by a qualified person, a qualified person shall conduct that aspect of the assessment. O. Reg. 511/09, s. 14.

(3) In all cases, the qualified person shall ensure that the phase one environmental site assessment is conducted in accordance with this Part and meets the requirements of Schedule D. O. Reg. 511/09, s. 14.

Responsibilities of qualified person, impediments

27. (1) The qualified person shall identify physical impediments that interfere with or may limit the ability to conduct investigations or to meet any general or specific objectives, components or requirements of a phase one environmental site assessment. O. Reg. 511/09, s. 14.

(2) The qualified person shall ensure that no impediment precludes meeting the general or specific objectives, components or requirements of a phase one environmental site assessment. O. Reg. 511/09, s. 14.

(3) Denial of access to a qualified person, or someone supervised by a qualified person, to a structure or building or to any other part of the phase one property or any area under the phase one property, for any reason other than safety or inaccessibility, is an impediment that precludes meeting the general or specific objectives, components or requirements of a phase one environmental site assessment. O. Reg. 511/09, s. 14.

(4) The qualified person shall document the denial of access, where access to a structure or building or to any other part of the phase one property or any area under the phase one property is denied to the qualified person, or someone supervised by a qualified person, because of safety or inaccessibility. O. Reg. 511/09, s. 14.

Requirement that phase one site assessment report be based on current work

28. (1) A report may be used by a qualified person as a phase one environmental site assessment report in a record of site condition or used as a phase one environmental site assessment report in planning, conducting or supervising a phase two environmental site assessment, for the phase one property that is the subject of the report or an RSC property within it, if,

(a) the date the last work on all of the records review, interviews and site reconnaissance required for the phase one environmental site assessment that is the subject of the report was done is no later than 18 months before the submission of the record of site condition or the commencement of the phase two environmental site assessment;

(b) in the professional opinion of the qualified person, there is no new or materially changed area of potential environmental concern at the property;

(c) the phase one environmental site assessment meets all other requirements of this Part and Schedule D for a phase one environmental site assessment, including the requirements for a phase one environmental site assessment report;

(d) the report is a single document; and

(e) the report is the most recent document that meets the requirements of this Part and Schedule D for a phase one environmental site assessment report. O. Reg. 511/09, s. 14.

(2) If subsection (1) does not apply, the qualified person shall, before submitting the record of site condition or commencing the phase two environmental site assessment, update the phase one environmental site assessment by conducting or supervising such further portions of a phase one environmental site assessment as may be necessary to achieve,

(a) the general objectives in section 24; and

(b) the specific objectives and requirements for the components of the assessment set out in Schedule D. O. Reg. 511/09, s. 14.

(3) Subsection (1) applies to a report of an update undertaken pursuant to subsection (2), except clause (1) (d) does not apply and clauses (1) (c) and (e) apply with necessary modifications. O. Reg. 511/09, s. 14.

Responsibilities of qualified person re reports and data

29. The qualified person who is conducting or supervising the phase one environmental site assessment shall,

(a) use all reasonably accessible environmental site assessment reports and other reports and data, as appropriate, to conduct a phase one environmental site assessment; and

(b) document all reports and data consulted, and indicate what was used and how it was used in the phase one environmental site assessment. O. Reg. 511/09, s. 14.

Responsibilities of newly retained qualified person

30. (1) Where a qualified person retained by or on behalf of an owner who wishes to submit a record of site condition for filing is not the same qualified person who conducted or supervised the phase one environmental site assessment, the qualified person who has been retained with respect to the submission of the record of site condition for filing shall review the phase one environmental site assessment and any other material necessary to determine whether,

(a) the phase one environmental site assessment meets the requirements of this Part and Schedule D for a phase one environmental site assessment, including the requirements for a phase one environmental site assessment report;

(b) the phase one conceptual site model accurately reflects the environmental condition of the phase one property and any need for a phase two environmental site assessment; and

(c) there is no new or materially changed area of potential environmental concern at the phase one property. O. Reg. 511/09, s. 14.

(2) The qualified person referred to in subsection (1) shall, before submitting the record of site condition or commencing the phase two environmental site assessment, conduct or supervise such work on a phase one environmental site assessment as may be necessary, to achieve the general objectives in section 24 and the specific objectives and requirements for the components of the assessment set out in Schedule D, if the qualified person determines that,

(a) the phase one environmental site assessment conducted or supervised by another qualified person does not meet the requirements referred to in clause (1) (a);

(b) the phase one conceptual site model does not accurately reflect the environmental condition of the phase one property and any need for a phase two environmental site assessment; or

(c) there is a new or materially changed area of potential environmental concern at the phase one property. O. Reg. 511/09, s. 14.

(3) The work referred to in subsection (2) includes the conduct and supervision of all or part of a phase one environmental site assessment, the preparation of all or part of a phase one environmental site assessment report or update to the report and the preparation of any documentary components of the report, such as a phase one conceptual site model. O. Reg. 511/09, s. 14.

(4) Nothing in this section shall be construed so as to derogate from any obligations imposed on the qualified person under the *Professional Engineers Ac*t or the *Professional Geoscientists Act, 2000*. O. Reg. 511/09, s. 14.

Transition

31. (1) If, before October 1, 2004, a report was completed for the purposes of an initial site assessment as referred to in section 8.1 of the Cleanup Guideline 1996, the initial site assessment is deemed to be a phase one environmental site assessment for the purpose of section 168.1 of the Act if a qualified person reviews the report and certifies that the initial site assessment was completed in accordance with this Part, except clause 28 (1) (a). O. Reg. 511/09, s. 14.

(2) If, before October 1, 2004, an initial site assessment, as referred to in section 8.1 of the Cleanup Guideline 1996, was commenced, but not completed, the initial site assessment satisfies the requirements of this Regulation for a phase one environmental site assessment if,

(a) a qualified person certifies in writing in the phase one environmental assessment report required under section 25 that the components of the initial site assessment completed before this Regulation came into force meet the requirements of this Regulation, except clause 28 (1) (a), with respect to a phase one environmental site assessment, except that they were not conducted or supervised by a qualified person; and

(b) a phase one environmental site assessment is completed that consists of,

(i) a review by a qualified person of those components of the initial site assessment completed before October 1, 2004, and

(ii) the completion of those components required under this Part that were not completed before October 1, 2004. O. Reg. 511/09, s. 14.

PART VIII
PHASE TWO ENVIRONMENTAL SITE ASSESSMENTS

When phase two assessment required to file record of site condition

32. (1) For the purposes of submitting a record of site condition for filing under subsection 168.4 (1) of the Act in respect of a property, a phase two environmental site assessment is required,

(a) if during a phase one environmental site assessment of the property, a potentially contaminating activity is identified on, in or under the property; or

(b) if the property is used, or has ever been used, in whole or in part for an industrial use or for any of the following commercial uses,

(i) as a garage,

(ii) as a bulk liquid dispensing facility, including a gasoline outlet, or

(iii) for the operation of dry cleaning equipment. O. Reg. 511/09, s. 14.

(1.1) Clause (1) (a) does not apply if,

(a) a record of site condition has been filed in the Registry under section 168.4 of the Act with respect to the property;

(b) during the phase one environmental site assessment of the property referred to in clause (1) (a), there was no potentially contaminating activity on, in or under the property identified other than potentially contaminating activity identified in the phase one environmental site assessment report of the property which was listed in support of the record of site condition referred to in clause (a); and

(c) the qualified person conducting or supervising the phase one environmental site assessment referred to in clause (1) (a) determines there is no area of potential environmental concern. O. Reg. 179/11, s. 3.

(2) Clause (1) (b) does not apply if,

(a) the property is currently used for an agricultural or other use, or a community use, an institutional use, a parkland use or a residential use; and

(b) since the latest date on which the property stopped being used for any of the types of property uses described in clause (1) (b), a record of site condition has been filed in the Registry under section 168.4 of the Act for the use described in clause (a). O. Reg. 511/09, s. 14.

(3) Clause (1) (b) does not apply with respect to the part of a property that is being used or has ever been used,

(a) for quarrying to excavate consolidated or unconsolidated aggregate; or

(b) for that aspect of the production of oil and gas consisting of the presence of an oil well or gas well on, in or under the property. O. Reg. 511/09, s. 14.

Phase two environmental site assessments, requirements

33. A phase two environmental site assessment shall be conducted in accordance with this Part and shall meet the requirements set out in Schedule E. O. Reg. 511/09, s. 14.

Phase two environmental site assessments, general objectives

33.1 (1) The general objectives of a phase two environmental site assessment are to do the following:

1. To determine the location and concentration of contaminants in the land or water on, in or under the phase two property.

2. To obtain information about environmental conditions in the land or water on, in or under the phase two property necessary to undertake a risk assessment, in accordance with this Regulation, with respect to one or more contaminants of concern.

3. To determine if applicable site condition standards and standards specified in a risk assessment for contaminants on, in or under the phase two property were met as of the certification date. O. Reg. 511/09, s. 14.

(2) The qualified person shall ensure that the general objectives of a phase two environmental site assessment are achieved by,

(a) developing an understanding of the geological and hydrogeological conditions at the phase two property; and

(b) conducting one or more rounds of field sampling for all contaminants associated with any area of potential environmental concern identified in the phase two sampling and analysis plan and for any such contaminants identified during subsequent phase two activities and analyses of environmental conditions at the phase two property. O. Reg. 511/09, s. 14.

Phase two environmental site assessment, components

33.2 Subject to section 33.8, a phase two environmental site assessment shall include the following components:

1. The planning of a site investigation.

2. A site investigation.

3. A review and evaluation of the information gathered through the site investigation.

4. A phase two environmental site assessment report.

5. The submission of the phase two environmental site assessment report to the owner of the phase two property. O. Reg. 511/09, s. 14.

Responsibilities of qualified persons, general

33.3 (1) A qualified person shall conduct or supervise a phase two environmental site assessment. O. Reg. 511/09, s. 14.

(2) Where this Regulation or Schedule E specifies that an aspect of a phase two environmental site assessment is to be conducted by a qualified person, a qualified person shall conduct that aspect of the assessment. O. Reg. 511/09, s. 14.

(3) In all cases, the qualified person shall ensure that the phase two environmental site assessment is conducted in accordance with this Part and meets the requirements of Schedule E. O. Reg. 511/09, s. 14.

Responsibilities of a qualified person, impediments

33.4 (1) The qualified person shall identify physical impediments that interfere with or may limit the ability to conduct investigations, sampling or analyses or to meet any general or specific objectives, components or requirements of a phase two environmental site assessment. O. Reg. 511/09, s. 14.

(2) The qualified person shall ensure that no impediment precludes meeting the general or specific objectives, components or requirements of a phase two environmental site assessment. O. Reg. 511/09, s. 14.

(3) Denial of access to a qualified person, or someone supervised by a qualified person, to a structure or building or to any other part of the phase two property or any area under the phase two property, for any reason other than safety or inaccessibility, is an impediment that precludes meeting the general or

specific objectives, components or requirements of a phase two environmental site assessment. O. Reg. 511/09, s. 14.

(4) The qualified person shall document the denial of access, where access to a structure or building or to any other part of the phase two property or any area under the phase two property is denied to the qualified person, or someone supervised by a qualified person, because of safety or inaccessibility. O. Reg. 511/09, s. 14.

Requirement that phase two environmental site assessment report be based on current work

33.5 (1) A report may be used by a qualified person as a phase two environmental site assessment report in a record of site condition or used as a phase two environmental site assessment report in planning, conducting or supervising a risk assessment, for the phase two property that is the subject of the report or an RSC property within it, if,

(a) the date the last work on all of the planning the site investigation, conducting the site investigation and reviewing and evaluating the information gathered through the site investigation required for the phase two environmental site assessment that is the subject of the report was done is no later than 18 months before the submission of the record of site condition or the commencement of the risk assessment;

(b) in the professional opinion of the qualified person, there is no new or materially changed area of potential environmental concern at the property;

(c) the phase two environmental site assessment meets all other requirements of this Part and Schedule E for a phase two environmental site assessment, including the requirements for a phase two environmental site assessment report;

(d) the report is a single document; and

(e) the report is the most recent document that meets the requirements of this Part and Schedule E for a phase two environmental site assessment report. O. Reg. 511/09, s. 14.

(2) If subsection (1) does not apply, the qualified person shall, before submitting the record of site condition or commencing the risk assessment, update the phase two environmental site assessment by conducting or supervising such further portions of a phase two environmental site assessment as may be necessary to achieve,

(a) the general objectives in subsection 33.1 (1); and

(b) the specific objectives and requirements for the components of the assessment set out in Schedule E. O. Reg. 511/09, s. 14.

(3) Subsection (1) applies to a report of an update undertaken pursuant to subsection (2) except clause (1) (d) does not apply and clauses (1) (c) and (e) apply with necessary modifications. O. Reg. 511/09, s. 14.

Responsibilities of qualified person re reports and data

33.6 The qualified person who is conducting or supervising the phase two environmental site assessment shall,

(a) use all reasonably accessible environmental site assessment reports and other reports and data, as appropriate, to conduct a phase two environmental site assessment; and

(b) document all reports and data consulted, and indicate what was used and how it was used in the phase two environmental site assessment. O. Reg. 511/09, s. 14.

Responsibilities of newly retained qualified person

33.7 (1) Where a qualified person retained by or on behalf of an owner who wishes to submit a record of site condition for filing is not the same qualified person who conducted or supervised the phase two environmental site assessment, the qualified person who has been retained with respect to submission of the record of site condition for filing shall review the phase two environmental site assessment and any other material necessary to determine whether,

(a) the phase two environmental site assessment meets the requirements of this Part and Schedule E for a phase two environmental site assessment, including the requirements for a phase two environmental site assessment report;

(b) the phase two conceptual site model accurately reflects the environmental condition of the phase two property prior to any actions taken to reduce the concentration of contaminants; and

(c) there is no new or materially changed area of potential environmental concern at the phase two property. O. Reg. 511/09, s. 14.

(2) The qualified person referred to in subsection (1) shall, before submitting the record of site condition or commencing a risk assessment, conduct or supervise such work on a phase two environmental site assessment as may be necessary to achieve the general objectives in subsection 33.1 (1) and the specific objectives and requirements for the components of the assessment set out in Schedule E, if the qualified person determines that,

(a) the phase two environmental site assessment conducted or supervised by another qualified person does not meet the requirements referred to in clause (1) (a);

(b) the phase two conceptual site model does not accurately represent the environmental condition of the phase two property prior to any actions taken to reduce the concentration of contaminants; or

(c) there is a new or materially changed area of potential environmental concern at the phase one property. O. Reg. 511/09, s. 14.

(3) The work referred to in subsection (2) includes the conduct and supervision of all or part of a phase two environmental site assessment, the preparation of all or part of a phase two environmental site assessment report or update to the report and the preparation of any documentary components of the report, such as a phase two conceptual site model. O. Reg. 511/09, s. 14.

(4) Nothing in this section shall be construed so as to derogate from any obligations imposed on the qualified person under the *Professional Engineers Act* or the *Professional Geoscientists Act, 2000*. O. Reg. 511/09, s. 14.

Transition

33.8 (1) If, before October 1, 2004, a report was completed for the purposes of a detailed site assessment as referred to in section 8.2 of the Cleanup Guideline 1996, the detailed site assessment is deemed to be a phase two environmental site assessment for the purpose of section 168.1 of the Act if a qualified person reviews the report and certifies that the detailed site assessment was completed in accordance with this Part, except clause 33.5 (1) (a). O. Reg. 511/09, s. 14.

(2) If, before October 1, 2004, a detailed site assessment as referred to in section 8.2 of the Cleanup Guideline 1996 in respect of a property was commenced, but not completed, the detailed site assessment satisfies the requirements of this Regulation for a phase two environmental site assessment if,

(a) a qualified person certifies in writing in the phase two environmental assessment report required under section 33 that the components of the detailed site assessment completed before October 1, 2004 meet the requirements of this Regulation, except clause 33.5 (1) (a), with respect to a phase two environmental site assessment, except that they were not conducted or supervised by a qualified person; and

(b) a phase two environmental site assessment is completed that consists of,

(i) a review by a qualified person of those components of the detailed site assessment completed before October 1, 2004, and

(ii) the completion of those components required under this Part that were not completed by October 1, 2004. O. Reg. 511/09, s. 14.

PART IX
SITE CONDITION STANDARDS AND RISK ASSESSMENTS

SITE CONDITION STANDARDS

Full depth background site condition standards

34. (1) For the purpose of sub-subparagraph 4 i A of subsection 168.4 (1) of the Act, the prescribed contaminants and the full depth background site condition standards for those contaminants are those set out in Table 1 of the Soil, Ground Water and Sediment Standards. O. Reg. 153/04, s. 34 (1).

(2) The property meets the applicable full depth background site condition standards for the prescribed contaminants, in relation to the type of property use for which the record of site condition is filed, if the following criteria are satisfied:

1. In each of the following media that exist at the property, the concentration of the contaminants does not exceed the standards in relation to the medium for that type of property use set out in Table 1 of the Soil, Ground Water and Sediment Standards:
   i. Soil, not including sediment (if any).
   ii. Sediment.
2. If ground water sampling was carried out at the property as part of the phase two environmental site assessment, the concentration of the contaminants in the ground water does not exceed the standards in relation to ground water for that type of property use set out in Table 1 of the Soil, Ground Water and Sediment Standards. O. Reg. 153/04, s. 34 (2).

Non-potable and potable ground water conditions

35. (1) In this section,

"non-potable ground water site condition standards" means,

(a) the full depth generic site condition standards prescribed under section 37 in relation to the contaminants prescribed under that section, or

(b) the stratified site condition standards prescribed under section 39 in relation to the contaminants prescribed under that section;

"owner", in relation to a notice in respect of a property, includes a person authorized by the owner of the property to give or receive such a notice;

"potable ground water site condition standards" means,

(a) the full depth generic site condition standards prescribed under section 36 in relation to the contaminants prescribed under that section, or

(b) the stratified site condition standards prescribed under section 38 in relation to the contaminants prescribed under that section;

"well" means a hole made in the ground to locate or to obtain ground water which is used or intended for use as a source of water and includes a spring around or in which works are made or equipment is

installed for collection or transmission of water, but does not include a hole not used or intended for use as a source of water for agriculture or human consumption, such as,

(a) a hole solely intended to test or to obtain information in respect of ground water or an aquifer, or

(b) a hole solely made to lower or control the level of ground water in the area of the hole or to remove material that may be in the ground water. O. Reg. 153/04, s. 35 (1); O. Reg. 179/11, s. 4 (1).

(2) For the purposes of sub-subparagraphs 4 i B and C of subsection 168.4 (1) of the Act,

(a) the non-potable ground water site condition standards may be applied only if the circumstances described in subsection (3) exist; and

(b) the potable ground water site condition standards may be applied whether or not those circumstances exist. O. Reg. 153/04, s. 35 (2).

(3) The circumstances mentioned in subsection (2) are that,

(a) the property, and all other properties located, in whole or in part, within 250 metres of the boundaries of the property, are supplied by a municipal drinking water system, as defined in the *Safe Drinking Water Act, 2002*, and have no wells installed;

(b) the property is either,

(i) not located in an area designated in a municipal official plan as a well-head protection area or other designation identified by the municipality for the protection of ground water, or

(ii) if it is located in such a designated area, the municipality has consented in writing to the application of the non-potable ground water site condition standards in preparing a record of site condition for the property;

(c) the record of site condition does not specify agricultural or other use as the type of property use for which the record of site condition is filed;

(d) the owner has given the clerk of the local municipality, and of any upper-tier municipality, in which the property is located written notice of intention to apply the non-potable ground water site condition standards in preparing a record of site condition for the property; and

(e) within 30 days after receiving the notice described in clause (d),

(i) neither the local municipality nor the upper-tier municipality (if any) has given written notice (in this clause called a "notice of objection") to the owner that it objects to that application of the non-potable ground water site condition standards, or

(ii) a local or upper-tier municipality has given a notice of objection to the owner, and the municipality, at any time after giving the notice of objection, has withdrawn the objection and given written consent to the owner for the application of the non-potable ground water site condition standards. O. Reg. 153/04, s. 35 (3); O. Reg. 511/09, s. 15 (2); O. Reg. 179/11, s. 4 (2).

Full depth generic site condition standards, potable ground water

36. (1) This section prescribes the full depth generic site condition standards that may be applied by virtue of clause 35 (2) (b). O. Reg. 153/04, s. 36 (1).

(2) Subject to subsection (2.1), for the purpose of sub-subparagraph 4 i B of subsection 168.4 (1) of the Act, the prescribed contaminants and the applicable prescribed full depth generic site condition standards for those contaminants are those set out in Table 2 of the Soil, Ground Water and Sediment Standards. O. Reg. 153/04, s. 36 (2); O. Reg. 511/09, s. 16 (1).

(2.1) Subject to subsection (4), for the purposes of sub-subparagraph 4 i B of subsection 168.4 (1) of the Act, the prescribed contaminants and the applicable prescribed full depth generic site condition standards for those contaminants are,

(a) in the case of a property described in clause 43.1 (1) (a), those set out in Table 6 of the Soil, Ground Water and Sediment Standards; and

(b) in the case of a property described in clause 43.1 (1) (b), those set out in Table 8 of the Soil, Ground Water and Sediment Standards. O. Reg. 511/09, s. 16 (2).

(3) The property meets the applicable full depth generic site condition standards for the prescribed contaminants, in relation to the type of property use for which the record of site condition is filed, if the following criteria are satisfied:

1. In each of the following media that exist at the property, the concentration of the contaminants does not exceed the standards in relation to the medium for that type of property use set out in Table 2, Table 6 or Table 8, as the case may be, of the Soil, Ground Water and Sediment Standards:

   i. In the case of standards set out in Table 2 or Table 6, soil, not including sediment (if any).

   ii. In the case of standards set out in Table 8,

      A. soil, not including sediment (if any), and

      B. sediment.

2. If ground water sampling was carried out at the property as part of the phase two environmental site assessment, the concentration of the contaminants in the ground water does not exceed the standards in relation to ground water for that type of property use set out in Table 2, Table 6 or Table 8, as the case may be, of the Soil, Ground Water and Sediment Standards. O. Reg. 153/04, s. 36 (3); O. Reg. 511/09, s. 16 (3, 4).

(4) If each of clauses 43.1 (1) (a) and (b) apply to a property and the applicable full depth generic standard for a contaminant that is set out in Table 6 is different from the applicable full depth generic standard that is set out in Table 8, the applicable full depth generic standard for the contaminant is the standard that prescribes the lower concentration for the contaminant. O. Reg. 511/09, s. 16 (5).

Full depth generic site condition standards, non-potable ground water

37. (1) This section prescribes the full depth generic site condition standards that may be applied by virtue of clause 35 (2) (a). O. Reg. 153/04, s. 37 (1).

(2) Subject to subsection (2.1), for the purpose of sub-subparagraph 4 i B of subsection 168.4 (1) of the Act, the prescribed contaminants and the applicable full depth generic site condition standards for those contaminants are those set out in Table 3 of the Soil, Ground Water and Sediment Standards. O. Reg. 153/04, s. 37 (2); O. Reg. 511/09, s. 17 (1).

(2.1) Subject to subsection (4), for the purposes of sub-subparagraph 4 i B of subsection 168.4 (1) of the Act, the prescribed contaminants and the applicable full depth generic site condition standards for those contaminants are,

(a) in the case of a property described in clause 43.1 (1) (a), those set out in Table 7 of the Soil, Ground Water and Sediment Standards; and

(b) in the case of a property described in clause 43.1 (1) (b), those set out in Table 9 of the Soil, Ground Water and Sediment Standards. O. Reg. 511/09, s. 17 (2).

(3) The property meets the applicable full depth generic site condition standards for the prescribed contaminants, in relation to the type of property use for which the record of site condition is filed, if the following criteria are satisfied:

1. In each of the following media that exist at the property, the concentration of the contaminants does not exceed the standards in relation to the medium for that type of property use set out in Table 3, Table 7 or Table 9, as the case may be, of the Soil, Ground Water and Sediment Standards:
   i. In the case of standards set out in Table 3 or Table 7, soil, not including sediment (if any).
   ii. In the case of standards set out in Table 9,
      A. soil, not including sediment (if any), and
      B. sediment.
2. If ground water sampling was carried out at the property as part of the phase two environmental site assessment, the concentration of the contaminants in the ground water does not exceed the standards in relation to ground water for that type of property use set out in Table 3, Table 7 or Table 9, as the case may be, of the Soil, Ground Water and Sediment Standards. O. Reg. 153/04, s. 37 (3); O. Reg. 511/09, s. 17 (3, 4).

(4) If each of clauses 43.1 (1) (a) and (b) apply to a property and the applicable full depth generic standard for a contaminant that is set out in Table 7 is different from the applicable full depth generic standard that is set out in Table 9, the applicable full depth generic standard for the contaminant is the standard that prescribes the lower concentration for the contaminant. O. Reg. 511/09, s. 17 (5).

Stratified site condition standards, potable ground water

38. (1) This section prescribes the stratified site condition standards that may be applied by virtue of clause 35 (2) (b). O. Reg. 153/04, s. 38 (1).

(2) For the purpose of sub-subparagraph 4 i C of subsection 168.4 (1) of the Act, the prescribed contaminants and the applicable stratified site condition standards for those contaminants are as set out in Table 4 of the Soil, Ground Water and Sediment Standards. O. Reg. 153/04, s. 38 (2).

(3) The property meets the applicable stratified site condition standards for the prescribed contaminants, in relation to the type of property use for which the record of site condition is filed, if the following criteria are satisfied:

1. In each of the following media that exist at the property, the concentration of the contaminants does not exceed the standards in relation to the medium for that type of property use set out in Table 4 of the Soil, Ground Water and Sediment Standards:
   i. Surface soil, not including sediment (if any).
   ii. Subsurface soil, not including sediment (if any).
   iii. Sediment.
2. If ground water sampling was carried out at the property as part of the phase two environmental site assessment, the concentration of the contaminants in the ground water does not exceed the standards in relation to ground water for that type of property use set out in Table 4 of the Soil, Ground Water and Sediment Standards. O. Reg. 153/04, s. 38 (3).

Stratified site condition standards, non-potable ground water

39. (1) This section prescribes the stratified site condition standards that may be applied by virtue of clause 35 (2) (a). O. Reg. 153/04, s. 39 (1).

(2) For the purpose of sub-subparagraph 4 i C of subsection 168.4 (1) of the Act, the prescribed contaminants and the applicable stratified site condition standards for those contaminants are as set out in Table 5 of the Soil, Ground Water and Sediment Standards. O. Reg. 153/04, s. 39 (2).

(3) The property meets the applicable stratified site condition standards for the prescribed contaminants, in relation to the type of property use for which the record of site condition is filed, if the following criteria are satisfied:

1. In each of the following media that exist at the property, the concentration of the contaminants does not exceed the standards in relation to the medium for that type of property use set out in Table 5 of the Soil, Ground Water and Sediment Standards:
   i. Surface soil, not including sediment (if any).
   ii. Subsurface soil, not including sediment (if any).
   iii. Sediment.
2. If ground water sampling was carried out at the property as part of the phase two environmental site assessment, the concentration of the contaminants in the ground water does not exceed the standards in relation to ground water for that type of property use set out in Table 5 of the Soil, Ground Water and Sediment Standards. O. Reg. 153/04, s. 39 (3).

Stratified site condition standards not applicable to certain uses

40. The qualified person shall not use the applicable stratified site conditions standards pursuant to sub-subparagraph 4 i C of subsection 168.4 (1) of the Act in certifying the record of site condition for the purposes of paragraph 4 of subsection 168.4 (1) of the Act if agricultural or other use is specified under paragraph 3 of subsection 168.4 (2) of the Act as the type of property use for which the record of site condition is filed. O. Reg. 153/04, s. 40.

Site condition standards, environmentally sensitive areas

41. (1) This section applies in relation to a property if,

(a) the property is,
   (i) within an area of natural significance,
   (ii) includes or is adjacent to an area of natural significance or part of such an area, or
   (iii) includes land that is within 30 metres of an area of natural significance or part of such an area;

(b) the soil at the property has a pH value as follows:
   (i) for surface soil, less than 5 or greater than 9,
   (ii) for sub-surface soil, less than 5 or greater than 11; or

(c), (d) REVOKED: O. Reg. 511/09, s. 18 (3).

(e) a qualified person is of the opinion that, given the characteristics of the property and the certifications the qualified person would be required to make in a record of site condition in relation to the property as specified in Schedule A, it is appropriate to apply this section to the property. O. Reg. 153/04, s. 41 (1); O. Reg. 511/09, s. 18 (1-3).

(2) If this section applies, the qualified person shall not use the following standards in certifying the record of site condition for the purposes of paragraph 4 of subsection 168.4 (1) of the Act:

1. The applicable full-depth generic site condition standards pursuant to sub-subparagraph 4 i B of subsection 168.4 (1) of the Act.

2. The applicable stratified site condition standards pursuant to sub-subparagraph 4 i C of subsection 168.4 (1) of the Act. O. Reg. 153/04, s. 41 (2).

(3) REVOKED: O. Reg. 511/09, s. 18 (4).

Soil textures, applicable standards

42. (1) If, in respect of a contaminant, a cell in a table in the Soil, Ground Water and Sediment Standards sets one standard for coarse textured soil and another standard for medium and fine textured soil for the contaminant, the qualified person shall apply the following rules in determining which standard applies to a property for that contaminant:

1. If the qualified person determines that at least 1/3 of the soil at the property, measured by volume, consists of coarse textured soil, the qualified person shall apply the standard for coarse textured soil.

2. In any other case, the qualified person may apply the standard for medium and fine textured soil. O. Reg. 153/04, s. 42 (1).

(2) In this section,

"coarse textured soil" means soil that contains more than 50 per cent by mass of particles that are 75 micrometres or larger in mean diameter;

"medium and fine textured soil" means soil that contains 50 per cent or more by mass of particles that are smaller than 75 micrometres in mean diameter. O. Reg. 153/04, s. 42 (2); O. Reg. 511/09, s. 19.

Applicable site condition standard: "N/A", "N/V" or not listed

43. (1) If a cell in a table in the Soil, Ground Water and Sediment Standards indicates "N/A" or "N/V" in respect of a contaminant found in an environmental medium in relation to a type of property use, no applicable site condition standard is prescribed for that contaminant found in that environmental medium in relation to that type of property use. O. Reg. 153/04, s. 43 (1).

(2) In cases where a cell in a table in the Soil, Ground Water and Sediment Standards indicates "N/V" as referenced in subsection (1), if the contaminant is detected in the environmental medium on, in or under a property and is associated with potentially contaminating activity, the owner of the property may submit to the Director a new science risk assessment described in section 9 of Schedule C, if the owner or qualified person is of the opinion that a risk assessment is necessary in order to complete the certifications in a record of site condition prescribed by Schedule A. O. Reg. 511/09, s. 20.

(3) In cases where a contaminant is detected on, in or under a property and the contaminant is not listed in the table that sets out the applicable site conditions standards in the Soil, Ground Water and Sediment Standards and is associated with potentially contaminating activity, the owner of the property may submit to the Director a new science risk assessment described in section 9 of Schedule C, if the owner or qualified person is of the opinion that a risk assessment is necessary in order to complete the certifications in a record of site condition prescribed by Schedule A. O. Reg. 511/09, s. 20.

Site condition standards, shallow soil property or water body

43.1 (1) This section applies in relation to a property if,

(a) the property is a shallow soil property; or

(b) the property includes all or part of a water body or is adjacent to a water body or includes land that is within 30 metres of a water body. O. Reg. 511/09, s. 21.

(2) If this section applies, the qualified person shall not use the applicable stratified site condition standards pursuant to sub-subparagraph 4 i C of subsection 168.4 (1) of the Act in certifying the record

of site condition for the purposes of paragraph 4 of subsection 168.4 (1) of the Act. O. Reg. 511/09, s. 21.

(3) In this section,

"shallow soil property" means a property of which 1/3 or more of the area consists of soil equal to or less than 2 metres in depth beneath the soil surface, excluding any non-soil surface treatment such as asphalt, concrete or aggregate;

"soil" means, for the purposes of the definition of shallow soil property, unconsolidated naturally occurring mineral particles and other naturally occurring material resulting from the natural breakdown of rock or organic matter by physical, chemical or biological processes that are smaller than 2 millimetres in size or that pass the US #10 sieve, and includes a mixture of soil and rock if less than 50 per cent by mass of the mixture is rock. O. Reg. 511/09, s. 21.

RISK ASSESSMENTS

Risk assessment form

44. (1) Subject to subsection (2) and section 45, a risk assessment shall be prepared and submitted in accordance with Schedule C. O. Reg. 153/04, s. 44 (1).

(2) A site specific risk assessment of a property as referred to in the Cleanup Guideline 1996 that was commenced, but not completed, before this Regulation came into force satisfies the requirements of this Regulation if,

(a) in an appendix to the risk assessment report prepared and submitted in accordance with Schedule C, a qualified person certifies in writing that the components of the site specific risk assessment completed before this Regulation came into force meet the requirements of this Regulation with respect to a risk assessment, except that they were not completed by a qualified person; and

(b) a risk assessment is completed that consists of,

(i) a review by a qualified person of those components of the site specific risk assessment completed before this Regulation came into force, and

(ii) the completion of those components required under Schedule C that were not completed at the time this Regulation came into force. O. Reg. 153/04, s. 44 (2).

(3) A site specific risk assessment of a property as referred to in the Cleanup Guideline 1996 that was submitted to Ministry, but not approved by the Ministry under the Guideline before this Regulation came into force, satisfies the requirements of this Regulation, if the Director determines that the site specific risk assessment complies with the requirements specified in section 4 of Schedule C, except that the site specific risk assessment was not completed by a qualified person. O. Reg. 153/04, s. 44 (3).

Transition

45. (1) If a site specific risk assessment in respect of a property was completed and submitted to the Ministry under the Cleanup Guideline 1996 before this Regulation came into force and was approved by the Ministry under the Guideline, the approved site specific assessment is deemed to be a risk assessment that has been accepted by the Director under section 168.5 of the Act for the purposes of the Act and this Regulation. O. Reg. 153/04, s. 45 (1).

(2) The following provisions do not apply to a site specific risk assessment that is deemed to be a risk assessment under subsection (1), if the site specific risk assessment does not specify a standard with respect to a contaminant:

1. Sub-subparagraph 4 (ii) C of subsection 168.4 (1) of the Act.

2. Paragraph 3 of subsection 21 (2) of Schedule A.
3. Paragraph 3 of subsection 22 (2) of Schedule A.
4. Paragraph 3 of subsection 23 (2) of Schedule A.
5. Paragraph 3 of subsection 24 (2) of Schedule A.
6. Paragraph 3 of subsection 25 (2) of Schedule A. O. Reg. 153/04, s. 45 (2).

Time to respond to risk assessment

46. (1) The period of time prescribed for the purposes of subsection 168.5 (1) of the Act for notice to be given in relation to a risk assessment submitted by the owner to the Director is as follows:

1. In the case of a limited scope risk assessment described in section 7 of Schedule C or an estimation of natural local background concentration risk assessment described in section 8 of Schedule C, eight weeks after the date of submission.
2. In the case of a new science risk assessment described in section 9 of Schedule C or a wider area of abatement risk assessment described in section 10 of Schedule C, 22 weeks after the date of submission.
3. In any other case, 16 weeks after the date of submission. O. Reg. 153/04, s. 46 (1).

(2) If, at any time after the submission of a risk assessment report and before the Director has made a decision on the risk assessment under section 168.5 of the Act, the Director becomes aware of one of the following circumstances, the Director may notify the owner in writing of the circumstance:

1. The type of approach taken by the risk assessment is not appropriate given the circumstances of the contaminant and the property to which the risk assessment relates.
2. The content of the risk assessment report does not comply with a requirement specified in section 4 or 5 of Schedule C.
3. The risk assessment report does not contain sufficient data or information to support the conclusions reached in the report. O. Reg. 153/04, s. 46 (2).

(3) A notice under subsection (2) may request that the owner,

(a) revise and resubmit the risk assessment to the Director in accordance with the directions specified in the notice; or

(b) provide specified additional information for the risk assessment report by the date and time specified in the notice. O. Reg. 153/04, s. 46 (3).

(4) If the Director gives notice under clause (3) (a), the period of time for the purposes of subsection (1) shall commence on the date that the qualified person submits the revised risk assessment in accordance with the Director's notice. O. Reg. 153/04, s. 46 (4).

(5) If the Director gives notice under clause (3) (b), the period of time for the purposes of subsection (1) stops on the date the notice is issued and resumes on the date the information specified in the notice is provided to the Director. O. Reg. 153/04, s. 46 (5).

(6) At any time after an owner submits a risk assessment under subsection 168.5 of the Act to the Director, the owner may withdraw the risk assessment by giving written notice to the Director. O. Reg. 153/04, s. 46 (6).

MEETING SITE CONDITION AND RISK ASSESSMENT STANDARDS

Analytical procedures

47. (1) Where a qualified person takes a sample of sediment, soil or ground water from the land or water in, on or under a property for the purpose of analysing the sample for a contaminant as part of a phase one or phase two environmental site assessment or a risk assessment or for the purpose of indicating the maximum concentration of a contaminant in, on or under the property in a record of site condition, the qualified person shall ensure that,

(a) the samples are handled and stored in accordance with the Analytical Protocol;

(b) the collection and chain of custody of samples is carried out in accordance with the requirements in Part VIII and Schedule E;

(c) the analyses of the samples mentioned in clause (a) are carried out by a laboratory that,

(i) has been accredited in accordance with the International Standard ISO/IEC 17025 – General Requirement for the Competence of Testing and Calibration Laboratories, dated May 5, 2005, as amended from time to time, and

(ii) has been accredited in accordance with the standards, if standards for proficiency testing have been developed by the Standards Council of Canada, the Canadian Association for Laboratory Accreditation or another accreditation body accepted by the Director for a parameter set out in the Soil, Ground Water and Sediment Standards;

(d) the laboratory provides the certificate of analysis or analytical report referred to in subsection (2) prepared in accordance with the Analytical Protocol and the requirements of subsection (3); and

(e) the laboratory is not instructed to exclude, from an analytical report or certificate of analysis, any of the parameters which were analyzed. O. Reg. 511/09, s. 22.

(2) If a sample mentioned in subsection (1) is submitted by a qualified person to a laboratory for analysis for a contaminant, the laboratory shall,

(a) conduct the analysis for the contaminant in accordance with the Analytical Protocol; and

(b) give a certificate of analysis or analytical report to the qualified person that specifies the analytical method used for conducting the analysis for the contaminant. O. Reg. 511/09, s. 22.

(3) The certificate of analysis or analytical report referenced in clause (2) (b) shall contain a complete record of the submission and analysis, including all correspondence between the laboratory and the qualified person or anyone under the supervision and control of the qualified person with respect to the sample collection, chain of custody, handling and analysis including,

(a) the laboratory name, address, contact and phone number;

(b) client name, client contact, address and phone number;

(c) sample identification number for tracking purposes;

(d) sample type and location;

(e) sampling date;

(f) date the sample was received;

(g) date the sample was analyzed;

(h) method identification and method reference as specified in the Analytical Protocol;

(i) chemical parameter measured;

(j) reporting limits, including adjustment for sample size, moisture content or dilution factor;

(k) method specific quality assurance and quality control requirements as specified in the Analytical Protocol;

(l) authorization to release the certificate including,

(i) the name, function, and signature or equivalent of any person authorizing the release, and

(ii) a statement that the results relate only to the items tested and to all the items tested;

(m) certification that the data met all analytical requirements in the Analytical Protocol with, if applicable, a detailed description of and rationale for qualification for required exceptions; and

(n) all information recorded by the laboratory with respect to the condition of samples brought to the laboratory, including information recorded with respect to,

(i) sample quality, holding time, preservation and storage, and

(ii) sample containers. O. Reg. 511/09, s. 22.

(4) Despite subsection (2), the analysis of a sample for a contaminant may be conducted by a laboratory using a method other than a method specified in the Analytical Protocol if the laboratory obtains the written permission of the Director to use that analytical method for that contaminant. O. Reg. 511/09, s. 22.

(5) The qualified person mentioned in subsection (2) shall obtain from the laboratory mentioned in subsection (2) written confirmation that the laboratory has,

(a) conducted its analysis for a contaminant,

(i) in accordance with the Analytical Protocol, or

(ii) in accordance with an analytical method for which the laboratory has obtained the written permission of the Director under subsection (4); and

(b) provided an analytical report or certificate of analysis referred to in subsection (2) that has been prepared in accordance with the Analytical Protocol and the requirements of subsection (3). O. Reg. 511/09, s. 22.

(6) If an analysis has been undertaken pursuant to subsection (4), the provisions of clause (2) (b) and subsection (3) apply with necessary modifications to the reporting of the results of the analysis. O. Reg. 511/09, s. 22.

(7) In this section,

"Analytical Protocol", means the "Protocol for Analytical Methods Used in the Assessment of Properties under Part XV.1 of the *Environmental Protection Act*" published by the Ministry and dated March 9, 2004, as it may be amended from time to time. O. Reg. 511/09, s. 22.

Meeting standards

48. (1) For the purposes of section 168.4 of the Act and this Regulation, a property meets an applicable site condition standard or a standard specified for a contaminant in a risk assessment, if, subject to subsection (2), the standard is met at each sampling point from which a sample is taken in, on or under the property and in no other circumstances. O. Reg. 153/04, s. 48 (1).

(2) If two or more samples of soil or sediment are taken from sampling points at the same sampling location that are at the same depth in, on or under the property, the property meets a standard mentioned in subsection (1) if the average of the sampling results meets the standard and in no other circumstances. O. Reg. 153/04, s. 48 (2).

(2.1) Subsection (2) does not apply to allow, in the circumstances outlined in that subsection, compositing of samples of soil or sediment to be analysed for volatile contaminants, including volatile organic compounds. O. Reg. 511/09, s. 23.

(3) If, having regard to any phase one and phase two environmental site assessments for a property, a qualified person determines that an applicable site condition standard is exceeded at the property solely because a substance has been used on a highway for the purpose of keeping the highway safe for traffic under conditions of snow or ice or both, as provided for under section 2 of Regulation 339 of the Revised Regulations of Ontario, 1990 (Classes of Contaminants — Exemptions), the applicable site condition standard is deemed not to be exceeded for the purpose of Part XV.1 of the Act. O. Reg. 153/04, s. 48 (3).

(4) In this section,

"sampling location", means an area of the property that does not have a radius larger than two metres. O. Reg. 153/04, s. 48 (4).

Meeting petroleum hydrocarbon standards

49. (1) A property does not meet an applicable site condition standard in relation to a petroleum hydrocarbon unless the qualified person has determined that there is no evidence of free product, including but not limited to, any visible petroleum hydrocarbon film or sheen present in the ground water or surface water or in any ground water or surface water samples. O. Reg. 153/04, s. 49 (1).

(2) A property does not meet an applicable potable ground water site condition standard unless the qualified person has determined that there is no indication of objectionable petroleum hydrocarbon odour and taste associated with the ground water. O. Reg. 511/09, s. 24.

PART X
CERTIFICATES OF PROPERTY USE

Certificate of property use, notice

50. For the purposes of subsection 168.6 (5) of the Act, the following persons are prescribed to receive notice in relation to a certificate of property use:

1. A chief building official as defined in the *Building Code Act, 1992* of the municipality in which the property is located.
2. The clerk of the local municipality in which the property is located.
3. The clerk of any upper-tier municipality in which the property is located.
4. If the property is located in an area in which a board of health, planning board or conservation authority has jurisdiction under section 3.1 of the *Building Code Act, 1992*, in each of the following:
    i. The inspector appointed under that section who has the same powers and duties in relation to sewage systems as does the chief building official in respect of buildings.
    ii. The medical officer of health of the board of health, or the secretary-treasurer of the planning board or conservation authority. O. Reg. 153/04, s. 50.

Certificate of property use, prohibition on construction or use

51. Sections 8 and 10 of the *Building Code Act, 1992* are prescribed for the purposes of subsection 168.6 (6) of the Act. O. Reg. 153/04, s. 51.

PART XI
NOTICES OF ORDERS

Notice of an order

51.1 (1) For the purposes of subsection 168.7.2 (1) of the Act, a notice of an order shall set out the number and date of issue of the order. O. Reg. 511/09, s. 25 (2).

(2) For the purposes of subsection 168.7.2 (2) of the Act, notice of compliance shall set out the number and date of issue of the order and the date on which the Director was satisfied that the order had been complied with. O. Reg. 511/09, s. 25 (2).

Emergencies relating to old contaminants

52. (1) For the purpose of subsection 168.8 (5) of the Act, notice of an order shall set out the number and date of issue of the order. O. Reg. 153/04, s. 52 (1).

(2) For the purpose of subsection 168.8 (6) of the Act, notice of compliance with an order shall set out the number and date of issue of the order, and the date on which the Director became satisfied that the order has been complied with. O. Reg. 153/04, s. 52 (2).

Exceptional circumstances, municipalities

53. (1) For the purpose of subsection 168.14 (6) of the Act, notice of an order shall set out the number and date of issue of the order. O. Reg. 153/04, s. 53 (1).

(2) For the purpose of subsection 168.14 (7) of the Act, notice of compliance with an order shall set out the number and date of issue of the order, and the date on which the Director became satisfied that the order has been complied with. O. Reg. 153/04, s. 53 (2).

Exceptional circumstances, secured creditors, receivers and trustees in bankruptcy

54. (1) For the purpose of subsection 168.20 (9) of the Act, notice of an order shall set out the number and date of issue of the order. O. Reg. 153/04, s. 54 (1).

(2) For the purpose of subsection 168.20 (10) of the Act, notice of compliance with an order shall set out the number and date of issue of the order, and the date on which the Director became satisfied that the order has been complied with. O. Reg. 153/04, s. 54 (2).

PART XII
SOIL

Soil brought from another property

55. (1) Soil that did not originate at a RSC property may be brought from another property to a RSC property to remain there following the filing of a record of site condition only where the RSC property,

(a) is being used or has been used, in whole or in part, for one of the uses described in clause 32 (1) (b);

(b) is a property with respect to which a potentially contaminating activity on, in or under the property has been identified as occurring or having occurred;

(c) is not a property described in subsection 32 (2); and

(d) is a property with respect to which one or more contaminants of concern have been identified as present. O. Reg. 511/09, s. 27.

(2) Soil referred to in subsection (1) may only be brought to an RSC property referred to in subsection (1) where a qualified person has ensured in the course of the phase two environmental site assessment with respect to the RSC property that the requirements of Schedule E regarding soil brought to the phase two property have been met and the RSC property is the same as or within the phase two property. O. Reg. 511/09, s. 27.

(3) Despite subsection (1), soil that did not originate at a RSC property may be brought from another property to the RSC property to remain there following the filing of a record of site condition if either of the following circumstances apply:

1. A qualified person conducting or supervising the phase two environmental site assessment has determined that the soil meets the standards set out in Table 1 of the Soil, Ground Water and Sediment Standards with respect to all contaminants in the soil to be brought from the other property to the RSC property and the determination was made during the course of a phase two environmental site assessment and, with necessary modifications, in accordance with the provisions in Schedule E that apply to soil brought to the phase two property with respect to a RSC property described in subsection (1).
2. A qualified person has determined that a record of site condition may be submitted without a phase two environmental site assessment, the record of site condition is to be submitted or has been submitted and the qualified person who is conducting or supervising or has conducted or supervised the phase one environmental site assessment has determined in accordance with Schedule F that soil intended to be brought from the other property to the RSC property meets the standards set out in Table 1 of the Soil, Ground Water and Sediment Standards with respect to all contaminants in the soil to be brought from the other property to the RSC property. O. Reg. 511/09, s. 27.

(4) Soil that did not originate at a RSC property and that is brought from another property to a RSC property to remain at the RSC property following the filing of a record of site condition shall be used at the RSC property solely to backfill an excavation or for final grading. O. Reg. 511/09, s. 27.

SCHEDULE A
RECORD OF SITE CONDITION

PART I
INTERPRETATION AND APPLICATION

1. (1) In this Schedule,

"certification date", in relation to a record of site condition, means the certification date applicable to the record of site condition;

"RSC" means a record of site condition under Part XV.1 of the Act;

"RSC property", in relation to a record of site condition, means the property in respect of which the record of site condition is filed.

(2) The certifications, information and documents required by this Schedule are in addition to the information required under section 168.4 of the Act.

(3) For the purposes of this Schedule, when reference is made to information relevant to this RSC it includes reports prepared by or on behalf of any person, including a current or former owner of the property, containing information in respect of the environmental condition of all or part of a phase one or phase two property.

(4) Without limiting the generality of subsection (3), information relevant to this RSC includes the following:

1. Environmental site assessment reports.
2. Remediation reports.
3. Reports prepared in response to an order or request of the Ministry.

4. Any other reports relating to the presence of a contaminant on, in or under the phase one property or the existence of an area of potential environmental concern.

2. The RSC and documents included in the RSC shall be submitted for filing in a form acceptable to the Director and the Director may require that the RSC and documents be submitted for filing in an acceptable electronic form.

PART II
OWNER'S OBLIGATIONS

3. This Part applies to every RSC that is submitted for filing in respect of a property.

4. (1) The person who is submitting the RSC for filing in respect of the property shall ensure that the RSC contains the following information:

1. The name, mailing address, postal code and telephone number of the owner of the RSC property who is submitting the RSC for filing or is authorizing the submission of the RSC for filing.
2. The e-mail address and fax number, if any, of the owner of the RSC property who is submitting the RSC for filing or who is authorizing that another person submit the RSC for filing.
3. If the owner is a firm, company or partnership, the name of the person who is authorizing the filing on behalf of the firm, company or partnership.
4. The name and mailing address of any other current owner of the RSC property and, if the other owner is a firm, company or partnership, the name of a contact person for the other owner.

4.1 For the RSC property,

i. a legal description of the property and a list of its owners and a description of the nature of their interest and any municipal address, assessment roll number and property identifier number applicable to the property, prepared by a lawyer after reviewing a current plan of survey of the property that has been prepared, signed and sealed by a surveyor and all other necessary documents, and

ii. geographic coordinates of the centroid of the property measured using a Global Positioning System receiver and projected on the UTM grid coordinate system identifying easting, northing and zone based on NAD 83 datum.

5. The current type of use of the property and, if the owner intends to change the type of use of the property, the proposed type of use.
6. An indication of whether a certificate of property use has been issued under section 168.6 of the Act for the RSC property and if so, the certificate of property use number.

(2) Despite paragraph 4.1 of subsection (1), where the RSC property consists of land that is administered by the Ministry of Natural Resources under the *Public Lands Act*, a description approved by the Surveyor General may be used instead of a plan of survey.

5. (1) The person who is submitting the RSC for filing in respect of the property shall ensure that the following documents are contained in the RSC:

1. If the owner is a corporation, other than a municipal corporation that is a beneficial owner, a copy of the Certificate of Status in the case of a corporation incorporated or continued under the *Business Corporations Act* or an equivalent document in the case of any other corporation. The Certificate of Status or other document must be dated no earlier than one month before the RSC is submitted for filing.

2. If the owner is an entity other than a corporation or an individual, a copy of a document that is equivalent to the documents referred to in paragraph 1, dated no earlier than one month before the date on which the RSC is submitted for filing.
3. If the owner has authorized an agent to make the statements required under subsection 6 (1) on their behalf, proof in a form approved by the Director of the owner's authorization to make the statements and to sign the RSC on the owner's behalf.
4. REVOKED: O. Reg. 511/09, s. 28 (8).
5. If the owner is a receiver, proof of appointment as receiver, including any order, or proof that the receiver has taken possession or control of the property.
6. If the owner is not a receiver, a copy of any deed, transfer or other document by which the RSC property was in whole or part acquired by the owner, as determined by the lawyer providing the legal description required by paragraph 4.1 of subsection 4 (1), even if the deed, transfer or other document includes other property in addition to the RSC property.
7. A copy of a current plan of survey, prepared, signed and sealed by a surveyor showing,
   i. the RSC property,
   ii. any RA property within which the RSC property is located, and
   iii. the phase one property and any phase two property within which the RSC property is located.
8. REVOKED: O. Reg. 511/09, s. 28 (9).

(2) Where section 21.1 of the regulation applies to allow the use of the standards referred to in subsection 21.1 (4) of the regulation in the record of site condition and the owner of the property wishes to use such standards, the person who is submitting the RSC for filing in respect of the property shall ensure that the following documents are contained in the RSC:

1. A copy of the notice referred to in section 21.1 of the regulation.
2. A copy of the acknowledgment referred to in section 21.1 of the regulation.

(3) Paragraphs 1 and 2 of subsection (1) do not apply if the beneficial owner of the RSC property is the Queen in right of Ontario or in right of Canada.

(4) Paragraph 7 of subsection (1) does not apply where the RSC property consists of land that is administered by the Ministry of Natural Resources under the *Public Lands Act*, but a description approved by the Surveyor General showing the RSC property, any RA property within which the RSC property is located and the phase one property and any phase two property within which the RSC property is located shall be contained in the RSC.

6. (1) The person who is submitting the RSC for filing shall ensure that the owner of the RSC property or their agent signs and dates the RSC and makes the following statements in the RSC, in the language set out in this section, in relation to the part of the RSC that includes the information and statements required by this Part:

1. I acknowledge that the RSC will be submitted for filing in the Environmental Site Registry, that records of site condition that are filed in the Registry are available for examination by the public and that the Registry contains a notice advising users of the Registry who have dealings with any property to consider conducting their own due diligence with respect to the environmental condition of the property, in addition to reviewing information in the Registry.
2. I have conducted reasonable inquiries to obtain all information relevant to this RSC, including information from the other current owners of the RSC property named in this part of the RSC and I [*insert have or have not*] obtained all information relevant to this RSC of which I am aware.

3. I have disclosed all information referred to in paragraph 2 to any qualified person named in this RSC.

4. To my knowledge, the statements made in this part of the RSC are true as of [*insert date on which the owner or the owner's agent signs the RSC*].

5. I have ensured that access to the entire property, including the phase one property, any phase two property and the RSC property, has been afforded to the qualified person and to persons supervised by the qualified person, for purposes of conducting the site reconnaissance.

(2) If an agent makes the certifications on behalf of the owner under subsections (1), the agent shall make the following statement, using the language set out in this subsection:

I certify that I have been authorized by the owner of the RSC property to make the statements prescribed by this section on their behalf and that the owner of the RSC property has read and understands the statements being made on their behalf.

PART III
NO PHASE TWO ESA CONDUCTED

7. This Part applies to a RSC submitted for filing in respect of a property if a phase two environmental site assessment was not conducted for the property.

8. A qualified person shall complete, sign and date the part of the RSC that includes the information, certifications and statements required by this Part.

9. The qualified person shall provide in the RSC the following information:

1. Their name, mailing address, telephone number, e-mail address and fax number.

2. The name of the local municipality and of any upper-tier municipality in which the property is located.

10. The qualified person shall certify, in the language set out in this section, the following in the RSC:

1. A phase one environmental site assessment of the RSC property, which includes the evaluation of the information gathered from a records review, site reconnaissance, interviews, a report and any updates as required, has been conducted in accordance with the regulation by or under the supervision of a qualified person as required by the regulation.

2. As of [*insert the certification date*], no phase two environmental site assessment is required by the regulation for the RSC property and based on the phase one environmental site assessment for the RSC property, in my opinion, it is not necessary for any other reason to conduct a phase two environmental site assessment for the RSC property.

3. As of [*insert the certification date*], in my opinion, based on the phase one environmental site assessment, there is no evidence of any contaminants in the soil, ground water or sediment on, in or under the RSC property that, if the RSC property were put to any of the types of property uses listed in subsection 1 (2) of the regulation, are likely to interfere with any of those types of property uses.

11. The qualified person shall provide in the RSC the following information and documents:

1. The total area of the RSC property in hectares.

2. The title, author and date of the document used as the phase one environmental site assessment report in submitting the record of site condition for filing.

3. The RSC number of any previous RSC that has been filed in the Registry, if the previous RSC applies to any part of the RSC property.

4. The transition notice number of any previous transition notice that has been filed in the Registry, if the previous transition notice applies to any part of the RSC property.
5. A list of reports or other documents, other than the documents referred to in paragraph 2, setting out title, author and date, relied upon in certifying the information set out in section 10 or otherwise used in conducting the phase one environmental site assessment.
6. The table of current and past uses of the phase one property prepared during the phase one environmental site assessment.
7. The phase one conceptual site model prepared during the phase one environmental site assessment.
8. The date the last work on the records review, interviews and site reconnaissance components of the phase one environmental site assessment was done.
9. The document prepared pursuant to subsection 3 (3) of Schedule F, where Schedule F and paragraph 2 of subsection 55 (3) of the regulation apply to the RSC.

12. The qualified person shall, in the RSC, make, using the language set out in this section, the following statements in relation to the part of the RSC that includes the information, certifications and statements required by this Part:

1. I am a qualified person and have the qualifications required by section 5 of the regulation.
2. I have in place an insurance policy that satisfies the requirements of section 7 of the regulation.
3. I acknowledge that the RSC will be submitted for filing in the Environmental Site Registry, that records of site condition that are filed in the Registry are available for examination by the public and that the Registry contains a notice advising users of the Registry who have dealings with any property to consider conducting their own due diligence with respect to the environmental condition of the property, in addition to reviewing information in the Registry.
4. The opinions expressed in this RSC are engineering or scientific opinions made in accordance with generally accepted principles and practices as recognized by members of the environmental engineering or science profession or discipline practising at the same time and in the same or similar location.

4.1 I do not hold and have not held [*add, where the qualified person is employed – and my employer does not hold and has not held*] a direct or indirect interest in the RSC property or any property which includes the RSC property and was the subject of a phase one or two environmental site assessment or risk assessment upon which this record of site condition is based.

5. To the best of my knowledge, the certifications and statements in this part of the RSC are true as of [*insert certification date*].
6. By signing this RSC, I make no express or implied warranties or guarantees.

PART IV
PHASE TWO ESA CONDUCTED

General

13. This Part applies to a RSC submitted for filing in respect of a property if a phase two environmental site assessment was conducted for the property.

14. A qualified person shall complete, sign and date the part of the RSC that includes the information, certifications and statements required by this Part.

15. The qualified person shall provide in the RSC the following information and documents:

1. The name, mailing address, telephone number, e-mail address and fax number of the qualified person.
2. The date the last work on the planning of the site investigation and conducting the site investigation components of the phase two environmental site assessment was done.
3. The table of current and past uses of the phase one property prepared during the phase one environmental site assessment.
4. The phase two conceptual site model prepared during the phase two environmental site assessment.
5. The name of the laboratory used to analyze any samples collected of soil, ground water or sediment on, in or under the RSC property.

ENVIRONMENTAL SITE ASSESSMENTS AND RISK ASSESSMENTS

16. (1) The qualified person shall certify, in the language set out in paragraph 1, the following in the RSC:

1. A phase one environmental site assessment of the RSC property, which includes the evaluation of the information gathered from a records review, site reconnaissance, interviews, a report and any updates required, has been conducted in accordance with the regulation by or under the supervision of a qualified person as required by the regulation.

(2) REVOKED: O. Reg. 511/09, s. 28 (24).

17. The qualified person shall certify, in the language set out in this subsection, the following in the RSC:

1. A phase two environmental site assessment of the RSC property, which includes the evaluation of the information gathered from planning and conducting a site investigation, a report, and any updates required, has been conducted in accordance with the regulation by or under the supervision of a qualified person as required by the regulation.
2. The information represents the site conditions at the sampling points at the time of sampling only and the conditions between and beyond the sampling points may vary.
3. As of [*insert certification date*], in my opinion, based on the phase one environmental site assessment and the phase two environmental site assessment, and any confirmatory sampling, there is no evidence of any contaminants in the soil, ground water or sediment on, in or under the RSC property that would interfere with the type of property use to which the RSC property will be put, as specified in the RSC.

18. The qualified person shall provide in the RSC information and documents in respect of,

(a) the total area of the RSC property in hectares;

(b) REVOKED: O. Reg. 511/09, s. 28 (27).

(c) the RSC number of any previous RSC that has been filed in the Registry, if the previous RSC applies to any part of the RSC property;

(d) the transition notice number of any previous transition notice that has been filed in the Registry, if the previous transition notice applies to any part of the RSC property;

(e) if a risk assessment has been accepted by the Director in relation to the RSC property under section 168.5 of the Act, the identification number of the risk assessment;

(f) if a risk assessment has been conducted in relation to the RSC property, an indication of whether the risk assessment was a site specific risk assessment completed and approved in accordance with the Cleanup Guideline 1996.

SITE CONDITION STANDARDS

19. (1) The qualified person shall make a statement in the RSC as to which of the site condition standards has been applied to the RSC property and shall specify in the statement whether potable ground water site condition standards or non-potable site condition standards were applied to the RSC property.

(2) If non-potable ground water standards prescribed under section 37 or 39 of the regulation have been applied, the qualified person shall certify, in the language set out in this subsection, the following:

1. One of the following certifications:

   i. The owner of the property or a person authorized by the owner of the property has informed me that the owner of the property has, within the six months immediately before the submission of this record of site condition, given written notice of intention to apply non-potable ground water site condition standards to the clerk of the local municipality in which the property is located and the clerk of any upper-tier municipality in which the property is located.

   ii. I have, within the six months immediately before the submission of this record of site condition, given written notice of intention to apply non-potable ground water site condition standards to the clerk of the local municipality in which the property is located and the clerk of any upper-tier municipality in which the property is located.

2. The owner of the property has informed me that either,

   i. the owner did not receive a notice of objection from either the local municipality or the upper-tier municipality within 30 days of the local municipality or upper-tier municipality receiving the notice described in paragraph 1, or

   ii. after receiving a notice of objection from the municipality, the municipality has withdrawn its objection and given written consent to the application of non-potable ground water standards.

3. I did not receive a notice of objection from either the local municipality or the upper-tier municipality within 30 days of the municipality receiving the notice described in paragraph 1, or, after I received a notice of objection from the municipality, the municipality gave written consent to the application of non-potable ground water standards.

GROUND WATER SAMPLING

20. (1) Where ground water sampling at the RSC property is required, the qualified person shall certify in the RSC, in the language set out in this subsection, the following in relation to the RSC property:

1. Ground water sampling has been conducted in accordance with the regulation by or under the supervision of a qualified person as required by the regulation.

(2) Where ground water sampling at the RSC property is not required, the qualified person shall make a statement in the RSC as to whether ground water sampling has been carried out at the RSC property and, if not, the qualified person shall certify, in the language set out in this subsection, the following:

1. As of [*insert certification date*], in my opinion, based on the phase one and phase two environmental site assessments, and any confirmatory sampling, which included the sampling and

analysis of soil, it is not necessary to conduct sampling and analysis of ground water quality for the RSC property to make the certified statement set out in paragraph 3 of section 17 of Schedule A.

FULL DEPTH BACKGROUND SITE CONDITION STANDARDS

21. (1) The qualified person shall certify in the RSC, in the language set out in this subsection, the following in relation to the RSC property, if the full depth background site condition standards prescribed by section 34 of the regulation were applied to the RSC property:

1. As of [*insert certification date*], in my opinion, based on the phase one and phase two environmental site assessments and any confirmatory sampling, the RSC property meets the applicable full depth background site condition standards prescribed by section 34 of the regulation for all contaminants prescribed by the regulation in relation to the type of property use for which this RSC is filed, except for those contaminants (if any) specified in this RSC at [*insert Table number*].
2. As of [*insert certification date*], the maximum known concentration of each contaminant in soil, sediment and ground water at the RSC property for which sampling and analysis has been performed is specified in this RSC at [*insert Table number*].

(2) In addition to the information certified under subsection (1), the qualified person shall certify, in the language set out in this subsection, the following in the RSC, if there is any contaminant excepted from the certification mentioned in paragraph 1 of subsection (1) or if there is any other contaminant that in the opinion of the qualified person is likely to cause an adverse effect:

1. A risk assessment was prepared for the contaminant with respect to the property for which the phase two environmental site assessment was conducted.
2. The Director has accepted the risk assessment under clause 168.5 (1) (a) of the Act.
3. As of [*insert certification date*], the property for which the phase two environmental site assessment was conducted meets the standards specified in the risk assessment for the contaminant.

FULL DEPTH GENERIC SITE CONDITION STANDARDS, POTABLE GROUND WATER

22. (1) If the full depth generic site condition standards prescribed by section 36 of the regulation were applied to the RSC property, the qualified person shall certify in the RSC, in the language set out in this subsection, the following in relation to the RSC property:

1. As of [*insert certification date*], in my opinion, based on the phase one and phase two environmental site assessments and any confirmatory sampling, the RSC property meets the applicable full depth generic site condition standards prescribed by section 36 of the regulation for all contaminants prescribed by the regulation in relation to the type of property use for which this RSC is filed, except for those contaminants (if any) specified in this RSC at [*insert Table number*].
2. As of [*insert certification date*], the maximum known concentration of each contaminant in soil, sediment and ground water at the RSC property for which sampling and analysis has been performed is specified in this RSC at [*insert Table number*].

(2) In addition to the information certified under subsection (1), the qualified person shall certify, in the language set out in this subsection, the following in the RSC, if there is any contaminant excepted from the certification mentioned in paragraph 1 of subsection (1) or if there is any other contaminant that in the opinion of the qualified person is likely to cause an adverse effect:

1. A risk assessment was prepared for the contaminant with respect to the property for which the phase two environmental site assessment was conducted.

2. The Director has accepted the risk assessment under clause 168.5 (1) (a) of the Act.
3. As of [*insert certification date*], the property for which the phase two environmental site assessment was conducted meets the standards specified in the risk assessment for the contaminant.

FULL DEPTH GENERIC SITE CONDITION STANDARDS, NON-POTABLE GROUND WATER

23. (1) If the full depth generic site condition standards prescribed by section 37 of the regulation were applied to the RSC property, the qualified person shall certify in the RSC, in the language set out in this subsection, the following in relation to the RSC property:

1. As of [*insert certification date*], in my opinion, based on the phase one and phase two environmental site assessments and any confirmatory sampling, the RSC property meets the applicable full depth generic site condition standards prescribed by section 37 of the regulation for all contaminants prescribed by the regulation in relation to the type of property use for which this RSC is filed, except for those contaminants (if any) specified in this RSC at [*insert Table number*].
2. As of [*insert certification date*], the maximum known concentration of each contaminant in soil, sediment and ground water at the RSC property for which sampling and analysis has been performed is specified in this RSC at [*insert Table number*].

(2) In addition to the information certified under subsection (1), the qualified person shall certify, in the language set out in this subsection, the following in the RSC, if there is any contaminant excepted from the certification mentioned in paragraph 1 of subsection (1) or if there is any other contaminant that in the opinion of the qualified person is likely to cause an adverse effect:

1. A risk assessment was prepared for the contaminant with respect to the property for which the phase two environmental site assessment was conducted.
2. The Director has accepted the risk assessment under clause 168.5 (1) (a) of the Act.
3. As of [*insert certification date*], the property for which the phase two environmental site assessment was conducted meets the standards specified in the risk assessment for the contaminant.

STRATIFIED SITE CONDITION STANDARDS, POTABLE GROUND WATER

24. (1) If the stratified site condition standards prescribed by section 38 of the regulation were applied to the RSC property, the qualified person shall certify in the RSC, in the language set out in this subsection, the following in relation to the RSC property:

1. As of [*insert certification date*], in my opinion, based on the phase one and phase two environmental site assessments and any confirmatory sampling, the RSC property meets the applicable stratified site condition standards prescribed by section 38 of the regulation for all contaminants prescribed by the regulation in relation to the type of property use for which this RSC is filed, except for those contaminants (if any) specified in this RSC at [*insert Table number*].
2. As of [*insert certification date*], the maximum known concentration of each contaminant in soil, sediment and ground water at the RSC property for which sampling and analysis has been performed is specified in this RSC at [*insert Table number*].

(2) In addition to the information certified under subsection (1), the qualified person shall certify, in the language set out in this subsection, the following in the RSC, if there is any contaminant excepted from the certification mentioned in paragraph 1 of subsection (1) or if there is any other contaminant that in the opinion of the qualified person is likely to cause an adverse effect:

1. A risk assessment was prepared for the contaminant with respect to the property for which the phase two environmental site assessment was conducted.
2. The Director has accepted the risk assessment under clause 168.5 (1) (a) of the Act.
3. As of [*insert certification date*], the property for which the phase two environmental site assessment was conducted meets the standards specified in the risk assessment for the contaminant.

STRATIFIED SITE CONDITION STANDARDS, NON-POTABLE GROUND WATER

25. (1) If the stratified site condition standards prescribed by section 39 of the regulation were applied to the RSC property, the qualified person shall certify in the RSC, in the language set out in this subsection, the following in relation to the RSC property:

1. As of [*insert certification date*], in my opinion, based on the phase one and phase two environmental site assessments and any confirmatory sampling, the RSC property meets the applicable stratified site condition standards prescribed by section 39 of the regulation for all contaminants prescribed by the regulation in relation to the type of property use for which this RSC is filed, except for those contaminants (if any) specified in this RSC at [*insert Table number*].
2. As of [*insert certification date*], the maximum known concentration of each contaminant in soil, sediment and ground water at the RSC property for which sampling and analysis has been performed is specified in this RSC at [*insert Table number*].

(2) In addition to the information certified under subsection (1), the qualified person shall certify, in the language set out in this subsection, the following in the RSC, if there is any contaminant excepted from the certification mentioned in paragraph 1 of subsection (1) or if there is any other contaminant that in the opinion of the qualified person is likely to cause an adverse effect:

1. A risk assessment was prepared for the contaminant with respect to the property for which the phase two environmental site assessment was conducted.
2. The Director has accepted the risk assessment under clause 168.5 (1) (a) of the Act.
3. As of [*insert certification date*], the property for which the phase two environmental site assessment was conducted meets the standards specified in the risk assessment for the contaminant.

REPORTS AND OTHER DOCUMENTS

26. The qualified person shall provide the following:

1. The title, author and date of the document used as the phase two environmental site assessment report in submitting the record of site condition for filing.
2. A list of reports or other documents, other than the document referred to in paragraph 1, setting out title, author and date, relied upon in making any certifications in the RSC for the purposes of this Part or otherwise used in conducting the phase two environmental site assessment.

REMEDIAL ACTION AND MITIGATION

27. The qualified person shall provide a description of any soil removals or other action taken to reduce the concentration of contaminants on, in or under the RSC property for the purposes of submitting the RSC for filing, in accordance with sections 28 to 34.2.

28. (1) The qualified person shall identify the estimated quantities of the soil, if any, originating at and remaining on the RSC property that have been remediated, at a location either on or off the property, to reduce the concentration of contaminants in the soil.

(2) The qualified person shall report estimated soil quantities as measured in, or equivalent to, in-ground volume in cubic metres.

(3) In identifying the quantities of any soil for the purposes of subsection (1), the qualified person shall indicate the remediation process or processes used and the estimated amount of soil remediated by each identified process.

29. (1) The qualified person shall identify the estimated quantities of soil or sediment, if any, removed from and not returned to the RSC property.

(2) The qualified person shall report the estimated soil and sediment quantities as measured in, or equivalent to, the in-ground volume in cubic metres.

30. (1) The qualified person shall identify the estimated quantity of the soil, if any, being brought from another property to and deposited at the RSC property, not including any soil that may have originated at but been remediated off the RSC property and that is identified in section 28.

(2) The qualified person shall report the estimated soil quantity as measured in, or equivalent to, the in-ground volume in cubic metres.

31. The qualified person shall identify and describe any ground water control or treatment measures that,

(a) were required for the RSC property prior to the certification date for the purpose of submitting the RSC for filing; or

(b) are or will be required for the RSC property after the certification date.

32. The qualified person shall identify the estimated volume in litres of ground water, if any, removed from and not returned to the RSC property.

33. REVOKED: O. Reg. 179/11, s. 5.

34. Other than the activities identified in sections 28 to 33, the qualified person shall identify any constructed works that,

(a) prior to the certification date for the purpose of submitting the RSC for filing, were required to control or otherwise mitigate the release or movement of known existing contaminants at the RSC property; or

(b) after the certification date, are required to control or otherwise mitigate the release or movement of known existing contaminants at the RSC property.

34.1 (1) The qualified person shall indicate whether there are any monitoring requirements or any requirements for care, maintenance or replacement of any monitoring or control works for known existing contaminants, if any, on the RSC property, after the certification date.

(2) A qualified person who indicates that there are monitoring requirements or requirements for care, maintenance or replacement of any monitoring or control works shall indicate whether those requirements are ground water management measures or soil management measures.

34.2 The qualified person shall indicate if any soil, sediment or ground water at the RSC property that is or was located within 3 metres of the RSC property boundary has been remediated or removed for the purpose of remediation.

COVERING STATEMENTS

35. The qualified person shall make the following statements in the RSC, using the language set out in this section, in relation to the part of the RSC that includes the information, certifications and statements required by this Part:

1. I am a qualified person, as defined in section 168.1 of the Act and have the qualifications required by section 5 of the regulation.
2. I have in place an insurance policy that satisfies the requirements of section 7 of the regulation
3. I acknowledge the RSC will be submitted for filing in the Environmental Site Registry, that records of site condition that are filed in the Registry are available for examination by the public and that the Registry contains a notice advising users of the Registry who have dealings with any property to consider conducting their own due diligence with respect to the environmental condition of the property, in addition to reviewing information in the Registry.
4. The opinions expressed in this RSC are engineering or scientific opinions made in accordance with generally accepted principles and practices as recognized by members of the environmental engineering or science profession or discipline practising at the same time and in the same or similar location.

4.1 I do not hold and have not held [*add, where the qualified person is employed – and my employer does not hold and has not held*] a direct or indirect interest in the RSC property or any property which includes the RSC property and was the subject of a phase one or two environmental site assessment or risk assessment upon which this record of site condition is based.

5. To the best of my knowledge, the certifications and statements in this part of the RSC are true as of [*insert certification date*].
6. By signing this RSC, I make no express or implied warranties or guarantees.

O. Reg. 153/04, Sched. A; O. Reg. 366/05, s. 4; O. Reg. 511/09, s. 28; O. Reg. 245/10, s. 2; O. Reg. 179/11, s. 5.

SCHEDULE B
TRANSITION NOTICE

1. In this Schedule,

"RSC" means record of site condition referred to in subsection 168.4 (6) of the Act; and

"RSC property", in relation to a record of site condition, means the property in respect of which the record of site condition is filed.

2. The transition notice, the RSC and the documents specified in section 4 shall be filed in a form acceptable to the Director and the Director may require that the RSC and the documents be filed in an acceptable electronic form.

3. (1) The person who is filing the transition notice and the RSC shall provide the following information in the transition notice:

1. The name, mailing address, postal code and telephone number of the owner of the RSC property who is filing the RSC or who is authorizing the filing of the RSC.
2. The e-mail address and fax number, if any, of the owner of the RSC property who is filing the RSC or who is authorizing the filing of the RSC.
3. If the owner is a firm, company or partnership, the name of the person who is authorizing the filing on behalf of the firm, company or partnership.
4. The name and mailing address of any other current owner of the RSC property and, if the other owner is a firm, company or partnership, the name of a contact person for the other owner.

4.1 For the RSC property,

i. a legal description of the property, and a list of its owners and a description of the nature of their interest and any municipal address, assessment roll number and property identifier number applicable to the property, prepared by a lawyer after reviewing a current plan of survey of the property that has been prepared, signed and sealed by a surveyor and all other necessary documents, and

ii. geographic coordinates of the centroid of the property measured using a Global Positioning System receiver and projected on the UTM grid coordinate system identifying easting, northing and zone based on a NAD 83 datum.

5. The following information from Part 3 of the RSC that was submitted to the Ministry under the Cleanup Guideline 1996:

i. an indication of whether a Phase 2 ESA has been completed,

ii. an indication of the assessment or restoration approach used in relation to the RSC property,

iii. an indication of the type of land use for the RSC property, and

iv. an indication of the ground water condition for the RSC property.

6. The name, mailing address, telephone number, e-mail address and fax number of the qualified person on whom the owner relied in making the certification below.

7. If the qualified person is an employee of a corporation, the name of the corporation.

8. If the qualified person is an employee of a partnership or a member of a partnership, the name of the partnership.

9. The name of the local municipality and of any upper-tier municipality in which the property is located.

10. REVOKED: O. Reg. 511/09, s. 29 (2).

(2) Despite subparagraph 4.1 i of subsection (1), where the RSC property consists of land that is administered by the Ministry of Natural Resources under the *Public Lands Act*, a description approved by the Surveyor General may be provided instead of a plan of survey.

4. (1) The person who is filing the RSC in respect of the property shall provide the following documents:

1. If the owner is a corporation, other than a municipal corporation that is the beneficial owner, a copy of the Certificate of Status in the case of a corporation incorporated or continued under the *Business Corporations Act* or an equivalent document in the case of any other corporation. The Certificate of Status or other document must be dated no earlier than one month before the RSC is filed.

2. If the owner is an entity other than a corporation or an individual, a copy of a document that is equivalent to the documents referred to in paragraph 1, dated no earlier than one month before the date on which the RSC is filed.

3., 4. REVOKED: O. Reg. 511/09, s. 29 (4).

5. If the owner is a receiver, proof of appointment as receiver, including any order or proof that the receiver has taken possession or control of the property.

6. If the owner is not a receiver, a copy of any deed, transfer or other document by which the RSC property was in whole or part acquired by the owner, as determined by the lawyer providing the legal description required by subparagraph 4.1 i of subsection 3 (1), even if the deed, transfer or other document includes other property in addition to the RSC property.

7. A copy of a current plan of survey, prepared, signed and sealed by a surveyor showing and outlining,

i. the RSC property,

ii. any RA property within which the RSC property is located, and

iii. the phase one property and any phase two property within which the RSC property is located.

8., 9. REVOKED: O. Reg. 511/09, s. 29 (7)

(2) Paragraphs 1 and 2 of subsection (1) do not apply if the beneficial owner of the RSC property is the Queen in right of Ontario or in right of Canada.

(3) Paragraph 7 of subsection (1) does not apply where the RSC property consists of land that is administered by the Ministry of Natural Resources under the *Public Lands Act*, but a description approved by the Surveyor General showing the RSC property, any RA property within which the RSC property is located and the phase one property and any phase two property within which the RSC property is located shall be contained in the RSC.

5. The person who is filing the transition notice and the RSC shall make a statement in the transition notice either that,

(a) an order has been issued under the Act in respect of the property as a result of the approval by the Ministry of a site specific risk assessment completed in accordance with the Cleanup Guideline 1996; or

(b) an order has not been issued under the Act in respect of the property as a result of the approval by the Ministry of a site specific risk assessment completed in accordance with the Cleanup Guideline 1996.

6. (1) The person who is filing the transition notice and the RSC shall ensure that the owner of the RSC property or their agent signs and dates the transition notice and makes the following statements in the transition notice, using the language set out in this section:

1. I acknowledge that the RSC and the transition notice will be filed in the Environmental Site Registry, that the transition notices and records of site condition that are filed in the Registry are available for examination by the public and that the Registry contains a notice advising users of the Registry who have dealings with any property to consider conducting their own due diligence with respect to the environmental condition of the property, in addition to reviewing information in the Registry.

2. I certify that the property for which the transition notice and the record of site condition is being filed is the same property or is entirely within the property in respect of which the record of site condition was submitted to the Ministry pursuant to the Cleanup Guideline 1996 before subsection 168.4 (6) of the Act came into force.

3. I certify that I retained a qualified person, whose name appears in the transition notice, who made the following written certifications to me:

i. The qualified person has the qualification required by section 5 of the regulation.

ii. The qualified person has in place an insurance policy that satisfies the requirements of section 7 of the regulation.

iii. The qualified person reviewed all of the following:

A. A copy of the record of site condition that was submitted to the Ministry pursuant to the Cleanup Guideline 1996 before subsection 168.4 (6) of the Act came into force and that was acknowledged as received by the Ministry.

B. The environmental reports listed in Part 2 of that record of site condition.

iv. On the basis of the review described in subparagraph iii:

A. The information set out in the record of site condition is consistent with the environmental reports listed in Part 2 of the record of site condition.

B. The land use specified in Part 3 of the record of site condition is identified as one of agricultural, residential/parkland or industrial/commercial as set out in the Cleanup Guideline 1996.

C. The record of site condition was properly completed in accordance with the Cleanup Guideline 1996 and indicates that, as of the certification date, the property met the appropriate environmental site conditions for the land use specified in Part 3 of the record of site condition.

v. The opinions expressed by the qualified person to the owner or the owner's agent, as set out in the transition notice, are engineering or scientific opinions made in accordance with generally accepted principles and practices as recognized by members of the environmental engineering or science profession or discipline practising at the same time and in the same or similar location.

vi. The qualified person has acknowledged that the RSC and the transition notice will be filed in the Environmental Site Registry, that transition notices and records of site condition that are filed in the Registry are available for examination by the public and that the Registry contains a notice advising users of the Registry who have dealings with any property to consider conducting their own due diligence with respect to the environmental condition of the property, in addition to reviewing information in the Registry.

vii. In making the written certifications for the purposes of this transition notice, the qualified person makes no express or implied warranties or guarantees.

4. I certify that, to the best of my knowledge, the statements and certifications in this notice are true as of the date below.

(2) If the RSC is filed electronically, the owner or their agent shall certify that the RSC is an accurate representation of the record of site condition that was submitted to the Ministry pursuant to the Cleanup Guideline 1996.

(3) If an agent makes the certifications on behalf of the owner under subsections (1) and (2), the agent shall make the following statements, using the language set out in this subsection:

I certify that I have been authorized by the owner of the RSC property to make the statements prescribed by this section on their behalf and that the owner of the RSC property has read and understands the statements being made on their behalf.

O. Reg. 153/04, Sched. B; O. Reg. 366/05, s. 5; O. Reg. 511/09, s. 29; O. Reg. 245/10, s. 3.

SCHEDULE C
RISK ASSESSMENTS

PART I
MANDATORY REQUIREMENTS

Definitions

1. (1) In this Schedule,

"approved model" means the data file entitled "Modified Generic Risk Assessment Model" and dated October 19, 2009, as amended from time to time, that is maintained by the Ministry as part of its Brownfield initiative and is available on the Internet and may be available in such other manner as the Minister of the Environment considers appropriate;

"community assessment report" means a report that,

(a) has been prepared by a person referred to in section 6 of the regulation based on an assessment by such a person,

(b) is a report on the assessment of contaminants of concern on one or more properties,

(c) uses assumptions and models in order to propose intervention values for one or more of the contaminants referred to in clause (b),

(d) proposes intervention values in respect of one or more properties which were not the source of the contaminant,

(e) identifies the area within which properties to which the intervention values apply are located, and

(f) has been submitted to a Director pursuant to an order or a draft order under legislation administered by the Ministry;

Components of a risk assessment

2. (1) A risk assessment must include the following components:

1. The preparation and submission of a pre-submission form.

2. The conduct of an assessment of human health risk and of ecological risk.

3. The preparation of a written risk assessment report that includes a description of the assessments of risk described in paragraph 2.

(2) Paragraph 2 of subsection (1) does not apply to an estimation of natural local background concentration risk assessment that is described in section 8.

(3) The Director may require that the pre-submission form or the risk assessment report be in whole or in part submitted in an acceptable electronic form.

Mandatory requirements of a pre-submission form

3. (1) Before completing the written risk assessment report referred to in paragraph 3 of subsection 2 (1), the property owner shall submit a pre-submission form to the Ministry for comment on the proposed risk assessment approach.

(1.1) Despite subsection (1), in respect of a modified generic risk assessment that is described in section 7, the property owner shall submit the pre-submission form to the Ministry with the written risk assessment report referred to in paragraph 3 of subsection 2 (1).

(2) The pre-submission form shall be prepared by a qualified person in accordance with this section using the form approved by the Director.

(3) The qualified person shall prepare the pre-submission form based on the results of the phase one environmental site assessment, the phase two environmental site assessment and on any other information that the qualified person considers relevant.

(4) The pre-submission form must contain the information specified in subsections (5) to (11) and any other information required by the Director.

(5) The pre-submission form must include the following:

1. The name, mailing address, postal code and telephone number of the owner of the RA property who is responsible for the submission of the risk assessment.

1.1 The e-mail address and fax number, if any, of the owner of the RA property who is responsible for the submission of the risk assessment.

2. The name of a contact person for the owner, if the owner is a corporation or a partnership.

3. The name and mailing address of any other current owner of the RA property and, if the other owner is a corporation or partnership, the name of a contact person for the other owner.

4. For the RA property,

   i. a legal description of the property and a list of its owners and a description of the nature of their interest and any municipal address, assessment roll number and property identifier number applicable to the property, prepared by a lawyer after reviewing a current plan of survey of the property that has been prepared, signed and sealed by a surveyor and all other necessary documents, and

   ii. municipal address, assessment roll number and property identifier number, if any, applicable to the property.

5. The current type of use of the RA property and, if the owner intends to change the type of use of the property, the proposed type of use.

(5.1) Despite subparagraph 4 i of subsection (5), where the RA property consists of land that is administered by the Ministry of Natural Resources under the *Public Lands Act*, a description approved by the Surveyor General may be provided instead of a plan of survey.

(6) The pre-submission form must identify which of the following types of risk assessment approaches the qualified person intends to use for the risk assessment:

1. A limited scope risk assessment described in section 7.

2. An estimation of natural local background concentration risk assessment described in section 8.

3. A new science risk assessment described in section 9.

4. A wider area of abatement risk assessment described in section 10.

5. A standard risk assessment, which is a risk assessment that satisfies the requirements of section 4, but is not a risk assessment described in paragraphs 1 to 4.

(7) If the risk assessment will use one or more computer models in its preparation, the pre-submission form must identify which models.

(8) The pre-submission form must include information on the proposed conceptual site model that the qualified person intends to rely upon in the preparation of the parts of the risk assessment report described in Report Section 3 (Property Information, Site Plan and Geological Interpretation), Report Section 4 (Human Health Risk Assessment (HHRA)) and Report Section 5 (Ecological Risk Assessment (ERA)) of Table 1 of this Schedule including,

(a) a description and assessment of,

   (i) areas of potential environmental concern, and

   (ii) any subsurface structures and utilities on, in or under the RA property that may affect contaminant distribution and transport;

(a.1) a description of and, as appropriate, figures illustrating, the physical setting of a RA property and any areas under it including,

(i) stratigraphy from ground surface to the deepest aquifer or aquitard investigated,

(ii) hydrogeological characteristics, including aquifers, aquitards and, in each hydrostratigraphic unit where one or more contaminants is present at concentrations above the applicable site condition standards, lateral and vertical hydraulic gradients,

(iii) approximate depth to bedrock,

(iv) approximate depth to water table,

(v) any respect in which section 41 or 43.1 of the regulation applies to the property,

(vi) areas where soil has been brought from another property and placed on, in or under the RA property, and

(vii) approximate locations, if known, of any proposed buildings and other structures;

(a.2) where a contaminant is present on, in or under a RA property at a concentration greater than the applicable site condition standard, identification of,

(i) each area where a contaminant is present on, in or under a RA property at a concentration greater than the applicable site condition standard,

(ii) the contaminants associated with each of the areas referred to in subclause (i), and

(iii) each medium in which a contaminant associated with an area referred to in subclause (i) above is present;

(a.3) where a contaminant is present on, in or under a RA property at a concentration greater than the applicable site condition standard, a description of,

(i) what is known about each of the areas referred to in subclause (a.2) (i),

(ii) the distribution, in each of the areas referred to in subclause (a.2) (i), of each contaminant present in the area at a concentration greater than the applicable site condition standard, for each medium in which the contaminant is present, together with figures showing the distribution,

(iii) anything known about the reason for the discharge into the natural environment of the contaminants present on, in or under the RA property at a concentration greater than the applicable site condition standard,

(iv) anything known about migration away from any area of potential environmental concern of the contaminants present on, in or under the RA property at a concentration greater than the applicable site condition standard, including the identification of any preferential pathways,

(v) climatic or meteorological conditions that may have influenced distribution and migration of the contaminants, such as temporal fluctuations in ground water levels, and

(vi) if applicable, information concerning soil vapour intrusion of the contaminants into buildings including,

(A) relevant construction features of a building, such as a basement or crawl space,

(B) building heating, ventilating and air conditioning design and operation, and

(C) subsurface utilities;

(a.4) where contaminants on, in or under the RA property are present at concentrations greater than the applicable site condition standard, one or more cross-sections showing,

(i) the lateral and vertical distribution of a contaminant in each area where the contaminant is present at a concentration greater than the applicable site condition standard in soil, ground water and sediment,

(ii) approximate depth to water table in each area referred to in subclause (i),

(iii) stratigraphy from ground surface to the deepest aquifer or aquitard investigated, and

(iv) any subsurface structures and utilities that may affect contaminant distribution and transport in each area referred to in subclause (i);

(b) for each area where a contaminant is present on, in or under the RA property at a concentration greater than the applicable site condition standard for the contaminant, a diagram identifying, with narrative explanatory notes,

(i) the release mechanisms,

(ii) contaminant transport pathway,

(iii) the human and ecological receptors located on, in, under and off the RA property,

(iv) receptor exposure points, and

(v) routes of exposure;

(c) one or more diagrams, with explanatory notes, showing the biota and food web relationships on and off the RA property which may be affected by contaminants on, in or under the RA property.

(9) The diagrams that are part of the conceptual site model mentioned in clauses (8) (b) and (c), must be prepared,

(a) taking into consideration the specific property use to which the RA property will be put and that no measure has been taken or will be taken at the RA property which has the effect of reducing the risk from a contaminant on, in or under the RA property, including any non-soil surface treatment such as asphalt, concrete or aggregate which may have been or will be applied to the RA property; and

(b) identifying any measures that have been taken or may be proposed at the RA property which have the effect of reducing the risk from a contaminant of concern on, in or under the RA property, including any non-soil surface treatment such as asphalt, concrete or aggregate which may have been or will be applied to the RA property.

(10) In respect of an estimation of natural local background concentration risk assessment described in section 8,

(a) clauses (8) (b) and (c) and subsection (9) do not apply; and

(b) in addition to the information specified in clause (8) (a), the pre-submission form must also include information on the methods described in subsections 8 (4) to (9) that will be used to support the natural local background concentration soil standard that will be proposed under subsection 8 (1).

(11) The pre-submission form must include information about proposed public communication plans, if applicable.

(12) Except in respect of a modified generic risk assessment, the Director shall review the pre-submission form and may provide comments with respect to it to the owner of the property.

(13) If, at any time after submitting the pre-submission form,

(a) the qualified person who is identified in the pre-submission form as being responsible for the preparation of the risk assessment changes; or

(b) the owner mentioned who is identified in the pre-submission form changes,

the property owner shall give notice to the Director of the change in circumstance.

Mandatory requirements of risk assessment reports

4. (1) A risk assessment report shall be prepared by a qualified person and,

(a) must be divided into the report sections as specified in Table 1 of this Schedule; and

(b) must include the headings and sub-headings set out in Table1.

(2) A risk assessment report must address the minimum requirements set out in Table 1 of this Schedule.

(3) A qualified person may include report sections, headings and sub-headings in addition to those set out in Table 1 of this Schedule and other information in the risk assessment report.

(4) Report section 4 (Human Health Risk Assessment (HHRA)) and Report Section 5 (Ecological Risk Assessment (ERA)) of Table 1 of this Schedule do not apply to an estimation of natural local background concentration risk assessment described in section 8.

(5) If a risk assessment assumes that the ground water under the RA property does not or will not serve as a raw water supply for a drinking water system, as defined in the *Safe Drinking Water Act, 2002*, the owner shall give written notice to the clerk of the local municipality and of any upper-tier municipality where the property is located that,

(a) identifies the location of the RA property and the use to which it will be put;

(b) notifies the municipality that the qualified person intends to prepare a risk assessment in a manner that assumes that the ground water under the RA property does not or will not serve as a raw water supply for a drinking water system; and

(c) requests the municipality to respond to the notice and to indicate whether the municipality objects to the assumption being made under clause (b) and, if there is an objection, the reasons for it.

(6) A risk assessment report must have the following attached as appendices to the report:

1. The pre-submission form submitted under section 3, including all attached documents, the Ministry response and how Ministry concerns, if any, were addressed.
2. The resumes for the qualified person who prepared the risk assessment report and for the team technical leads.
3. A list of the documents relied upon in the preparation of the risk assessment report.
4. A summary of the phase one environmental site assessment and phase two environmental site assessment reports, including,
    i. justification for the sampling program used in undertaking the phase two environmental site assessment,
    ii. a summary of quality assurance and quality controls used for the sampling program and analysis of the samples,
    iii. an assessment of whether the sampling program is sufficient for the purposes of the risk assessment and if not, a description of what further site investigations were conducted to support the risk assessment, and
    iv. a rationale for and description of any hydrogeological and geological interpretations which differ from assumptions on which the Soil, Ground Water and Sediment Standards are based.

4.1 The appendix to the phase two environmental site assessment report that reports on requirements in a phase two environmental site assessment in support of a modified generic risk assessment.

4.2 The portion of the review and evaluation section of the phase two environmental site assessment report headed “phase two conceptual site model”.

5. A copy of any reports documenting further site investigations conducted to support the risk assessment, if applicable.

6. A copy of the written notice of intention to conduct a risk assessment that assumes a non-potable ground water condition in preparing a risk assessment for the property given under subsection (5), if applicable and a copy of any response the municipality has given to the notice.

7. If the risk assessment recommends a risk management measure that involves engineering or hydrogeological controls, an engineering or hydrogeological report prepared by a qualified person mentioned in clause 5 (2) (a) or (b) of the regulation that includes detailed plans and specifications of the engineering or hydrogeological controls or both.

(7) Paragraphs 1 and 7 of subsection (6) do not apply with respect to a risk assessment report prepared as part of a modified generic risk assessment described in section 7.

(8) Paragraph 7 of subsection (6) does not apply with respect to a risk assessment report prepared as part of a risk assessment based on a community assessment report described in section 7.

Mandatory certifications

5. (1) In an appendix to the risk assessment report, the qualified person shall certify the following, using the language set out in this section:

1. I have conducted or supervised a risk assessment report in accordance with the regulation.

2. I am a qualified person, as defined in section 168.1 of the Act, and have the qualifications required by section 6 of the regulation.

3. I have in place an insurance policy that satisfies the requirements of section 7 of the regulation.

4. The risk assessment team included members with expertise in all of the disciplines required to complete the risk assessment in accordance with the regulation.

5. The opinions expressed in the risk assessment are engineering or scientific opinions made in accordance with generally accepted principles and practices as recognized by members of the environmental engineering or science profession or discipline practising at the same time and in the same or similar location.

6. To the best of my knowledge, the certifications and statements in this risk assessment are true as of [*insert date of completion of risk assessment report*].

7. By making these certifications in this risk assessment report, I make no express or implied warranties or guarantees.

(2) In an appendix to the risk assessment report, the qualified person shall certify, in the language set out in this section, the following in relation to the RA property:

1. As of [*insert date of completion of risk assessment report*], it is my opinion that based on the phase one environmental site assessment and the phase two environmental site assessment and other relevant property information, the approach taken in the conduct of the risk assessment,

   i. is appropriate to evaluate human health and ecological risks from the contaminants of concern at the concentrations proposed as the standards specified in the risk assessment and assuming

no measures have been taken at the RA property which have the effect of reducing the risk from the contaminants, and

ii. is consistent with the approach set out in the pre-submission form with the exception of those deviations listed in Report Section 1 (Summary of Recommendations/Findings) of the report under the heading "Deviations from Pre-Submission Form".

2. As of [*insert date of completion of risk assessment report*], it is my opinion that, taking into consideration the assumptions specified in the risk assessment report, including the use of the property specified in Report Section 3 (Property Information, Site Plan and Geological Interpretation) of the risk assessment, and any risk management measures recommended in the report, as long as the RA property satisfies those assumptions and meets the standards specified in the risk assessment report, the contaminants of concern are unlikely to pose a human health or ecological risk greater than the level of risk that was intended in the development of the applicable full-depth site condition standards for those contaminants.

3. As of [*insert date of completion of risk assessment report*], it is my opinion that, (pick the applicable statement below),

i. no risk management plan is necessary for a contaminant of concern addressed in the risk assessment report to prevent, eliminate or ameliorate any adverse effect from that contaminant to the human or ecological receptors addressed in the report and located on the RA property, or

ii. the implementation of the risk management plan described in Report Section 7 (Risk Management Plan) of the risk assessment report is necessary for a contaminant of concern addressed in the risk assessment report to prevent, eliminate or ameliorate any adverse effect from that contaminant to the human or ecological receptors addressed in the report and located on the RA property and is sufficient to address the current and potential future transport and exposure pathways.

4. As of [*insert date of completion of risk assessment report*], the risk assessment report completely and accurately reflects the risk assessment assumptions and conclusions and all pertinent information has been included in the report and the appendices to the report.

(3) If, under the heading "Risk Characterization" in each of Report Section 4 (Human Health Risk Assessment (HHRA)) and Report Section 5 (Ecological Risk Assessment (ERA)) of the risk assessment report, the report concludes that the standards that are being proposed for the RA property are not likely to result in a concentration greater than the applicable full depth site condition standard for any of the human or ecological receptors that are addressed in the report and are located off the RA property, the qualified person shall certify, in the language set out in this subsection, the following in relation to the RA property and its impact on those receptors:

As of the submission date, it is my opinion that, taking into consideration the assumptions specified in the risk assessment report including any risk management measures recommended in the report, as long as the RA property satisfies those assumptions and meets the standards specified in the report, the applicable full depth site condition standards will likely be met at the nearest off-site ecological and human receptors identified in the report.

PART II
ALTERNATIVE RISK ASSESSMENT PROCEDURES

Alternative risk assessment procedures

6. Risk assessment procedures may be modified in accordance with this Part.

Limited scope risk assessment

7. (1) A risk assessment is a limited scope risk assessment in respect of a property if,

(a) it is either a risk assessment based on a community assessment report or a modified generic risk assessment; and

(b) sections 9 and 10 do not apply to the risk assessment.

(2) A risk assessment is a risk assessment based on a community assessment report if,

(a) the owner of the RA property, with respect to a contaminant that was assessed as part of and reported on in the community assessment report,

(i) relies on the models and assumptions used in the community assessment with respect to the contaminant, and

(ii) proposes one or more intervention values for contaminants set out in the community assessment report as a standard to be specified in the risk assessment;

(b) the RA property is within the study area of the assessment described in the community assessment report;

(c) the risk assessment uses the community assessment report in a manner that is appropriate to the characteristics of the RA property; and

(d) the District Office of the Ministry for the area in which the RA property is located has been consulted on the appropriateness of using a limited scope risk assessment based on the community assessment report.

(3) A risk assessment is a modified generic risk assessment if the risk assessment,

(a) uses the approved model in a manner that is appropriate to the characteristics of the RA property;

(b) is submitted in a template provided by the Ministry for use in submitting a modified generic risk assessment; and

(c) modifies an assumed value for an assumption, based on and in a manner consistent with the results of an assessment which meets the minimum requirements and objective for the assumption category associated with the assumption in each case where the risk assessment is to modify an assumed value for an assumption associated with an assumption category in Table 4 of Schedule E from the assumed value for the assumption used by the Ministry to develop the full depth generic site condition standards.

(4) A modified generic risk assessment shall not be submitted in respect of,

(a) a property to which section 41 of the regulation applies; or

(b) a property for which any risk management measure, other than any risk management measure designed and published by the Ministry for use in a modified generic risk assessment, is proposed in the risk assessment.

Estimation of natural local background concentrations

8. (1) Where full depth background site condition standards provided in Table 1 of the Soil Ground Water and Sediment Standards are not technologically achievable on a property because of naturally elevated local background concentrations or are not provided by Table 1, a property owner may propose a natural local background concentration soil standard for a contaminant of concern by undertaking a soil sampling and analysis program in accordance with this section.

(2) A natural local background concentration for a contaminant of concern proposed under subsection (1) is a standard specified in a risk assessment.

(3) A risk assessment is an estimation of natural local background concentration risk assessment if the natural local background concentration soil standard proposed under subsection (1) for a contaminant of concern,

(a) does not exceed the applicable full depth generic potable site condition standard provided in Table 2 of the Soil Ground Water and Sediment Standards; and

(b) was estimated using the method described in subsections (4) to (9).

(4) The property owner shall ensure that samples are collected in accordance with the following procedures:

1. Samples must be collected from not less than 30 separate sampling locations, distributed over at least 10 physically separate geographical settings, as described in paragraph 3, that are representative of the local geology.
2. From at least one sampling location in each geographical setting, a minimum of two samples must be taken from sampling points at that same sampling location.
3. The sampling locations must be in areas that have not been affected by local point sources of air or land pollution, by local roads or highways or by other known sources of contaminant. The sampling locations may be in rural (agricultural property use) or urban (all other property uses) settings in Ontario. Suitable geographical settings include parks, cemeteries, forests, wood lots or large undeveloped tracks of land.
4. Subsections 48 (2) and (4) of the regulation apply with necessary modifications to samples collected under this subsection.

(5) Despite subsection (4), in areas of known, widespread soil contamination, where it is not possible to avoid the influence of historical industrial emissions to soil surfaces, the sampling program may still be undertaken if,

(a) it is designed to determine the change in contaminant of concern concentration as it varies with increased depth from the surface; and

(b) the use of this sampling program approach can be justified.

(6) The sampling and analysis program shall be used to establish the 90th percentile of the concentration of the contaminants of concern present in the soil.

(7) The value established in accordance with subsection (6) is the natural local background concentration soil standard for that contaminant of concern at that property that shall be proposed under subsection (1).

(8) If the concentration of contaminants of concern show large variability, increased replicate sampling (that is, more than two replicate samples) and averaging the analytical results from the replicate sampling may be used to establish the 90th percentile.

(9) Despite subsections (4) to (8), existing geological summary data may also be used to estimate the natural local background concentrations in place of sampling data to support the soil standard proposal under subsection (1), if, in the opinion of the Director, the sampling method used to obtain the data provides data at least as accurate as the estimates that would be provided by the sampling method set out in subsection (4).

New science risk assessment

9. (1) A risk assessment is a new science risk assessment if the risk assessment satisfies one or more of the conditions set out in this section.

(2) A risk assessment is a new science risk assessment if a contaminant of concern is identified during a phase two environmental site assessment for which there is no applicable site condition standard, as described in subsections 43 (2) and (3) of the regulation, and the property owner,

(a) chooses to develop a standard specified in the risk assessment by undertaking a risk assessment using quantitative analysis for both human health and the natural environment as described in this Schedule; or

(b) adopts a standard from a credible agency.

(3) For the purposes of subsection (2), an agency is a credible agency if it incorporates one or more of the following in developing contaminant standards:

1. Rigorous peer review of the standards by regulatory bodies, public organizations or academic institutions or any combination of them.

2. A process to ensure the ongoing review and updating of the standards.

3. The standards and the rationale for setting the standards are publicly available.

(4) A risk assessment is a new science risk assessment if the risk assessment uses a computer model that,

(a) is not available to the public; or

(b) is available to risk assessment practitioners for a fee but has not been used by the Ministry.

(5) If a risk assessment uses a computer model referred to in subsection (4), the qualified person shall, upon the request of the Director, include an electronic copy of the computer model in the risk assessment report in a manner that does not violate any person's copyright or other intellectual property rights.

(6) If a risk assessment uses a computer model referred to in subsection (4), the following information shall be provided in the risk assessment report to support the selection and use of the computer model:

1. A list of assumptions used in the development of the model and a discussion of the validity of the assumptions for the RA property, including the effect invalid assumptions will have on the model results.

2. Any information used to generate the computer model inputs.

(7) A risk assessment is a new science risk assessment if there is use of a probabilistic model and may be used if it meets the criteria set out in subsection (8) and in no other circumstances.

(8) A risk assessment that uses a probabilistic model may be used if the model is used for the exposure assessments described in Report Section 4 (Human Health Risk Assessment (HHRA)) and Report Section 5 (Ecological Risk Assessment (ERA)) of Table 1 of this Schedule and for no other purposes and shall be sufficiently supported by data.

Wider area of abatement risk assessment

10. (1) A risk assessment is a wider area of abatement risk assessment if the Ministry has identified the RA property to be within a wider area of abatement in its comments on the pre-submission form or in a notice issued under subsection 46 (2) of the regulation.

(2) If the Ministry has identified the property to be within a wider area of abatement, the wider area of abatement risk assessment must include,

(a) consultation with the applicable Ministry of the Environment District or Regional Office regarding the implications of the risk assessment report recommendations; and

(b) development and implementation of a public communication plan.

Exemption

11. Despite sections 4 and 5, if the Director considers it appropriate in the circumstances and in the public interest after having regard to the RA property, the contaminants of concern and the human and ecological receptors to be addressed in a risk assessment report, the Director in the course of providing comments on a pre-submission form submitted under subsection 3 (1) or in a notice issued under subsection 46 (2) of the regulation, may exempt the risk assessment report from,

(a) a requirement in relation to the preparation of a risk assessment report specified in section 4;

(b) a requirement to make a certification in an appendix to the risk assessment report as specified in section 5.

TABLE 1
MANDATORY REQUIREMENTS FOR RISK ASSESSMENT REPORTS

Report Section	Heading	Sub-Heading	Minimum Requirements
1. Summary of Recommendations and Findings	(a) Risk Assessment Objectives and Approach		Summarize the risk assessment objectives, including those specified in Report Section 4 (Human Health Risk Assessment (HHRA)) and Report Section 5 (Ecological Risk Assessment (ERA)).
			Summarize the type or types of risk assessment approaches taken to meet the objectives.
	(b) Deviations from Pre-submission Form		Describe in detail any deviations from the information provided in the pre-submission form including,
			(a) any changes to the conceptual site model that was submitted as part of the form;
			(b) whether there has been a change in the type of risk assessment approach identified in the form; and,
			(c) whether another computer model was used other than the model specified in the form.
	(c) Risk Assessment Standards		State the proposed standard specified in the risk assessment for each contaminant of concern.
	(d) Risk Assessment Assumptions		State the assumptions used in determining each standard specified in the risk assessment, including property use assumptions.

	(e) Risk Management Requirements		State the risk management measures and on-going monitoring, maintenance and contingency plan requirements, if applicable.
2. Risk Assessment Team Membership			State the expertise required to complete this risk assessment and design of any risk management measures specified in Report Section 7 (Risk Management Plan) and justify the omission of areas of expertise normally associated with the completion of a risk assessment.
			Identify each team member with the expertise necessary to complete the risk assessment and state how their qualifications relate to the given role and expertise required for this risk assessment.
3. Property Information, Site Plan and Geological Interpretation	(a) Property Information		State the property location and ownership.
			Describe the general physical characteristics of the property including size of the property and size of contaminated area.
			Provide sufficient detail on the property to support the conceptual site model used in the preparation of the risk assessment report, including,
			(a) a summary of past and current use of property;
			(b) a summary of past and current use of any relevant property that is adjacent to the property;
			(c) a description of off-site sources of contaminants of concern and off-site receptors; and,
			(d) an indication of the proposed use of property.
	(b) Site Plan and Hydrogeological Interpretation of RA Property		Provide the site plans, cross-sections and a hydrogeological interpretation of the RA property that satisfies the requirements of clause 3 (8) (a) and that was relied upon in the preparation of the risk assessment and all documentation used to support this interpretation.

	(c) Contaminants of Concern		List all of the contaminants of concern.
			The contaminants of concern must include the following:
			1. Any contaminants detected on, in or under the RA property that exceed the applicable site condition standards.
			2. Any contaminants detected on, in or under the RA property and for which no applicable site condition standard is prescribed under Part IX (Site Condition Standards and Risk Assessment) of the regulation.
		(i) Sampling Programs	With reference to the sampling programs summarized in the appendices to the risk assessment report, describe how the program is adequate for the risk assessment objectives and approach specified in Report Section 1 (Summary of Recommendations and Findings).
			In the case of an estimation of natural local background concentration risk assessment, specify the methods that were used to estimate the local background concentrations in soil, including details of,
			(a) any sampling programs undertaken in accordance with subsections 8 (4) to (8);
			(b) any existing geological data, as described in subsection 8 (9) that were used to estimate the natural local background concentrations in place of sampling data.
4. Human Health Risk Assessment (HHRA)	(a) Problem Formulation	(i) Human Health Conceptual Site Model	Provide a human health conceptual site model that,
			(a) satisfies the requirements of clause 3 (8) (b) and is consistent with the information upon which the diagrams referred to in that clause are based;
			(b) explains how the information provided under Report Section 3

			(Property Information, Site Plan and Geological Interpretation) was incorporated into and is consistent with the human health conceptual site model; and
			(c) was relied upon in the preparation of the risk assessment.
		(ii) Risk Assessment Objectives	State the objectives of the human health risk assessment and include an indication of,
			(a) the proposed use of the RA property;
			(b) the receptors and exposure pathways to be assessed by the human health risk assessment;
			(c) whether a qualitative or quantitative assessment of risk or both will be used in the human health risk assessment; and
			(d) the type of approach used for the human health risk assessment.
			Demonstrate that the data used for the human health risk assessment is sufficient to meet the objectives of the assessment, having regard to,
			(a) the data quality objectives specified in the reports on the sampling program summarized in the appendices to the risk assessment report; and
			(b) any other relevant information the qualified person has gathered or obtained in conducting the assessment.
			State how any uncertainty resulting from variable data, poor data quality or gaps in data in relation to the RA property affected,
			(a) the setting of objectives for the human health risk assessment; and
			(b) the ability to meet those objectives.
	(b) Exposure Assessment	(i) Receptor Characteristics	Describe in detail the characteristics of every human receptor, both on and off the RA property, identified in the human health conceptual site model.
		(ii) Pathway	Describe in detail every exposure

		Analysis	pathway identified in the human health conceptual site model. Justify which exposure pathways are incomplete.
		(iii)Exposure Estimates	For every complete exposure pathway state,
			(a) the relative frequency and duration of actual or potential exposures;
			(b) the relative magnitude of exposure to the human receptors, using measured contaminant exposure concentrations or concentrations predicted through fate and transport modelling; and
			(c) given the uncertainty described under Heading (a) (Problem Formulation), how does this uncertainty affect the outcomes of the exposure assessments conducted under clauses (a) and (b).
	(c) Toxicity Assessment	(i) Nature of Toxicity (Hazard Assessment)	For each contaminant of concern,
			(a) state the potential adverse health effects on the human receptors associated with their exposure to those contaminants; and
			(b) indicate whether the contaminants are carcinogenic or exhibit threshold or non-threshold characteristics.
		(ii) Dose Response Assessment	For each contaminant of concern,
			(a) describe the relationship between the magnitude of exposure to the contaminant from each route of exposure and the probability of the occurrence of the adverse health effects identified in the hazard assessment;
			(b) if the data permits, identify the appropriate toxicity limit, from published limits available from a credible agency as described in

			subsection 9 (3) for each of the routes of exposure identified in clause (a); and
			(c) analyze the sources of uncertainty in the data used to conduct the hazard assessment and the dose response assessment, including any gaps or variability in the data and state how such uncertainty could affect these assessments.
	(d) Risk Characterization	(i) Interpretation of Health Risks	For each contaminant of concern, having regard to the exposure assessment and the toxicity assessment, state the risk attributable in respect of that contaminant to each exposure route for human receptors on the RA property, using either a quantitative or qualitative analysis.
		(ii) Quantitative Interpretation of Health Risks	A quantitative analysis undertaken for a contaminant of concern must include the following:
			1. Provide a comparison of the dose response assessment to the exposure estimate to derive the risk level or hazard quotient at the RA property in the absence of any measures that have been taken or are being proposed at the RA property which have the effect of reducing the risk from the contaminant of concern.
			2. For each contaminant of concern with non-threshold toxic effects and taking into consideration any risk management measures that are being proposed in the risk assessment, propose and justify a human health standard for the contaminant, ensuring that the standard meets a target risk level of 1×10^{-6} for each environmental medium.
			3. For each contaminant of concern with threshold toxic effects and taking into consideration any risk management measures that are being proposed in the risk assessment, propose and justify a

			human health standard for the contaminant, ensuring that each human receptor does not receive an estimated dose exceeding 0.2 × the limit dose (TDI, RfD or RfC) for each environmental medium. In this paragraph, "TDI" means tolerable daily intake, "RfD" means the reference dose, "RfC" means the reference concentration. The units used to measure the TDI, the RfD and the RfC must be specified and conform to acceptable conventions.
			4. If, under paragraph 3, given the circumstances of the human receptors and the characteristics of the contaminant, it is unreasonable to apply a hazard quotient of less than or equal to 0.2 for each environmental medium, a higher hazard quotient may be proposed, if the proposed quotient is accompanied with a detailed site specific multi-media exposure assessment that considers the transport of the contaminant across all environmental media to the human receptors by all exposure pathways and ensures that the standard achieves the same level of protection for each human receptor as is intended to be achieved by the applicable full depth generic site condition standard for that contaminant.
		(iii) Qualitative Interpretation of Health Risks	A qualitative analysis undertaken for a contaminant of concern must include the following:
			1. Provide a justification for why a quantitative analysis was not undertaken.
			2. Describe the justification process being used as part of the qualitative analysis. The justification process includes a

			non-numeric characterization of risk and may include a numeric assessment of exposure or toxicity for screening purposes and risk prioritization.
			3. Taking into consideration any risk management measures that are being proposed for the RA property, propose and justify a human health standard for the contaminant.
		(iv) Special Considerations	If section 41 or 43.1 of the regulation applies to a RA property, the justification for the health standard being proposed for the RA property must take into account the site conditions that make section 41 or 43.1 of the regulation apply to the RA property.
		(v) Interpretation of Off-Site Health Risks	For each contaminant of concern, assess whether the human health standard being proposed for the RA property is likely to result in a concentration greater than the applicable full depth site condition standard at the nearest human receptor located off the RA property and, if this is the case for any contaminant, specify the contaminant, the applicable site condition for that contaminant and the property where the human receptor is located and describe the human receptors that may be impacted.
		(vi) Discussion of Uncertainty	Having regard to the discussions of uncertainty under Heading (b) (Exposure Assessment) and Heading (c) (Toxicity Assessment), state how such uncertainty could affect the interpretation of risk in this report section and the need to manage such risks.
5. Ecological Risk Assessment (ERA)	(a) Problem Formulation	(i) Ecological Conceptual Site Model	Provide an ecological conceptual site model that,
			(a) satisfies the requirements of clauses 3 (8) (b) and (c) and is consistent with the information

			upon which the diagrams referred to in that clause are based;
			(b) explains how the information provided under Report Section 3 (Property Information Site Plan and Geological Interpretation) was incorporated into and is consistent with the ecological conceptual site model; and
			(c) was relied upon in the preparation of the risk assessment.
		(ii) Risk Assessment Objectives	State the objectives of the ecological risk assessment and include an indication of,
			(a) the proposed use of the RA property;
			(b) which ecological receptors on the RA property are considered to be valued ecosystem components, the degree to which they must be protected and a justification to support such decisions;
			(c) the exposure pathways to be assessed in the ecological risk assessment;
			(d) whether a qualitative or quantitative assessment of risk or both will be used in the ecological risk assessment;
			(e) the type of approach used for the ecological risk assessment.
			Demonstrate that the data used for the ecological risk assessment are sufficient to meet the objectives of the assessment, having regard to,
			(a) the data quality objectives specified in the reports on the sampling program summarized in the appendices to the risk assessment report; and
			(b) any other relevant information that the qualified person has gathered or obtained in conducting the assessment.
			State how any uncertainty resulting from variable data, poor data quality or gaps in data in relation to the RA property affected,

			(a) the setting of objectives for the ecological risk assessment; and
			(b) the ability to meet those objectives.
	(b) Receptor Characterization		Describe in detail the characteristics of every valued ecosystem component, both on and off the RA property, identified in the ecological conceptual site model.
	(c) Exposure Assessment	(i) Pathway Analysis	Describe in detail every exposure pathway identified in the ecological conceptual site model. Justify which exposure pathways are incomplete.
		(ii) Exposure Estimates	For every complete exposure pathway, state,
			(a) the relative frequency and duration of actual or potential exposures;
			(b) the relative magnitude of exposure to the valued ecosystem components, using measured contaminant exposure concentrations or concentrations predicted through fate and transport modelling in a manner compatible with that used in the human health risk assessment; and
			(c) given the uncertainty described under the heading of “Problem Formulation”, how does this uncertainty affect the outcomes of the exposure assessments conducted under clauses (a) and (b).
	(d) Hazard Assessment		State the potential adverse effects on the valued ecosystem components associated with their exposure to each contaminant of concern.
			For each contaminant of concern,
			(a) describe the relationship between the magnitude of exposure to the contaminant from each route of exposure and the probability of the occurrence of the adverse ecological effect identified in the hazard assessment;
			(b) if the data permits, propose a

			toxicity reference value for each of the routes of exposure identified in clause (a); and
			(c) analyze the sources of uncertainty in the data used to conduct the hazard assessment, including any gaps or variability in the data and state how such uncertainty could affect the assessment.
	(e) Risk Characterization	(i) Interpretation of Ecological Risks	For each contaminant of concern, having regard to the exposure assessment and the hazard assessment, state the risk attributable in respect of that contaminant to each exposure route for the valued ecological components on the RA property, using either a quantitative or qualitative analysis.
		(ii) Quantitative Interpretation of Ecological Risks	A quantitative analysis that has been undertaken for a contaminant of concern must include the following:
			1. For each valued ecosystem component, provide a comparison of the toxicity reference value proposed in the “Hazard Assessment” to the exposure estimate proposed in the “Exposure Assessment” to derive an estimate of the degree of risk at the RA property in the absence of any measures that have been taken or are being proposed at the RA property which have the effect of reducing the risk from the contaminant of concern.
			2. Provide narrative to describe all magnitudes, comparisons and limitations relied upon to derive the risk under paragraph 1.
			3. Taking into consideration any risk management measures being proposed in the risk assessment, propose and justify an ecological standard for the contaminant, ensuring that the standard achieves the same level of protection for each valued ecosystem component that is

			intended to be achieved by the applicable full-depth generic site condition standard for that contaminant.
		(iii) Qualitative Interpretation of Ecological Risks	A qualitative analysis that has been undertaken for a contaminant of concern must include the following:
			1. Provide a justification for why a quantitative analysis was not undertaken.
			2. Describe the justification process being used as part of the qualitative analysis. The justification process includes a non-numeric characterization of risk and may include a numeric assessment of exposure or toxicity for screening purposes and risk prioritization.
			3. Taking into consideration any risk management measures being proposed for the RA property, propose and justify an ecological standard for the contaminant, ensuring that the standard achieves the same level of protection for each valued ecosystem component that is intended to be achieved by the applicable full-depth generic site condition standard for that contaminant.
		(iv) Special Considerations	If a RA property is,
			(a) located within 30 metres of an “area of natural significance”, includes such an area, is adjacent to such an area or part of such an area, the justification for the ecological standard being proposed for the RA property must ensure that the standard is protective of the conditions that causes the area to be an area of natural significance; and
			(b) subject to section 41 or 43.1 of the regulation, the justification

			for the ecological standard being proposed for the RA property must take into account the site conditions that make section 41 or 43.1 of the regulation apply to the RA property.
		(v) Interpretation of Off-Site Ecological Risks	For each contaminant of concern, assess whether the ecological standard being proposed for the RA property is likely to result in a concentration greater than the applicable full depth site condition standard at the nearest ecological receptor located off the RA property and, if this is the case for any contaminant, specify the contaminant, the applicable site condition standard for that contaminant and the property where the ecological receptor is located and describe the ecological receptors that may be impacted.
		(vi) Discussion of Uncertainty	Having regard to the discussions of uncertainty under headings "Exposure Assessment" and "Hazard Assessment", state how such uncertainty could affect the interpretation of risk advanced in this report section and the need to manage such risks.
6. Conclusions and Recommendations		(i) Recommended Standards	A standard must be specific in the risk assessment for each contaminant of concern. The specified standard shall be, at a minimum, the more stringent of the human health standard and the ecological standard being proposed for the RA property.
			In the case of an estimation of natural local background concentration risk assessment, the specified standard shall be the local background concentration soil standard proposed under subsection 8 (1).
			State critical assumptions on which the standards specified in the risk assessment rely, having regard to the discussion of uncertainty under Heading (d) (Risk Characterization) in Report Section 4 (Human Health

			Risk Assessment (HHRA)) and under Heading (e) (Risk Characterization) in Report Section 5 (Ecological Risk Assessment (ERA)).
		(ii) Special Considerations for Ground Water Standards	If a standard being proposed in the risk assessment for ground water in or under the RA property is greater than 50% of the solubility limit, demonstrate the risk of free product formation and propose any risk management measures necessary in order to mitigate the formation of free product.
7. Risk Management Plan (if applicable)	(a) Risk Management Plan	(i) Risk Management Performance Objectives	State the exposure pathways and environmental media that risk management measures are intended to address.
			State the required reduction in exposure concentration that the risk management measures are intended to achieve.
		(ii) Risk Management Measures	To achieve the specified performance objectives,
			(a) propose risk management measures on the RA property that are designed to prevent, eliminate or ameliorate any adverse effects on or off the RA property;
			(b) propose restrictions on the use of the RA property, including any restriction that apply to the construction of a building on the property; or
			(c) propose a combination of measures specified in clauses (a) and (b).
			State the implications of the risk management plan for off-site health and ecological receptors.
		(iii) Duration of Risk Management Measures	Specify the duration the proposed risk management measures are required to remain in place to ensure the specified performance objectives are achieved.
		(iv) Requirements for Monitoring	Specify the designed lifespan of the measure, if applicable.

		and Maintenance	
			Propose a program for one or more of the following activities, if the program is necessary to achieve the specified risk management performance objectives:
			1. A program which includes procedures for the ongoing maintenance, monitoring and replacement of the risk management measures to ensure they remain operable for the period identified in this report under the sub-heading “Duration of Risk Management Measures”.
			2. A program which includes procedures for the ongoing monitoring of contaminants of concern.
			3. A contingency plan for meeting the Risk Management Performance Objectives if the Risk Management Measures fail.
8. Public Communication Plan (if applicable)	(a) Public Communication Plan	(i) Optional Communication Plans	If owner has implemented a plan to consult the public as part of the development of the risk assessment, provide,
			(a) a description of the plan, including any opportunities given to the public to comment on the proposed risk assessment;
			(b) a summary of the comments received during the consultation; and
			(c) a description of how the public comments were considered as part of the risk assessment process.
		(ii) Required Communication Plans For RA Properties in Wider Area of Abatement	If the risk assessment has been identified by the Ministry as relating to a property located within a wider area of abatement under section 10, the risk assessment shall include,
			(a) a description of the public communication plan required by

			clause 10 (2) (b) including any opportunities given to the public to comment on the proposed risk assessment;
			(b) a summary of the comments received during consultation under the plan;
			(c) a description of how the public comments were considered as part of the risk assessment process; and
			(d) a copy of all the written comments received from the Ministry under clause 10 (2) (a).

O. Reg. 153/04, Sched. C; O. Reg. 511/09, s. 30; O. Reg. 245/10, s. 4; O. Reg. 179/11, s. 6.

SCHEDULE D
PHASE ONE ENVIRONMENTAL SITE ASSESSMENTS

PART I
APPLICATION

Application and definitions

1. (1) The requirements in this Schedule apply to phase one environmental site assessments.

(2) Each section in this Schedule is deemed to be a requirement, whether it is described as such or not.

(3) In this Schedule,

"sewage" means,

(a) a waste of domestic origin that is human body waste, toilet or other bathroom waste, waste from showers and tubs, liquid or water borne culinary and sink waste and laundry waste, and

(b) drainage, storm water, commercial wastes and industrial wastes;

"sewage works" means any works for the collection, transmission, treatment and disposal of sewage or any part of such works.

PART II
RECORDS REVIEW

Records review, specific objectives

2. The following are the specific objectives of a records review:

1. To obtain and review records that relate to the phase one property and to the current and past uses of and activities at or affecting the phase one property in order to determine if an area of potential environmental concern exists and to interpret any area of potential environmental concern.

2. To obtain and review records that relate to properties in the phase one study area, other than the phase one property, in order to determine if an area of potential environmental concern exists and to interpret any area of potential environmental concern.

Records review, requirements

3. (1) The qualified person shall, as part of a preliminary records review,

(a) consider and determine, with a rationale for the determination, whether the phase one study area should include a property that is not located, wholly or partly, within 250 metres from the nearest point on a boundary of the phase one property; and

(b) determine, with a rationale for the determination, the date of the first developed use of the phase one property.

(2) The qualified person shall ensure that the following additional requirements are met as part of the records review:

General

1. Make all reasonable inquiries to obtain reasonably accessible records pertaining to the current use or uses and all past uses of the phase one property.
2. Make all reasonable inquiries, including reference to the *Catalogue of Canadian Fire Insurance Plans 1875-1975*, to obtain the fire insurance plans for all parts of the phase one property.
3. Prepare an up-to-date chronological chain of title that shows the owners' names and dates of ownership for the phase one property based on a search of the title of the phase one property that goes back to the date of the first developed use of the phase one property, unless other information from the records review satisfies the objectives of the records review and a title search back to the date of the first developed use would not contribute to obtaining information about the environmental condition of the phase one property.
4. Make all reasonable inquiries to obtain copies of reports prepared in respect of all or part of the phase one property by or on behalf of a current or former owner respecting environmental conditions at the phase one property including,
   i. environmental site assessment reports,
   ii. remediation reports,
   iii. reports prepared in response to an order or request of the Ministry, and
   iv. any other reports relating to the presence of a contaminant on, in or under the phase one property or the existence of an area of potential environmental concern.
5. Make all reasonable inquiries to obtain records concerning the matters referred to in sections 13 and 14 of this Schedule.
6. Review the documents obtained pursuant to paragraphs 1, 2, 4 and 5.

Environmental Source Information

7. Make all reasonable inquiries to obtain such of the following as are reasonably accessible and pertain, unless otherwise specified, to the phase one study area:
   i. National Pollutant Release Inventory information maintained by Environment Canada,
   ii. PCB information maintained by the Ministry,
   iii. environmental compliance approvals, permits to take water, certificates of property use or similar instruments related to the environmental condition of the phase one property and any property on, under or adjacent to the phase one property and issued pursuant to an Act administered by the Ministry, whether in force or not,
   iv. the inventory of coal gasification plants that is maintained by the Ministry,
   v. records concerning environmental incidents, orders, offences, spills, discharges of contaminants or inspections maintained by the Ministry where the incident, order, offence,

spill, discharge or inspection affects the phase one property and any property on, under or adjacent to the phase one property,

vi. waste management records, including current and historical waste storage locations and waste generator and waste receiver information maintained pursuant to Regulation 347 of the Revised Regulations of Ontario, 1990 (General — Waste Management) made under the Act, or its predecessors with respect to the phase one property and any property on, under or adjacent to the phase one property,

vii. reports submitted to the Ministry related to the environmental conditions of the phase one property and any property on, under or adjacent to the phase one property,

viii. retail fuel storage tanks information maintained by the Technical Standards and Safety Authority,

ix. notices and instruments, including records of site condition, posted in the Registry,

x. identification of areas of natural significance maintained by the Ministry of Natural Resources, and

xi. landfill information maintained by the Ministry.

8. Review the documents obtained pursuant to paragraph 7.

Physical Setting Sources

9. Make all reasonable inquiries to obtain a series of aerial photographs of the phase one study area that, as a whole,

i. illustrate as much as possible of the period from the phase one property's first developed use to the time of the phase one environmental site assessment,

ii. identify the buildings and structures that were present on the phase one property from time to time throughout this period,

iii. identify potentially contaminating activities within the phase one study area from time to time throughout this period, and

iv. identify areas of potential environmental concern.

10. Obtain one or more topographic maps (Ontario Base Map series), which illustrate the location of the phase one property in relation to any water bodies in the phase one study area and document regional topography.

11. Make all reasonable inquiries to obtain one or more physiographic maps or other similar documents in order to define regional physiography in the phase one study area and to obtain information about the surficial soil and bedrock in the phase one study area.

12. Make all reasonable inquiries to obtain one or more geological maps or other similar document in order to define the regional geology in the phase one study area and to obtain information about the stratigraphy of the overburden, from ground surface to bedrock, including approximate depth to bedrock and type of bedrock.

13. Make all reasonable inquiries to obtain well records and other relevant data for any operating or abandoned wells, including all wells described or defined under the *Ontario Water Resources Act*, in the phase one study area in order to identify the presence of such wells and to make appropriate use of the records and data to help determine the hydrogeological and geological characteristics of the phase one study area and describe,

i. the location of any such wells,

ii. the stratigraphy of the overburden, from ground surface to bedrock,

iii. approximate depth to bedrock, and

iv. approximate depth to the water table.

Site Operating Records

14. Where the phase one property is an enhanced investigation property that is currently being used, in whole or in part, for one of the uses described in clause 32 (1) (b) of the regulation, review all of the following, as are applicable and reasonably accessible otherwise than as described in clause 22 (2) (c) or (d) of the regulation, in respect of the property,

i. regulatory permits and records related to areas of potential environmental concern,

ii. material safety data sheets,

iii. underground utility drawings,

iv. inventories of chemicals, chemical usage and chemical storage areas,

v. inventory of above ground storage tanks and underground storage tanks,

vi. environmental monitoring data, including data created in response to an order or request of the Ministry,

vii. waste management records, including current and historical waste storage locations and waste generator and waste receiver information maintained pursuant to Regulation 347 of the Revised Regulations of Ontario, 1990 (General — Waste Management) made under the Act, or its predecessors,

viii. process, production and maintenance documents related to areas of potential environmental concern,

ix. records of spills and records of discharges of contaminants, including records of spills and records of discharges of contaminants of which notice is required to be given to the Ministry under the Act and records of such spills and discharges required to be kept pursuant to Ontario Regulation 675/98 (Classification and Exemption of Spills and Reporting of Discharges) made under the Act,

x. emergency response and contingency plans, including spill prevention and contingency plans prepared pursuant to section 91.1 of the Act, and Ontario Regulation 224/07 (Spill Prevention and Contingency Plans) made under the Act,

xi. environmental audit reports, and

xii. site plan of facility showing areas of production and manufacturing.

15. Where the phase one property is an enhanced investigation property, in whole or in part, because the property had been put to a use that is no longer being carried on, all reasonable inquiries shall be made to obtain and review the material referred to in paragraph 14 with respect to the former use.

(3) If a document required by the records review is obtained from one source, it need not be obtained again from another source.

PART III
INTERVIEWS

Interviews, specific objectives

4. The following are the specific objectives of conducting the phase one environmental site assessment interviews:

1. To obtain information to assist in determining if an area of potential environmental concern exists.
2. To identify details of potentially contaminating activities or potential contaminant pathways in, on or under the phase one property.

Interviews, role of qualified person

5. Subject to section 6, the qualified person shall select persons to be interviewed, determine the timing and method of the interviews, and select the topics for each interview.

Persons to be interviewed

6. (1) The qualified person shall ensure that the following persons are interviewed:

1. A current owner or a current occupant of the phase one property, where one can be identified, or an individual with control of or authority over the owner or occupant, where the owner or occupant is not an individual.
2. The key site manager for each use, where the phase one property is an enhanced investigation property currently being used, in whole or in part, as an industrial property or a commercial property described in clause 32 (1) (b) of the regulation.

(2) The qualified person shall make all reasonable efforts to ensure that the following persons are interviewed:

1. All persons relevant to meeting the general and specific objectives of the phase one environmental site assessment as determined by the qualified person.
2. Where the phase one property is an enhanced investigation property, at least one person with detailed knowledge of site activities identified by the qualified person and referred to as the key site manager, for each use included among the uses referred to in clause 32 (1) (b) of the regulation that is no longer being carried out at the phase one property but that has been carried on at the phase one property.
3. Where no owner or occupant of the phase one property can be identified, at least one owner or occupant of a property in the phase one study area and one provincial or municipal government official, each of whom is familiar with the phase one property and its history, as determined by the qualified person having regard to the objectives of a phase one environmental site assessment.

Persons with specific knowledge

7. (1) Where the phase one property is an enhanced investigation property, the owner of the property shall provide to the qualified person the information in the owner's possession or control concerning persons with detailed knowledge of site activities with respect to any use or activity described in subsection 32 (1) of the regulation which is currently or was formerly being carried on at the phase one property.

(2) The qualified person shall make all reasonable efforts to ensure that at least one person with detailed knowledge of site activities identified under subsection (1) is present during the site reconnaissance component of the phase one environmental site assessment.

Conduct of the interviews

8. The phase one environmental site assessment interviews shall be conducted as follows:

1. The qualified person shall design all interviews. Interviews shall, to the degree practicable, include questions about all matters referred to in sections 13 and 14, including questions about the former

uses of the property, and such questions shall, unless no one is accompanying the person conducting the site reconnaissance, be asked during the site reconnaissance in addition to being asked of any other person being interviewed who may be able to answer them.

2. The date, place and method of the interview and the name of the person being interviewed, the reason why the person was identified as an interview subject and all relevant information concerning potentially contaminating activity and areas of potential environmental concern shall be noted in writing by the interviewer.

3. Information gleaned through interviews shall be compared to other information sources in order to assess the validity of the information from the interview, and such comparisons shall be documented by the interviewer or other person conducting the comparison.

4. A written summary of each interview shall be prepared, which shall include consideration of the interviewer's notes and the assessment of the validity of information from each interview.

PART IV
SITE RECONNAISSANCE

Site reconnaissance, specific objectives

9. The following are the specific objectives of the site reconnaissance component of a phase one environmental site assessment:

1. To determine if areas of potential environmental concern exist through observations about current and past uses and potentially contaminating activity on, in or under the phase one property and, as practicable, current and past uses and activities and potentially contaminating activity in the phase one study area.

2. To identify details of potential contaminant pathways on, in or under the phase one property and areas of potential environmental concern and contaminants of potential concern.

Obligation of owner

10. The owner of the phase one property shall grant access and ensure that access is granted by any occupant of the phase one property who is not the owner to the qualified person and to persons supervised by the qualified person for purposes of conducting the site reconnaissance, to enable them to investigate the entire phase one property.

Timing of site reconnaissance

11. The site reconnaissance shall occur after the preliminary records review and shall consist of an investigation of the phase one study area, including the phase one property, on one or more occasions.

Site reconnaissance, general requirements

12. The following are the general requirements for the site reconnaissance:

1. The qualified person or a person supervised by the qualified person shall physically attend at the phase one property and investigate it.

2. The qualified person or a person supervised by the qualified person shall conduct investigation of the remaining properties within the phase one study area from publicly accessible areas.

3. The following shall be noted during each investigation,

   i. date and time of the investigation,

   ii. weather conditions,

   iii. the length of time of the investigation,

iv. whether the facility was operating at the time of the investigation, where the phase one property is an enhanced investigation property that is currently being used for one of the uses described in clause 32 (1) (b) of the regulation, and

v. the name and qualifications of the person conducting the investigation.

4. The qualified person or a person supervised by the qualified person shall,

i. take photographs of the phase one property, including of the exterior and interior portions of buildings or structures on the property, in order to document any areas of potential environmental concern and illustrate any relevant structures and areas of disturbed soils such as fill areas,

ii. take photographs of the phase one study area, as practicable, in order to document any potentially contaminating activity which may be contributing to or causing an area of potential environmental concern and illustrate any relevant structures and areas of disturbed soils such as fill areas, and

iii. prepare a written description and explanation of the photographs taken pursuant to subparagraphs i and ii, including an orientation by compass of the photograph and a description of the photograph with respect to other photographs, records and figures.

Specific observations at phase one property

13. (1) At the phase one property, the following shall be carried out:

1. Investigations of structures sufficient to obtain and document the following,

i. a general description of structures and other improvements, including the number and age of buildings,

ii. a general description of the number, age and depth of below-ground structures,

iii. details of all tanks, above and below ground, at the phase one property, including the material and method of construction of the tank, tank age, tank contents and tank volume, whether the tank is in use or not, and

iv. any potable and non-potable water sources.

2. Inquiries about the type and approximate location of underground utility and service corridors, such as sewer, water, electrical or gas lines, located on, in or under the phase one property.

3. Inquiries about, and as practicable, investigations of the interior of any buildings or structures at the phase one property so as to identify and document the following:

i. exit and entry points,

ii. details of existing and former heating systems, including type and fuel source,

iii. details of cooling systems, including type and fuel source, if any,

iv. details of any drains, pits and sumps, including their current use, if any, and former use,

v. details of any unidentified substances, and

vi. details of stains or corrosion on floors other than from water, where located near a drain, pit, sump, crack or other potential discharge location.

4. Inquires about, and as practicable, investigations sufficient to obtain and document the following:

i. details and locations of wells described or defined under the *Ontario Water Resources Act* and the *Oil, Gas and Salt Resources Act*,

ii. details of sewage works, including their location,

iii. details of ground surface, including type of ground cover, such as grass, gravel, soil or pavement, and

iv. details of current or former railway lines or spurs and their locations.

(2) At the parts of the phase one property not covered by buildings or other structures, investigations shall be carried out to identify, locate and document,

(a) areas of stained soil, vegetation or pavement;

(b) stressed vegetation;

(c) areas where fill and debris materials appear to have been placed or graded;

(d) potentially contaminating activity; and

(e) details of any unidentified substances found at the property.

(3) Where the phase one property is an enhanced investigation property that is currently being used for one of the uses described in clause 32 (1) (b) of the regulation, investigations shall be carried out to identify, locate and document,

(a) operations at the property, including processing or manufacturing;

(b) hazardous materials used or stored at the phase one property;

(c) products manufactured at the phase one property;

(d) by-products and wastes at the phase one property;

(e) raw materials handling and storage locations at the phase one property;

(f) location and contents of drums, totes and bins at the phase one property;

(g) details of all oil/water separators at the phase one property including for each separator the location, installation date, source of incoming liquid and effluent discharge location;

(h) all vehicle and equipment maintenance areas, including the locations of maintenance, fluid storage, and waste storage areas;

(i) details of all spills including the dates, locations, materials involved, and volumes of material spilled;

(j) details of liquid discharge points such as water and French drains, including their locations; and

(k) details of all hydraulic lift equipment at the property, including elevators, in-ground hoists and loading docks.

(4) Where the phase one property is an enhanced investigation property that has been used, in whole or in part, in a manner described in clause 32 (1) (b) of the regulation, the qualified person or someone supervised by the qualified person,

(a) shall conduct an investigation to identify and document such of the things specified in subsection (3) as it may be practicable to do during the site reconnaissance, with respect to those uses set out in clause 32 (1) (b) of the regulation that the property has been used for; and

(b) shall consider and use information available from the records review and interviews in conducting this investigation.

Investigation of phase one study area, other than phase one property

14. In the part of the phase one study area that is outside of the phase one property and that is not covered by buildings or other structures, investigations shall be carried out to identify, locate and document,

(a) potentially contaminating activity;

(b) water bodies; and

(c) areas of natural significance.

Written description of investigation

15. (1) The qualified person shall ensure that a written description of the investigations carried out pursuant to sections 13 and 14 is prepared.

(2) The written description shall include details of each of the investigations and any findings that are relevant to the existence of an area of potential environmental concern.

PART V
REVIEW AND EVALUATION OF INFORMATION

Review and evaluation of information

16. (1) The qualified person shall review, evaluate and interpret the information obtained from the records review, the interviews and the site reconnaissance components of the phase one environmental site assessment so as to achieve the general and specific objectives of a phase one environmental site assessment.

(2) Without limiting the generality of subsection (1), and based on the review, evaluation and interpretation, the qualified person shall prepare,

(a) a table of areas of potential environmental concern in a form approved by the Director;

(b) a table of current and past uses of the phase one property in a form approved by the Director; and

(c) a phase one conceptual site model.

(3) To assist with meeting the requirements of subsection (2) and the objectives of a phase one environmental site assessment, the qualified person shall reach a conclusion on, based on a review of the available information and the exercise of professional judgment,

(a) the existence and location of any areas of potential environmental concern on, in or under the phase one property;

(b) the current and past uses of the phase one property;

(c) the likelihood that one or more contaminants have affected any land or water on, in or under the phase one property; and

(d) whether a phase two environmental site assessment is required before a record of site condition may be submitted with respect to all or part of the phase one property.

(4) For each of the matters referred to in subsections (2) and (3), the qualified person shall include the logic and reasoning used to evaluate the available information.

(5) For each of the matters referred to in subsections (2) and (3), except clause (2) (c), the qualified person shall in the review and evaluation document the data sources, with reference to the specific data and source used, including,

(a) whether the source was from a record, an interview or a site investigation or a combination of them or another source; and

(b) what aspect of each record, interview or observation during a site investigation or a combination of them or other source was relied upon and how it was relied upon.

(6) The qualified person shall consider and document how any uncertainty or absence of information obtained in each of the components of the phase one environmental site assessment could affect the validity of the conclusions, tables and model described in subsections (2) and (3).

(7) The phase one conceptual site model shall consist of the figures and narrative descriptions and assessments set out in Sub-Heading (iv) (Phase One Conceptual Site Model) in Report Section 7 (Review and Evaluation of Information) of Table 1 of this Schedule.

(8) The phase one conceptual site model shall be prepared taking into consideration,

(a) any property use to which the phase one property could be put where a record of site condition is to be filed based on the phase one environmental site assessment; and

(b) the proposed property use to which the phase one property will be put, where it is known, in any other case.

(9) During the course of the phase one environmental site assessment or any subsequent phase one or phase two environmental site assessment of the phase one property, the qualified person shall update the review, evaluation and interpretation as further information becomes available.

PART VI
PHASE ONE ENVIRONMENTAL SITE ASSESSMENT REPORT

Preparation of report

17. Subject to subsection 16 (1), the qualified person shall prepare or supervise the preparation of a phase one environmental site assessment report.

Phase one environmental site assessment report, specific objectives

18. The following are the specific objectives of a phase one environmental site assessment report:

1. To document the presence or absence of areas of potential environmental concern.
2. To provide a record of a phase one environmental site assessment of a phase one property that demonstrates, in a manner that is clear and can be assessed, tested and reconstructed, how the phase one environmental site assessment of the property was carried out, and, in particular, to document and demonstrate,
   i. how the general and specific objectives of a phase one environmental site assessment were achieved and how each of the minimum requirements for such objectives were met,
   ii. whether further investigation is required in order to submit a record of site condition for filing,
   iii. that there exists an adequate basis for any further investigation that may be needed, and
   iv. that there is a basis for any required certifications.

Sections of report

19. (1) The phase one environmental site assessment report shall,

(a) be divided into the report sections as specified in Table 1 of this Schedule; and

(b) include the headings and sub-headings set out in Table 1.

(2) The phase one environmental site assessment report shall meet the requirements set out in Table 1 of this Schedule.

(3) The qualified person may include,

(a) report sections, headings and sub-headings in addition to those set out in Table 1 of this Schedule; and

(b) other information in the phase one environmental site assessment report.

(4) The phase one environmental site assessment report shall have the appendices, references and figures specified in Table 1 of this Schedule attached to the report.

(5) Figures, maps, site plans and cross-sections in the phase one environmental site assessment report shall contain a scale, north arrow and a title block that includes,

(a) a descriptive title;

(b) the address, if any, of the phase one property;

(c) the name of the qualified person's firm, company or partnership, if any; and

(d) the date the figure, map, site plan or cross-section was created.

TABLE 1
MANDATORY REQUIREMENTS FOR PHASE ONE ENVIRONMENTAL SITE ASSESSMENT REPORTS

Report Section	Heading	Sub-Heading	Minimum Requirements
1. Executive Summary			Provide a brief summary of the contents of the Report.
2. Introduction	(a) Phase One Property Information		Include the following and any other relevant introductory material concerning the phase one property and the phase one environmental site assessment:
			1. The municipal address and property identifier number, if any, of the phase one property.
			2. The name and address and other contact information for the owner of the phase one property and the name, status and other contact information for any other person who has engaged the qualified person to conduct the phase one environmental site assessment.
3. Scope of Investigation			Provide an overview of the phase one environmental site assessment conducted with respect to the phase one property.
4. Records Review	(a) General	(i) Phase One Study Area Determination	Document, with reference to details of the relevant property, the rationale for the determination that the phase one study area should or should not include a property that is not located, wholly or partly, within 250 metres

			from the nearest point on a boundary of the phase one property.
		(ii) First Developed Use Determination	Document, with reference to details of the phase one property, the rationale for the determination of the date of the first developed use of the phase one property.
		(iii)Fire Insurance Plans	Make a summary of each fire insurance plan reviewed including,
			i. date and description of the area covered with reference to the phase one property,
			ii. lot and address numbers,
			iii. lot sizes and description of structures and other improvements, and
			iv. relevant information gleaned from the plan concerning potentially contaminating activity and areas of potential environmental concern.
		(iv)Chain of Title	Prepare an up-to-date chronological chain of title that shows the owners' names and dates of ownership for the phase one property based on a search of the title of the phase one property that goes back to the date of the first developed use of the phase one property, unless other information from the records review satisfies the objectives of the records review and a title search back to the date of the first developed use would not contribute to obtaining information about the environmental condition of the phase one property.
			Document and provide a rationale for the period chosen for the search of title of the phase one property, with details of any information relied on in lieu of conducting a title search back to the date of the first developed use of the phase one property, where a title search of the phase one property has not been conducted back to the date of the first developed use of the phase one property.
		(v)	Provide a list and summary of

		Environmental Reports	reports referred to in paragraph 4 of subsection 3 (2), if any, including,
			i. the title, date, name of the property owner or other person funding the work and the report,
			ii. the author of the report, and
			iii. a description of data, analysis and findings relevant to the phase one environmental site assessment, such as the existence of an area of potential environmental concern.
	(b) Environmental Source Information		Provide the list and summary of information or documents referred to in paragraph 7 of subsection 3 (2) including,
			i. the title of the information or document, and
			ii. a detailed description of data, analysis or findings relevant to the phase one environmental site assessment, such as the existence of an area of potential environmental concern.
	(c) Physical Setting Sources	(i) Aerial Photographs	Where possible, provide the series of aerial photographs of the phase one study area referred to in paragraph 9 of subsection 3 (2).
			Where there is a series of aerial photographs,
			i. provide a list of the aerial photographs of the phase one study area,
			ii. provide a rationale for the time period between aerial photographs used,
			iii. identify the date of the earliest aerial photographs available and their source, and
			iv. summarize the information gleaned from the series of aerial photographs.
		(ii) Topography, Hydrology, Geology	Provide topographic maps (Ontario Base Map series) referred to in paragraph 10 of subsection 3 (2) which illustrate the location of the phase one property in relation to any water bodies in the phase one study

			area and provide a description of regional topography.
			Describe regional physiography, including surficial soil and bedrock characteristics of the phase one study area based on physiographic maps or other similar documents referred to in paragraph 11 of subsection 3 (2).
			Describe the geology, including the stratigraphy of the overburden from ground surface to bedrock, the approximate depth to bedrock and type of bedrock of the phase one study area based on geological maps or other similar documents referred to in paragraph 12 of subsection 3 (2) and well records and other relevant data referred to in paragraph 13 of subsection 3 (2).
		(iii)Fill Materials	Describe any areas of disturbed soil or fill areas on the phase one property.
		(iv)Water Bodies and Areas of Natural Significance	Describe any water bodies and any areas of natural significance in the phase one study area.
		(v) Well Records	Provide well records and other relevant data referred to in paragraph 13 of subsection 3 (2), and a description of them, which identifies the presence of wells, helps determine the hydrogeological and geological characteristics of the phase one study area and describes,
			i. the location of any such wells,
			ii. the stratigraphy of the overburden, from ground surface to bedrock,
			iii. approximate depth to bedrock, and
			iv. approximate depth to the water table.
	(d) Site Operating Records		Where applicable, provide a list and summary of the information and documents referred to in paragraph 14 of subsection 3 (2) including,
			i. the title of the information or document, and

			ii. a detailed description of data, analysis or findings relevant to the phase one environmental site assessment such as the existence of an area of potential environmental concern.
5. Interviews			Provide the information referred to in paragraph 2 of section 8 including,
			i. the date, place, and method of the interviews and the name of person being interviewed,
			ii. the reason why the person was identified as an interview subject, and
			iii. relevant information concerning potentially contaminating activity and areas of potential environmental concern noted by the interviewer.
			Provide the comparison and assessment, referred to in paragraph 3 of section 8, of information gleaned through interviews with other information sources and of the validity of the information gleaned from the interviews.
			Provide the summary of the interviews referred to in paragraph 4 of section 8.
			Identify and evaluate relevant information from the interviews concerning potentially contaminating activity and areas of potential environmental concern.
6. Site Reconnaissance	(a) General Requirements		Provides notes of the following for each investigation,
			i. date and time of the investigation,
			ii. weather conditions,
			iii. the length of time of the investigation,
			iv. whether the facility was operating at the time of the investigation, where the phase one property is an enhanced investigation property that is currently being used for one of

			the uses described in clause 32 (1) (b) of the regulation, and
			v. the name and qualifications of the person conducting the investigation.
			Provide the following information and analysis based on paragraph 4 of section 12,
			i. photographs of the exterior and interior portions of the phase one property,
			a. documenting any areas of potential environmental concern, and
			b. illustrating any relevant structures and areas of disturbed soils, including fill areas, and
			ii. a written description and explanation of the photographs including,
			a. an orientation by compass of the photograph, and
			b. a description of the photograph with respect to other photographs, records and figures.
	(b) Specific Observations at Phase One Property		Provide the following, based on the investigation referred to in paragraph 1 of subsection 13 (1),
			i. a general description of structures and other improvements, including the number and age of buildings,
			ii. a general description of the number, age and depth of below-ground structures,
			iii. details of all tanks, above and below ground, at the phase one property, including the material and method of construction of the tank, tank age, tank contents and tank volume, whether in use or not, and
			iv. any potable and non-potable water sources.
			Based on the inquiries referred to in

			paragraph 2 of subsection 13 (1), provide the type and approximate location of underground utility and service corridors, such as sewer, water, electrical or gas lines, located on, in or under the phase one property.
			Based on the investigations referred to in paragraph 3 of subsection 13 (1), identify and document the following features of structures and buildings at the phase one property,
			i. exit and entry points,
			ii. details of existing and former heating systems, including type and fuel source,
			iii. details of cooling systems, including type and fuel source, if any,
			iv. details of any drains, pits and sumps, including their current use, if any, and former use,
			v. details of any unidentified substances, and
			vi. details, including locations, of stains or corrosion on floors other than from water, where located near a drain, pit, sump, crack or other potential discharge location.
			Provide the documentation referred to in paragraph 4 of subsection 13 (1) of,
			i. details, including locations, of current and former wells, including all wells described or defined in or under the *Ontario Water Resources Act* and the *Oil, Gas and Salt Resources Act*,
			ii. details of sewage works, including their location,
			iii. details of ground surface, including type of ground cover, such as grass, gravel, soil or pavement, and
			iv. details of current or former railway lines or spurs and their locations.

			Provide the documentation, referred to in subsection 13 (2), of the following,
			i. areas of stained soil, vegetation or pavement,
			ii. stressed vegetation,
			iii. areas where fill and debris materials appear to have been placed or graded,
			iv. potentially contaminating activity, and
			v. details of any unidentified substances found at the property.
		(i) Enhanced Investigation Property	Where subsection 13 (3) applies to the phase one property, provide the documentation referred to in subsection 13 (3) of,
			i. the operations at the property, including processing or manufacturing,
			ii. hazardous materials used or stored at the phase one property,
			iii. products manufactured at the phase one property,
			iv. by-products and wastes at the phase one property,
			v. raw materials handling and storage locations at the phase one property, whether in use or not,
			vi. details of drums, totes and bins at the phase one property,
			vii. details of all oil/water separators at the phase one property, including for each separator the location, installation date, source of incoming liquid and effluent discharge location,
			viii. all vehicle and equipment maintenance areas, including the locations of maintenance, fluid storage, and waste storage areas, whether in use or not,
			ix. details of all spills including the dates, locations, materials involved, and volumes of material spilled,
			x. details of liquid discharge points such as water and French drains,

			including their locations,
			xi. details of operations at the property, including processing or manufacturing and equipment used in processing or manufacturing, and
			xii. details of all hydraulic lift equipment at the property, including elevators, in-ground hoists and loading docks.
			Where subsection 13 (4) applies to a phase one property, provide the documentation referred to in subsection 13 (4).
	(c) Written Description of Investigation		Provide a written description of the investigations carried out pursuant to sections 13 and 14 including,
			i. details of each of the investigations, and
			ii. any findings that are relevant to the existence of an area of potential environmental concern such as the presence on, in or under the phase one property of any of the things to be identified in section 13 or 14 which may be relevant to the existence of an area of potential environmental concern.
7. Review and Evaluation of Information.		(i) Current and Past Uses	Provide a table of current and past uses of the phase one property in a form approved by the Director.
			Provide a description of the current and past uses of the phase one property to its first developed use.
		(ii) Potentially Contaminating Activity	Provide a list and description of each potentially contaminating activity on, in or under the phase one property.
			Provide a list and description of each potentially contaminating activity in the phase one study area that may be contributing to an area of potential environmental concern.
		(iii)Areas of Potential Environmental Concern	Provide a table of areas of potential environmental concern in a form approved by the Director.

			Provide documentation and rationale for the conclusion referred to in clause 16 (3) (a) as to the existence of areas of potential environmental concern including,
			i. a discussion of the logic and reasoning used by the qualified person to evaluate the available information,
			ii. a summary and description of any areas of potential environmental concern determined to exist,
			iii. a summary, description and rationale for contaminants of potential concern identified with respect to each area of potential environmental concern determined to exist, and
			iv. a discussion and description of how any uncertainty or absence of information obtained in each of the components of the phase one environmental site assessment could affect the conclusion.
		(iv) Phase One Conceptual Site Model	Provide one or more figures of the phase one study area that,
			i. show any existing buildings and structures,
			ii. identify and locate water bodies located in whole or in part on the phase one study area,
			iii. identify and locate any areas of natural significance located in whole or in part on the phase one study area,
			iv. locate any drinking water wells at the phase one property,
			v. show roads, including names, within the phase one study area,
			vi. show uses of properties adjacent to the phase one property,
			vii. identify and locate areas where any potentially contaminating activity has occurred, and show tanks in such areas, and

			viii. identify and locate any areas of potential environmental concern.
			Provide a description and assessment of,
			i. any areas where potentially contaminating activity on or potentially affecting the phase one property has occurred,
			ii. any contaminants of potential concern,
			iii. the potential for underground utilities, if any present, to affect contaminant distribution and transport,
			iv. available regional or site specific geological and hydrogeological information, and
			v. how any uncertainty or absence of information obtained in each of the components of the phase one environmental site assessment could affect the validity of the model.
8. Conclusions		(i) Whether Phase Two Environmental Site Assessment Required Before Record of Site Condition Submitted	Provide documentation and rationale for the conclusion referred to in clause 16 (3) (d) as to whether a phase two environmental site assessment is required before a record of site condition may be submitted with respect to all or part of the phase one property including,
			i. a discussion of the logic and reasoning used by the qualified person to evaluate the available information, and
			ii. identification and reporting of data sources for the conclusion, with reference to the specific data and source used in reaching the conclusion.
		(ii) Record of Site Condition Based on Phase One Environmenta	Provide a rationale, where a record of site condition is to be filed based on the phase one environmental site assessment, for why the phase one property is suitable for any of the

		l Site Assessment Alone	types of property use listed in subsection 1 (2) of the regulation.
		(iii)Signatures	Provide original signatures of the qualified person who conducted or supervised the phase one environmental site assessment.
			Provide a statement by the qualified person confirming the carrying out of the phase one environmental site assessment and the findings and conclusions of the report.
9. References			The phase one environmental site assessment report shall include a list of all documents or data cited in the report.
10. Appendices			Provide a current plan of survey of the phase one property that has been prepared, signed and sealed by a surveyor or, where the phase one property consists of land that is administered by the Ministry of Natural Resources under the *Public Lands Act*, a description of the phase one property approved by the Surveyor General.
			Provide a topographic map (Ontario Base Map series) that includes the phase one study area.

TABLE 2
POTENTIALLY CONTAMINATING ACTIVITIES

Item	Column A
	Potentially Contaminating Activity
1.	Acid and Alkali Manufacturing, Processing and Bulk Storage
2.	Adhesives and Resins Manufacturing, Processing and Bulk Storage
3.	Airstrips and Hangars Operation
4.	Antifreeze and De-icing Manufacturing and Bulk Storage
5.	Asphalt and Bitumen Manufacturing
6.	Battery Manufacturing, Recycling and Bulk Storage
7.	Boat Manufacturing
8.	Chemical Manufacturing, Processing and Bulk Storage

9.	Coal Gasification
10.	Commercial Autobody Shops
11.	Commercial Trucking and Container Terminals
12.	Concrete, Cement and Lime Manufacturing
13.	Cosmetics Manufacturing, Processing and Bulk Storage
14.	Crude Oil Refining, Processing and Bulk Storage
15.	Discharge of Brine related to oil and gas production
16.	Drum and Barrel and Tank Reconditioning and Recycling
17.	Dye Manufacturing, Processing and Bulk Storage
18.	Electricity Generation, Transformation and Power Stations
19.	Electronic and Computer Equipment Manufacturing
20.	Explosives and Ammunition Manufacturing, Production and Bulk Storage
21.	Explosives and Firing Range
22.	Fertilizer Manufacturing, Processing and Bulk Storage
23.	Fire Retardant Manufacturing, Processing and Bulk Storage
24.	Fire Training
25.	Flocculants Manufacturing, Processing and Bulk Storage
26.	Foam and Expanded Foam Manufacturing and Processing
27.	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles
28.	Gasoline and Associated Products Storage in Fixed Tanks
29.	Glass Manufacturing
30.	Importation of Fill Material of Unknown Quality
31.	Ink Manufacturing, Processing and Bulk Storage
32.	Iron and Steel Manufacturing and Processing
33.	Metal Treatment, Coating, Plating and Finishing

34.	Metal Fabrication
35.	Mining, Smelting and Refining; Ore Processing; Tailings Storage
36.	Oil Production
37.	Operation of Dry Cleaning Equipment (where chemicals are used)
38.	Ordnance Use
39.	Paints Manufacturing, Processing and Bulk Storage
40.	Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
41.	Petroleum-derived Gas Refining, Manufacturing, Processing and Bulk Storage
42.	Pharmaceutical Manufacturing and Processing
43.	Plastics (including Fibreglass) Manufacturing and Processing
44.	Port Activities, including Operation and Maintenance of Wharves and Docks
45.	Pulp, Paper and Paperboard Manufacturing and Processing
46.	Rail Yards, Tracks and Spurs
47.	Rubber Manufacturing and Processing
48.	Salt Manufacturing, Processing and Bulk Storage
49.	Salvage Yard, including automobile wrecking
50.	Soap and Detergent Manufacturing, Processing and Bulk Storage
51.	Solvent Manufacturing, Processing and Bulk Storage
52.	Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
53.	Tannery
54.	Textile Manufacturing and Processing
55.	Transformer Manufacturing, Processing and Use
56.	Treatment of Sewage equal to or greater than 10,000 litres per day
57.	Vehicles and Associated Parts Manufacturing
58.	Waste Disposal and Waste

	Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners
59.	Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products

O. Reg. 511/09, s. 31; O. Reg. 245/10, s. 5 (1, 2); O. Reg. 179/11, s. 7; O. Reg. 269/11, s. 2.

SCHEDULE E
PHASE TWO ENVIRONMENTAL SITE ASSESSMENTS

PART I
APPLICATION

Application and definitions

1. (1) The requirements in this Schedule apply to phase two environmental site assessments.

(2) Each section in this Schedule is deemed to be a requirement, whether it is described as such or not.

(3) In this Schedule,

"in situ" means in place;

"site investigation" means a site investigation that includes both a field investigation and a non-field investigation;

"soil type" means soil texture class as determined pursuant to Figure 3.16 and Chapter 3 of the Soil Survey Manual, United States Department of Agriculture, Natural Resources Conservation Service, published at its website.

PART II
PLANNING SITE INVESTIGATION

Planning site investigation, specific objectives

2. The following are the specific objectives of the planning of the site investigation component of a phase two environmental site assessment:

1. To plan an investigation that will achieve the general objectives of a phase two environmental site assessment,
   i. through the use of an appropriate and complete information base concerning the phase two property, and
   ii. through the conduct of an investigation based both on information obtained before the phase two environmental site assessment begins and on the incorporation of information obtained during the phase two environmental site assessment.
2. To develop a sampling and analysis plan that will adequately assess all areas of the phase two property where contaminants may be present in land or water on, in or under the property.
3. To develop a quality assurance program that is designed to effectively limit errors and bias in sampling and analysis through implementation of assessment and control measures that will ensure data are useful, appropriate and accurate in the determination of whether the phase two property, or any RSC property within it, meets applicable site condition standards and any standards specified in a risk assessment.

Planning site investigation, specific requirements

3. (1) The qualified person shall ensure the following requirements are met in planning a site investigation:

1. The phase one conceptual site model for the phase one environmental site assessment report shall be used in conjunction with other information in determining,
   i. media for investigation,
   ii. locations and depths for sampling, and
   iii. parameters for laboratory analysis.
2. Information obtained after the completion of the phase one environmental site assessment shall be used to modify the investigation, as appropriate.

(2) The qualified person shall ensure that there is a sampling and analysis plan that includes a quality assurance and quality control program, data quality objectives, standard operating procedures and a description of any physical impediments that interfere with or limit the ability to conduct sampling and analysis.

(3) The quality assurance and quality control program shall include the following requirements:

1. All non-dedicated sampling and monitoring equipment must be cleaned following each use.
2. Where ground water samples are to be analyzed for volatile organic compounds, one trip blank sample shall be submitted for laboratory analysis with each laboratory submission.
3. Specification of the minimum requirements for the number, type and frequency of field quality control measures including,
   i. trip blanks,
   ii. field duplicates, and
   iii. calibration checks on field instruments.
4. Sufficient field duplicate samples shall be collected in each medium being sampled, so that at least one field duplicate sample can be submitted for laboratory analysis for every ten samples submitted for laboratory analysis.
5. At least one field duplicate sample shall be submitted for laboratory analysis for every ten samples submitted for laboratory analysis.

(4) The data quality objectives for all types of field data collected during the phase two environmental site assessment field investigation that set the level of uncertainty in environmental data shall be such that,

(a) the decision-making is not affected; and

(b) the overall objectives of the investigation are met.

(5) Standard operating procedures shall be developed for all of the following field investigation methods used in the field investigation,

(a) borehole drilling;

(b) excavating;

(c) soil sampling;

(d) field screening measurements, including calibration procedures;

(e) monitoring well installation;

(f) monitoring well development;

(g) field measurement of water quality indicators, including calibration procedures;

(h) sediment sampling; and

(i) ground water sampling.

(6) The sampling and analysis plan shall include identification of and rationale and procedures for,

(a) the choice of sampling system, such as a judgmental, random or grid sampling system;

(b) the sampling media;

(c) the number of samples;

(d) sampling frequency;

(e) sampling points;

(f) sampling depth intervals, including the screened intervals of the monitoring wells;

(g) other field information to be obtained, including water levels, field measurements and elevation surveying; and

(h) samples to be submitted for laboratory analysis.

(7) The sampling and analysis plan shall meet the following criteria:

1. The qualified person shall consider,
   i. findings as to potentially contaminating activity,
   ii. all contaminants of potential concern or appropriate subsets of such contaminants, and
   iii. any other information and matters relating to the environmental condition of the property which are relevant to an informed professional judgment.
2. After considering the matters referred to in paragraph 1, the qualified person shall determine,
   i. sampling and analysis for all contaminants of potential concern, or appropriate subsets of such contaminants, and
   ii. appropriate sampling and analysis for any other relevant contaminants.

Soil vapour investigations

4. (1) Where a site investigation is to include a soil vapour investigation, the requirements of this Part apply, with necessary modifications.

(2) Without limiting the generality of subsection (1),

(a) when soil vapour samples are to be analyzed for volatile contaminants, including volatile organic compounds, one trip blank sample shall be submitted for laboratory analysis with each laboratory submission;

(b) sufficient field duplicate samples of soil vapour shall be collected so that at least one field duplicate sample can be submitted for laboratory analysis for every ten samples submitted for laboratory analysis;

(c) at least one field duplicate sample of soil vapour shall be submitted for laboratory analysis for every ten samples submitted for laboratory analysis; and

(d) in addition to the standard operating procedures referred to in subsection 3 (5), standard operating procedures shall be developed for soil vapour probe installation and soil vapour probe development, performance, leak testing and purging and sampling.

PART III
CONDUCTING THE SITE INVESTIGATION

GENERAL

Site investigation, specific objectives

5. The following are the specific objectives of the site investigation component of a phase two environmental site assessment:

1. To determine what applicable site condition standards apply to the phase two property.
2. To confirm whether contaminants are present on, in or under the phase two property, and, if so, what the contaminants are, where they are located on, in or under the phase two property and at what concentrations.
3. To determine whether any contaminants on, in or under the phase two property are present at concentrations higher than applicable site condition standards by,
   i. investigating and characterizing soil, ground water and sediment on, in or under the phase two property, and
   ii. taking measures to further investigate and characterize the soil, ground water and sediment following any actions taken to reduce the concentration of contaminants on, in or under the phase two property.
4. To determine whether any contaminants on, in or under the phase two property are present at concentrations higher than the standards specified in the risk assessment for the contaminants, where a risk assessment has been accepted with respect to contaminants on, in or under the phase two property, by,
   i. investigating and characterizing soil, ground water and sediment on, in or under the phase two property, and
   ii. taking measures to further investigate and characterize the soil, ground water and sediment following any actions taken to reduce the concentration of contaminants on, in or under the phase two property.

Sampling and analysis of ground water

6. (1) The qualified person shall ensure that the site investigation includes investigation, sampling and analysis of ground water on, in or under the phase two property where it is required or advisable to do so to achieve any of the objectives of,

(a) a phase two environmental site assessment or its components; or

(b) any of the other provisions of the regulation, this Schedule or any other Schedule to the regulation.

(2) The qualified person shall ensure that the site investigation includes investigation, sampling and analysis of ground water on, in or under the phase two property where the phase two property is an enhanced investigation property.

(3) The qualified person shall ensure that the site investigation includes investigation, sampling and analysis of ground water on, in or under the phase two property where there is no soil on, in or under the property and either,

(a) an investigation, sampling and analysis of soil on, in or under the property already undertaken,

(i) is not, or cannot be used as part of the phase two environmental site assessment, or

(ii) does not meet the requirements and objectives of a phase two environmental site assessment with respect to soil; or

(b) no investigation, sampling and analysis of soil on, in or under the property has been undertaken.

(4) For the purposes of clause (3) (a), there is no soil on, in or under the property when the soil present is not sufficient to investigate, sample and analyze in a manner which will meet the requirements and objectives of a phase two environmental site assessment.

DELINEATION, GENERAL

Site investigation, delineation

7. (1) The qualified person shall ensure that all areas on, in or under the phase two property where a contaminant is present at a concentration greater than the applicable site condition standard for the contaminant shall be delineated laterally and vertically for each contaminant present in soil, ground water or sediment on, in or under the phase two property.

(2) The qualified person shall ensure that all areas on, in or under the phase two property where a contaminant is present at a concentration greater than the standard specified in the risk assessment for the contaminant shall be delineated laterally and vertically for each contaminant present in soil, ground water or sediment on, in or under the phase two property for which a standard has been specified in a risk assessment that has been accepted by the Director.

(3) The qualified person shall ensure the lateral and vertical delineations referred to in subsections (1) and (2) are undertaken, as appropriate in the circumstances,

(a) during the investigation and characterization of contaminants on, in or under the phase two property; or

(b) following any actions taken to reduce the concentration of contaminants on, in or under the phase two property.

(4) The qualified person shall ensure that during the delineations referred to in subsections (1) and (2),

(a) samples of each medium being investigated are collected from depths and locations on, in or under the phase two property and analyzed for contaminants, until it is determined that samples have been collected from the areas of highest concentration of contaminants on, in or under the phase two property;

(b) areas of highest concentration of each contaminant in each medium being investigated on, in or under the phase two property are identified and located; and

(c) the delineation is conducted by assuming the lateral and vertical extent of the area in which a contaminant is present at a concentration greater than the applicable site condition standard for that contaminant extends laterally or vertically, as the case may be, from a sampling location at which the contaminant is present at a concentration greater than the applicable site condition standard for the contaminant to the next sampling location at which the concentration of the contaminant is equal to or below the applicable site condition standard for the contaminant.

(5) The qualified person shall ensure that the depth and thickness of sediments on, in or under the phase two property where a contaminant is present at concentrations greater than the applicable site condition standard or standard specified in a risk assessment, as the case may be, is determined for the contaminant while the presence of contaminants in sediment is being considered during the delineations referred to in subsections (1) and (2).

FIELD INVESTIGATION EQUIPMENT, METHODS AND REQUIREMENTS

Ground water sampling methods, general requirements

8. For a ground water sampling method to be used to characterize contamination or determine if the concentration of a contaminant is above, at or below an applicable site condition standard or standard specified in a risk assessment for the contaminant, the following requirements shall be met:

1. Sampling depth intervals, including the screened intervals of monitoring wells shall be positioned,
   i. within the geologic formation in which a contaminant may be present,
   ii. so as to isolate the zones where contaminants may be present, and
   iii. so as to delineate both dissolved and separate phase contaminants.
2. Where petroleum hydrocarbons or light non-aqueous phase liquids may be present on, in or under the phase two property, sampling depth intervals, including screened intervals of monitoring wells, shall be positioned to intersect the water table.
3. Where a monitoring well is being used, monitoring well screens shall not exceed 3.1 metres in length, based on the saturated length of the screen.
4. REVOKED: O. Reg. 179/11, s. 8 (3).

Requirements where sampling re meeting standards

9. (1) Where sampling of ground water is being undertaken to demonstrate if the applicable site condition standard for a contaminant has been met or not, the following requirements shall be followed:

1. Samples shall be collected from a monitoring well or equivalent professionally acceptable ground water collection method, and not from a test pit, excavation, borehole, undeveloped monitoring well, or any other similar source.
2. A monitoring well from which a sample is to be collected shall have been developed to remove any fluids that may have been introduced into the well during drilling and to remove particulates that may have become entrained in the well and filter pack.
3. A monitoring well from which a sample is to be collected shall have been appropriately purged immediately prior to sampling.
4. Precautions shall be taken to minimize the potential for cross-contamination or contamination through preferential pathways.

(2) The qualified person shall ensure that the well development and purging referred to in paragraphs 2 and 3 of subsection (1) shall be documented by,

(a) recording,
   (i) the date of the development or purging,
   (ii) the time the development or purging started and stopped, and
   (iii) the volume of fluid removed from the well during development or purging;
(b) recording a rationale for concluding the development or purging was complete; and
(c) recording a description of the measures taken to minimize cross contamination between wells when using non-dedicated equipment.

Limitation on use of measurements taken by field screening equipment

10. Measurements taken by field screening equipment shall not be used to demonstrate that the applicable site condition standard or standard specified in a risk assessment for a contaminant have been met on, in or under the phase two property.

Following standard operating procedures

11. (1) The standard operating procedures referred to in subsection 3 (5) shall be followed during the field investigation.

(2) A qualified person or person supervised by a qualified person may deviate from standard operating procedures as appropriate, but the qualified person shall ensure that there is a professional rationale for any deviation.

(3) The qualified person shall ensure that the standard operating procedures and any deviations from them, with a rationale for any deviation, used during the phase two environmental site assessment field investigation are documented in a manner that is sufficient to allow a third party to review the adequacy of the methods used.

Identification and investigation of aquifers and aquitards

12. The qualified person shall ensure that all aquifers and aquitards on, in or under a phase two property which are relevant for determining the location and concentration of contaminants are identified and investigated.

SAMPLING LOCATION AND SAMPLING POINT REQUIREMENTS

Sampling points, soil and ground water

13. The qualified person shall ensure the following is taken into account when sampling points are being determined for soil and ground water during the field investigation:

1. The sampling and analysis plan.
2. Any new information about areas of potential environmental concern, contaminants and geologic and hydrogeologic conditions identified during the investigation up to the time of sampling.
3. The phase one conceptual site model from the phase one environmental site assessment.
4. The objectives and requirements of the site investigation.

Sampling points, sediment

14. The qualified person shall ensure, in addition to the matters outlined in section 13, that the following is taken into account when sampling points for sediment are being determined during the course of the field investigation:

1. The size of the sampling area.
2. The location of depositional areas.
3. New information about areas of potential environmental concern, contaminants and geologic and hydrologeological conditions identified during the field investigation.

Sampling locations, sediment

15. (1) The qualified person shall ensure that sediment samples are collected for all contaminants expected to be present on, in or under the phase two property and from locations on, in or under the phase two property that are most likely to have the contaminants present at concentrations above the applicable site condition standards.

(2) The sampling done under subsection (1) shall be based on the applicable criteria set out in section 14.

Sampling requirements where contaminant present above applicable standards

16. If at any time during the phase two field investigation a ground water sample is collected and analyzed for a contaminant and the analysis shows the contaminant is present at a concentration greater than the applicable site condition standard for the contaminant, the qualified person shall ensure that,

(a) ground water samples are collected cross-gradient and down-gradient from the sampling point from which the ground water sample showing the concentration was collected;

(b) the sample collected from each of the additional cross-gradient and down-gradient sampling points are submitted for laboratory analysis; and

(c) the samples are analyzed for each contaminant that was shown to be present at a concentration greater than the applicable site condition standard for the contaminant, and for any other associated or related contaminants.

COLLECTING, HANDLING AND ANALYZING SAMPLES

Soil samples, requirements

17. The qualified person shall ensure that the following requirements concerning soil sampling are met:

1. Soil samples for characterization or delineation shall be collected from undisturbed soils on, in or under the phase two property and not from soil which has been excavated, unless delineation is being undertaken after completion of actions to reduce the concentration of contaminants in which case soil samples shall be collected both from undisturbed soils on, in or under the phase two property and from stockpiles of soil which is intended to remain on the property permanently.
2. Soil samples shall be collected using professionally acceptable soil collection methods.
3. Precautions shall be taken to minimize the potential for cross-contamination or contamination through preferential pathways.
4. Grain size analysis shall be undertaken by a laboratory whenever a standard for fine-medium textured soil is to be applied.

Soil sampling and analysis

18. The qualified person shall ensure that the number of samples of soil collected and analyzed is sufficient to determine the subsurface stratigraphy at or under the phase two property and the location of contaminants in soil, on, in or under the phase two property.

Sediment samples

19. The qualified person shall ensure that for sediment samples a record is made of the depth at which each sample was collected and of the depth interval each sample is intended to represent.

Contaminant not listed

20. Where a contaminant is identified on, in or under the phase two property during the site investigation and the contaminant is one for which there is no standard listed in the Soil, Ground Water and Sediment Standards, samples of the contaminant shall be collected and analyzed if the contaminant is a contaminant of concern.

SELECTING SAMPLES FOR ANALYSIS

Selecting soil samples for analysis

21. The qualified person shall ensure the following are considered when soil samples to be analyzed are being selected in order to ensure the samples analyzed are representative of the maximum concentration of a contaminant in each area of the phase two property to be investigated:

1. Any evidence of the presence of a contaminant.
2. The maximum concentrations of a contaminant,
   i. measured using field screening equipment, and
   ii. any other field screening means which may be necessary to ensure the analysis includes such maximum concentrations.

MEASURING GROUND WATER LEVELS AND DETERMINING GROUND WATER FLOW DIRECTION

Variation in ground water level

22. (1) The qualified person shall ensure that measuring ground water levels and determining ground water flow direction is undertaken during the site investigation and that this includes consideration of,

(a) temporal ground water level variations on, in or under the phase two property; and

(b) whether and how such variations may affect the distribution and concentration of contaminants in the ground water.

(2) The measurement and determination referred to in subsection (1) shall be carried out at the times and places needed, but shall be included whenever ground water sampling is undertaken.

Ground water flow directions

23. (1) When ground water flow directions are being determined pursuant to section 22, the qualified person shall ensure this is done through an assessment that includes,

(a) measuring water levels to interpret ground water flow directions in any aquifer that is on, in or under a phase two property and in which a contaminant may be present at a concentration above the applicable site condition standard for the contaminant;

(b) using water level measurements that are representative of static and actual conditions;

(c) taking into account all water level measurements made when ground water samples have been collected;

(d) determining the direction of interpreted ground water flow in each aquifer investigated;

(e) assessing the potential for temporal variability in ground water flow direction;

(f) determining a reference elevation for each monitoring well reported to the nearest centimetre relative to a geodetic or permanent and recoverable benchmark;

(g) measuring water levels in a monitoring well at least 24 hours after the development of the well;

(h) determining the ground water elevation of each aquifer in which water level measurements were taken;

(i) installing a minimum of three monitoring wells, not placed in a straight line, in each aquifer to be investigated, at locations and in a manner appropriate to interpret horizontal flow directions;

(j) determining horizontal hydraulic gradients for each aquifer; and

(k) taking water level measurements whenever ground water samples are collected from a monitoring well, and at such other times as may be necessary to determine ground water flow direction and temporal ground water level variations.

(2) The qualified person shall ensure that the following measures are undertaken where a phase two property is one at which petroleum hydrocarbons, light non-aqueous phase liquids, volatile contaminants, including volatile organic compounds, or dense non-aqueous phase liquids may be present on, in or under the property:

1. Testing each monitoring well with an interface probe to determine if light or dense non-aqueous phase liquids are present in the well.
2. Where light or dense non-aqueous liquids are present, measuring the thickness of such free product and including the measurement in determining water levels and measuring and interpreting ground water flow directions.

DOCUMENTING THE FIELD INVESTIGATION

Finalized field logs, soil

24. (1) The qualified person shall ensure that field logs are recorded and finalized for all intrusive investigation points and test holes in the field investigation to document the soil conditions on, in or under the phase two property.

(2) A finalized field log shall include,

(a) a unique identification number;

(b) the date;

(c) a description of type and condition of geologic material encountered;

(d) a description of type and condition of other material encountered;

(e) the soil colour;

(f) the soil vapour measurement from field screening for volatile contaminants, including volatile organic compounds;

(g) the soil moisture content, using a qualitative description;

(h) the observations concerning the soil;

(i) the identification of soil samples sent for laboratory analysis;

(j) the soil sample depths;

(k) the soil sampling methods;

(l) evidence of free flowing product;

(m) the total depth drilled; and

(n) any drilling refusal.

Monitoring wells and test holes, finalized field logs

25. (1) The qualified person shall ensure that field logs are recorded and finalized for all monitoring wells and test holes constructed during the field investigation to document the ground water conditions on, in or under the phase two property.

(2) A finalized field log for a monitoring well shall include,

(a) the surveyed location and elevation of the well;

(b) the monitoring well identification number;

(c) the details of the well construction, including screened interval, sand pack, seal location and thickness, well diameter and screen slot size;

(d) the date;

(e) the total depth drilled; and

(f) any drilling refusal.

Sediment sampling, finalized field logs

26. (1) The qualified person shall ensure that field logs are recorded and finalized for all sediment sampling during the field investigation to document the presence of contaminants on, in or under the phase two property that may be present at concentrations above the applicable site condition standards.

(2) A finalized field log for sediment shall include,

(a) a unique sample identification number;

(b) the date;

(c) the sediment type, for example gravel, sand, silt, clay or organic, or types, if different sediment types appear at different depths;

(d) the sediment colour or colours, if different sediment colours appear at different depths;

(e) the mixing layer depth;

(f) a description of bottom dynamics where samples are collected;

(g) the sediment moisture content, using a qualitative description;

(h) any significant observations concerning the sediment;

(i) the identification of sediment samples sent for laboratory analysis;

(j) the sediment sample depths;

(k) the sediment sampling methods;

(l) evidence of free flowing product or strong chemical odour; and

(m) the presence or absence of aquatic biota in the sediment.

SOIL VAPOUR INVESTIGATION REQUIREMENTS

Soil vapour investigation requirements, general

27. (1) The qualified person shall ensure that the requirements that apply to an investigation of soil vapour that is being undertaken as part of a site investigation at a phase two property are met.

(2) The requirements of this Schedule apply, with necessary modifications and subject to sections 28 and 29 to the conduct of a soil vapour investigation at a phase two property.

Limitation on use of measurements taken by field screening equipment

28. Measurements taken by field screening equipment shall not be used to determine the soil vapour concentration of a contaminant on, in or under the phase two property.

Soil vapour probes, finalized field logs

29. (1) The qualified person shall ensure that field logs are recorded and finalized for all soil vapour probes constructed during the field investigation to document the subsurface conditions on, in or under the phase two property.

(2) In addition to the information entered into the field log with respect to soil samples under section 24, a finalized field log for a soil vapour probe shall include,

(a) the location and elevation of the well or probe;

(b) the identification number; and

(c) the details of the soil vapour probe construction, including screened interval, sand pack, seal location and thickness, soil vapour probe diameter and screen slot size.

SOIL EXCAVATED AT OR BROUGHT TO THE PHASE TWO PROPERTY

Specific objectives

30. The specific objective of the requirements concerning soil excavated at the phase two property for possible reuse there or that does not originate at the phase two property but is brought from another property to the phase two property to remain at the phase two property after the phase two environmental site assessment is to determine reliably whether,

(a) the applicable site condition standards or any standard specified in a risk assessment with respect to the property, for all contaminants in the soil have been met; and

(b) when the soil is used or reused at the phase two property, the property meets the applicable site condition standards or any standard specified in a risk assessment.

Requirements for soil to be brought to phase two property

31. Where soil is excavated at or brought from another property to a phase two property the provisions of this Schedule and sections 47 and 48 of the regulation applicable to the collection and recording of samples of soil and the methods of sampling, analysis of samples, and reporting of analytical results, including requirements for sampling and analysis in order to determine whether soil meets the applicable site condition standards for the contaminants in the soil or any standard for a contaminant specified in a risk assessment with respect to the phase two property, apply, with necessary modifications, in addition to the requirements of sections 32 to 36.

Requirements for soil to be brought to phase two property

32. The qualified person shall ensure that where soil that does not originate at the phase two property but is to be brought from another property to a phase two property and remain at the phase two property after the filing of a record of site condition, the following requirements are met:

1. Subject to paragraph 2, the concentration of each contaminant in the soil must be equal to or lesser than the standard that would be the applicable site condition standards for the contaminant assuming it was already in, on or under the phase two property.
2. Where there has been a risk assessment with respect to one or more contaminants in, on or under the phase two property that included a soil management plan and the risk assessment has been accepted by the Director, the concentration of a contaminant in the soil may be equal to or lesser than a standard specified in the risk assessment for the contaminant.
3. Samples shall be collected from the soil to be brought to the phase two property and shall be analyzed and the concentrations of contaminants known, before any soil is brought to the phase two property in order to determine what contaminants are in the soil, and whether the standards for each such contaminant referred to in paragraph 1, and any standard for a contaminant which may have been specified pursuant to paragraph 2 are met.
4. The samples collected and analyzed under paragraph 3 must be,
    i. representative samples collected for the purpose of determining the concentration of any contaminant in the soil to be brought to the phase two property and at locations and frequencies which will be adequate to allow the concentrations of any contaminants in the soil to be known,

ii. collected by or under the supervision of a qualified person by an individual qualified to take samples for such purpose following a plan determined by the qualified person to collect samples at locations and frequencies which will be adequate to allow the concentrations of any contaminants in the soil to be known, and

iii. collected for the purpose of determining if contaminants are present in the soil as a result of any potentially contaminating activity or other environmental condition,

A. at the property from which the soil originated while the soil was there,

B. at any property at which the soil has subsequently been stored while the soil was being stored at that property, and

C. while the soil was being handled, stored or transported at any time before its final placement on, in or under the phase two property.

Analysis of soil to be brought to the phase two property

33. The samples referred to in section 32 shall be analyzed for contaminants that may reasonably be expected to be present in the soil, having regard to,

(a) the property from which the soil was taken before being brought to the phase two property;

(b) the handling of the soil, including its storage and transport, following its original excavation; and

(c) any other relevant factors, including potentially contaminating activity.

Sampling of soil to be brought to the phase two property

34. (1) Samples of the soil referred to in section 32 shall be collected and selected for analysis so as to obtain representative results that locate any areas in the soil being sampled where a contaminant may be present at concentrations greater than the applicable site condition standard for the contaminant.

(2) At least one soil sample shall be analyzed for each 160 cubic metres of soil for the first 5,000 cubic metres to be assessed at each source from which soil is being brought to the phase two property, following which at least one sample for each additional 300 cubic metres of soil which is to remain on, in or under the phase two property shall be analyzed.

Segregation of soil excavated from or under the phase two property

35. (1) The qualified person shall ensure that soil excavated from or under the phase two property during the phase two field investigation or in the course of remediation, and not removed from the phase two property as part of the excavating but placed in stockpiles for possible reuse on, in or under the phase two property, shall be segregated in separate stockpiles on or above the phase two property according to contaminant and concentration of contaminant.

(2) Decisions on how to segregate excavated soil referred to in subsection (1) shall be based on the results of any one or more of,

(a) in situ characterization;

(b) field screening;

(c) sample collection and analysis; and

(d) indications of contamination.

Sampling and analysis of soil in stockpiles

36. The qualified person shall ensure that where excavated soil referred to in subsection 35 (1) is intended for reuse on, in or under the property, the soil shall be sampled and analyzed as follows, before it is reused:

1. Samples of the excavated soil from each stockpile to be reused shall be collected and analyzed so as to characterize the contaminants present in the excavated soil.
2. Samples must be selected for analysis and contaminants chosen for analysis on the basis of all available information, including the phase one environmental site assessment and subsequently obtained information and must include analysis for any contaminants which may have been introduced to, brought onto, released to or created in land and water on, in or under the phase two property during actions taken to reduce the concentration of contaminants.
3. Sampling locations must be chosen so as to ensure uniformly distributed and representative sampling collection throughout the stockpile.
4. Samples must not be collected from the surface of a stockpile.
5. Samples of soil from stockpiles must be collected and analyzed by an accredited laboratory, at or above the applicable minimum frequencies set out in Table 2 of this Schedule.

ACTIONS TAKEN TO REDUCE THE CONCENTRATION OF CONTAMINANTS

Required precautionary measures during remediation

37. The qualified person shall ensure that the following precautionary measures are undertaken before and during remediation of the phase two property:

1. Before remediation is undertaken, the steps necessary to establish baseline and background conditions relevant to the proposed remediation method are taken to a degree that is adequate to detect any increases of contaminants on, in or under the phase two property following remediation, including contaminants created or introduced to the property during remediation.
2. Sampling of appropriate monitoring wells and analysis of ground water samples occurs for appropriate contaminants, including contaminants created or introduced to the property during remediation.

Free flowing product

38. The qualified person shall ensure that the volume of any free flowing product removed from ground water on, in or under the phase two property is monitored and recorded.

CONFIRMATION SAMPLING AND ANALYSIS

Objectives of confirmation sampling and analysis

39. The specific objectives of confirmation sampling and analysis are the following:

1. To confirm the effect and effectiveness, if any, of remediation undertaken to reduce the concentration of contaminants on, in or under the phase two property.
2. To provide a reliable basis for conclusions as to whether the applicable site condition standards or standards specified in a risk assessment have or have not been met for each contaminant.
3. To identify and demonstrate the location and concentration of contaminants on, in or under the phase two property following the completion of remediation undertaken to reduce the concentration of contaminants on, in or under the phase two property.

Requirements for confirmation sampling and analysis

40. The following requirements apply to confirmation sampling and analysis:

1. Confirmation sampling and analysis shall be undertaken during and following actions taken to reduce the concentration of contaminants on, in or under the phase two property.

2. The requirements of this Schedule and sections 47 and 48 of the regulation applicable to the collection and recording of samples of soil, ground water or sediment and the methods of sampling, analysis of samples and reporting of analytical results apply to confirmation samples.
3. When actions intended to reduce the concentration of contaminants on, in or under the phase two property are to be taken, the qualified person shall,
    i. design and implement a sampling and analysis program to collect samples and analyze them from all locations where remediation was undertaken,
    ii. ensure samples are collected and analyzed for each contaminant in any area and medium where the contaminant was present at a concentration greater than the applicable site condition standard or standard specified in a risk assessment for the contaminant before remediation, where the soil, ground water or sediment remains on, in or under the phase two property after remediation, and
    iii. ensure samples are collected and analyzed for each contaminant where soil, ground water or sediment has been returned to the phase two property after remediation at a location away from the phase two property.
4. The confirmation sampling and analysis program shall be designed and conducted so as to demonstrate whether the phase two property and any property under it meets or does not meet the applicable site condition standards or any standard specified in a risk assessment for all contaminants of concern.
5. Confirmation sampling shall be conducted at locations and depths which include those areas on, in or under the phase two property, where a contaminant was present, before remediation, at a concentration greater than the applicable site condition standard or any standard specified in a risk assessment for the contaminant and the maximum concentration of the contaminant in the area was located.
6. Samples taken from monitoring wells into which material was introduced into the monitoring well for purposes of remediation shall not be used to meet the objectives of confirmation sampling, including being used as evidence to demonstrate that the phase two property meets the applicable site condition standard or any standard specified in a risk assessment for a contaminant.
7. Where part of the soil on, in or under a phase two property has been excavated the qualified person shall ensure that,
    i. confirmation samples of soil are collected from each wall and floor of the excavation and analyzed in order to demonstrate that the limits of the excavation are appropriate and that the excavation has included all areas where a contaminant may be present at a concentration greater than the applicable site condition standard or any standard specified in a risk assessment, and
    ii. the number and location of samples at each excavation is equal to or greater than the minimum requirements set out in Table 3 of this Schedule or, where the floor area of the excavation is greater than 1,000 square metres, is adequate to meet the requirements of subparagraph i, is greater than the number and location requirements in Table 3 for a floor area of between 750 to 1,000 square metres, and follows the guidance in Note 1 to Table 3.
8. Where a contaminant is present in ground water on, in or under a phase two property at a concentration greater than the applicable site condition standard for the contaminant or any standard specified in a risk assessment for the contaminant which has been accepted under clause 168.5 (1) (a) of the Act, and actions have been taken on, in or under the phase two property to

reduce the concentration of the contaminant to meet the standard which applies to the contaminant in the circumstances, the qualified person shall ensure that,

i. confirmation sampling of ground water is conducted, in each area where the actions occurred or to which material was returned following remediation at a location away from the property as follows:

A. where the remediation is in situ remediation, until the results from analysis of samples collected from four consecutive quarterly sampling events, the first of which is conducted a minimum of 90 days after the last remedial action, are for all contaminants analyzed below the applicable site condition standards or, where applicable, any standards specified in a risk assessment, and

B. where the remediation is not remediation described in sub-subparagraph A but is excavation on, in or under the phase two property, until the results from analysis of samples collected from two consecutive quarterly sampling events, the first of which is conducted a minimum of 90 days after the last remedial action, are for all contaminants analyzed below the applicable site condition standards or, where applicable, any standards specified in a risk assessment, and

ii. the contaminants sampled and analyzed include all contaminants for which remediation was undertaken and any contaminants which may have been introduced to, created in or brought onto the land or water in, on or under the phase two property or released during remediation.

9. Where confirmation sampling is being undertaken pursuant to paragraph 8, the qualified person shall ensure that water level measurements are also taken in the monitoring wells from which the confirmation samples are being taken.

SITE ASSESSMENT REQUIREMENTS FOR RISK ASSESSMENT

Requirements for risk assessment

41. Where the owner of a phase two property wishes to submit a modified generic risk assessment, the qualified person shall ensure that in any case where in the risk assessment an assumed value for any assumption set out under an assumption category in Table 4 of this Schedule to be modified from the assumed value for the assumption used by the Ministry to develop the full depth generic site condition standards, an assessment is carried out which satisfies the minimum requirements and meets the objective set out in Table 4 with respect to that assumption category.

Requirements of this Schedule

42. The requirements of this Schedule that are relevant to an objective or minimum requirement in Table 4 of this Schedule which must be met pursuant to section 41 apply, with necessary modifications, to the minimum requirement.

PART IV
REVIEW AND EVALUATION OF INFORMATION

Review and evaluation of information

43. (1) The qualified person shall review, interpret and evaluate the information used in the planning of the site investigation and obtained from conducting the site investigation.

(2) Based on the review, interpretation and evaluation, the qualified person shall prepare a phase two conceptual site model of the phase two property that demonstrates the current condition of the phase two property or, where remedial actions have been undertaken, the condition of the phase two property before the remedial actions were undertaken.

(3) The format of the phase two conceptual site model shall consist of,

(a) diagrams, cross-sections and figures; and

(b) narrative, including explanation of the contents of the diagrams, cross-sections and figures and the logical bases for the interpretations and the scientific processes that account for the contaminant distribution.

(4) The phase two conceptual site model shall include a narrative description and assessment of,

(a) areas of potential environmental concern; and

(b) any subsurface structures and utilities on, in or under the phase two property that may affect contaminant distribution and transport.

(5) The phase two conceptual site model shall include a narrative description of, and, as appropriate, figures illustrating, the physical setting of the phase two property and any areas under it including,

(a) stratigraphy from ground surface to the deepest aquifer or aquitard investigated;

(b) hydrogeological characteristics, including aquifers, aquitards and, in each hydrostratigraphic unit where one or more contaminants are present at concentrations above the applicable site condition standards, lateral and vertical hydraulic gradients;

(c) approximate depth to bedrock;

(d) approximate depth to water table;

(e) any respect in which section 41 or 43.1 of the regulation applies to the property;

(f) areas where soil has been brought from another property and placed on, in or under the phase two property; and

(g) approximate locations, if known, of any proposed buildings and other structures.

(6) Where a contaminant is present on, in or under the phase two property at a concentration greater than the applicable site condition standard, the phase two conceptual site model shall identify,

(a) each area where a contaminant is present on, in or under the phase two property at a concentration greater than the applicable site condition standard;

(b) the contaminants associated with each of the areas referred in clause (a); and

(c) each medium in which a contaminant associated with an area referred to in clause (a) is present.

(7) Where a contaminant is present on, in or under the phase two property at a concentration greater than the applicable site condition standard, the phase two conceptual site model shall include a narrative description of,

(a) what is known about each of the areas referred to in clause (6) (a);

(b) the distribution, in each of the areas referred to in clause (6) (a), of each contaminant present in the area at a concentration greater than the applicable site condition standard, for each medium in which the contaminant is present, together with figures showing the distribution;

(c) anything known about the reason for the discharge into the natural environment of the contaminants present on, in or under the phase two property at a concentration greater than the applicable site condition standard;

(d) anything known about migration away from any area of potential environmental concern of the contaminants present on, in or under the phase two property at a concentration greater than the applicable site condition standard, including the identification of any preferential pathways;

(e) climatic or meteorological conditions that may have influenced distribution and migration of the contaminants, such as temporal fluctuations in ground water levels; and

(f) if applicable, information concerning soil vapour intrusion of the contaminants into buildings including,

(i) relevant construction features of a building, such as a basement or crawl space,

(ii) building heating, ventilating and air conditioning design and operation, and

(iii) subsurface utilities.

(8) Where contaminants on, in or under the phase two property are present at concentrations greater than the applicable site condition standard, the phase two conceptual site model shall include one or more cross-sections showing,

(a) the lateral and vertical distribution of a contaminant in each area where the contaminants is present at concentrations greater than the applicable site condition standard in soil, ground water and sediment;

(b) approximate depth to water table in each area referred to in clause (a);

(c) stratigraphy from ground surface to the deepest aquifer or aquitard investigated; and

(d) any subsurface structures and utilities that may affect contaminant distribution and transport in each area referred to in clause (a).

(9) For each areas where a contaminant is present on, in or under the property at a concentration greater than the applicable site condition standard for the contaminant, the phase two conceptual site model shall include a diagram identifying, with narrative explanatory notes,

(a) the release mechanisms;

(b) contaminant transport pathway;

(c) the human and ecological receptors located on, in or under the phase two property;

(d) receptor exposure points; and

(e) routes of exposure.

(10) During the course of the phase two environmental site assessment or any subsequent phase one or phase two environmental site assessment of the phase two property or other site assessment work with respect to the phase two property, the qualified person shall update the review, evaluation and interpretation as further information becomes available.

PART V
PHASE TWO ENVIRONMENTAL SITE ASSESSMENT REPORT

Preparation of report

44. The qualified person shall ensure that a phase two environmental site assessment report which meets the requirements of this Part is prepared.

Phase two environmental site assessment report, specific objectives

45. The following are the specific objectives of a phase two environmental site assessment report:

1. To document the presence or absence of contaminants in the land or water on, in or under the phase two property.

2. To document the determination of the location of one or more contaminants in the land or water on, in or under the phase two property.

3. To provide a record of a phase two environmental site assessment of the phase two property that demonstrates, in a manner that is clear and can be assessed and reconstructed, how the phase two environmental site assessment of the property was carried out, and, in particular, to document and demonstrate,

   i. how the general and specific objectives of a phase two environmental site assessment, including each of its components, were achieved and how the minimum requirements for the objectives were met,

   ii. to document the basis for certifications in a record of site condition as to whether all or that part of the phase two property that may comprise the RSC property meets the applicable site condition standards or standards specified in a risk assessment for one or more contaminants, and

   iii. to document information needed to undertake a risk assessment of the phase two property with respect to one or more contaminants.

Phase two environmental site assessment report, general requirements

46. The phase two environmental site assessment report shall be based on the following:

1. Information obtained from planning and conducting the phase two environmental site assessment.
2. Interpretation and evaluation of the information from planning and conducting the phase two environmental site assessment.
3. Any additional information that the qualified person considers relevant.

Phase two environmental site assessment report, general requirements

47. (1) The phase two environmental site assessment report shall,

(a) be divided into the report sections as specified in Table 1 of this Schedule; and

(b) include the headings and sub-headings set out in Table 1.

(2) The phase two environmental site assessment report shall address the requirements set out in Table 1 of this Schedule.

(3) The qualified person may include report sections, headings and sub-headings in addition to those set out in Table 1 of this Schedule and other information in the phase two environmental site assessment report.

(4) The following sub-headings in Report Section 5 (Investigation Method) of Table 1 of this Schedule and the requirements associated with the sub-headings do not apply unless there has been sampling of ground water during the phase two environmental site assessment:

1. Ground Water: Monitoring Well Installation.
2. Ground Water: Field Measurement of Water Quality Parameters.
3. Ground Water: Sampling.

(4.1) Sub-Heading (iii) (Soil: Sampling) in Report Section 5 (Investigation Method) of Table 1 of this Schedule and the requirements associated with the sub-heading do not apply unless there has been sampling of soil during the phase two environmental site assessment.

(5) Sub-Heading (viii) (Sediment: Sampling) in Report Section 5 (Investigation Method) of Table 1 of this Schedule and the requirements associated with it do not apply unless there has been sampling of sediment during the phase two environmental site assessment.

(6) The following sub-headings in Report Section 6 (Review and Evaluation) of Table 1 of this Schedule and the requirements associated with the sub-headings do not apply unless there has been sampling of ground water during the phase two environmental site assessment:

1. Ground Water: Elevations and Flow Direction.
2. Ground Water: Hydraulic Gradients.
3. Ground Water: Quality.

(6.1) The following sub-headings in Report Section 6 (Review and Evaluation) of Table 1 of this Schedule and the requirements associated with the sub-headings do not apply unless there has been sampling of soil during the phase two environmental site assessment:

(iv) Fine-Medium Soil Texture.

(v) Soil: Field Screening.

(vi) Soil Quality.

(7) Sub-Heading (viii) (Sediment Quality) in Report Section 6 (Review and Evaluation) of Table 1 of this Schedule and the requirements associated with it do not apply unless there has been sampling of sediment during the phase two environmental site assessment.

(8) The requirements in Report Section 9 (Figures and Tables) of Table 1 of this Schedule which refer to monitoring wells, ground water, ground water elevations or analytical results of ground water sampling do not apply unless there has been sampling of ground water during the phase two environmental site assessment.

(9) The requirements in Report Section 9 (Figures and Tables) of Table 1 of this Schedule which refer to analytical results of sediment sampling do not apply unless there has been sampling of sediment during the phase two environmental site assessment.

(9.1) The requirements in Report Section 9 (Figures and Tables) of Table 1 of this Schedule which refer to soil data or analytical results of soil sampling do not apply unless there has been sampling of soil during the phase two environmental site assessment.

(10) The following requirements associated with Heading (c) (Soil Excavated at or Brought to the Phase Two Property) in Report Section 10 (Appendices) of Table 1 of this Schedule do not apply, unless the conditions in the paragraph are met:

1. Sub-Heading (i) (Soil Brought to the Phase Two Property) does not apply unless soil which did not originate at the phase two property has been brought from another property to the phase two property to remain there after the phase two environmental site assessment.
2. Sub-Heading (ii) (Segregation of Soil) does not apply unless soil has been excavated at the phase two property and placed in a stockpile for possible reuse at the phase two property.
3. Sub-Heading (iii) (Stockpiles) does not apply unless the soil in stockpiles is to be reused at the phase two property.

(11) Heading (b) (Remediation) in Report Section 10 (Appendices) of Table 1 of this Schedule and the requirements associated with it do not apply where no remediation has been conducted.

(12) The requirements under Heading (b) (Remediation) in Report Section 10 (Appendices) of Table 1 of this Schedule which refer to remediation of ground water do not apply unless there has been remediation of ground water during the phase two environmental site assessment.

(13) Heading (d) (Modified Generic Risk Assessment) in Report Section 10 (Appendices) of Table 1 of this Schedule and the requirements associated with it do not apply where the owner does not intend to submit such a risk assessment.

(14) The phase two environmental site assessment report must have the appendices, references and figures specified in Table 1 of this Schedule attached to the report.

(15) Figures, maps, site plans and cross-sections in the phase two environmental site assessment report shall contain a scale, north arrow and a title block that includes,

(a) a descriptive title;

(b) the address, if any, of the phase two property;

(c) the name of the qualified person's firm, company or partnership, if any; and

(d) the date the figure, map, site plan or cross-section was created.

TABLE 1
MANDATORY REQUIREMENTS FOR PHASE TWO ENVIRONMENTAL SITE ASSESSMENT REPORTS

Report Section	Heading	Sub-Heading	Minimum Requirements
1. Executive Summary			Provide a brief summary of the report.
2. Introduction		(i) Site Description	Provide the following,
			i. municipal address and property identifier number if any, of the phase two property, and
			ii. size and boundaries of the phase two property.
		(ii) Property Ownership	Provide the name and address and other contact information for the owner of the phase two property and the name, status and other contact information for any other person who has engaged the qualified person to conduct the phase two environmental site assessment.
		(iii) Current and Proposed Future Uses	Provide the identification of the current and proposed uses of the phase two property, and whether, if the proposed use is undertaken, section 168.3.1 of the Act would prohibit the new use unless a record of site condition is filed.
		(iv) Applicable Site Condition Standard	Provide identification of and rationale for the choice of the applicable site condition standard for the phase two property, based on consideration of matters relevant to the choice, including sections 35, 41 and 43.1 of the regulation, the

			current and proposed use of the property, soil texture of the property and proposed grading of the property following adoption of the proposed use.
3. Background Information		(i) Physical Setting	Provide a description of the general physical setting of the phase two property including,
			i. water bodies and areas of natural significance within the phase one study area, and
			ii. the topography and surface water drainage features on the phase two property.
		(ii) Past Investigations	Provide,
			i. a summary of any relevant past investigations of the phase two property, and
			ii. documentation of the steps taken to confirm that information or data which are to be used from previous investigations are of adequate quality such that it can be relied upon.
4. Scope of the Investigation		(i) Overview of Site Investigation	Provide an overview of the site investigation conducted with respect to the phase two property.
		(ii) Media Investigated	Provide,
			i. the rationale for whether to include in the field investigation sampling and analysis of each of ground water and sediment on, in or under the phase two property, and
			ii. an overview of the field investigation of each medium for which sampling and analysis were done.
		(iii) Phase One Conceptual Site Model	Provide a description of the phase one conceptual site model prepared as part of the phase one environmental site assessment report and of relevant subsequently acquired information.
		(iv) Deviations From Sampling	Provide a description of any deviations from the sampling and

		and Analysis Plan	analysis plan.
		(v) Impediments	Provide a description of any physical impediments and documentation of any denial of access.
5. Investigation Method		(i) General	Provide a brief description of all methods as specified in the following sections. Where the method differs from the associated standard operating procedure, provide a detailed description of the method used, and a rationale for the change in method.
		(ii) Drilling and Excavating	Provide for each borehole drilled or test pit excavated,
			i. the name of the contractor,
			ii. a description of the equipment used,
			iii. a description of the measures taken to minimize the potential for cross-contamination, and
			iv. the frequency of sample collection.
		(iii)Soil: Sampling	Provide,
			i. a description of all equipment used to collect soil samples, and
			ii. a geological description of soil and sediment cores and samples, based on the finalized field logs for each monitoring well, test hole or intrusive investigation point.
		(iv)Field Screening Measurements	Provide a description of any equipment used to perform field screening measurements including,
			i. make and model number,
			ii. chemicals the equipment can detect and associated detection limits,
			iii. precision of the measurements,
			iv. accuracy of the measurements,
			v. calibration reference standards such as span gas, and
			vi. procedures for checking calibration of the equipment.
			Provide a description of how field screening measurements were used to select samples for laboratory

			analysis, if applicable.
			Where a field screening method was different from what was proposed as a standard operating procedure in the sampling and analysis plan, provide a description of, and rationale for, the difference.
		(v) Ground Water: Monitoring Well Installation	For each monitoring well installed provide,
			i. the name of the contractor,
			ii. a description of the equipment used,
			iii. a description of the measures taken to minimize the potential for cross-contamination, and
			iv. the frequency of sample collection during drilling, if any.
			Provide a description of the methods used to develop monitoring wells.
		(vi) Ground Water: Field Measurement of Water Quality Parameters	Provide a description of the methods used to measure water quality parameters such as pH, specific conductance and temperature.
		(vii) Ground Water: Sampling	Provide a description of the methods used to conduct ground water samples.
		(viii) Sediment: Sampling	Provide a description of the methods used to collect sediment samples.
		(ix) Analytical Testing	Provide the names of all laboratories used for analysis of soil, sediment or ground water samples.
		(x) Residue Management Procedures	Provide detailed documentation of procedures used for the management of residues from the field investigation including,
			i. soil cuttings from drilling and excavations,
			ii. water from well development and purging, and
			iii. fluids from equipment cleaning.
		(xi) Elevation Surveying	Provide an accurate specification of the location of any benchmark used in surveying of elevations.
		(xii) Quality Assurance and	Provide,

		Quality Control Measures	
			i. a description of sample containers, preservation, labelling, handling and custody for samples submitted for laboratory analysis, including any deviations from the sampling and analysis plan,
			ii. a description of equipment cleaning procedures followed during all sampling,
			iii. a description of how the field quality control measures referred to in subsection 3 (3) were carried out, and
			iv. a description of, and rationale for, any deviations from the procedures set out in the quality assurance and quality control program set out in the sampling and analysis plan.
6. Review and Evaluation		(i) Geology	Provide a description and analysis of each aquifer and aquitard investigated pursuant to section 12 including,
			i. estimated thickness of each geologic unit,
			ii. elevations, relative to a geodetic benchmark or other permanent and recoverable benchmark, of the top and bottom of each geologic unit,
			iii. geological and other material in each geological unit,
			iv. the properties of each aquifer and aquitard, and
			v. the rationale for the choice of aquifers and aquitards investigated as it relates to identification of the location, presence, release, concentration, migration or retention of a contaminant.
		(ii) Ground Water: Elevations and Flow Direction	Provide,
			i. a discussion of, and rationale for,

			locations and screened intervals of monitoring wells used for interpretations of ground water flow direction,
			ii. results of any measurements taken using an interface probe during water level measurements, and
			iii. measurements of the thickness of any free flowing product present in monitoring wells.
			A description of the method used to calculate ground water elevation in the monitoring well,
			i. a description of the ground water elevations from all monitoring events in any aquifer investigated,
			ii. a description of the interpreted direction of ground water flow at the phase two property,
			iii. assessment of the potential for temporal variability in ground water flow direction, and
			iv. an evaluation and description of the potential interaction between any buried utilities in or under the phase two property and the water table.
		(iii)Ground Water: Hydraulic Gradients	Provide,
			i. a description of the horizontal hydraulic gradient for each aquifer investigated, including minimum, maximum and average horizontal hydraulic gradients, and
			ii. a description of vertical hydraulic gradients in aquifers where a contaminant is present at a concentration greater than the applicable site condition standard for the contaminant, including minimum, maximum and average vertical hydraulic gradients.
		(iv)Fine-Medium	Where fine-medium soil texture is to

		Soil Texture	be used in determining the applicable site condition standards provide,
			i. a rationale for the use of the fine-medium soil texture category,
			ii. a description of the results of the required grain size analysis, and
			iii. a description and rationale for the number of samples collected and analyzed.
		(v) Soil: Field Screening	Provide a discussion of soil field screening results.
		(vi) Soil Quality	Provide a discussion and analysis of the laboratory analytical results for all soil samples analyzed including,
			i. locations and depths of samples,
			ii. comparison of analytical results to applicable site conditions standards,
			iii. contaminants of concern,
			iv. contaminants related to chemical and biological transformations that have or may have occurred,
			v. whether the results indicate soil serves as a source of contaminant mass contributing to ground water or sediment, and
			vi. whether the results indicate the presence of light or dense non-aqueous phase liquids
		(vii) Ground Water Quality	Provide a discussion and analysis of the laboratory analytical results for all ground water samples analyzed including,
			i. locations and sample depth interval of samples,
			ii. documentation of any field filtering,
			iii. comparison of analytical results to applicable site conditions standards,
			iv. contaminants of concern,
			v. contaminants related to chemical and biological transformations that have or may have occurred,
			vi. whether the results indicate soil serves as a source of contaminant mass contributing to

			ground water or sediment, and
			vii. whether the results indicate the presence of light or dense non-aqueous phase liquids.
		(viii) Sediment Quality	Provide a discussion and analysis of the laboratory analytical results for any sediment samples analyzed including,
			i. locations and depths of samples,
			ii. comparison of analytical results to applicable site conditions standards,
			iii. contaminants of concern,
			iv. contaminants related to chemical and biological transformations that have or may have occurred, and
			v. whether the results indicate the presence of light or dense non-aqueous phase liquids.
		(ix) Quality Assurance and Quality Control Results	Provide,
			i. a description of the types of quality control samples collected and results of any other quality assurance and quality control measures taken during the field investigation, including the types of quality control sample, the media sampled, and the importance of the results with respect to ensuring the data are useful, appropriate and accurate in the determination of whether the phase two property, or any RSC property within it, meets the applicable site condition standards and any standards specified in a risk assessment,
			ii. a description of each instance where a sample was not handled in accordance with the Analytical Protocol with respect to,
			A. holding time,
			B. preservation method

			C. storage requirement; or
			D. container type,
			iii. a statement, with respect to subsection 47 (3) of the regulation that,
			A. all certificates of analysis or analytical reports received pursuant to clause 47 (2) (b) of the regulation comply with subsection 47(3),
			B. a certificate of analysis or analytical report has been received for each sample submitted for analysis, and
			C. all certificates of analysis or analytical reports received have been included in full in an appendix to the phase two environmental site assessment report,
			iv. a description of each instance where a laboratory qualified any results or made remarks in a certificate of analysis or analytical report about a sample, including, a discussion of the validity of any results qualified, and
			v. a discussion of the overall quality of the field data from the investigation with respect to the data quality objectives, to demonstrate that,
			A. decision-making was not affected, and
			B. the overall objectives of the investigation and the assessment were met.
		(x) Phase Two Conceptual Site Model	Provide,
			i. a description and assessment of,
			A. areas where potentially contaminating activity has occurred,
			B. areas of potential environmental concern, and
			C. any subsurface structures and

			utilities on, in or under the phase two property that may affect contaminant distribution and transport,
			ii. a description of and, as appropriate, figures illustrating, the physical setting of the phase two property and any areas under it including,
			A. stratigraphy from ground surface to the deepest aquifer or aquitard investigated,
			B. hydrogeological characteristics, including aquifers, aquitards and, in each hydrostratigraphic unit where one or more contaminants is present at concentrations above the applicable site condition standards, lateral and vertical gradients,
			C. approximate depth to bedrock,
			D. approximate depth to water table,
			E. any respect in which section 41 or 43.1 of the regulation applies to the property,
			F. areas where soil has been brought from another property and placed on, in or under the phase two property, and
			G. approximate locations, if known, of any proposed buildings and other structures,
			iii. where a contaminant is present on, in or under the phase two property at a concentration greater than the applicable site condition standard, identification of,
			A. each area where a contaminant is present on, in or under the phase two property at a concentration greater than the applicable site condition standard,
			B. the contaminants associated

			with each of the areas referred to in subparagraph A,
			C. each medium in which a contaminant associated with an area referred to in subparagraph is present,
			D. a description and assessment of What is known about each of the areas referred to in subparagraph A,
			E. the distribution, in each of the areas referred to in subparagraph A, of each contaminant present in the area at a concentration greater than the applicable site condition standard, for each medium in which the contaminant is present, together with figures showing the distribution,
			F. anything known about the reason for the discharge of the contaminants present on, in or under the phase two property at a concentration greater than the applicable site condition standard into the natural environment,
			G. anything known about migration of the contaminants present on, in or under the phase two property at a concentration greater than the applicable site condition standard away from any area of potential environmental concern, including the identification of any preferential pathways,
			H. climatic or meteorological conditions that may have influenced distribution and migration of the contaminants, such as temporal fluctuations in ground water levels, and
			I. if applicable, information concerning soil vapour intrusion of the contaminants

			into buildings including,
			1. relevant construction features of a building, such as a basement or crawl space,
			2. building heating, ventilating and air conditioning design and operation, and
			3. subsurface utilities,
			iv. where contaminants on, in or under the phase two property are present at concentrations greater than the applicable site condition standard, one or more cross-sections showing,
			A. the lateral and vertical distribution of a contaminant in each area where the contaminants is present at concentrations greater than the applicable site condition standard in soil, ground water and sediment,
			B. approximate depth to water table in each area referred to in subparagraph A,
			C. stratigraphy from ground surface to the deepest aquifer or aquitard investigated, and
			D. any subsurface structures and utilities that may affect contaminant distribution and transport in each area referred to in subparagraph A, and
			v. for each areas where a contaminant is present on, in or under the property at a concentration greater than the applicable site condition standard for the contaminant, a diagram identifying, with narrative explanatory notes,
			A. the release mechanisms,
			B. contaminant transport pathway,
			C. the human and ecological receptors located on, in or under the phase two property,

			D. receptor exposure points, and
			E. routes of exposure.
7. Conclusions			Provide a summary of the information about the following:
			i. the location and concentration of contaminants in the land or water on, in or under the phase two property,
			ii. environmental conditions in the land or water on, in or under the phase two property where it is necessary to undertake a risk assessment with respect to one or more contaminants of concern, and
			iii. whether applicable site condition standards and standards specified in a risk assessment for contaminants on, in or under the phase two property were met as of the certification date.
		(i) Signatures	Provide,
			i. original signatures of the qualified person who conducted or supervised the phase two environmental site assessment, and
			ii. a statement by the qualified person confirming the carrying out of the phase two environmental site assessment and the findings and conclusions of the report.
8. References			Ensure that the phase two environmental site assessment report includes a list of all documents or data cited in the report.
9. Figures and Tables	(a) Tables	(i) Monitoring Well Installation	Provide a table showing construction details and elevations for all monitoring wells installed during the field investigation.
		(ii) Water Levels	Provide a table showing all water level measurements for all monitoring events at or under the phase two property, including depth to water reported as elevations to the nearest centimetre relative to a geodetic or permanent and

			recoverable benchmark and reference elevations.
		(iii)LNAPLs and DNAPLs	Provide a table showing all light or dense non-aqueous phase liquid measurements at or under the phase two property, reported as elevations to the nearest centimetre relative to a geodetic or permanent and recoverable benchmark and reference elevations.
		(iv)Soil Data	Provide one or more tables that,
			i. show soil quality data contained in laboratory certificates of analysis of samples taken at or under the phase two property,
			ii. include the borehole, test hole, test pit or monitoring well identification number, sample depths, sample identification number, date of sample collection, date of analysis and laboratory certificate of analysis or analytical report reference number, and
			iii. include a comparison of the data to applicable site condition standards.
		(v) Ground Water Data	Provide one or more tables that,
			i. show any ground water quality data contained in laboratory certificates of analysis of samples taken at or under the phase two property,
			ii. include the test hole or monitoring well identification number, sample identification number, sampling depth intervals, date of sample collection, date of analysis and laboratory certificate of analysis or analytical report reference number, and
			iii. include a comparison of the data to applicable site condition standards.
		(vi)Sediment Data	Provide one or more tables that,
			i. summarize all sediment quality

			data contained in laboratory certificates of analysis of samples taken at or under the phase two property,
			ii. include the sample identification number, sampling depths, date of sample collection, date of analysis and laboratory certificate of analysis or analytical report reference number, and
			iii. include a comparison of the data to applicable site condition standards.
		(vii) Ground Water, Sediment and Soil Maximum Concentration Data	Provide a table showing, for each contaminant for which sampling and analysis has been performed, the maximum known concentration of each contaminant on, in or under the phase two property as of the certification date including,
			i. the location and unique identification number of each borehole, test pit, test hole or monitoring well from which the sample showing the maximum concentration was collected, and
			ii. the relevant soil sampling depths, sediment sampling depths, and ground water sampling depth intervals.
	(b) Figures	(i) Areas of Natural Significance and Water Bodies	Provide a figure that illustrates the location of any,
			i. area of natural significance that includes the phase two property, that is adjacent to the phase two property or that is located, wholly or partly, on the phase two property or within 30 metres of the phase two property or part of the phase two property, and
			ii. water body located adjacent to the phase two property or, wholly or partly, on the phase two property or within 30 metres of the phase two property or part

			of the phase two property.
		(ii) Property Before Actions Taken to Reduce the Concentration of Contaminants	Provide a figure showing, in a plan view, all features relevant to the phase two environmental site assessment prior to any actions being taken to reduce the concentration of contaminants including,
			i. areas where a contaminant is present at a concentrations greater than the applicable site condition standards for the contaminant, and
			ii. the locations of buildings, storage tanks, drainage features and fill areas on or under the phase two property.
		(iii)Interpreted Contours of Ground Water Elevations	Provide a figure showing the phase two property that shows interpreted contours of the ground water elevations for each hydrostratigraphic unit where at least three monitoring wells have been installed to permit contouring and includes,
			i. monitoring well identification numbers,
			ii. water elevation at each monitoring well used for contouring,
			iii. labelling of the elevation contour,
			iv. ground water elevations contoured, which shall obey and not extend outside the dataset, and
			v. arrows indicating the qualified person's interpretation of lateral ground water flow direction at the phase two property.
		(iv)Contaminants in Soil Before Actions Taken to Reduce the Concentration of Contaminants	Where one or more contaminants in soil at or under the phase two property are present at a concentration greater than the applicable site condition standard for the contaminant prior to any actions taken to reduce concentration of contaminants, provide one or more

			figures in plan view of the phase two property that show the concentration of contaminants as analyzed in an accredited laboratory, in all boreholes, test holes, test pits and any other soil sampling locations.
		(v) Contaminants in Ground Water Before Actions Taken to Reduce the Concentration of Contaminants	Where one or more contaminants in ground water at or under the phase two property are greater than the applicable site condition standard prior to any actions taken to reduce concentration of contaminants, provide one or more figures in plan view of the phase two property that show the concentration of contaminants, as analyzed in an accredited laboratory, in all monitoring wells and test holes.
		(vi) Contaminants in Sediment Before Actions Taken to Reduce the Concentration of Contaminants	Where one or more contaminants in sediment at or under the phase two property are greater than the applicable site condition standard prior to any actions taken to reduce concentration of contaminants, provide one or more figures in plan view of the phase two property that show the concentration of contaminants, as analyzed in an accredited laboratory, in all sediment sample locations.
		(vii) Delineation	Provide figures showing the phase two property in a plan view and illustrating the delineation of the lateral and vertical extent of contaminants of concern in soil, ground water or sediment for each area contaminants of concern including,
			i. sampling locations,
			ii. sample identification number,
			iii. sampling point,
			iv. sampling depths,
			v. sampling depth intervals,
			vi. concentrations of contaminants as analyzed in an accredited laboratory, and
			vii. the applicable site condition standard or standard specified in

			a risk assessment for each contaminant analyzed.
		(viii) Contaminants of Concern in Areas of Potential Environmental Concern	Provide cross-sections that are oriented parallel and perpendicular to the direction of ground water flow at the phase two property illustrating,
			i. the delineation of the lateral and vertical extent of contaminants of concern in soil, ground water or sediment for each area of potential environmental concern and showing sample locations, sampling identification numbers, sampling points and sampling depths,
			ii. concentration of contaminants analyzed in an accredited laboratory,
			iii. in highlighting, all concentrations of contaminants in excess of the applicable site condition standard or standard specified in a risk assessment, and
			iv. the stratigraphy from ground surface to the deepest aquifer or aquitard investigated.
10. Appendices	(a) General	(i) Sampling and Analysis Plan	Provide the sampling and analysis plan for the site investigation.
		(ii) Finalized Field Logs	Provide all finalized field logs.
		(iii)Certificates of Analysis or Analytical Reports from Laboratories	Provide laboratory certificates of analysis or analytical reports for all samples analyzed.
		(iv)Residue Management	Provide copies of all permits, approvals and the like obtained from municipal, provincial or federal governments or agencies for handling, treating, discharging and disposing of soil, sediment and ground water.
		(v) Survey of Phase Two Property	Provide a survey of the phase two property which has been prepared,

			signed and sealed by a surveyor or, where the phase two property consists of land that is administered by the Ministry of Natural Resources under the *Public Lands Act*, a description of the phase two property approved by the Surveyor General.
	(b) Remediation	(i) Where any Action has been Taken to Reduce the Concentration of Contaminants on, in or under a Phase Two Property	Provide a remediation appendix that includes the following sections,
			i. remedial actions,
			ii. free flowing product,
			iii. results of confirmation sampling and analysis, and
			iv. conclusions.
		(ii) Remedial Actions	Provide,
			i. a description of any soil excavation and soil treatment activities at the phase two property that includes,
			A. the rationale for each method used,
			B. the quantities and types of compounds used to treat contaminants of concern, and
			C. the location of the remedial action,
			ii. an estimate of the quantity of soil treated on the property and removed from the property, in tonnes,
			iii. a description of any ground water removal or ground water treatment activities at the phase two property, including,
			A. the rationale for each method used,
			B. the quantities and types of compounds used to treat

			contaminants of concern, and
			C. the location of the remedial action,
			iv. an estimate, in litres, of the volume of any ground water removed from the phase two property,
			v. a description of any actions taken to reduce contaminant concentrations in sediment at the phase two property, including,
			A. the rationale for each method used,
			B. the quantities and types of compounds used to treat contaminants of concern, and
			C. the location of the remedial action in relation to any areas of potential environmental concern,
			vi. an estimate of the quantity of sediment treated or removed from the property,
			vii. copies of all permits from local, provincial and federal agencies for handling, treating, discharging and disposing of soil, ground water or sediment,
			viii. a description of the steps taken to ensure that contaminants created or introduced to the property during remediation do not exceed the applicable site condition standard, if the remediation method involved the creation or introduction of contaminants or substances to the subsurface of the property,
			ix. a description of the steps taken to establish baseline and background conditions relevant to the proposed remediation method to a degree adequate to detect any increases of contaminants on, in or under the phase two property following remediation, including contaminants created or

			introduced to the property during remediation, and
			x. a rationale for the selection of monitoring wells and contaminants to be analyzed for the purpose of monitoring concentrations of contaminants in, on or under the phase two property, including contaminants created or introduced to the property during remediation.
		(iii) Free Flowing Product	Provide,
			i. a discussion of the types and quantities of any free flowing product observed during remediation,
			ii. an estimate of the volume of free flowing product, in litres, removed from ground water on, in or under the phase two property, where free flowing product is present, and
			iii. a description of any free flowing product recovery system or other activity undertaken to remove the free flowing product.
		(iv) Confirmation Sampling and Analysis	Provide,
			i. a description of all confirmation sampling activities conducted during and after remedial actions for the purpose of demonstrating that the phase two property meets the applicable site condition standards and any standards specified in a risk assessment,
			ii. a description and rationale for all confirmation sampling locations, depths and contaminants analyzed,
			iii. a description of the lateral and vertical dimensions of the excavations and the number and types of confirmation samples taken at each excavation, where part or all of the land on, in or

			under a phase two property has been excavated,
			iv. one or more figures of the phase two property, identifying the locations and dimensions of any excavations on, in or under the phase two property,
			v. one or more cross-sections that show the vertical dimensions of any excavations on, in or under the phase two property,
			vi. one or more figures of the phase two property, identifying the locations of any ground water removal or treatment activities, including the locations of any injection wells and extraction wells,
			vii. one or more figures of the phase two property, identifying the locations of any sediment removal or treatment activities,
			viii. a description of the results of quarterly sampling events, including water level measurements and ground water sampling and analysis, where *in situ* treatment has been undertaken on, in or under the phase two property,
			ix. a description of the results of quarterly sampling events, including water level measurements and ground water sampling and analysis, where excavation has been undertaken on, in or under the phase two property,
			x. tables showing all soil, ground water and sediment quality data contained in laboratory certificates of analysis or analytical reports for confirmation samples, including,
			A. comparison of the data to applicable site condition standards or standards specified in a risk assessment as the case may be for each

			contaminant analyzed,
			B. the borehole, test hole, test pit or monitoring well identification number,
			C. the sample identification number,
			D. soil or sediment sample depth,
			E. ground water sampling depth interval,
			F. date of sample collection,
			G. date of sample analysis, and
			H. laboratory certificate of analysis or analytical report reference number,
			xi. provide one or more figures that show the results of analyses for all confirmation samples of soil, ground water and sediment, including the delineation of the lateral and vertical extent of contaminants in soil, ground water or sediment following actions taken to reduce the concentration of contaminants, and illustrating,
			A. sampling points,
			B. sample identification number,
			C. sampling depth intervals, and
			D. concentrations of contaminants as analyzed in an accredited laboratory,
			xii. provide cross-sections that are oriented parallel and perpendicular to the direction of ground water flow that show the results of analyses for all confirmation samples of soil, ground water and sediment, including the delineation of the lateral and vertical extent of contaminants in soil, ground water or sediment following actions taken to reduce the concentration of contaminants, and illustrating,
			A. sampling points,
			B. sample identification number,
			C. sampling depth intervals,

			D. concentrations of contaminants as analyzed in an accredited laboratory, and
			E. the stratigraphy from ground surface to the deepest aquifer or aquitard where actions were taken to reduce the concentration of contaminants,
			xiii. a table showing construction details and elevations for all monitoring wells used in demonstrating that contaminant concentrations in ground water are below the applicable site condition standards following actions taken to reduce concentration of contaminants, and
			xiv. a table showing all water level measurements for all monitoring events used in demonstrating that contaminant concentrations in ground water are below the applicable site condition standards following actions taken to reduce concentration of contaminants, including depth to water reported as elevations to the nearest centimetre relative to a geodetic or permanent and recoverable benchmark and reference elevations.
	(c) Soil Excavated at or Brought to the Phase Two Property	(i) Soil Brought to the Phase Two Property	Provide,
			i. a rationale for the selection of chemical parameters analyzed by a laboratory in accordance with section 32 of this Schedule,
			ii. a description of the soil sampling activities conducted, including,
			A. the number of samples analyzed,
			B. the soil sampling program, including methods used to ensure that the samples are representative of any areas

			where a contaminant may be present at a concentration greater than the applicable site condition standard for the contaminant,
			C. the address of the source property and any property where the soil was stored prior to being deposited on, in or under the phase two property,
			D. the former and current uses of the source property, including identification of any potentially contaminating activity,
			E. total volume of soil brought to the phase two property,
			F. the results of analyses of soil samples, including a comparison of the results to the applicable site condition standard for each contaminant analyzed,
			G. a figure showing the locations on the phase two property where soil was deposited,
			H. tables,
			1. showing all soil quality data contained in laboratory certificates of analysis of soil, samples analyzed, and
			2. comparing the analytical results to the applicable site condition standard for each contaminant analyzed, and
			iii. a description of the purposes for which the soil was brought to the phase two property.
		(ii) Segregation of Soil	Provide,
			i. a rationale for the choice of contaminants to be analyzed,
			ii. a description of the methods used to ensure uniform and representative sample collection,
			iii. the number of soil samples collected and the volume of each stockpile, and

			iv. a comparison of the results of analysis to the applicable site condition standards and standards specified in a risk assessment for all contaminants analyzed.
		(iii)Stockpiles	Provide,
			i. a rationale for the choice,
			ii. a description of the stockpile sampling program, including methods used to ensure uniform and representative sample collection, the number of soil samples collected and the volume of each stockpile, and
			iii. a table showing all soil quality data contained in certificates of analysis or analytical reports for stockpiled soil samples analyzed and a comparison of the analytical results to the applicable site condition standards and standards specified in a risk assessment.
	(d) Modified Generic Risk Assessment	(i) Property Information	Provide,
			i. property location and ownership,
			ii. municipal address and property identification number, if any,
			iii. size and boundaries of the property, and
			iv. identification of the current and proposed uses of the property.
		(ii) Fraction of Organic Carbon (FOC)	Whenever an assumed value for FOC (for the water table to soil surface, in the upper 0.5 m, or the aquifer) is to be modified in a modified generic risk assessment, the report shall include,
			i. a description of the rationale for determining sampling locations,
			ii. a table with the sampling results,
			iii. a figure showing the sampling points,
			iv. finalized field logs, indicating the depth of the soil samples, and
			v. the new value to be used in the

			modified generic risk assessment.
		(iii)Distance to Water Body	Whenever an assumed value for distance to water body is to be modified in a modified generic risk assessment, the report shall include a figure showing,
			i. the location of the property,
			ii. areas where a contaminant is present at a concentration greater than the applicable site condition standard for the contaminant,
			iii. location of monitoring wells, ground water flow direction, interpreted flow pathways from each area to the nearest water body, estimated distance from each area to the nearest water body,
			iv. nearest water body down gradient of each area noted in ii, and
			v. the new value to be used in the modified generic risk assessment.
		(iv)Depth to Water Table	Whenever an assumed value for depth to water table is to be modified in a modified generic risk assessment, the report shall include,
			i. a description of, and rationale for, the method used to estimate the depth from soil surface to the highest water table,
			ii. a figure showing the soil surface elevation contours, monitoring well locations, and measured depths to the highest water table from soil surface,
			iii. a table with all the water level data used to determine the highest water table, and
			iv. the new value to be used in the modified generic risk assessment.
		(v) Aquifer Horizontal Hydraulic Gradient	Whenever an assumed value for aquifer horizontal hydraulic gradient is to be modified in a modified generic risk assessment, the report

			shall include,
			i. a figure showing the location of monitoring wells, water level information, and ground water elevation contours,
			ii. gradient calculations, and
			iii. the new value to be used in the modified generic risk assessment.
		(vi) Aquifer Horizontal Hydraulic Conductivity	Whenever an assumed value for aquifer horizontal hydraulic conductivity is to be modified in a modified generic risk assessment, the report shall include,
			i. a description of field test methods, and interpretation of the field data,
			ii. a rationale for the decision to use or not use a multiplier, and for the particular choice and use of any multiplier chosen and used in adjusting hydraulic conductivity values,
			iii. all field data, calculations, and hydraulic conductivity values, and
			iv. the new value to be used in the modified generic risk assessment.
		(vii) Soil Type in the Vadose Zone and Capillary Fringe	Whenever an assumed value for soil type in the vadose zone and capillary fringe is to be modified in a modified generic risk assessment, the report shall include,
			i. for each area where a contaminant is present on, in or under the property at a concentration greater than the applicable site condition standard for the contaminant, the following information related to soil type in the vadose zone and capillary fringe, if applicable,
			A. a description of grain size analysis undertaken by an accredited laboratory and the process and rationale for the selection of the soil type,

			B. grain size distribution curves,
			C. a figure showing all the sampling points, and
			D. related finalized field logs, indicating the depth of the soil samples, and
			ii. soil type selected as property soil type (for each of the vadose zone and capillary fringe), and the area soil type (in each of the vadose zone and capillary fringe) for each of the areas investigated.
		(viii) Soil Vapour Investigation - Depth to Soil Vapour Measurements	Whenever an assumed value for depth below soil surface to soil vapour is to be entered in a modified generic risk assessment, the report shall include,
			i. a description of the rationale for the selection of the soil vapour sampling locations and depths,
			ii. a discussion on soil vapour preferential pathways present or anticipated on the property, and whether and how they may affect vapour intrusion into existing and any known future buildings,
			iii. a figure showing the locations of,
			A. existing and, if known, future buildings,
			B. all soil vapour points,
			C. areas where volatile contaminants are present at a concentration greater than the applicable site condition standards,
			D. known or inferred volatile contaminant release areas, and
			E. ground water flow direction,
			iv. a minimum of one cross section for each area at which a contaminant is present at a concentration above the applicable site condition standards for the contaminant, which illustrates,
			A. variations in the soil surface elevation at the property,

			B. soil and ground water sampling points,
			C. soil vapour probe locations and depths,
			D. interpreted distribution of the soil types present in the area,
			E. depth to water table, and
			F. soil and ground water concentrations for the volatile contaminants referred to above, and
			v. a table summarizing the rationale for the location and depth of each soil vapour probe used in the soil vapour investigation, construction details of the probes, including materials, diameter, length of the screen interval, and depth from soil surface to the top of the probe screening interval.
		(ix) Soil Vapour Investigations - Soil Vapour Concentrations	Whenever a value for soil vapour concentration is to be entered in a modified generic risk assessment, the report shall include,
			i. a description of the soil vapour analytical methods, data quality objectives, rationale for the selected sampling method, devices and sampling duration,
			ii. a description of the standard operating procedures for soil vapour probe installation and soil vapour probe development, performance testing, leak testing, purging and sampling used in the field investigation,
			iii. a description of the quality assurance and quality control measures implemented,
			iv. soil vapour field data, including leak test data, purge volumes and sample rates,
			v. soil vapour laboratory results presented in a tabular format by soil vapour sampling location and probe, including in the table depth to measurement (from soil

			surface to the top of the probe screening interval) and approved model calculated soil vapour screening level for each volatile contaminant,
			vi. soil vapour probe finalized field logs, including depths and installation details, and
			vii. certificates of analysis or analytical reports for all soil vapour samples.
		(x) Number of Frozen Ground Days per Year	Whenever an assumed value for frozen days is to be modified in a modified generic risk assessment, the report shall include,
			i. the name and location of the meteorological station, and
			ii. the new value to be used in the modified generic risk assessment.
		(xi) Aquifer Soil Dry Bulk Density	Whenever an assumed value for aquifer soil dry bulk density is to be modified in a modified generic risk assessment, the report shall include,
			i. a description of the test method used to determine the aquifer soil bulk density along with the data used for the determination of the test results and a site map showing the sampling points, and
			ii. the new value to be used in the modified generic risk assessment.
		(xii) References	Include a list of all documents or data cited in the report.

TABLE 2
MINIMUM STOCKPILE SAMPLING FREQUENCY

Sample Frequency		
Pile Volume	Field Screening Samples	Samples for Laboratory Analysis
Less than 50 m^3	A minimum of 5 samples	A minimum of one sample
>50m^3 to 150 m^3	A minimum of 15 samples	A minimum of three samples
>150m^3 to 500 m^3	A minimum of 30 samples	A minimum of five samples
>500m^3 to 1500 m^3	A minimum of 50 samples	A minimum of 10 samples
>1500 m^3	A minimum of 75 samples	A minimum of 15 samples

TABLE 3
MINIMUM CONFIRMATION SAMPLING REQUIREMENTS FOR EXCAVATION

Floor Area (m^2)	Floor Samples	Sidewall Samples[1]
<25	2	2
>25-50	2	3
>50-100	3	3
>100-250	3	5
>250-500	4	6
>500-750	4	7
>750-1000	5	8
Note 1	Sidewall samples should not all be taken from the same wall, and should represent worst-case.	

TABLE 4
PHASE TWO ENVIRONMENTAL SITE ASSESSMENT REQUIREMENTS FOR MODIFIED GENERIC RISK ASSESSMENTS

Assumption Category	Objective	Minimum Requirements
1. Fraction of Organic Carbon (FOC) – Water Table to Soil Surface	(a) Determine the FOC in the area between the water table and the soil surface.	1. Soil samples from at least four continuous borehole cores but not necessarily undisturbed soil samples must be collected at the phase two property for the purpose of defining FOC.
		2. The samples must be taken from soil between the soil surface and the top of the water table.
		3. The four sample locations must be chosen so as to provide results for natural (non-anthropogenic) FOC at the property.
		4. The samples must be taken from soil of the same soil type present in an area where a contaminant is present at a concentration greater than the applicable site condition standard for the contaminant.
		5. A minimum of one composite soil sample for each sampling location is required for FOC determination.
		6. Each soil sample for FOC determination shall be analyzed in triplicate.
		7. The FOC for the phase two property shall be the mean of all the soil samples analyzed for FOC determination.

		8. At least one soil sample shall be taken at each of the four sampling locations and analyzed for the contaminants of concern or contaminants of potential concern which are organic chemicals and for any other organic chemical detected.
2. Fraction of Organic Carbon (FOC) – in Upper 0.5 m	(a) Determine the FOC in the upper 0.5 m of soil immediately below soil surface.	1. Soil samples shall be collected, from at least four locations at the property, each of which is in the upper 0.5 m of soil below soil surface at the time of sampling.
		2. The sample locations must be chosen so as to provide results for natural (non-anthropogenic) FOC at the phase two property.
		3. The samples must be taken from soil of the same soil type present in an area where a contaminant is present at a concentration greater than the applicable site condition standard for the contaminant.
		4. A minimum of one composite soil sample for each sampling location is required for FOC determination.
		5. The FOC for the phase two property shall be the mean of all the soil samples analyzed for FOC determination.
		6. At least one soil sample shall be taken at each of the four sampling locations and analyzed for the contaminants of concern or contaminants of potential concern which are organic chemicals and for any other organic chemical detected.
3. Minimum Distance From Areas Where Contaminants Present Above Applicable Site Condition Standards to Nearest Down Gradient Water Body	(a) Determine the minimum distance from the centre of areas on, in or under the phase two property at which a contaminant is present at a concentration greater than the applicable site condition standard for the contaminant to the nearest water body that is down gradient of the area.	1. Using hydrogeological expertise and all relevant information from the phase two environmental site assessment, determine the distance from the centre of each area on, in or under the phase two property at which a contaminant is present at a concentration greater than the applicable site condition standard for the contaminant to the nearest water body that is down gradient of

		the area.
		2. Determine the shortest of these distances.
4. Minimum Depth Below Soil Surface to the Highest Annual Water Table	(a) Determine the minimum depth below soil surface to the highest water table in areas where volatile contaminants are present at concentrations greater than the applicable site condition standards in ground water.	1. Where at least two years of water table level monitoring done at intervals no less frequent than quarterly has been undertaken for the water table at or within 250 metres from the boundary of the phase two property, water table level monitoring shall be conducted monthly for three months in order to determine the minimum depth of the high water table below soil surface. Such monitoring shall be conducted during the three months at which the highest water table can reasonably be expected to be at its highest elevation ASL based on historical data.
		2. If the historical water level information referred to in paragraph 1 is not available then either,
		a. water table level monitoring shall be conducted monthly for 12 months in order to determine the minimum depth of the highest water table below soil surface, or
		b. water table level fluctuations reasonably to be anticipated at the phase two property shall be identified and documented by the qualified person, water table level monitoring shall be conducted once and the greater of the anticipated fluctuation as identified by the qualified person or one metre shall be subtracted from the measurement taken during the water table level monitoring in order to determine the minimum depth of the highest water table below soil surface.
5. Aquifer horizontal hydraulic conductivity	(a) Determine the horizontal hydraulic conductivity for each aquifer that carries contaminants of concern to a water body.	1. A representative horizontal hydraulic conductivity for each aquifer that carries contaminants of concern to a water body shall be determined, which shall be done as follows:

		i. Field testing shall be conducted within the coarsest geological material in the aquifer for the purpose of determining horizontal hydraulic conductivity for each aquifer that carries the contaminants of concern from the aquifer to a water body.
		ii. The hydraulic conductivity values from field testing shall be compared with published values associated with the geological material which was tested.
		iii. If the field testing values are not consistent with published values associated with the geological material in the aquifer which was tested, or if there are any other reasons to believe the field testing quality is subject to uncertainty, an appropriately conservative multiplier shall be applied to the field testing values.
6. Aquifer Horizontal Hydraulic Gradient	(a) Determine the average horizontal hydraulic gradient across the phase two property to the nearest down gradient water body.	1. The average horizontal hydraulic gradient between aquifers on, in or under the phase two property and the nearest water body to which ground water at the property discharges shall be determined, which determination shall be done as follows:
		i. Water level measurements shall be taken from at least three monitoring wells at the property from the same hydrostratigrapic unit during at least one monitoring event.
		ii. The monitoring wells must not be placed in a straight line.
		iii. In selecting the monitoring wells from which to collect water level information and determining when to collect it the qualified person shall take into consideration fluctuations of ground water flow direction, so that water level measurements from these wells are representative of ground water

		flows from the aquifer to the nearest water body.
		2. For all aquifers where a contaminant of concern is present at a concentration greater than the applicable site condition standard for the contaminant, the qualified person shall ensure the following information is prepared:
		i. Contours of the interpreted ground water surface based on the water level measurements.
		ii. A determination of the approximate water level elevation of the nearest water body.
		iii. A calculation of the horizontal hydraulic gradient between the phase two property and the nearest water body, using the minimum distance from areas where a contaminant is present at a concentration greater than the applicable site condition standard for the contaminant to the nearest water body calculated as indicated above.
		3. Using the calculations referred to in subparagraph 2 iii, the qualified person shall ensure that the average horizontal hydraulic gradient between the phase two property and the nearest water body is calculated.
7. Aquifer Fraction of Organic Carbon (FOC)	(a) Determine the FOC in the aquifer that carries the contaminants of concern to a water body.	1. Samples of geological material in the aquifer that carries contaminants of concern to a water body must be collected from at least two sampling points.
		2. Each sample must be analyzed in triplicate.
		3. The FOC for the aquifer is the mean of all the samples.
8. Property Soil Type – Vadose Zone	(a) Determine the predominant soil type for the areas at the phase two property where a contaminant is present in soil or in ground water a concentrations greater than	1. In areas at the phase two property where a contaminant is present at concentrations greater than the applicable site condition standard for the contaminant, the predominant soil type in the vadose zone shall be determined as

	the applicable site condition standard for the contaminant.	follows:
		i. For each area where a contaminant is present in soil only at a concentration greater than the applicable site condition standard for the contaminant, one or more boreholes must be advanced to the bottom of the area.
		ii. In any other case, one or more boreholes must be advanced to the top of the saturated zone.
		iii. The determination of the predominant soil type among all the areas shall be done through soil sampling and analysis as follows:
		a. an appropriate number and distribution of samples, but at least four samples, of soil from each area must be collected and analyzed in order to determine grain size distribution of the soil,
		b. grain size analysis shall be undertaken by an accredited laboratory,
		c. the predominant soil type from among all the areas must be determined based on analysis of the samples chosen in subparagraph a, and on borehole information, and
		d. where two or more soil types exist in approximately equal amounts, taking into account all the areas, the predominant soil type shall be the coarsest soil type from amongst those present in approximately equal amounts.
9. Property Soil Type – Capillary Fringe	(a) Determine the predominant soil type directly above the water table in the capillary fringe for the areas at the phase two property where a	1. In areas at the phase two property where a contaminant is present at concentrations greater than the applicable site condition standard for the contaminant, the predominant soil type in the

	contaminant is present in ground water in concentrations greater than the applicable site condition standard for the contaminant.	capillary fringe shall be determined through soil sampling and analysis as follows:
		i. One or more boreholes must be advanced to the top of the saturated zone.
		ii. The determination of the predominant soil type among all the areas shall be done as follows:
		a. an appropriate number and distribution of samples, but at least two samples, of soil from each area must be collected and analyzed in order to determine grain size distribution of the soil,
		b. samples must be taken from the stratum directly above the water table in the capillary fringe,
		c. grain size analysis shall be undertaken by an accredited laboratory,
		d. the predominant soil type from among all the areas must be determined based on the samples chosen in clause a, and on borehole information, and
		e. where two or more soil types exist in approximately equal amounts taking into account all the areas, the predominant soil type shall be the coarsest soil type from amongst those present in approximately equal amounts.
10. Area Soil Type - Vadose Zone	(a) Determine the coarsest soil type in the vadose zone in each area in which a volatile contaminant is present at a concentration greater than the applicable site condition standard for the contaminant.	1. In each area where a volatile contaminant is present in soil, or in ground water, at a concentration greater than the applicable site condition standard for the contaminant, determine the soil type in the area.

		2. For each area where a contaminant is present in soil only at a concentration greater than the applicable site condition standard for the contaminant, one or more boreholes must be advanced to the bottom of the area.
		3. In any other case, one or more boreholes must be advanced to the top of the saturated zone.
		4. The determination of the coarsest soil type for each area shall be done as follows:
		i. An appropriate number and distribution of samples, but at least four samples, of soil from each area must be collected and analyzed in order to determine grain size distribution of the soil.
		ii. Grain size analysis shall be undertaken by an accredited laboratory.
		iii. The coarsest soil type from among these samples for each are shall be identified.
11. Area Soil Type – Capillary Fringe	(a) Determine the coarsest soil type directly above the water table in the capillary fringe in each area of the phase two property where a volatile contaminant is present in ground water at a concentration greater than the applicable site condition standard for the contaminant.	1. In each area where a volatile contaminant is present at a concentration greater than the applicable site condition standard for the contaminant the coarsest soil type directly above the water table must be determined.
		2. One or more boreholes must be advanced to the top of the saturated zone.
		3. The determination of the coarsest soil type among all the area shall be done as follows:
		i. An appropriate number and distribution of samples, but at least two samples, of soil from each area must be collected and analyzed in order to determine grain size distribution of the soil.

		ii. Grain size analysis shall be undertaken by an accredited laboratory.
		iii. Samples must be taken from the stratum directly above the water table in the capillary fringe.
		iv. The coarsest soil type from among these samples for each area where a volatile contaminant is present in ground water at a concentration greater than the applicable site condition standard for the contaminant-shall be identified.
12. Soil Vapour Concentrations and Depth to Soil Vapour Measurements	(a) Determine soil vapour concentrations in each area at the phase two property in which a volatile contaminant is present in soil, and in each area of the phase two property in which a volatile contaminant is present in ground water, at a concentration greater than the applicable site condition standard for the contaminant.	1. Soil vapour concentrations shall be determined in each area at the phase two property in which a volatile contaminant is present at a concentration greater than the applicable site condition standard for the contaminant, which determination shall be done as follows:
		i. The qualified person shall ensure a sampling and analysis plan for soil vapour characterization is prepared.
		ii. In this plan the qualified person shall determine the appropriate sampling locations for sampling soil vapour, including the appropriate depth for each location, which locations shall include the areas,
		a. where known or inferred releases of volatile contaminants have occurred,
		b. where the highest concentration of contaminants in soil and ground waters are present, and
		c. where the qualified person considers vapour intrusion related exposures may be of

		potential concern.
		iii. The soil vapour samples must be collected,
		a. from within the sampling location and at the depth that is approximately the same as the depth at which the highest concentration of the volatile contaminant in soil has been measured, and
		b. as close as possible to, but not more than 0.5 metres above the top of the capillary fringe in the area where the highest concentration of the volatile contaminant in ground water has been measured.
		iv. The soil vapour samples shall be collected and analyzed.
		v. The qualified person shall document the rationale for the selection of the soil vapour sampling locations and depths.
		vi. At least two soil vapour probes must be installed in each sampling location and depth. Multiple probes installed in a single borehole are not acceptable.
		vii. Samples shall be collected from the probes in each sampling location during at least two sampling events separated by at least three months.
		viii. Samples shall be collected from at least 1.5 metres below the soil surface.
		ix. Screen intervals in soil vapour probes used for the sampling shall not exceed 0.5 metres.
		x. The depth to soil vapour measurement is the distance from soil surface to the top of the probe screening interval for each soil vapour probe from which samples are collected.
		2. The qualified person shall ensure that the soil vapour samples are

		collected using soil vapour probes that have been designed, constructed and operated within specifications for adequate measurement and in a manner that minimizes adsorption, desorption and leaks.
13. Number of Frozen Ground Days per Year	(a) Determine the number of days per year with a maximum temperature of less than 0 degrees Celsius.	1. Determine the number of frozen days reported by Environment Canada, based on the Canadian Climate Normals, from the nearest meteorological station for which climate norms are reported.
14. Aquifer Soil Dry Bulk Density	(a) Determine the aquifer soil dry bulk density for each aquifer that carries the contaminants of concern to a water body.	1. Samples of geological materials in the aquifer that carries the contaminants of concern to a water body must be collected from at least two sampling points.
		2. Each sample must be analyzed by an appropriate field testing method or by a laboratory.
		3. The aquifer soil dry bulk density is the mean of all analytical results.

O. Reg. 511/09, s. 31; O. Reg. 245/10, s. 6 (1); O. Reg. 179/11, s. 8.

SCHEDULE F
REQUIREMENTS FOR SOIL RE PARAGRAPH 2 OF SUBSECTION 55 (3) OF THE REGULATION

APPLICATION

Application

1. (1) This Schedule sets out the requirements for the purposes of paragraph 2 of subsection 55 (3) of the regulation of the regulation for determining whether soil described in subsection (2) meets the standards set out in Table 1 of the Soil, Ground Water and Sediment Standards with respect to all contaminants in the soil.

(2) Subsection (1) applies to soil that,

(a) originated at a property other than the one to which it is to be brought;

(b) is intended to be brought to a RSC property that is a RSC property for which a record of site condition may be submitted solely based on a phase one environmental site assessment; and

(c) is intended to remain at the RSC property after a record of site condition has been filed.

REQUIREMENTS

Requirements

2. A qualified person shall ensure that the following requirements are met:

1. The concentration of each contaminant in the soil to be brought to the RSC must be equal to or lesser than the standard for the contaminant set out in Table 1 of the Soil, Ground Water and Sediment Standards.
2. Samples must be collected from the soil to be brought to the RSC property.
3. The samples must be analyzed in accordance with this section, and the concentrations of contaminants in the soil when it is to be brought to the RSC property known, before any soil is brought to the RSC property in order to determine what contaminants are in the soil, and whether the standards referred to in paragraph 1 are met for each contaminant in the soil.
4. The samples that are collected and analyzed must be,
    i. representative samples collected for the purpose of determining the concentration of contaminants in the soil to be brought to the RSC property and at locations and frequencies which will be adequate to allow the concentrations of contaminants in the soil to be known,
    ii. collected by the qualified person, or under the supervision of the qualified person by an individual qualified to take samples for such purpose, following a plan determined by the qualified person to collect samples at locations and frequencies which will be adequate to allow the concentrations of contaminants in the soil to be known, and
    iii. collected for the purpose of determining if contaminants are present in the soil as a result of any potentially contaminating activity or other environmental condition,
        A. at the property from which the soil originated while the soil was there,
        B. at any property at which the soil has subsequently been stored while the soil was being stored at that property, and
        C. while the soil was being handled, stored or transported at any time before its final placement on, in or under the phase two property.
5. The samples must be analyzed for contaminants that may reasonably be expected to be present in the soil, having regard to,
    i. the property from which the soil was taken before being brought to the RSC property,
    ii. the handling of the soil, including its storage and transport, following its original excavation, and
    iii. any other relevant factors, including potentially contaminating activity.
6. The samples of the soil must be collected and selected for analysis so as to obtain representative results that locate any areas in the soil being sampled where a contaminant may be present at a concentration greater than the standard in Table 1 of the Soil, Ground Water and Sediment Standards for the contaminant and at least one soil sample must be analyzed for each 160 cubic metres of soil for the first 5,000 cubic metres to be assessed at each source from which soil is being brought to the RSC property, following which at least one sample for each additional 300 cubic metres of soil which is to remain on, in or under the RSC property must be analyzed.
7. Analysis of the samples referred in paragraph 6 is carried out at an accredited laboratory.

Application of Schedule E etc.

3. (1) The provisions of Schedule E and sections 47 and 48 of the regulation applicable to the collection and recording of samples of soil and the methods of sampling, analysis of samples and reporting of analytical results apply with necessary modifications to the determination of whether soil to

be brought to the RSC property meets standards in Table 1 of the Soil, Ground Water and Sediment Standards for the contaminants in the soil.

(2) For purposes of subsection (1), the applicable provisions include the requirements for sampling and analysis for the purpose of determining whether a standard for a contaminant set out in the Soil, Ground Water and Sediment Standards has been met.

(3) The qualified person shall ensure that a document which meets the requirements of Sub-Heading (i) (Soil Brought to the Phase Two Property) in Heading (c) (Soil Excavated at or Brought to the Phase Two Property) in Report Section 10 (Appendices) of Table 1 of Schedule E is prepared with respect to the sampling and analysis of soil brought to the RSC property.

(4) For the purposes of subsection (3), the sub-heading described in that subsection shall be read as follows:

1. References to section 32 are deemed to be references to section 2 of this Schedule.
2. References to “phase two property” are deemed to be references to the “RSC property”.
3. References to “applicable site condition standard” are deemed to be references to “standard in Table 1 of the Soil, Ground Water and Sediment Standards”.

PART I
GENERAL

INTERPRETATION AND APPLICATION

1. (1) In this Regulation,

"adequate", in relation to a procedure, material, device, object or thing, means,

(a) sufficient for both its intended and its actual use, and

(b) sufficient to protect a worker from occupational illness or occupational injury,

and "adequately" has a corresponding meaning;

"allowable unit stress", in relation to a material, means,

(a) the allowable unit stress assigned to a material by the standards required under the *Building Code*, or

(b) if no allowable unit stress is assigned under clause (a), the allowable unit stress for the material as determined by a professional engineer in accordance with good engineering practice;

"approved", in relation to a form, means approved by the Minister;

"blocker truck" means a truck that weighs at least 6,800 kilograms and has four-way flashers and a mounted flashing arrowboard sign;

"boom" means the projecting part of a backhoe, shovel, crane or similar lifting device from which a load is likely to be supported;

"*Building Code*" means Ontario Regulation 403/97 made under the *Building Code Act, 1992*;

"caisson" means,

(a) a casing below ground or water level whether or not it is designed to contain air at a pressure greater than atmospheric pressure,

(b) an excavation, including a waterwell but not a well within the meaning of the *Petroleum Resources Act*, drilled by an auger and into which a person may enter;

"cofferdam" means a structure constructed entirely or partially below water level or below the level of the groundwater table and intended to provide a work place that is free of water;

"competent worker", in relation to specific work, means a worker who,

(a) is qualified because of knowledge, training and experience to perform the work,

(b) is familiar with the *Occupational Health and Safety Act* and with the provisions of the regulations that apply to the work, and

(c) has knowledge of all potential or actual danger to health or safety in the work;

"conduit" means a sewer, a water main, a duct or cable for a telegraphic, telephonic, television or electrical service, a pipe or duct for the transportation of any solid, liquid or gas or any combination of these items and includes a service connection made or intended to be made thereto;

"crash truck" means a blocker truck that is equipped with a crash-attenuating device;

"excavation" means the hole that is left in the ground, as a result of removing material;

"excavation depth" means the vertical dimension from the highest point of the excavation wall to a point level with the lowest point of the excavation;

"excavation width" means the least horizontal dimension between the two opposite walls of the excavation;

"fall arrest system" means an assembly of components joined together so that when the assembly is connected to a fixed support, it is capable of arresting a worker's fall;

"fall restricting system" means a type of fall arrest system that has been designed to limit a worker's fall to a specified distance;

"falsework", in relation to a form or structure, means the structural supports and bracing used to support all or part of the form or structure;

"fixed support" means a permanent or temporary structure or a component of such a structure that can withstand all loads and forces the structure or component is intended to support or resist and is sufficient to protect a worker's health and safety, and includes equipment or devices that are securely fastened to the structure or component;

"flammable liquid" means a liquid with a flash point below 37.8 degrees celsius and a vapour pressure not exceeding 275 kilopascals absolute at 37.8 degrees celsius;

"form" means the mould into which concrete or another material is to be placed;

"formwork" means a system of forms connected together;

"freeway" means a controlled-access highway that has a continuous dividing median and a normal posted speed limit of 90 kilometres per hour or more;

"full body harness" means a device that can arrest an accidental vertical or near vertical fall of a worker and which can guide and distribute the impact forces of the fall by means of leg and shoulder strap supports and an upper dorsal suspension assembly which, after the arrest, will not by itself permit the release or further lowering of the worker;

"guardrail system" means an assembly of components joined together to provide a barrier to prevent a worker from falling from the edge of a surface;

"highway" means a common and public highway, street, avenue, parkway, driveway, square, place, bridge, viaduct or trestle, any part of which is intended for or used by the general public for the passage of vehicles;

"longitudinal buffer area" means the area of a project between the end of a lane closure taper and the start of a work area;

"magazine" means a place in which explosives are stored or kept, whether above or below ground;

"multi-point suspended scaffold" means a suspended scaffold or suspended work platform or a system of suspended scaffolds or suspended work platforms, each scaffold or platform being more than 750 millimetres in width, that is supported from an overhead support system by at least three primary load-carrying means of suspension to maintain the system's stability;

"professional engineer" means a person who is a professional engineer within the meaning of the *Professional Engineers Act*;

"public way" means a highway or other street, avenue, parkway, driveway, square, place, bridge, viaduct, or other open space to which the public has access, as of right or by expressed or implied invitation;

"roadway" means the travelled portion of a highway;

"safety belt" means a belt worn around the waist of a worker and all the fittings for the belt appropriate for the use being made of it;

"safety factor" means the ratio of the failure load to the specified load or rated load;

"safety net" means a safety net that complies with section 26.8, and is located and supported in such a way that it arrests the fall of a worker who may fall into it without endangering the worker;

"service shaft" means a shaft by which people or materials are passed into or out of a tunnel under construction;

"shaft" means an excavation with a longitudinal axis at an angle greater than 45 degrees from the horizontal that is used to pass people or materials into or out of a tunnel or that leads to a tunnel or that is used as an access to a boring or augering operation;

"sheathing" means the members of shoring that are placed up against the walls of an excavation to directly resist the pressure exerted from the walls of the excavation;

"sign truck" means a vehicle that has,

(a) four-way flashers and a mounted flashing arrowboard sign, or

(b) a portable trailer with a mounted flashing arrowboard sign;

"strut" means a transverse member of shoring that directly resists pressure from a wale;

"suitable", in relation to a procedure, material, device, object or thing, means sufficient to protect a worker from damage to the worker's body or health;

"tower crane" means a travelling, fixed or climbing mechanical device or structure that has,

(a) a boom, a jib or both,

(b) a power-driven drum and wire rope to raise, lower or move material, and

(c) a vertical mast;

"travel restraint system" means an assembly of components capable of restricting a worker's movement on a work surface and preventing the worker from reaching a location from which he or she could fall;

"traverse", when used in relation to a multi-point suspended scaffold, means to move the scaffold horizontally, in a controlled manner, along the building or structure to which it is attached;

"trench" means an excavation where the excavation depth exceeds the excavation width;

"tunnel" means a subterranean passage into which a person may enter that is made by excavating beneath the overburden;

"underground", in relation to work, means inside a shaft, tunnel or caisson;

"vehicle" means a vehicle propelled by mechanical power and includes a trailer, a traction engine and a road-building machine;

"wale" means a longitudinal member of the shoring that is placed against the sheathing to directly resist the pressure from the sheathing;

"work belt" means a belt that has a back support pad and a connecting hook at the front and that is capable of supporting a worker. O. Reg. 213/91, s. 1 (1); O. Reg. 631/94, s. 1; O. Reg. 145/00, s. 1 (1-13); O. Reg. 85/04, s. 1; O. Reg. 628/05, s. 1.

(2) In this Regulation, a short form listed in Column 1 of the Table to this subsection has the same meaning as the term set out opposite to it in Column 2.

O. Reg. 213/91, s. 1 (2); O. Reg. 145/00, s. 1 (4).

1.1 In this Regulation, a requirement that something be done in accordance with good engineering practice includes a requirement that it be done in a manner that protects the health and safety of all workers. O. Reg. 85/04, s. 2.

1.2 In this Regulation, a requirement that a design, drawing, instruction, report, specification, opinion or other document be prepared by a professional engineer includes a requirement that he or she sign and seal it. O. Reg. 85/04, s. 2.

2. This Part applies with respect to all projects. O. Reg. 213/91, s. 2.

ALTERNATIVE METHODS AND MATERIALS

3. An employer, owner or constructor may vary a procedure required by this Regulation or the composition, design, size or arrangement of a material, object, device or thing as required by this Regulation,

(a) if the procedure, composition, design, size or arrangement as varied affords protection for the health and safety of workers that is at least equal to the protection that would otherwise be given; and

(b) if the employer, owner or constructor gives written notice of the varied procedure, composition, design, size or arrangement to the joint health and safety committee or the health and safety representative, if any, for the work place. O. Reg. 213/91, s. 3.

DESIGNATION OF A PROJECT

4. A Director may designate in writing a part of a project as a project and the designated project is considered to be a project for the purposes of the Act and this Regulation. O. Reg. 213/91, s. 4; O. Reg. 145/00, s. 2.

REGISTRATION AND NOTICES

5. (1) Before beginning work at a project, each constructor and employer engaged in construction shall complete an approved registration form. O. Reg. 145/00, s. 3.

(2) The constructor shall ensure that,

(a) each employer at the project provides to the constructor a completed approved registration form; and

(b) a copy of the employer's completed form is kept at the project while the employer is working there. O. Reg. 145/00, s. 3.

6. (1) This section applies with respect to a project if,

(a) the total cost of labour and materials for the project is expected to exceed $50,000;

(b) the work is the erection or structural alteration of a building more than two storeys or more than 7.5 metres high;

(c) the work is the demolition of a building at least four metres high with a floor area of at least thirty square metres;

(d) the work is the erection, structural alteration or structural repair of a bridge, an earth-retaining structure or a water-retaining structure more than three metres high or of a silo, chimney or a similar structure more than 7.5 metres high;

(e) work in compressed air is to be done at the project;

(f) a tunnel, caisson, cofferdam or well into which a person may enter is to be constructed at the project;

(g) a trench into which a person may enter is to be excavated at the project and the trench is more than 300 metres long or more than 1.2 metres deep and over thirty metres long; or

(h) a part of the permanent or temporary work is required by this Regulation to be designed by a professional engineer. O. Reg. 213/91, s. 6 (1).

(2) The constructor shall comply with subsection (3) or (4) before beginning work at the project. O. Reg. 145/00, s. 4.

(3) The constructor shall complete an approved notification form and file it at the Ministry office located nearest to the project. O. Reg. 145/00, s. 4.

(4) If the constructor believes that the work at the project will not take more than 14 days, the constructor may provide the relevant information to an inspector at the Ministry office located nearest to the project,

(a) by faxing the completed form to the inspector; or

(b) by providing the information that would be required to complete the form to the inspector by telephone. O. Reg. 145/00, s. 4.

(5) Despite subsection (2), the constructor may begin work at a project before complying with subsection (3) or (4) if the following conditions are met:

1. It is necessary to do the work immediately to prevent injury to people or damage to property.
2. Before beginning the work, the constructor gives an inspector notice of the information required in the form by telephone or fax. O. Reg. 145/00, s. 4.

(6) The constructor shall keep the completed notification form posted in a conspicuous place at the project or available at the project for review by an inspector. O. Reg. 145/00, s. 4.

(7) REVOKED: O. Reg. 145/00, s. 4.

7. If section 6 does not apply to a project but the project includes work on a trench more than 1.2 metres deep into which a worker may enter, the constructor shall, before any work at the project is begun, give notice in person, by telephone or by fax to the Ministry office located nearest to the project. O. Reg. 145/00, s. 5.

ACCIDENT NOTICES AND REPORTS UNDER SECTIONS 51-53 OF THE ACT

8. A written report under subsection 51 (1) of the Act respecting an occurrence in which a person is killed or critically injured shall set out,

(a) the name and address of the constructor and the employer, if the person involved is a worker;

(b) the nature and the circumstances of the occurrence and the bodily injury sustained by the person;

(c) a description of the machinery or equipment involved;

(d) the time and place of the occurrence;

(e) the name and address of the person involved;

(f) the names and addresses of all witnesses to the occurrence;

(g) the name and address of the any legally qualified medical practitioner by whom the person was or is being attended for the injury; and

(h) the steps taken to prevent a recurrence. O. Reg. 213/91, s. 8; O. Reg. 145/00, s. 6.

9. (1) A notice under subsection 52 (1) of the Act respecting an occurrence involving a worker shall set out,

(a) the name, address and type of business of the employer;

(b) the nature and the circumstances of the occurrence and the bodily injury or illness sustained by the worker;

(c) a description of the machinery or equipment involved;

(d) the time and place of the occurrence;

(e) the name and address of the worker involved;

(f) the names and addresses of all witnesses to the occurrence;

(g) the name and address of any legally qualified medical practitioner by whom the worker was or is being attended for the injury or illness;

(g.1) the name and address of each medical facility, if any, where the worker was or is being attended for the injury or illness; and

(h) the steps taken to prevent a recurrence. O. Reg. 213/91, s. 9 (1); O. Reg. 145/00, s. 7 (1).

(2) A notice under subsection 52 (2) of the Act (information and particulars respecting a worker's occupational illness) shall contain the following information:

1. The employer's name, address and type of business.
2. The nature of the illness.
3. The worker's name and address.
4. The name and address of any legally qualified medical practitioner by whom the worker was or is being attended for the illness.
5. The name and address of each medical facility, if any, where the worker was or is being attended for the illness.
6. A description of the steps taken to prevent a recurrence. O. Reg. 145/00, s. 7 (2).

10. (1) An employer shall keep in the employer's permanent records a record of any accident, explosion or fire involving a worker that causes injury requiring medical attention but does not disable the worker from performing his or her usual work. O. Reg. 213/91, s. 10 (1).

(2) The record shall include particulars of,

(a) the nature and circumstances of the occurrence and the injury sustained by the worker;

(b) the time and place of the occurrence;

(c) the name and address of the injured worker; and

(d) the steps taken to prevent a recurrence. O. Reg. 213/91, s. 10 (2).

(3) An employer to whom subsection (1) applies shall make the record available to an inspector upon request. O. Reg. 213/91, s. 10 (3).

11. (1) The following incidents are prescribed for the purpose of section 53 of the Act:

1. A worker falling a vertical distance of three metres or more.
2. A worker falling and having the fall arrested by a fall arrest system other than a fall restricting system.
3. A worker becoming unconscious for any reason.
4. Accidental contact by a worker or by a worker's tool or equipment with energized electrical equipment, installations or conductors.
5. Accidental contact by a crane, similar hoisting device, backhoe, power shovel or other vehicle or equipment or its load with an energized electrical conductor rated at more than 750 volts.
6. Structural failure of all or part of falsework designed by, or required by this Regulation to be designed by, a professional engineer.
7. Structural failure of a principal supporting member, including a column, beam, wall or truss, of a structure.
8. Failure of all or part of the structural supports of a scaffold.
9. Structural failure of all or part of an earth- or water-retaining structure, including a failure of the temporary or permanent supports for a shaft, tunnel, caisson, cofferdam or trench.
10. Failure of a wall of an excavation or of similar earthwork with respect to which a professional engineer has given a written opinion that the stability of the wall is such that no worker will be endangered by it.
11. Overturning or the structural failure of all or part of a crane or similar hoisting device. O. Reg. 213/91, s. 11 (1); O. Reg. 85/04, s. 3; O. Reg. 627/05, s. 1.

(2) A notice under section 53 of the Act shall set out the circumstances of the occurrence and the steps taken to prevent a recurrence. O. Reg. 213/91, s. 11 (2).

12. (1) This section applies with respect to an occurrence for which a report under subsection 51 (1) of the Act or a notice under section 52 or 53 of the Act is given, if the occurrence involves a failure of all or part of,

(a) temporary or permanent works;

(b) a structure;

(c) an excavation wall or similar earthwork for which a professional engineer has given a written opinion that the stability of the wall is such that no worker will be endangered by it; or

(d) a crane or similar hoisting device. O. Reg. 213/91, s. 12 (1).

(2) A constructor or employer who submits a report under subsection 51 (1) of the Act (notice of death or injury) or gives a notice under section 52 or 53 of the Act (notice of accident, etc.) shall also provide, within 14 days after the occurrence, a professional engineer's written opinion stating the cause of the occurrence. O. Reg. 145/00, s. 8.

GENERAL REQUIREMENTS

13. (1) A constructor shall post in a conspicuous place at a project and keep posted while work is done at the project a notice setting out,

(a) the constructor's name and if the constructor carries on business in a different name, the business name;

(b) the address and telephone number of the constructor's head office or principal place of business in Ontario; and

(c) the address and telephone number of the nearest office of the Ministry. O. Reg. 213/91, s. 13 (1); O. Reg. 145/00, s. 9.

(2) Within forty-eight hours after a health and safety representative or joint health and safety committee members are selected for a project, a constructor shall add to the notice the name, trade and employer of the health and safety representative or of each of the committee members. O. Reg. 213/91, s. 13 (2).

14. (1) A constructor shall appoint a supervisor for every project at which five or more workers will work at the same time. O. Reg. 213/91, s. 14 (1).

(2) The supervisor shall supervise the work at all times either personally or by having an assistant, who is a competent person, do so personally. O. Reg. 213/91, s. 14 (2).

(3) A supervisor or a competent person appointed by the supervisor shall inspect all machinery and equipment, including fire extinguishing equipment, magazines, electrical installations, communication systems, sanitation and medical facilities, buildings and other structures, temporary supports and means of access and egress at the project to ensure that they do not endanger any worker. O. Reg. 213/91, s. 14 (3).

(4) An inspection shall be made at least once a week or more frequently as the supervisor determines is necessary in order to ensure that the machinery and equipment referred to in subsection (3) do not endanger any worker. O. Reg. 213/91, s. 14 (4).

(5) A competent person shall perform tests and observations necessary for the detection of hazardous conditions on a project. O. Reg. 213/91, s. 14 (5).

15. (1) An employer of five or more workers on a project shall appoint a supervisor for the workers. O. Reg. 213/91, s. 15.

(2) The supervisor shall supervise the work at all times either personally or by having an assistant, who is a competent person, do so personally. O. Reg. 145/00, s. 10.

16. At a project, no person younger than 16 years of age shall,

(a) be employed in or about the workplace; or

(b) be permitted to be present in or about the workplace while work is being performed. O. Reg. 145/00, s. 11.

17. (1) A constructor shall establish for a project written procedures to be followed in the event of an emergency and shall ensure that the procedures are followed at the project. O. Reg. 145/00, s. 11.

(2) The constructor shall review the emergency procedures with the joint health and safety committee or the health and safety representative for the project, if any. O. Reg. 145/00, s. 11.

(3) The constructor shall ensure that the emergency procedures are posted in a conspicuous place at the project. O. Reg. 145/00, s. 11.

18. The constructor shall ensure that every worker at the project has ready access to a telephone, two-way radio or other system of two-way communication in the event of an emergency. O. Reg. 145/00, s. 11.

19. If, under this Regulation, a record is required to be kept available for inspection at a project, the constructor or employer, as the case may be, shall keep the record for at least one year after the project is finished. O. Reg. 213/91, s. 19.

PART II
GENERAL CONSTRUCTION

Application

20. This Part applies with respect to all projects. O. Reg. 213/91, s. 20.

Protective Clothing, Equipment and Devices

21. (1) A worker shall wear such protective clothing and use such personal protective equipment or devices as are necessary to protect the worker against the hazards to which the worker may be exposed. O. Reg. 213/91, s. 21 (1).

(2) A worker's employer shall require the worker to comply with subsection (1). O. Reg. 213/91, s. 21 (2).

(3) A worker required to wear protective clothing or use personal protective equipment or devices shall be adequately instructed and trained in the care and use of the clothing, equipment or device before wearing or using it. O. Reg. 213/91, s. 21 (3).

22. (1) Every worker shall wear protective headwear at all times when on a project. O. Reg. 213/91, s. 22 (1).

(2) Protective headwear shall be a safety hat that,

(a) consists of a shell and suspension that is adequate to protect a person's head against impact and against flying or falling small objects; and

(b) has a shell which can withstand a dielectric strength test at 20,000 volts phase to ground. O. Reg. 213/91, s. 22 (2).

23. (1) Every worker shall wear protective footwear at all times when on a project. O. Reg. 213/91, s. 23 (1).

(2) Protective footwear shall be a safety shoe or safety boot,

(a) with a box toe that is adequate to protect the wearer's toes against injury due to impact and is capable of resisting at least 125 joules impact; and

(b) with a sole or insole that is adequate to protect the wearer's feet against injury due to puncture and is capable of resisting a penetration load of 1.2 kilonewtons when tested with a DIN standard pin. O. Reg. 213/91, s. 23 (2).

24. A worker shall use protection appropriate in the circumstances when there is a risk of eye injury to the worker. O. Reg. 213/91, s. 24.

25. A worker shall use protection appropriate in the circumstances when there is a risk of injury on a project from contact between the worker's skin and,

(a) a noxious gas, liquid, fume or dust;

(b) an object that may puncture, cut or abrade the skin;

(c) a hot object, hot liquid or molten metal; or

(d) radiant heat. O. Reg. 213/91, s. 25.

26. Sections 26.1 to 26.9 apply where a worker is exposed to any of the following hazards:

1. Falling more than 3 metres.
2. Falling more than 1.2 metres, if the work area is used as a path for a wheelbarrow or similar equipment.
3. Falling into operating machinery.
4. Falling into water or another liquid.
5. Falling into or onto a hazardous substance or object.
6. Falling through an opening on a work surface. O. Reg. 145/00, s. 12; O. Reg. 85/04, s. 4.

26.1 (1) A worker shall be adequately protected by a guardrail system that meets the requirements of subsections 26.3 (2) to (8). O. Reg. 145/00, s. 12.

(2) Despite subsection (1), if it is not reasonably possible to install a guardrail system as that subsection requires, a worker shall be adequately protected by at least one of the following methods of fall protection:

1. A travel restraint system that meets the requirements of section 26.4.
2. A fall restricting system that meets the requirements of section 26.5.
3. A fall arrest system, other than a fall restricting system designed for use in wood pole climbing, that meets the requirements of section 26.6.
4. A safety net that meets the requirements of section 26.8. O. Reg. 145/00, s. 12; O. Reg. 85/04, s. 5 (1).

(3) The components of any system listed in subsection (2) shall be designed by a professional engineer in accordance with good engineering practice, and shall meet the requirements of any of the following National Standards of Canada standards that are applicable:

1. CAN/CSA-Z259.1-05: Body Belts and Saddles for Work Positioning and Travel Restraint.
2. CAN/CSA-Z259.2.1-98 (R2008): Fall Arresters, Vertical Lifelines and Rails.
3. CAN/CSA-Z259.2.2-98 (R2004): Self-Retracting Devices for Personal Fall-Arrest Systems.
4. CAN/CSA-Z259.2.3-99 (R2004): Descent Control Devices.
5. CAN/CSA-Z259.10-06: Full Body Harnesses.
6. CAN/CSA-Z259.11-05: Energy Absorbers and Lanyards.
7. CAN/CSA-Z259.12-01 (R2006): Connecting Components for Personal Fall Arrest Systems (PFAS).
8. CAN/CSA-Z259.14-01 (R2007): Fall Restrict Equipment for Wood Pole Climbing. O. Reg. 85/04, s. 5 (2); O. Reg. 443/09, s. 1.

(4) Before any use of a fall arrest system or a safety net by a worker at a project, the worker's employer shall develop written procedures for rescuing the worker after his or her fall has been arrested. O. Reg. 145/00, s. 12.

26.2 (1) An employer shall ensure that a worker who may use a fall protection system is adequately trained in its use and given adequate oral and written instructions by a competent person. O. Reg. 145/00, s. 13.

(2) The employer shall ensure that the person who provides the training and instruction referred to in subsection (1) prepares a written training and instruction record for each worker and signs the record. O. Reg. 145/00, s. 13.

(3) The training and instruction record shall include the worker's name and the dates on which training and instruction took place. O. Reg. 145/00, s. 13.

(4) The employer shall make the training and instruction record for each worker available to an inspector on request. O. Reg. 145/00, s. 13.

26.3 (1) Despite paragraph 1 of section 26, a guardrail system that meets the requirements of this section shall be used if a worker has access to the perimeter or an open side of any of the following work surfaces and is exposed to a fall of 2.4 metres or more:

1. A floor, including the floor of a mezzanine or balcony.
2. The surface of a bridge.
3. A roof while formwork is in place.
4. A scaffold platform or other work platform, runway or ramp. O. Reg. 145/00, s. 14.

(2) One of the following precautions shall be used to prevent a worker from falling through an opening on a work surface:

1. A guardrail system that meets the requirements of this section.
2. A protective covering that,
   i. completely covers the opening,
   ii. is securely fastened,
   iii. is adequately identified as covering an opening,
   iv. is made from material adequate to support all loads to which the covering may be subjected, and
   v. is capable of supporting a live load of at least 2.4 kilonewtons per square metre without exceeding the allowable unit stresses for the material used. O. Reg. 145/00, s. 14.

(3) The guardrail system or protective covering required under subsection (1) or (2) may be removed temporarily to perform work in or around the opening if a worker is adequately protected and signs are posted in accordance with subsections 44 (1) and (2). O. Reg. 145/00, s. 14.

(4) The following are the specifications for a guardrail system:

1. It shall have a top rail, an intermediate rail and a toe board.
2. The intermediate rail may be replaced by material that can withstand a point load of 450 newtons applied in a lateral or vertical downward direction.
3. Subject to subsection 116 (8), the top of the guardrail system shall be located at least 0.9 metres but not more than 1.1 metres above the surface on which the system is installed.
4. The intermediate rail shall be located midway between the top rail and the toe board.

4.1 The toe board shall extend from the surface to which the guardrail system is attached to a height of at least 89 millimetres.

5. If the guardrail system is located at the perimeter of a work surface, the distance between the edge of the surface and the guardrail system shall not be greater than 300 millimetres. O. Reg. 145/00, s. 14; O. Reg. 443/09, s. 2 (1).

(5) A guardrail system shall be capable of resisting anywhere along the length of the system the following loads when applied separately, without exceeding the allowable unit stress for each material used:

1. A point load of 675 newtons applied in a lateral direction to the top rail.
2. A point load of 450 newtons applied in a vertical downward direction to the top rail.
3. A point load of 450 newtons applied in a lateral or vertical downward direction to the intermediate rail, or midway between the top rail and the toe board.
4. A point load of 225 newtons applied in a lateral direction to the toe board. O. Reg. 145/00, s. 14.

(6) The distance between any two adjacent posts of the guardrail system may be greater than 2.4 metres only if the system is capable of resisting the loads specified in subsection (5) increased in proportion to the greater distance between the posts. O. Reg. 443/09, s. 2 (2).

(7) The following additional requirements apply to a guardrail system that is made of wood:

1. The wood shall be spruce, pine or fir (S-P-F) timber of construction grade quality or better and shall not have any visible defect affecting its load-carrying capacity.
2. The wood shall be free of sharp objects such as splinters and protruding nails.
3. The system shall have posts that are at least 38 millimetres by 89 millimetres, are securely fastened to the surface and are spaced at intervals of not more than 2.4 metres.
4. The top rail and the intermediate rail shall each be at least 38 millimetres by 89 millimetres. O. Reg. 145/00, s. 14; O. Reg. 443/09, s. 2 (3).

(7.1) If a guardrail system that is made of wood is constructed and installed so that it is capable of resisting all loads that it may be subjected to by a worker, the following do not apply:

1. The requirement in paragraph 2 of subsection (4) that the replacement material can withstand a point load of 450 newtons.
2. Subsections (5) and (6). O. Reg. 443/09, s. 2 (4).

(8) The following additional requirements apply to a guardrail system that is made of wire rope:

1. The top rail and intermediate rail shall be made of wire rope that is at least 10 millimetres in diameter, and the rope shall be kept taut by a turnbuckle or other device.
2. The outward deflection of the top rail and intermediate rail resulting from the loads specified in subsection (5) shall not extend beyond the edge of a work surface.
3. The system shall have vertical separators at intervals of not more than 2.4 metres and horizontal supports at intervals of not more than 9 metres.
4. REVOKED: O. Reg. 443/09, s. 2 (6).

O. Reg. 145/00, s. 14; O. Reg. 443/09, s. 2 (5, 6).

26.4 (1) A travel restraint system shall consist of a full body harness with adequate attachment points or a safety belt. O. Reg. 145/00, s. 14.

(2) The full body harness or safety belt shall be attached by a lifeline or lanyard to a fixed support that meets the requirements of section 26.7. O. Reg. 145/00, s. 14.

(3) The travel restraint system shall be inspected by a competent worker before each use. O. Reg. 145/00, s. 14.

(4) If a component of the travel restraint system is found to be defective on inspection, the defective component shall immediately be taken out of service. O. Reg. 145/00, s. 14.

26.5 (1) A fall restricting system that is not designed for use in wood pole climbing shall consist of an assembly of components that is,

(a) attached to an independent fixed support that meets the requirements of section 26.7; and

(b) designed and arranged in accordance with the manufacturer's instructions and so that a worker's free fall distance does not exceed 0.6 metres. O. Reg. 85/04, s. 6.

(2) A fall restricting system that is designed for use in wood pole climbing,

(a) shall consist of an assembly of components that is designed and arranged in accordance with the manufacturer's instructions; and

(b) shall not allow pole slippage in excess of the distances set out in the applicable National Standards of Canada standard referred to in subsection 26.1 (3). O. Reg. 85/04, s. 6.

(3) A fall restricting system shall be inspected by a competent worker before each use. O. Reg. 85/04, s. 6.

(4) If a component of the fall restricting system is found to be defective on inspection, the component shall be taken out of service immediately. O. Reg. 85/04, s. 6.

(5) If a worker who is using the fall restricting system falls or slips more than the distance determined under clause (1) (b) or (2) (b), as the case may be, the system shall be taken out of service immediately and shall not be used again by a worker unless all components of the system have been certified by the manufacturer as being safe for reuse. O. Reg. 85/04, s. 6.

26.6 (1) A fall arrest system shall consist of a full body harness with adequate attachment points and a lanyard equipped with a shock absorber or similar device. O. Reg. 145/00, s. 14.

(2) The fall arrest system shall be attached by a lifeline or by the lanyard to an independent fixed support that meets the requirements of section 26.7. O. Reg. 145/00, s. 14.

(3) The fall arrest system shall be arranged so that a worker cannot hit the ground or an object or level below the work. O. Reg. 145/00, s. 14.

(4) Despite subsection (1), the fall arrest system shall not include a shock absorber if wearing or using one could cause a worker to hit the ground or an object or level below the work. O. Reg. 145/00, s. 14.

(5) The fall arrest system shall not subject a worker who falls to a peak fall arrest force greater than 8 kilonewtons. O. Reg. 145/00, s. 14.

(6) The fall arrest system shall be inspected by a competent worker before each use. O. Reg. 145/00, s. 14.

(7) If a component of the fall arrest system is found to be defective on inspection, the defective component shall immediately be taken out of service. O. Reg. 145/00, s. 14.

(8) If a worker who is using the fall arrest system falls, the system shall be immediately removed from service and shall not be used again by a worker unless all components of the system have been certified by the manufacturer as being safe for re-use. O. Reg. 145/00, s. 14.

(9) Subsections (1) to (8) do not apply to fall restricting systems designed for use in wood pole climbing. O. Reg. 85/04, s. 7.

26.7 (1) A permanent anchor system shall be used as the fixed support in a fall arrest system, fall restricting system or travel restraint system if the following conditions are met:

1. The anchor system has been installed according to the *Building Code*.

2. It is safe and practical to use the anchor system as the fixed support. O. Reg. 145/00, s. 14.

(2) If the conditions set out in subsection (1) are not met, a temporary fixed support shall be used that meets the following requirements:

1. Subject to paragraph 2, a support used in a fall arrest system shall be capable of supporting a static force of at least 8 kilonewtons without exceeding the allowable unit stress for each material used.
2. If a shock absorber is also used in the fall arrest system, the support shall be capable of supporting a static force of at least 6 kilonewtons without exceeding the allowable unit stress for each material used.
3. Subject to paragraph 4, a support used in a fall restricting system must be capable of supporting a static force of at least 6 kilonewtons without exceeding the allowable unit stress for each material used.
4. Paragraph 3 does not apply to a support that is used in accordance with the manufacturer's written instructions and is adequate to protect a worker.
5. A support used in a travel restraint system shall be capable of supporting a static force of at least 2 kilonewtons without exceeding the allowable unit stress for each material used. O. Reg. 145/00, s. 14.

(3) Despite the requirements listed in subsection (2), the support capacity of a temporary fixed support used in a fall protection system may be determined by dynamic testing in accordance with good engineering practice to ensure that the temporary fixed support has adequate capacity to arrest a worker's fall. O. Reg. 145/00, s. 14.

(4) A fixed support shall not have any sharp edges that could cut, chafe or abrade the connection between it and another component of the system. O. Reg. 145/00, s. 14.

(5) Subsections (1) to (4) do not apply to fall restricting systems designed for use in wood pole climbing. O. Reg. 85/04, s. 8.

26.8 (1) A safety net shall be designed, tested and installed in accordance with ANSI Standard 10.11-1989, Personnel and Debris Nets for Construction and Demolition Operations. O. Reg. 145/00, s. 14.

(2) The safety net shall be installed by a competent worker. O. Reg. 145/00, s. 14.

(3) A professional engineer or a competent person under the engineer's supervision shall inspect and test the installation of the safety net before it is put in service. O. Reg. 145/00, s. 14.

(4) The engineer shall document the inspection and testing of the safety net. O. Reg. 145/00, s. 14; O. Reg. 85/04, s. 9.

(5) A copy of the document shall be kept at the project while the safety net is in service. O. Reg. 145/00, s. 14.

26.9 (1) This section applies to a lanyard or lifeline that is part of a travel restraint system or a fall arrest system. O. Reg. 145/00, s. 14.

(2) The following requirements apply to a lanyard or a lifeline:

1. It shall not be used in such a way that it is likely to be cut, chafed or abraded.
2. It shall not be subjected to extreme temperature, flame, abrasive or corrosive materials or other hazards that may damage it.
3. The free end of the lanyard or lifeline shall be kept clear of equipment and machinery. O. Reg. 145/00, s. 14.

(3) Only one person at a time may use a lanyard. O. Reg. 145/00, s. 14.

(4) The connecting ends of a lanyard shall be wrapped around a protective thimble and securely fastened with a swaged fitting or eye splice supplied by the manufacturer of the lanyard. O. Reg. 145/00, s. 14.

(5) A horizontal or vertical lifeline shall be kept free from splices or knots, except knots used to connect it to a fixed support. O. Reg. 145/00, s. 14.

(6) Only one person at a time may use a vertical lifeline. O. Reg. 145/00, s. 14.

(7) A vertical lifeline shall,

(a) extend to the ground; or

(b) have a positive stop that prevents the rope grab or other similar device from running off the end of the lifeline. O. Reg. 145/00, s. 14.

(8) The following requirements apply to a horizontal lifeline system:

1. It shall be designed by a professional engineer in accordance with good engineering practice.
2. The design may be a standard design or a custom design.
3. The design shall,
   i. show the arrangement of the system including the anchorage or fixed support system,
   ii. indicate the components used,
   iii. state the number of workers that can safely be attached to it,
   iv. set out instructions for installation or erection, and
   v. show the design loads for the system.
4. The system shall be installed or erected, and maintained, in accordance with the professional engineer's design.
5. Before each use, the system shall be inspected by a professional engineer or a competent worker designated by a supervisor.
6. The constructor shall keep the design at the project while the system is in use. O. Reg. 145/00, s. 14.

26.10, 26.11 REVOKED: O. Reg. 85/04, s. 10.

27. (1) Despite subsections 26.1 (1) and (2), if the following conditions are met, a worker shall wear a lifejacket or other personal flotation device that is adequate:

1. The worker is exposed to a risk of drowning on a project.
2. It is not reasonably possible to install a guardrail system as subsection 26.1 (1) requires.
3. It is not reasonably possible to protect the worker adequately by means of a fall protection method as subsection 26.1 (2) requires. O. Reg. 443/09, s. 3 (1).

(2) If a worker may drown at a project,

(a) at least two workers trained to perform rescue operations shall be available to perform rescue operations;

(b) rescue equipment shall be provided in a suitable location on or near the project; and

(c) all workers on the project shall be advised of the rescue procedures to be followed and their role, if any, in carrying out a rescue. O. Reg. 213/91, s. 27 (2).

(3) The rescue equipment shall include,

(a) a seaworthy boat equipped with a lifebuoy attached to a buoyant heaving line not less than 15 metres in length and a boat hook; and

(b) REVOKED: O. Reg. 443/09, s. 3 (2).

(c) an alarm system capable of warning a worker of the necessity of carrying out a rescue operation. O. Reg. 213/91, s. 27 (3); O. Reg. 443/09, s. 3 (2).

(4) The boat shall be power-driven if the water is likely to be rough or swift. O. Reg. 213/91, s. 27 (4).

(5) The alarm system shall be activated when a rescue operation is necessary. O. Reg. 213/91, s. 27 (5).

(6) REVOKED: O. Reg. 443/09, s. 3 (3).

HYGIENE

28. (1) A reasonable supply of potable drinking water shall be kept readily accessible at a project for the use of workers. O. Reg. 213/91, s. 28 (1).

(2) Drinking water shall be supplied from a piping system or from a clean, covered container with a drain faucet. O. Reg. 213/91, s. 28 (2).

(3) Workers shall be given a sanitary means of drinking the drinking water. O. Reg. 213/91, s. 28 (3).

(4) Workers shall not be required to share a common drinking cup to drink water. O. Reg. 213/91, s. 28 (4).

29. (1) In this section,

"facilities" means toilet, urinal and clean-up facilities;

"service", when used as a verb, means to have waste pumped out and to have the facilities replenished where necessary. O. Reg. 527/00, s. 1.

(2) REVOKED: O. Reg. 527/00, s. 1.

(3) The constructor shall ensure,

(a) that facilities are provided or arranged for workers before work has started at a project; and

(b) that workers at the project have reasonable access to these facilities. O. Reg. 145/00, s. 15.

(4) Subject to subsections (5) and (6), the facilities shall be located within 180 metres horizontally of the work area of the project. O. Reg. 145/00, s. 15.

(5) If work is being performed in a tunnel, the facilities shall be located within 180 metres horizontally from the entrance to the tunnel. O. Reg. 145/00, s. 15.

(6) The facilities may be located within 3 kilometres of the work area if transportation to the facilities is provided for workers where reasonably required. O. Reg. 145/00, s. 15.

(7) If the project is the construction of a building, then in addition to the requirement of subsection (4), the facilities must also be located within 9 metres vertically of the level at which work is being performed. O. Reg. 145/00, s. 15.

(8) The location of the facilities under subsection (7) may be varied if the arrangement affords reasonable accessibility for workers. O. Reg. 145/00, s. 15.

(9) If the location of the facilities is varied under subsection (8), the constructor shall document in writing the location and the reasons for the variance, and shall provide the document to,

(a) the joint health and safety committee or the health and safety representative, if any, for the workplace; or

(b) the workers, if there is no committee or representative for the workers. O. Reg. 145/00, s. 15.

(10) The constructor shall,

(a) inform workers of the location of the facilities; and

(b) post the location of the facilities in a conspicuous place at the project if it is practical to do so. O. Reg. 145/00, s. 15.

(11) The facilities shall be serviced, cleaned and sanitized as frequently as necessary to maintain them in a clean and sanitary condition. O. Reg. 145/00, s. 15.

(12) The constructor shall keep at the project for the duration of the project,

(a) a record of the servicing, cleaning and sanitizing of the facilities; and

(b) a copy of the document required under subsection (9), if any. O. Reg. 145/00, s. 15.

(13) Facilities that are not under the constructor's control satisfy the requirements of this section only if the constructor has received permission from the facilities' owner for workers to use the facilities. O. Reg. 145/00, s. 15.

29.1 (0.1) In this section,

"non-sewered flush toilet facilities" means water flush toilets or chemical flush toilets that have the features listed in subsection (0.2);

"sewered toilet facilities" means water flush toilets that are connected to a sanitary sewer system and equipped with a trap in accordance with Part 7 of the *Building Code*. O. Reg. 527/00, s. 2 (1).

(0.2) The features referred to in the definition of "non-sewered flush toilet facilities" in subsection (0.1) are:

1. The toilets are not connected to a sanitary sewer system.
2. They are equipped with a trap or a positive seal separating stored waste from the bowl.
3. The waste is first flushed from the bowl with water or with water containing chemical additives. Then the waste is deposited into a container and chemically treated sufficiently for the container's maximum capacity. O. Reg. 527/00, s. 2 (1).

(1) Each toilet facility shall meet the following requirements:

1. There shall be a toilet with an open-front toilet seat.
2. There shall be a toilet paper holder and an adequate supply of toilet paper. If the facility is intended for use by female workers, there shall be a disposal receptacle for sanitary napkins.
3. The facility shall afford the user privacy and protection from weather and from falling objects. There shall be a self-closing door that can be locked from inside the facility.
4. The facility shall be,
   i. illuminated by natural or artificial light,
   ii. adequately heated, if that is possible, and
   iii. adequately ventilated.
5. If the facility is intended for use by males only or by females only, it shall have a sign indicating that fact.

6. The facility shall be kept in good repair at all times. O. Reg. 145/00, s. 15; O. Reg. 527/00, s. 2 (2, 3).

(2) Separate toilet facilities shall be provided for male and female workers, unless the facilities are intended to be used by only one worker at a time. O. Reg. 145/00, s. 15.

(3) Sewered toilet facilities or non-sewered flush toilet facilities shall be provided at a project, subject to subsection (4). O. Reg. 145/00, s. 15.

(4) If a project is being carried out in a remote unpopulated area and it is not reasonably possible to provide the toilet facilities required under subsection (3), other types of toilet facilities that come as close as possible to having the features of non-sewered flush toilet facilities shall be provided instead. O. Reg. 527/00, s. 2 (4).

(5) When water flush toilets or non-recirculating chemical flush toilets are provided, the minimum number of toilets required at the project is as follows:

TABLE 1

Minimum number of toilets	Number of workers regularly employed at the project
1	1-15
2	16-30
3	31-45
4	46-60
4, plus 1 additional toilet for each additional group of 15 or fewer workers	61 or more

O. Reg. 145/00, s. 15; O. Reg. 527/00, s. 2 (5).

(6) If the toilets are located in a multiple water flush toilet facility and are intended to be used by male workers, water flush urinals may be substituted for a maximum of two-thirds of the number of toilets required by subsection (5). O. Reg. 145/00, s. 15.

(7) When toilets other than water flush toilets or non-recirculating chemical flush toilets are provided, the minimum number of toilets required at the project is as follows:

TABLE 2

Minimum number of toilets	Number of workers regularly employed at the project
1	1-10
2	11-20
3	21-30
4	31-40
4, plus 1 additional toilet for each additional group of 15 or fewer workers	41 or more

O. Reg. 145/00, s. 15; O. Reg. 527/00, s. 2 (6).

(8) If the toilets are located in a portable single-unit toilet facility intended for use by male workers, there shall be at least one urinal for each toilet. O. Reg. 145/00, s. 15.

(9) Portable urinals equipped with clean-up facilities are permitted in addition to the requirements of this section. O. Reg. 145/00, s. 15.

29.2 (1) Each single-toilet facility shall be provided with its own clean-up facility. O. Reg. 527/00, s. 3.

(1.1) In a multiple-toilet facility at a project, one clean-up facility shall be provided for every two toilets. O. Reg. 527/00, s. 3.

(2) Each clean-up facility shall meet the following requirements:

1. Subject to subsection (3), the facility shall have a wash basin with running water. Both hot and cold running water shall be available if reasonably possible.
2. Soap or hand cleanser shall be provided.
3. Paper towels or a hand dryer shall be provided. If paper towels are provided, there shall be a waste disposal receptacle nearby. O. Reg. 145/00, s. 15.

(3) If it is not reasonably possible to have a wash basin with running water at a clean-up facility, hand cleanser that can be used without water shall be provided instead. O. Reg. 145/00, s. 15.

30. Workers who handle or use corrosive, poisonous or other substances likely to endanger their health shall be provided with washing facilities with clean water, soap and individual towels. O. Reg. 213/91, s. 30.

GENERAL REQUIREMENTS

31. (1) Every part of a project, including a temporary structure,

(a) shall be designed and constructed to support or resist all loads and forces to which it is likely to be subjected without exceeding the allowable unit stress for each material used; and

(b) shall be adequately braced to prevent any movement that may affect its stability or cause its failure or collapse. O. Reg. 213/91, s. 31 (1).

(2) If two structural steel columns or structural steel beams are connected to a common column or common beam,

(a) the connection shall be made using a clipped double connection; or

(b) the first column or beam shall be secured in a seated connection. O. Reg. 213/91, s. 31 (2).

(3) No part of a project, including a temporary structure, shall be subjected to a load in excess of the load it is designed and constructed to bear. O. Reg. 213/91, s. 31 (3).

32. (1) During the construction of a building, temporary or permanent flooring shall be installed progressively as the building is erected. O. Reg. 213/91, s. 32 (1).

(2) Temporary flooring,

(a) shall consist of material that, without exceeding the allowable unit stress for the material used, is capable of supporting,

(i) any load to which it is likely to be subjected, and

(ii) a load of at least 2.4 kilonewtons per square metre;

(b) shall be securely fastened to and supported on girders, beams or other structural members that are capable of supporting any load likely to be applied to the flooring without exceeding the allowable unit stress for the structural members; and

(c) shall extend over the whole area of the surface on or above which work is being carried out. O. Reg. 213/91, s. 32 (2).

(3) Temporary flooring shall not be subjected to a load in excess of the load that it is designed and constructed to bear. O. Reg. 213/91, s. 32 (3).

33. (1) Subject to subsection (2), work on a building shall not be carried out at a distance higher than the higher of two storeys or the first column splice above the temporary or permanent flooring. O. Reg. 213/91, s. 33 (1).

(2) If the vertical distance between the tiers of column splices on a building exceeds two storeys, work shall not be carried out higher than three storeys above the temporary or permanent flooring. O. Reg. 213/91, s. 33 (2).

(3) This section does not apply to work carried out by a worker,

(a) who is working from a scaffold;

(b) whose fall would be arrested by means of a safety net without endangering the worker; or

(c) who is using a fall arrest system attached to the project. O. Reg. 213/91, s. 33 (3).

34. (1) If material may fall on a worker, overhead protection shall be provided,

(a) at every means of access to and egress from a building or other structure under construction; and

(b) above every area where work is being carried out. O. Reg. 213/91, s. 34 (1).

(2) Overhead protection shall consist of material capable of supporting 2.4 kilonewtons per square metre without exceeding the allowable unit stress for the material used. O. Reg. 213/91, s. 34 (2).

HOUSEKEEPING

35. (1) Waste material and debris shall be removed to a disposal area and reusable material shall be removed to a storage area as often as is necessary to prevent a hazardous condition arising and, in any event, at least once daily. O. Reg. 213/91, s. 35 (1).

(2) Rubbish, debris and other materials shall not be permitted to fall freely from one level to another but shall be lowered by a chute, in a container or by a crane or hoist. O. Reg. 213/91, s. 35 (2).

(3) Despite subsection (2), rubbish, debris and other materials from demolition on a project may be permitted to fall or may be dropped into an enclosed designated area to which people do not have access. O. Reg. 213/91, s. 35 (3).

(4) A chute,

(a) shall be adequately constructed and rigidly fastened in place;

(b) if it has a slope exceeding a gradient of one in one, shall be enclosed on its four sides;

(c) shall have a gate at the bottom end if one is necessary to control the flow of material; and

(d) shall discharge into a container or an enclosed area surrounded by barriers. O. Reg. 213/91, s. 35 (4).

(5) The entrance to a chute,

(a) shall be constructed to prevent spilling over when rubbish, debris and other materials are being deposited into the chute;

(b) if it is at or below floor level, shall have a curb that is at least 100 millimetres high;

(c) shall not be more than 1.2 metres high;

(d) shall be kept closed when the chute is not in use; and

(e) shall be designed so that any person will be discouraged from entering it. O. Reg. 213/91, s. 35 (5).

36. If a formwork tie, reinforcing steel, a nail or another object protruding from concrete or another surface may endanger a worker, the protrusion shall be removed, cut off at the surface or otherwise protected as soon as practicable. O. Reg. 213/91, s. 36.

37. (1) Material or equipment at a project shall be stored and moved in a manner that does not endanger a worker. O. Reg. 213/91, s. 37 (1).

(2) No material or equipment to be moved by a crane or similar hoisting device shall be stored under or in close proximity to an energized outdoor overhead electrical conductor. O. Reg. 213/91, s. 37 (2).

38. Blocking, support chains, metal bands, wire rope and rigging components shall be removed from material or equipment in a manner that does not endanger a worker. O. Reg. 213/91, s. 38.

39. Material and equipment at a project shall be piled or stacked in a manner that prevents it from tipping, collapsing or rolling. O. Reg. 213/91, s. 39.

40. (1) No material shall be stored, stacked or piled within 1.8 metres of,

(a) an opening in a floor or roof;

(b) the open edge of a floor, roof or balcony; or

(c) an excavation. O. Reg. 213/91, s. 40 (1).

(2) Subsection (1) does not apply with respect to material in a building or a completely enclosed part of a building that is used solely for storing and distributing materials. O. Reg. 213/91, s. 40 (2).

(3) Subsection (1) does not apply with respect to small masonry units including bricks, blocks and similar objects,

(a) that can be handled by one worker;

(b) that are to be used at the edge of a floor, a roof, an excavation or an opening in a floor or roof; and

(c) that are stacked in a pile whose height is less than the distance from the face of the pile to the edge of the floor, roof, excavation or opening in a floor or roof. O. Reg. 213/91, s. 40 (3).

41. A combustible, corrosive or toxic substance shall be stored in a suitable container. O. Reg. 213/91, s. 41.

42. (1) A storage cylinder for compressed gas shall be secured in an upright position. O. Reg. 213/91, s. 42 (1).

(2) The control valve of a storage cylinder for compressed gas, other than a cylinder connected to a regulator, supply line or hose, shall be covered by a protective cap that is secured in its proper position. O. Reg. 213/91, s. 42 (2).

(3) A spent storage cylinder shall not be stored inside a building. O. Reg. 213/91, s. 42 (3).

(4) No storage cylinder for propane shall be placed closer than three metres to a source of ignition or fire. O. Reg. 213/91, s. 42 (4).

(5) Subsection (4) does not apply to a storage cylinder,

(a) that forms part of hand-held propane equipment;

(b) that forms part of a lead pot used in plumbing or electrical work;

(c) that forms part of a propane-powered or propane-heated vehicle; or

(d) that is protected from a source of ignition by a barrier, wall or other means of separation. O. Reg. 213/91, s. 42 (5).

43. (1) A flammable liquid or gas shall be stored in a building or storage tank that is suitable for the purpose and, if practicable, not less than 100 metres from a magazine for explosives. O. Reg. 213/91, s. 43 (1).

(2) No more than one work day's normal supply of a flammable liquid shall be stored in a building or structure on a project unless it is stored,

(a) in a container that is suitable for the particular hazards of the liquid; and

(b) in a controlled access area or a room,

(i) that has sufficient window area to provide explosion relief to the outside, and

(ii) that is remote from the means of egress from the building or structure. O. Reg. 213/91, s. 43 (2).

(3) A portable container used to store or transport flammable liquids,

(a) shall be approved for use for that liquid by a recognized testing laboratory; and

(b) shall have a label stating the use for which the container is approved and the name of the testing laboratory which gave the approval required by clause (a). O. Reg. 213/91, s. 43 (3).

44. (1) Signs meeting the requirements of subsection (2) shall be posted in prominent locations and in sufficient numbers to warn workers of a hazard on a project. O. Reg. 213/91, s. 44 (1).

(2) A sign shall contain the word "DANGER" written in legible letters that are at least 150 millimetres in height and shall state that entry by any unauthorized person to the area where the hazard exists is forbidden. O. Reg. 213/91, s. 44 (2).

(3) Without limiting the generality of subsection (1), a sign shall be posted,

(a) adjacent to a hoisting area;

(b) under a boatswain's chair, a suspended scaffold or a suspended platform;

(c) at the outlet from a chute;

(d) at a means of access to a place where there may be a noxious gas, vapour dust or fume, noxious substance or a lack of oxygen; and

(e) where there is a potential hazard from an energized overhead electrical conductor at more than 750 volts. O. Reg. 213/91, s. 44 (3).

(4) No person shall enter an area in which a sign is posted other than a worker authorized to work in the area. O. Reg. 213/91, s. 44 (4).

45. (1) The areas in which a worker is present and the means of access to and egress from those areas shall be adequately lit. O. Reg. 213/91, s. 45 (1).

(2) A light bulb used in a temporary lighting system shall be enclosed by a mechanical protection device. O. Reg. 213/91, s. 45 (2).

46. (1) A project shall be adequately ventilated by natural or mechanical means,

(a) if a worker may be injured by inhaling a noxious gas, vapour, dust or fume or from a lack of oxygen; or

(b) if a gas, vapour, dust or fume may be capable of forming an explosive mixture with air. O. Reg. 213/91, s. 46 (1).

(2) If it is not practicable to provide natural or mechanical ventilation in the circumstances described in clause (1) (a), respiratory protective equipment suitable for the hazard shall be provided to and used by the workers. O. Reg. 213/91, s. 46 (2).

47. No internal combustion engine shall be operated,

(a) in an excavation unless provision is made to ensure that exhaust gases and fumes will not accumulate in the excavation; or

(b) in a building or other enclosed structure,

(i) unless the exhaust gases and fumes from the engine are discharged directly outside the building or structure to a point sufficiently remote to prevent the return of the gases and fumes, or

(ii) unless there is an adequate supply of air for combustion and adequate natural or mechanical ventilation to ensure exhaust gases and fumes will not accumulate. O. Reg. 213/91, s. 47.

48. (1) When a drum, tank, pipeline or other container is to be repaired or altered,

(a) its internal pressures shall be adjusted to atmospheric pressure before any fastening is removed;

(b) it shall be drained, cleaned and ventilated or otherwise rendered free from any explosive, flammable or harmful substance; and

(c) it shall not be refilled during repair or alteration if the substance which is to be placed in it may vaporize or ignite. O. Reg. 213/91, s. 48 (1).

(2) Clauses (1) (a) and (b) do not apply with respect to a pipeline if hot-tapping and boxing-in are carried out by a competent worker under controlled conditions that provide for the protection of all persons. O. Reg. 213/91, s. 48 (2).

TEMPORARY HEAT

49. (1) A fuel-fired heating device shall be located, protected and used in such a way that there is no risk of igniting a tarpaulin or similar temporary enclosure or combustible materials adjacent to it. O. Reg. 213/91, s. 49 (1).

(2) No fuel-fired heating device shall be used in a confined or enclosed space unless there is an adequate supply of air for combustion and adequate general ventilation. O. Reg. 213/91, s. 49 (2).

(3) A fuel-fired heating device shall be protected from damage and from overturning. O. Reg. 213/91, s. 49 (3).

(4) No fuel-fired heating device shall be located so as to restrict any means of egress. O. Reg. 213/91, s. 49 (4).

(5) A fuel-fired heating device that generates noxious products of combustion shall discharge the products of combustion outside the building or structure in which it is located. O. Reg. 213/91, s. 49 (5).

50. All fuel supply lines shall be constructed, guarded or placed in such a way as to be protected from damage. O. Reg. 213/91, s. 50.

51. (1) Temporary steam-piping shall be installed and supported so as not to endanger a worker. O. Reg. 213/91, s. 51 (1).

(2) Temporary steam-piping shall be insulated or otherwise protected if a worker is likely to come into contact with it. O. Reg. 213/91, s. 51 (2).

FIRE SAFETY

52. (1) Fire extinguishing equipment shall be provided at readily accessible and adequately marked locations at a project. O. Reg. 213/91, s. 52 (1).

(1.1) Every worker who may be required to use fire extinguishing equipment shall be trained in its use. O. Reg. 145/00, s. 16.

(2) Without limiting subsection (1), at least one fire extinguisher shall be provided,

(a) where flammable liquids or combustible materials are stored, handled or used;

(b) where oil-fired or gas-fired equipment, other than permanent furnace equipment in a building, is used;

(c) where welding or open-flame operations are carried on; and

(d) on each storey of an enclosed building being constructed or altered. O. Reg. 213/91, s. 52 (2).

(3) At least one fire extinguisher shall be provided in a workshop for each 300 or fewer square metres of floor area. O. Reg. 213/91, s. 52 (3).

(4) Clause (2) (d) and subsection (3) do not apply to a building,

(a) that is to be used as a detached or semi-detached single-family dwelling;

(b) that has two storeys or less and is to be used as a multiple family dwelling; or

(c) that has one storey with no basement or cellar. O. Reg. 213/91, s. 52 (4).

53. (1) Fire extinguishing equipment shall be of a suitable type and size to permit the evacuation of workers during a fire. O. Reg. 213/91, s. 53 (1).

(2) Every fire extinguisher,

(a) shall be a type whose contents are discharged under pressure; and

(b) shall have an Underwriters' Laboratories of Canada 4A40BC rating. O. Reg. 213/91, s. 53 (2).

54. (1) Fire extinguishing equipment shall be protected from physical damage and from freezing. O. Reg. 213/91, s. 54 (1).

(2) After a fire extinguisher is used, it shall be refilled or replaced immediately. O. Reg. 213/91, s. 54 (2).

55. Every fire extinguisher shall be inspected for defects or deterioration at least once a month by a competent worker who shall record the date of the inspection on a tag attached to it. O. Reg. 213/91, s. 55.

56. No work shall be carried out at a height of 84 metres or more in a building unless the building has temporary or permanent fire pumps that provide a minimum water flow of 1,890 litres per minute at a discharge pressure of at least 450 kilopascals at and above the 84-metre height. O. Reg. 145/00, s. 17.

57. (1) As construction proceeds in a building with two or more storeys, a permanent or temporary standpipe shall be installed to within two storeys of the uppermost work level. O. Reg. 145/00, s. 18 (1).

(2) Subsection (1) does not apply to work carried out in a building which is not required by the *Building Code* to have a permanent standpipe. O. Reg. 213/91, s. 57 (2).

(3) A permanent standpipe,

(a) shall have sufficient hose outlets to permit every part of the building to be protected by a hose not longer than twenty-three metres;

(b) shall have a connection for the use of the local fire department located on the street side of the building not more than 900 millimetres and not less than 300 millimetres above ground level and to which there is clear access at all times; and

(c) shall be maintained so as to be readily operable if required to be used. O. Reg. 213/91, s. 57 (3).

(4) Every hose outlet in a permanent standpipe shall have a valve. O. Reg. 213/91, s. 57 (4).

(5) Every hose used with a permanent standpipe,

(a) shall be at least thirty-eight millimetres in diameter;

(b) shall have a combination straight stream and fog nozzle; and

(c) shall be stored on a rack in such a way as to protect it from damage and keep it available for immediate use. O. Reg. 213/91, s. 57 (5).

(6) If a temporary standpipe has been installed, it shall not be disconnected until the permanent standpipe is connected, so that there is always a standpipe in service. O. Reg. 145/00, s. 18 (2).

(7) A temporary standpipe shall be maintained so that it is readily operable. O. Reg. 145/00, s. 18 (2).

(8) A temporary standpipe shall have at least one hose outlet per floor, with a valve and a hose attached to each hose outlet and a nozzle attached to each hose. O. Reg. 145/00, s. 18 (2).

(9) In addition to the requirements of subsection (8), there shall be a connection to which there is clear access at all times, located between 30 and 90 centimetres above ground level on a side of the building that faces the street. O. Reg. 145/00, s. 18 (2).

(10) A hose outlet on a temporary standpipe,

(a) shall have a valve; and

(b) shall be capable of accepting a hose that is 38 millimetres in diameter. O. Reg. 145/00, s. 18 (2).

(11) If a temporary standpipe is installed in a building under construction, the constructor shall post at the project, or have available for review, a floor plan of the building indicating,

(a) the location of the hose outlets on each floor;

(b) the location of the point on the perimeter of each floor that is furthest from the hose outlet on that floor; and

(c) the location of each exit on each floor. O. Reg. 145/00, s. 18 (2).

(12) The constructor shall give a copy of the floor plan to the fire department located nearest to the project. O. Reg. 145/00, s. 18 (2).

58. No flammable liquid shall be transferred from one container to another by the direct application of air under pressure. O. Reg. 213/91, s. 58.

Dust Control

59. If the dissemination of dust is a hazard to a worker, the dust shall be adequately controlled or each worker who may be exposed to the hazard shall be provided with adequate personal protective equipment. O. Reg. 145/00, s. 19.

60.-63. Revoked: O. Reg. 628/05, s. 2.

Public Way Protection

64. (1) No work shall be carried out on a building or structure located within 4.5 metres of a public way unless a covered way is constructed over the part of the public way that is adjacent to the project. O. Reg. 213/91, s. 64 (1).

(2) Subsection (1) does not apply with respect to a building or structure if the work being done is enclosed. O. Reg. 213/91, s. 64 (2).

(3) A covered way,

(a) shall have an unobstructed height of not less than 2.4 metres;

(b) shall have an unobstructed width of not less than 1.1 metres or, if it is over a sidewalk that is less than 1.1 metres wide, have a width equal to the width of the sidewalk;

(c) shall be capable of supporting any load likely to be applied to it and capable of supporting a load of at least 2.4 kilonewtons per square metre;

(d) shall have a weather-tight roof;

(e) shall have the side adjacent to the project covered with a partition that has a smooth surface on the public way side;

(f) shall have a railing one metre high from ground level on the street side; and

(g) shall have adequate lighting within the public way. O. Reg. 213/91, s. 64 (3).

65. If work on a project may endanger a person using a public way, a sturdy fence at least 1.8 metres in height shall be constructed between the public way and the project. O. Reg. 213/91, s. 65.

66. Machinery, equipment and material that is being used, left or stored where it may be a hazard to traffic on a public way shall be marked by flashing devices. O. Reg. 213/91, s. 66; O. Reg. 145/00, s. 20.

TRAFFIC CONTROL

67. (1) In this section,

"barricade" means a device that provides a visual indicator of the path a motorist is supposed to take;

"barrier" means a device that provides a physical limitation through which a vehicle would not normally pass, and includes a concrete barrier;

"mobile operation" means work, including a paving operation, that is done on a highway or the shoulder of a highway and moves along at speeds of less than 30 kilometres per hour. O. Reg. 145/00, s. 21.

(2) If a worker at a project on a highway may be endangered by vehicular traffic unrelated to the project, the project shall make use of as many of the following measures as is necessary to adequately protect the worker:

1. Barriers.
2. Barricades.
3. Delineators.
4. Lane control devices.
5. Warning signs.
6. Flashing lights.
7. Flares.
8. Traffic control devices.
9. Blocker trucks.
10. Crash trucks.

11. Sign trucks.

12. Speed control devices.

13. Longitudinal buffer areas. O. Reg. 145/00, s. 21.

(3) In addition to the measures listed in subsection (2) but subject to section 68, a worker may be used to direct traffic. O. Reg. 145/00, s. 21.

(4) Every employer shall develop in writing and implement a traffic protection plan for the employers' workers at a project if any of them may be exposed to a hazard from vehicular traffic. O. Reg. 145/00, s. 21.

(5) The traffic protection plan,

(a) shall specify the vehicular traffic hazards and the measures described in subsection (2) to be used to protect workers; and

(b) shall be kept at the project and made available to an inspector or a worker on request. O. Reg. 145/00, s. 21.

(6) A worker who is required to set up or remove measures described in subsection (2) on a roadway or a shoulder of a roadway,

(a) shall be a competent worker;

(b) shall not perform any other work while setting up or removing the measures; and

(c) shall be given adequate written and oral instructions, in a language that he or she understands, with respect to setting up or removing the measures. O. Reg. 145/00, s. 21.

(7) Subject to subsection (8), adequate barriers shall be installed to protect workers at a project from vehicular traffic if the project,

(a) is on a freeway;

(b) is not a mobile operation; and

(c) is expected to require more than five days to complete. O. Reg. 145/00, s. 21.

(8) Until January 1, 2003, if a project to which subsection (7) would otherwise apply is expected to require five days or less to complete, or if it is not practical to install barriers as that subsection requires, the following measures shall be taken to protect workers at the project:

1. An adequate longitudinal buffer area shall be provided if physically possible.

2. If information about the annual average daily travel rate of vehicular traffic on the freeway is available and the rate is less than 25,000, blocker trucks shall be adequately positioned between vehicular traffic and workers.

3. If the annual average daily travel rate of vehicular traffic on the freeway is 25,000 or more or if information about the rate is unavailable, crash trucks shall be adequately positioned between vehicular traffic and workers. O. Reg. 145/00, s. 21.

(9) If subsection (8) applies and information about the annual average daily travel rate of vehicular traffic on the freeway is available, a record of the rate shall be maintained at the project and be made available to an inspector upon request. O. Reg. 145/00, s. 21.

(10) On and after January 1, 2003, if it is not practical to install barriers as subsection (7) requires, or if the project is expected to require five days or less to complete, crash trucks shall be adequately positioned to protect workers. O. Reg. 145/00, s. 21.

(11) If work on a shoulder of a freeway is expected to take less than 30 minutes to complete, a vehicle with four-way flashers and a 360-degree beacon light shall be provided. O. Reg. 145/00, s. 21.

(12) The following measures shall be taken to protect a worker at a project if the project is on a freeway and involves a mobile operation:

1. Until January 1, 2003, an adequate number of blocker trucks shall be adequately positioned between vehicular traffic and the worker.
2. On and after January 1, 2003, an adequate number of crash trucks shall be adequately positioned between vehicular traffic and the worker.
3. If the operation involves intermittent stops averaging 30 minutes or less, an adequate number of barricades or delineators shall be adequately positioned between vehicular traffic and the worker.
4. If the operation involves intermittent stops averaging more than 30 minutes,
   i. an adequate longitudinal buffer area shall be provided if physically possible,
   ii. the lane on which work is being done shall be adequately identified with lane closure signs and a lane closure taper, and
   iii. an adequate number of barricades or delineators shall be adequately positioned between vehicular traffic and the work area. O. Reg. 145/00, s. 21.

68. The following requirements apply with respect to a sign used by a worker to direct vehicular traffic:

1. It shall be octagonal in shape, measure 450 millimetres between opposite sides, and be mounted on a pole that is 1.2 metres long.
2. It shall be made of material with at least the rigidity of plywood that is six millimetres thick.
3. On one side it shall be high-intensity retro-reflective grade red in colour, with the word “STOP” written in legible high-intensity retro-reflective grade white letters 150 millimetres high in a central position on the sign.
4. On the other side it shall be high retro-reflective micro-prismatic fluorescent chartreuse in colour, with a black diamond-shaped border that is at least 317 millimetres by 317 millimetres, and with the word “SLOW” written in legible black letters 120 millimetres high in a central position on the sign.
5. It shall be maintained in a clean and legible condition. O. Reg. 145/00, s. 22.

69. (1) This section applies with respect to directing vehicular traffic that may be a hazard to workers on a public way. O. Reg. 145/00, s. 23.

(2) A worker shall not direct vehicular traffic for more than one lane in the same direction. O. Reg. 145/00, s. 23.

(3) A worker shall not direct vehicular traffic if the normal posted speed limit of the public way is more than 90 kilometres per hour. O. Reg. 145/00, s. 23.

(4) A worker who is required to direct vehicular traffic,

(a) shall be a competent worker;

(b) shall not perform any other work while directing vehicular traffic;

(c) shall be positioned in such a way that he or she is endangered as little as possible by vehicular traffic; and

(d) shall be given adequate written and oral instructions, in a language that he or she understands, with respect to directing vehicular traffic, and those instructions shall include a description of the signals that are to be used. O. Reg. 145/00, s. 23.

(5) The written instructions referred to in clause (4) (d) shall be kept at the project. O. Reg. 145/00, s. 23.

69.1 (1) A worker who may be endangered by vehicular traffic shall wear a garment that covers at least his or her upper body and has the following features:

1. The garment shall be fluorescent blaze or international orange in colour.
2. On the front and the back, there shall be two yellow stripes that are 5 centimetres wide. The yellow area shall total at least 500 square centimetres on the front and at least 570 square centimetres on the back.
3. On the front, the stripes shall be arranged vertically and centred and shall be approximately 225 millimetres apart, measured from the centre of each stripe. On the back, they shall be arranged in a diagonal "X" pattern.
4. The stripes shall be retro-reflective and fluorescent. O. Reg. 145/00, s. 23.

(2) If the garment is a vest, it shall have adjustable fit. O. Reg. 145/00, s. 23.

(3) On and after January 1, 2001, a nylon vest to which this section applies shall also have a side and front tear-away feature. O. Reg. 145/00, s. 23.

(4) In addition, a worker who may be endangered by vehicular traffic during night-time hours shall wear retro-reflective silver stripes encircling each arm and leg, or equivalent side visibility-enhancing stripes with a minimum area of 50 square centimetres per side. O. Reg. 145/00, s. 23.

ACCESS TO AND EGRESS FROM WORK AREAS

70. (1) Access to and egress from a work area located above or below ground level shall be by stairs, runway, ramp or ladder. O. Reg. 213/91, s. 70 (1).

(2) Subsection (1) does not apply to a work area that is a suspended scaffold able to be moved to give access to a floor, roof or platform or to ground level. O. Reg. 213/91, s. 70 (2).

71. Adequate means of egress shall be provided from a work area to permit the evacuation of workers during an emergency. O. Reg. 213/91, s. 71.

72. A work area, a route to and from a work area and a scaffold platform on which work is being performed shall be maintained at all times in a condition that does not endanger workers and, without limiting the generality of the foregoing,

(a) shall be kept clear of obstructions;

(b) shall be kept clear of snow, ice or other slippery material; and

(c) shall be treated with sand or similar material when necessary to ensure a firm footing. O. Reg. 213/91, s. 72.

PLATFORMS, RUNWAYS AND RAMPS

73. (1) Runways, ramps and platforms other than scaffold platforms shall meet the requirements of this section. O. Reg. 213/91, s. 73 (1).

(2) A runway, ramp or platform shall be designed, constructed and maintained to support or resist, without exceeding the allowable unit stresses for the materials of which it is made,

(a) all loads and forces to which it is likely to be subjected; and

(b) at least 2.4 kilonewtons per square metre. O. Reg. 213/91, s. 73 (2).

(3) No runway, ramp or platform shall be loaded in excess of the load that it is designed and constructed to bear. O. Reg. 213/91, s. 73 (3).

(4) A runway, ramp or platform shall be at least 460 millimetres wide and shall be securely fastened in place. O. Reg. 213/91, s. 73 (4).

74. (1) A ramp shall have,

(a) a slope not exceeding a gradient of 1 in 3; and

(b) if its slope exceeds a gradient of 1 in 8, cross cleats made from nineteen millimetres by thirty-eight millimetres boards that are securely nailed to the ramp and spaced at regular intervals not exceeding 500 millimetres. O. Reg. 213/91, s. 74 (1).

(2) Subsection (1) does not apply to a ramp installed in the stairwell of a building not exceeding two storeys in height if the ramp,

(a) has a slope not exceeding a gradient of 1 in 1; and

(b) has cross cleats made from thirty-eight millimetres by thirty-eight millimetres boards that are securely nailed to the ramp and spaced at regular intervals not exceeding 300 millimetres. O. Reg. 213/91, s. 74 (2).

STAIRS AND LANDINGS

75. (1) No work shall be performed in a building or structure that will be at least two storeys high when it is finished unless stairs are installed in accordance with this section. O. Reg. 213/91, s. 75 (1).

(2) As the construction of a building or structure progresses, permanent or temporary stairs shall be installed up to,

(a) the uppermost work level; or

(b) if stairs would interfere with work on the uppermost work level, to within the lesser of two storeys or nine metres below the uppermost work level. O. Reg. 213/91, s. 75 (2).

(3) Subsection (2) does not apply with respect to,

(a) a part of a building or structure in which only the structural steel beams or columns are erected; or

(b) a structure to which a permanent ladder is attached before the structure is raised into position. O. Reg. 213/91, s. 75 (3).

76. (1) Temporary stairs and landings shall be designed, constructed and maintained to support a live load of 4.8 kilonewtons per square metre without exceeding the allowable unit stresses for each material used. O. Reg. 213/91, s. 76 (1).

(2) No temporary stair or landing shall be loaded in excess of the load it is designed and constructed to bear. O. Reg. 213/91, s. 76 (2).

77. (1) No work shall be performed in a building or structure with stairs unless the stairs meet the requirements of this section. O. Reg. 213/91, s. 77 (1).

(2) Stairs shall have,

(a) a clear width of at least 500 millimetres;

(b) treads and risers of uniform width, length and height;

(c) subject to subsection (3), stringers with a maximum slope of 50 degrees from the horizontal;

(d) landings that are less than 4.5 metres apart measured vertically;

(e) a securely fastened and supported wooden handrail on the open sides of each flight; and

(f) a guardrail on the open side of each landing. O. Reg. 213/91, s. 77 (2).

(3) The stringers of prefabricated stairs erected inside a tower formed by scaffold frame sections shall have a maximum slope of 60 degrees from the horizontal. O. Reg. 213/91, s. 77 (3).

(4) A wooden handrail shall measure thirty-eight millimetres by eighty-nine millimetres and shall be free of loose knots, sharp edges, splinters and shakes. O. Reg. 213/91, s. 77 (4).

(5) Skeleton steel stairs shall have temporary wooden treads securely fastened in place that are made of suitable planking extending the full width and breadth of the stairs and landings. O. Reg. 213/91, s. 77 (5).

LADDERS

78. (1) A ladder shall be designed, constructed and maintained so as not to endanger a worker and shall be capable of withstanding all loads to which it may be subjected. O. Reg. 213/91, s. 78 (1).

(2) A ladder,

(a) shall be free from defective or loose rungs;

(b) shall have rungs spaced at 300 millimetres on centres;

(c) shall have side rails at least 300 millimetres apart;

(d) shall be placed on a firm footing; and

(e) shall be situated so that its base is not less than one-quarter, and not more than one-third, of the length of the ladder from a point directly below the top of the ladder and at the same level as the base of the ladder, if the ladder is not securely fastened. O. Reg. 213/91, s. 78 (2).

(3) The maximum length of a ladder measured along its side rail shall not be more than,

(a) five metres for a trestle ladder or for each of the base and extension sections of an extension trestle ladder;

(b) six metres for a step-ladder;

(c) nine metres for a single ladder or an individual section of a ladder;

(d) fifteen metres for an extension ladder with two sections; and

(e) twenty metres for an extension ladder with more than two sections. O. Reg. 213/91, s. 78 (3).

(4) No ladder shall be lashed to another ladder to increase its length. O. Reg. 213/91, s. 78 (4).

(5) In this section,

"extension trestle ladder" means a combination of a trestle ladder and a vertically-adjustable single ladder with a suitable means of securely locking the ladders together. O. Reg. 213/91, s. 78 (5).

79. No ladder shall be present in an elevator shaft or a similar hoisting area when the shaft or area is being used for hoisting. O. Reg. 213/91, s. 79.

80. A ladder used as a regular means of access between levels of a structure,

(a) shall extend at the upper level at least 900 millimetres above the landing or floor;

(b) shall have a clear space of at least 150 millimetres behind every rung;

(c) shall be located so that an adequate landing surface that is clear of obstructions is available at the top and bottom of the ladder; and

(d) shall be secured at the top and bottom to prevent movement. O. Reg. 213/91, s. 80.

81. (1) A wooden ladder,

(a) shall be made of wood that is straight-grained and free of loose knots, sharp edges, splinters and shakes; and

(b) shall not be painted or coated with an opaque material. O. Reg. 213/91, s. 81 (1).

(2) The side rails of a wooden ladder of the cleat type,

(a) shall be not less than 400 millimetres and not more than 610 millimetres apart; and

(b) shall measure not less than,

(i) thirty-eight millimetres by eighty-nine millimetres if the ladder is 5.8 metres or less long, or

(ii) thirty-eight millimetres by 140 millimetres if the ladder is more than 5.8 metres long. O. Reg. 213/91, s. 81 (2).

(3) The rungs of a wooden ladder of the cleat type,

(a) shall measure not less than,

(i) nineteen millimetres by sixty-four millimetres if the side rails are 400 millimetres apart, or

(ii) nineteen millimetres by eighty-nine millimetres if the side rails are more than 400 millimetres and not more than 610 millimetres apart; and

(b) shall be braced by filler blocks that are nineteen millimetres thick and are located between the rungs. O. Reg. 213/91, s. 81 (3).

82. A double-width wooden ladder,

(a) shall have three evenly-spaced rails that measure at least thirty-eight millimetres by 140 millimetres;

(b) shall have rungs that,

(i) measure at least thirty-eight millimetres by eighty-nine millimetres,

(ii) extend the full width of the ladder, and

(iii) are braced by filler blocks that are at least 19 millimetres thick; and

(c) shall not be less than 1.5 metres wide and not more than two metres wide. O. Reg. 213/91, s. 82.

83. (1) When a step-ladder is being used as a self-supporting unit, its legs shall be fully-spread and its spreader shall be locked. O. Reg. 213/91, s. 83 (1).

(2) No worker shall stand on the top of or the pail shelf of a step-ladder. O. Reg. 213/91, s. 83 (2).

84. (1) Subject to subsection (2), an access ladder fixed in position,

(a) shall be vertical;

(b) shall have rest platforms at not more than nine metre intervals;

(c) shall be offset at each rest platform;

(d) where the ladder extends over three metres above grade, floor or landing, shall have a safety cage commencing not more than 2.2 metres above grade, floor or landing and continuing at least 90 centimetres above the top landing with openings to permit access by a worker to rest platforms or to the top landing;

(e) shall have side rails that extend 90 centimetres above the landing; and

(f) shall have rungs that are at least 15 centimetres from the wall and spaced at regular intervals. O. Reg. 631/94, s. 2.

(2) Subsection (1) does not apply to an access ladder on a tower, water tank, chimney or similar structure that has a safety device that will provide protection should a worker using the ladder fall. O. Reg. 631/94, s. 2.

85., 86. REVOKED: O. Reg. 145/00, s. 24.

FORMS, FORMWORK, FALSEWORK AND RE-SHORING

87. (1) Formwork, falsework and re-shoring shall be designed, constructed, supported and braced so that they are capable of withstanding all loads and forces likely to be applied to them,

(a) without exceeding the allowable working loads established for any component of the structure; and

(b) without causing uplift, sliding, overturning or lateral displacement of the system. O. Reg. 213/91, s. 87 (1).

(2) No formwork, falsework or re-shoring shall be loaded in excess of the load that it is designed and constructed to bear. O. Reg. 213/91, s. 87 (2).

(3) The allowable working load of the formwork, falsework or re-shoring shall be established,

(a) by a professional engineer in accordance with good engineering practice; or

(b) by testing the principal components to their ultimate strength in a manner that simulates the actual loading conditions to which the formwork, falsework or re-shoring is likely to be subjected and by applying a reduction factor, in accordance with good engineering practice, to the values of ultimate strength. O. Reg. 213/91, s. 87 (3).

(4) The results of the testing in clause (3) (b) shall be verified and certified by a professional engineer and made available to an inspector upon request. O. Reg. 213/91, s. 87 (4).

(5) If single post shores are placed more than one tier high, the junction of each tier shall be braced against a fixed support in at least two directions in order to prevent any lateral movement. O. Reg. 213/91, s. 87 (5).

88. Formwork and falsework shall not be removed unless,

(a) the concrete is strong enough to support itself and any loads that may be applied to the structure; or

(b) the concrete and the structure are adequately re-shored. O. Reg. 213/91, s. 88.

89. (1) This section applies with respect to formwork, falsework and re-shoring that includes,

(a) a tubular metal frame;

(b) a column whose effective length is dependent upon lateral restraints between the ends of the column;

(c) shores placed one upon another to form a supporting system that is more than one tier in height;

(d) shores which are three metres or more in height;

(e) a truss;

(f) members so connected to one another that a load applied to one member may alter or induce stress in another member; or

(g) a unitized modular formwork or falsework structure intended to be moved as a unit. O. Reg. 213/91, s. 89 (1).

(2) Formwork and falsework shall be designed by a professional engineer in accordance with good engineering practice and be installed or erected in accordance with the design drawings. O. Reg. 213/91, s. 89 (2).

(3) Formwork and falsework shall, before the placement of concrete, be inspected by a professional engineer or by a competent worker designated in writing by the professional engineer. O. Reg. 213/91, s. 89 (3).

(4) The person carrying out the inspection shall state in writing whether the formwork and falsework is installed or erected in accordance with the design drawings for it. O. Reg. 213/91, s. 89 (4).

(5) The constructor shall keep the design drawings and the statements on the project while the formwork or the falsework is in use. O. Reg. 213/91, s. 89 (5).

90. Re-shoring shall be designed by a professional engineer in accordance with good engineering practice and be erected in accordance with the design drawings. O. Reg. 213/91, s. 90.

91. Falsework and re-shoring,

(a) shall have sound and rigid footings capable of carrying the maximum load to which the footings may be subjected without settlement or deformation of the soil or structure below the footings; and

(b) shall be adequately protected to prevent deformation caused by frost heave. O. Reg. 213/91, s. 91.

92. (1) Design drawings by a professional engineer for the formwork, falsework or re-shoring,

(a) if a manufactured system is used, shall identify the components;

(b) if non-manufactured system components are used, shall show the size, grade and specifications of the non-manufactured system components;

(c) shall show the design loads for the structure and shall detail the bracing and external ties required to adequately support the design loads;

(d) if the structure is a unitized modular formwork or falsework structure intended to be lifted or moved as a unit, shall show the attachment points for rigging and hoisting; and

(e) shall set out the erection instructions that are specified by the manufacturer or by the professional engineer.

(f) REVOKED: O. Reg. 85/04, s. 11.

O. Reg. 213/91, s. 92 (1); O. Reg. 85/04, s. 11.

(2) The constructor shall keep the design drawings on the project while the formwork, falsework or re-shoring is in use. O. Reg. 213/91, s. 92 (2).

EQUIPMENT, GENERAL

93. (1) All vehicles, machinery, tools and equipment shall be maintained in a condition that does not endanger a worker. O. Reg. 213/91, s. 93 (1).

(2) No vehicle, machine, tool or equipment shall be used,

(a) while it is defective or hazardous;

(b) when the weather or other conditions are such that its use is likely to endanger a worker; or

(c) while it is being repaired or serviced, unless the repair or servicing requires that it be operated. O. Reg. 213/91, s. 93 (2); O. Reg. 145/00, s. 25 (1).

(3) All vehicles, machines, tools and equipment shall be used in accordance with any operating manuals issued by the manufacturers. O. Reg. 145/00, s. 25 (2).

(4) For vehicles, machines, tools and equipment rated at greater than 10 horsepower, copies of any operating manuals issued by the manufacturers shall be kept readily available at the project. O. Reg. 145/00, s. 25 (2).

94. (1) All mechanically-powered vehicles, machines, tools and equipment rated at greater than 10 horsepower shall be inspected by a competent worker to determine whether they can handle their rated capacity and to identify any defects or hazardous conditions. O. Reg. 145/00, s. 26.

(2) The inspections shall be performed before the vehicles, machines, tools or equipment are first used at the project and thereafter at least once a year or more frequently as recommended by the manufacturer. O. Reg. 145/00, s. 26.

95. (1) Every replacement part for a vehicle, machine, tool or equipment shall have at least the same safety factor as the part it is replacing. O. Reg. 213/91, s. 95 (1).

(2) No modification to, extension to, repair to or replacement of a part of a vehicle, machine, tool or equipment shall result in a reduction of the safety factor of the vehicle, machine, tool or equipment. O. Reg. 213/91, s. 95 (2).

96. (1) No worker shall operate a vehicle at a project unless he or she is competent to do so. O. Reg. 145/00, s. 26.

(2) However, a worker being trained in the operation of a vehicle may operate it while being instructed and supervised by a competent person. O. Reg. 145/00, s. 26.

97. (1) Every vehicle other than a trailer shall be equipped with brakes and a seat or other place for the vehicle operator. O. Reg. 213/91, s. 97 (1).

(2) No person other than the operator shall ride on a vehicle unless a seat is provided for the use of, and is used by, the person. O. Reg. 213/91, s. 97 (2).

98. The means of access to any operator's station in a vehicle, machine or equipment shall not endanger the operator and shall have skid-resistant walking, climbing and work surfaces. O. Reg. 213/91, s. 98.

99. A cab or screen shall be provided to protect a worker who is exposed to an overhead hazard while operating a vehicle. O. Reg. 213/91, s. 99.

100. (1) No vehicle, machine or equipment shall be drawn or towed by another vehicle on a project unless there are two separate means of attachment to the vehicle drawing or towing it. O. Reg. 213/91, s. 100 (1).

(2) Subsection (1) does not apply with respect to a vehicle being drawn or towed in which there is an operator and that has brakes that are able to stop the vehicle with its load, if any. O. Reg. 213/91, s. 100 (2).

(3) Each means of attachment referred to in subsection (1) shall be constructed and attached in such a way that the failure of one means of attachment does not permit the vehicle, machine or equipment being drawn or towed to become detached from the other vehicle. O. Reg. 213/91, s. 100 (3).

101. (1) No worker shall remain on or in a vehicle, machine or equipment while it is being loaded or unloaded if the worker might be endangered by remaining there. O. Reg. 213/91, s. 101 (1).

(2) Such action as may be necessary to prevent an unattended vehicle, machine or equipment from being started or set in motion by an unauthorized person shall be taken. O. Reg. 213/91, s. 101 (2).

(3) An unattended vehicle, machine or equipment shall have its brakes applied and its wheels blocked to prevent movement when the vehicle, machine or equipment is on sloping ground or is adjacent to an excavation. O. Reg. 213/91, s. 101 (3).

102. No operator shall leave unattended the controls of,

(a) a front-end loader, backhoe or other excavating machine with its bucket raised;

(b) a bulldozer with its blade raised;

(c) a fork-lift truck with its forks raised; or

(d) a crane or other similar hoisting device with its load raised. O. Reg. 213/91, s. 102.

103. (1) No worker shall operate a shovel, backhoe or similar excavating machine in such a way that it or part of its load passes over a worker. O. Reg. 213/91, s. 103 (1).

(2) No worker shall operate a crane or similar hoisting device in such a way that part of its load passes over another worker unless the other worker is receiving the load or is engaged in sinking a shaft. O. Reg. 213/91, s. 103 (2).

(3) If practicable, a worker who is receiving a load or is engaged in sinking a shaft shall be positioned so that no load or part of a load carried by a crane or similar hoisting device passes over the worker. O. Reg. 213/91, s. 103 (3).

(4) Subsections (2) and (3) do not apply in respect of a multi-tiered load as defined in section 103.1 if written procedures have been developed and implemented for the particular project in accordance with that section. O. Reg. 627/05, s. 2.

103.1 (1) In this section,

"move" includes raise and lower;

"multi-tiered load" means two or three individually rigged structural steel pieces that are,

(a) suspended so that they remain horizontal,

(b) aligned vertically, and

(c) moved simultaneously by a crane;

"multi-tiered load hoisting operation" means the moving of one or more multi-tiered loads by one crane at a project;

"procedures" means the procedures prepared under subsection (7). O. Reg. 627/05, s. 3.

(2) A multi-tiered load,

(a) shall not contain structural steel pieces that are bundled together;

(b) shall not contain more than three structural steel pieces;

(c) shall not use one structural steel piece to support another;

(d) shall have each structural steel piece independently slung back to the main load hook or master link;

(e) shall be lowered only by a crane using power-controlled lowering. O. Reg. 627/05, s. 3.

(3) A crane shall be used to move only one multi-tiered load at a time. O. Reg. 627/05, s. 3.

(4) A crane shall not be used for a multi-tiered load if it is contrary to the crane manufacturer's specifications or limitations to do so. O. Reg. 627/05, s. 3.

(5) No worker shall be in an area where a multi-tiered load hoisting operation is taking place unless he or she is directly engaged in the operation. O. Reg. 627/05, s. 3.

(6) Before a multi-tiered load hoisting operation is begun at a project, written procedures to ensure the safety of workers engaged in the operation shall be developed and implemented. O. Reg. 627/05, s. 3.

(7) The procedures shall be prepared by a professional engineer in accordance with good engineering practice and shall,

(a) include design drawings that illustrate the arrangement and dimensions of the structural steel pieces, the assembly of rigging components and devices, and all attachment points;

(b) identify the crane and its rated load-carrying capacity, and identify and specify its limitations and restrictions, if any;

(c) describe the method of determining the weight of the structural steel pieces;

(d) specify the maximum load per lift and the maximum reach of the crane per lift;

(e) identify all factors that could affect the safety of the multi-tiered load hoisting operation, such as wind speed, weather conditions, potential overlapping of cranes and other restrictions;

(f) state the measures to be taken to control and secure multi-tiered loads while they are being moved;

(g) specify any circumstances that would require additional work, including inspections, to be performed by a professional engineer to ensure the safety of any worker engaged in the multi-tiered load hoisting operation; and

(h) identify all critical parts of the rigging and the rigged structural steel pieces that are to be inspected before each lift, and set out the inspection criteria to be followed. O. Reg. 627/05, s. 3.

(8) The employer responsible for a multi-tiered load hoisting operation shall,

(a) create a document that identifies the workers engaged in the multi-tiered load hoisting operation by name and job title and states their respective duties;

(b) ensure that, before the multi-tiered load hoisting operation is begun, a copy of the procedures is provided to and reviewed with each worker engaged in the operation;

(c) ensure that the procedures are implemented, and are followed throughout the multi-tiered load hoisting operation;

(d) ensure that any deviations from the procedures are approved by a professional engineer, in writing, before any multi-tiered load is moved; and

(e) unless the professional engineer who prepared the procedures specifies otherwise, appoint a competent worker to ensure that the procedures, including the inspections described in clause (7) (h), are followed before any multi-tiered load is moved. O. Reg. 627/05, s. 3.

(9) The employer responsible for a multi-tiered load hoisting operation shall keep a copy of the following available for inspection at the project until the operation is completed:

1. The procedures.
2. The document described in clause (8) (a).
3. Any approvals given under clause (8) (d). O. Reg. 627/05, s. 3.

(10) Before the first multi-tiered load hoisting operation is started at a project, the constructor shall give notice to the Ministry office located nearest the project, in person, by telephone, by fax or by electronic means. O. Reg. 627/05, s. 3.

104. (1) Every project shall be planned and organized so that vehicles, machines and equipment are not operated in reverse or are operated in reverse as little as possible. O. Reg. 145/00, s. 27.

(2) Vehicles, machines and equipment at a project shall not be operated in reverse unless there is no practical alternative to doing so. O. Reg. 145/00, s. 27.

(3) Operators of vehicles, machines and equipment shall be assisted by signallers if either of the following applies:

1. The operator's view of the intended path of travel is obstructed.
2. A person could be endangered by the vehicle, machine or equipment or by its load. O. Reg. 145/00, s. 27.

(4) Subsection (3) also applies to shovels, backhoes and similar excavating machines and to cranes and similar hoisting devices. O. Reg. 145/00, s. 27.

(5) The operator and the signaller shall,

(a) jointly establish the procedures by which the signaller assists the operator; and

(b) follow those procedures. O. Reg. 145/00, s. 27.

(6) If subsection (3) applies to the project and it is not possible to carry out the project without some operation of vehicles and equipment in reverse, signs shall be posted at the project in conspicuous places warning workers of the danger. O. Reg. 145/00, s. 27.

105. A dump truck shall be equipped with an automatic audible alarm that signals when the truck is being operated in reverse. O. Reg. 145/00, s. 27.

106. (1) A signaller shall be a competent worker and shall not perform other work while acting as a signaller. O. Reg. 213/91, s. 106 (1).

(1.1) The signaller shall wear a garment that covers at least his or her upper body and has the following features:

1. The garment shall be fluorescent blaze or international orange in colour.
2. On the front and the back, there shall be two yellow stripes that are 5 centimetres wide. The yellow area shall total at least 500 square centimetres on the front and at least 570 square centimetres on the back.
3. On the front, the stripes shall be arranged vertically and centred and shall be approximately 225 millimetres apart, measured from the centre of each stripe. On the back, they shall be arranged in a diagonal "X" pattern.
4. The stripes shall be retro-reflective and fluorescent. O. Reg. 145/00, s. 28.

(1.2) If the garment is a vest, it shall have adjustable fit. O. Reg. 145/00, s. 28.

(1.3) On and after January 1, 2001, a nylon vest to which this section applies shall also have a side and front tear-away feature. O. Reg. 145/00, s. 28.

(1.4) In addition, a signaller who may be endangered during night-time hours shall wear retro-reflective silver stripes encircling each arm and leg, or equivalent side visibility-enhancing stripes with a minimum area of 50 square centimetres per side. O. Reg. 145/00, s. 28.

(1.5) The employer shall,

(a) ensure that the signaller has received adequate oral training in his or her duties and has received adequate oral and written instructions in a language that he or she understands; and

(b) keep the written instructions at the project. O. Reg. 145/00, s. 28.

(2) A signaller,

(a) shall be clear of the intended path of travel of the vehicle, machine or equipment, crane or similar hoisting device, shovel, backhoe or similar excavating machine or its load;

(b) shall be in full view of the operator of the vehicle, machine or equipment, crane or similar hoisting device, shovel, backhoe or similar excavating machine;

(c) shall have a clear view of the intended path of travel of the vehicle, machine or equipment, crane or similar hoisting device, shovel, backhoe or similar excavating machine or its load; and

(d) shall watch the part of the vehicle, machine or equipment or crane or similar hoisting device, shovel, backhoe or similar excavating machine or its load whose path of travel the operator cannot see. O. Reg. 213/91, s. 106 (2).

(3) The signaller shall communicate with the operator by means of a telecommunication system or, where visual signals are clearly visible to the operator, by means of prearranged visual signals. O. Reg. 213/91, s. 106 (3).

107. No worker shall use as a work place a platform, bucket, basket, load, hook or sling that is capable of moving and that is supported by a fork-lift truck, front-end loader or similar machine. O. Reg. 213/91, s. 107.

108. Blocking shall be installed to prevent the collapse or movement of part or all of a piece of equipment that is being dismantled, altered or repaired if its collapse or movement may endanger a worker. O. Reg. 213/91, s. 108.

109. Every gear, pulley, belt, chain, shaft, flywheel, saw and other mechanically-operated part of a machine to which a worker has access shall be guarded or fenced so that it will not endanger a worker. O. Reg. 213/91, s. 109.

110. (1) Safety chains, cages or other protection against blown-off side or lock rings shall be used when inflating a tire mounted on a rim. O. Reg. 213/91, s. 110 (1).

(2) If a cage is used, the tire shall be inflated by remote means. O. Reg. 213/91, s. 110 (2).

111. (1) A lifting jack shall have its rated capacity legibly cast or stamped on it in a place where it can be readily seen. O. Reg. 213/91, s. 111 (1).

(2) A lifting jack shall be equipped with a positive stop to prevent overtravel or, if a positive stop is not practicable, with an overtravel indicator. O. Reg. 213/91, s. 111 (2).

112. (1) Every chain-saw shall have a chain that minimizes kickback and a device to stop the chain in the event of a kickback. O. Reg. 213/91, s. 112 (1).

(1.1) No worker shall use a chain-saw unless he or she has been adequately trained in its use. O. Reg. 145/00, s. 29.

(1.2) No worker shall use a chain-saw unless he or she is wearing,

(a) adequate personal protective equipment and clothing, including gloves; and

(b) adequate eye protection and hearing protection. O. Reg. 145/00, s. 29.

(2) A worker shall hold a chain-saw firmly when starting it and firmly in both hands when using it. O. Reg. 213/91, s. 112 (2).

(3) The chain of a chain-saw shall be stopped when not cutting. O. Reg. 213/91, s. 112 (3).

113. No object or material shall be placed, left or stored in a location or manner that may endanger a worker. O. Reg. 213/91, s. 113.

114. A hose that may whip shall be attached to a rope or chain in order to prevent whipping. O. Reg. 213/91, s. 114.

115. No barrel, box or other loose object shall be used as a work place or as a support for a ladder, scaffold or work platform. O. Reg. 213/91, s. 115.

116. (1) No stilts shall be present at or used on a project except in accordance with this section. O. Reg. 443/09, s. 4.

(2) No leg extensions, other than stilts, shall be present at or used on a project. O. Reg. 443/09, s. 4.

(3) Subject to subsection (4), stilts may be used on a project for work in residential units and residential common areas only if they are used for the following purposes:

1. Drywall finishing work.
2. Installation of insulation.
3. Installation of vapour barriers. O. Reg. 443/09, s. 4.

(4) Stilts shall not be used on a scaffold or to climb up or down stairs. O. Reg. 443/09, s. 4.

(5) Stilts used in accordance with this section shall,

(a) be commercially manufactured;

(b) be made of unpainted metal;

(c) have a non-slip surface on the bottom of each base plate;

(d) be in good working condition; and

(e) be suitable for their intended use. O. Reg. 443/09, s. 4.

(6) Stilts may be used to a maximum height of 76 centimetres as measured from the work surface that the user of the stilts would otherwise stand on to the top of the foot plate. O. Reg. 443/09, s. 4.

(7) Stilts may be used on a work surface only if the work surface satisfies the following conditions:

1. It is made of rigid material.
2. It is either level or does not have a slope of more than three per cent.
3. All openings on the work surface are adequately covered or guarded.
4. All open sides of the work surface are adequately guarded.
5. It is free of debris or anything else that may be a hazard to a worker on stilts.
6. All obstructions that cannot be removed are adequately guarded, placed or secured to prevent a worker on stilts from being injured. O. Reg. 443/09, s. 4.

(8) If stilts are used in a work area for which sections 26.1 and 26.3 require a guardrail system, the guardrail system shall be modified by adding,

(a) an additional top rail,

(i) 76 centimetres above the existing top rail, or

(ii) at a height above the existing top rail equal to the height of the stilts being used in the work area; and

(b) an intermediate rail that is located midway between the additional top rail and the existing top rail. O. Reg. 443/09, s. 4.

(9) A modified guardrail system described in subsection (8) shall be capable of resisting any load it could be subjected to by a worker on stilts. O. Reg. 443/09, s. 4.

(10) An employer shall ensure that a worker who uses stilts is trained in their use by completing an adequate training program that,

(a) enables the worker to demonstrate proficiency in the safe and proper use of stilts; and

(b) provides instruction on the relevant requirements of this Regulation; and

(c) provides instruction on,

(i) mounting and dismounting,

(ii) adjusting stilts to suit the individual worker and the work,

(iii) walking on and working with stilts while maintaining balance and stability,

(iv) inspecting stilts for damage and defects,

(v) maintaining, servicing and storing stilts,

(vi) conducting an inspection of the work area before commencing work to identify hazards for stilts use,

(vii) correcting any hazardous conditions identified under subclause (vi), and

(viii) setting up tools and materials to ensure they are adequately accessible when using stilts. O. Reg. 443/09, s. 4.

(11) No worker shall use stilts at a project unless he or she has successfully completed a program described in subsection (10) and carries proof of completing the program at all times when using the stilts. O. Reg. 443/09, s. 4.

(12) A worker using stilts at a project shall inspect the stilts for damage, wear, corrosion and other defects the first time each day that the worker uses the stilts. O. Reg. 443/09, s. 4.

(13) An employer shall ensure that a worker does not use stilts that are damaged, worn, corroded or defective and no worker shall use such stilts. O. Reg. 443/09, s. 4.

(14) Stilts shall be stored, serviced and maintained in accordance with the manufacturer's instructions. O. Reg. 443/09, s. 4.

EXPLOSIVE ACTUATED FASTENING TOOL

117. (1) No worker shall use an explosive actuated fastening tool unless he or she has been adequately trained in its use. O. Reg. 145/00, s. 30.

(2) When using an explosive actuated fastening tool, the worker shall carry proof of his or her training in its use. O. Reg. 145/00, s. 30.

(3) No worker shall use an explosive actuated fastening tool unless he or she is wearing,

(a) adequate personal protective equipment; and

(b) adequate eye protection. O. Reg. 145/00, s. 30.

118. A worker using an explosive actuated fastening tool shall inspect it before using it to ensure,

(a) that it is clean;

(b) that all moving parts operate freely;

(c) that its barrel is free from obstruction; and

(d) that it is not defective. O. Reg. 213/91, s. 118.

119. (1) No worker shall use an explosive actuated fastening tool unless it has a suitable protective guard,

(a) that is at least seventy-five millimetres in diameter;

(b) that is mounted at right angles to the barrel of the tool; and

(c) that is centred on the muzzle end of the tool, if practicable. O. Reg. 213/91, s. 119 (1).

(2) An explosive actuated fastening tool shall be inoperable unless,

(a) its muzzle end is held against a surface using a force at least 22 newtons greater than the force equivalent of the weight of the tool measured in newtons; and

(b) when a protective guard is centred on the muzzle end of the tool, the bearing surface of the guard is not tilted more than eight degrees from the work surface. O. Reg. 145/00, s. 31.

(3) Subsection (1) and clause (2) (b) do not apply with respect to an explosive actuated fastening tool if the velocity of a fastener fired from it does not exceed 90 metres per second measured at a distance of two metres from its muzzle end when propelled by the maximum commercially-available explosive load it is chambered to accept. O. Reg. 213/91, s. 119 (3).

(4) An explosive actuated fastening tool that is designed to require dismantling into separate parts for loading shall be inoperable unless the separate parts are locked together. O. Reg. 145/00, s. 31.

(5) An explosive actuated fastening tool shall have a firing mechanism that prevents the tool from being fired if it is dropped or while it is being loaded and prepared for firing. O. Reg. 213/91, s. 119 (5).

(6) The firing movement for an explosive actuated fastening tool shall be a separate action from the operation of bringing the tool into firing position. O. Reg. 145/00, s. 31.

(7) An explosive actuated fastening tool shall not be capable of being fired until the operator performs the two separate actions described in subsection (6). O. Reg. 145/00, s. 31.

120. (1) Every explosive actuated fastening tool shall be stored in a locked container when not in use. O. Reg. 213/91, s. 120 (1).

(2) No explosive actuated fastening tool shall be left unattended when out of its container. O. Reg. 213/91, s. 120 (2).

(3) No explosive actuated fastening tool shall be loaded unless it is being prepared for immediate use. O. Reg. 213/91, s. 120 (3).

(4) No explosive actuated fastening tool, whether or not it is loaded, shall be pointed at a person. O. Reg. 213/91, s. 120 (4).

121. (1) Every explosive load for an explosive actuated fastening tool,

(a) shall be marked or labelled so that a worker can easily identify its strength; and

(b) shall be stored in a locked container unless it is required for immediate use. O. Reg. 213/91, s. 121 (1).

(2) No explosive load for an explosive actuated fastening tool,

(a) shall be stored in a container with explosive loads of other strengths; or

(b) shall be left unattended where it may be available to a worker who is not qualified to operate an explosive actuated fastening tool. O. Reg. 213/91, s. 121 (2).

(3) A misfired explosive load removed from an explosive actuated fastening tool shall be placed in a water-filled container on the project until the misfired explosive load is removed from the project. O. Reg. 213/91, s. 121 (3).

WELDING AND CUTTING

122. (1) Cylinders, piping and fittings used in welding and cutting shall be protected against damage. O. Reg. 213/91, s. 122 (1).

(2) No cylinder of compressed gas used in welding and cutting shall be dropped, hoisted by slings or magnets or transported or stored in a horizontal position. O. Reg. 213/91, s. 122 (2).

(3) The valve of a cylinder shall be closed when the cylinder is spent or is not being used. O. Reg. 213/91, s. 122 (3).

123. Precautions to prevent a fire shall be taken when using a blow torch or welding or cutting equipment or a similar piece of equipment. O. Reg. 213/91, s. 123.

124. (1) No arc welding electrode or ground lead shall be hung over a compressed gas cylinder. O. Reg. 213/91, s. 124 (1).

(2) An area where electric welding is carried on shall be kept free of electrode stubs and metal scrap. O. Reg. 213/91, s. 124 (2).

(3) Receptacles for electrode stubs shall be provided and used. O. Reg. 213/91, s. 124 (3).

SCAFFOLDS AND WORK PLATFORMS

125. (1) A scaffold which meets the requirements of sections 126, 128, 129, 130, 134, 135, 137, 138, 139, 140, 141 and 142 shall be provided for workers where work cannot be done on or from the ground or from a building or other permanent structure without hazard to the workers. O. Reg. 213/91, s. 125 (1).

(2) A worker who is on or under a scaffold while it is being erected, altered or dismantled shall be on a part of the scaffold or scaffold platform that meets the requirements of sections 126, 128, 129, 130, 134, 135, 137, 138, 139, 140, 141 and 142. O. Reg. 213/91, s. 125 (2).

126. (1) Every scaffold shall be designed and constructed to support or resist,

(a) two times the maximum load or force to which it is likely to be subjected, without exceeding the allowable unit stresses for the materials of which it is made; and

(b) four times the maximum load or force to which it is likely to be subjected without overturning. O. Reg. 213/91, s. 126 (1).

(2) Despite clause (1) (a), a scaffold with structural components whose capacity can only be determined by testing shall be designed and constructed to support or resist three times the maximum load or force to which it is likely to be subjected without causing the failure of any component. O. Reg. 213/91, s. 126 (2).

(3) No scaffold shall be loaded in excess of the load that it is designed and constructed to bear. O. Reg. 213/91, s. 126 (3).

127. (1) The failure load of a scaffold which consists of structural components whose capacity cannot be determined by testing shall be established by testing the components in a manner that simulates the actual loading conditions for which each of the components is fabricated. O. Reg. 213/91, s. 127 (1).

(2) A professional engineer shall verify and certify the results of a test and the corresponding rated load of the scaffold. O. Reg. 213/91, s. 127 (2).

(3) The constructor shall make available to an inspector upon request a copy of the certification by the professional engineer. O. Reg. 213/91, s. 127 (3).

128. (1) Every scaffold,

(a) shall have uprights braced diagonally in the horizontal and vertical planes to prevent lateral movement;

(b) shall have horizontal members that are adequately secured to prevent lateral movement and that do not have splices between the points of support;

(c) shall have footings, sills or supports that are sound, rigid and capable of supporting at least two times the maximum load to which the scaffold may be subjected without settlement or deformation that may affect the stability of the scaffold;

(d) shall have all fittings and gear, including base plates or wheels, installed in accordance with the manufacturer's instructions;

(e) shall have connecting devices between frames that provide positive engagement in tension and compression;

(f) shall have safety catches on all hooks; and

(g) shall be adequately secured at vertical intervals not exceeding three times the least lateral dimension of the scaffold, measured at the base, to prevent lateral movement. O. Reg. 213/91, s. 128 (1).

(2) A scaffold shall be constructed of suitable structural materials and, if lumber is used, it shall be construction grade or Number 1 Grade spruce. O. Reg. 213/91, s. 128 (2).

(3) A scaffold mounted on pneumatic tires shall not be supported by the pneumatic tires while the scaffold is being erected, used or dismantled. O. Reg. 213/91, s. 128 (3).

(4) If tubular metal frames are used to support masonry units on a scaffold platform, each frame leg shall have a minimum working load of,

(a) twenty-two kilonewtons for standard frames; and

(b) 16.7 kilonewtons for walk-through frames. O. Reg. 213/91, s. 128 (4).

129. (1) A scaffold mounted on castors or wheels,

(a) shall be equipped with a suitable braking device on each castor or wheel; and

(b) shall have the brakes applied when a worker is on the scaffold. O. Reg. 213/91, s. 129 (1).

(2) A scaffold mounted on castors or wheels shall be equipped with guy wires or outriggers to prevent its overturning if the height of the scaffold platform exceeds three times the least lateral dimension of the scaffold,

(a) measured at the base of the scaffold; or

(b) if outriggers are used, measured between the outriggers. O. Reg. 213/91, s. 129 (2).

(3) No scaffold mounted on castors or wheels that has a scaffold platform more than 2.4 metres above the base shall be moved when a worker is on it unless,

(a) the worker is wearing a full body harness as part of a fall arrest system attached to a fixed support; and

(b) the scaffold is being moved on a firm level surface. O. Reg. 213/91, s. 129 (3).

130. (1) A scaffold shall be designed by a professional engineer and shall be erected in accordance with the design if the scaffold exceeds,

(a) fifteen metres in height above its base support; or

(b) ten metres in height above its base support if the scaffold is constructed of a tube and clamp system. O. Reg. 213/91, s. 130 (1).

(2) Design drawings for a scaffold shall set out erection instructions and the rated loads for the scaffold. O. Reg. 85/04, s. 12.

(3) A professional engineer or a competent worker designated by the supervisor of the project shall inspect the scaffold before it is used to ensure that it is erected in accordance with the design drawings. O. Reg. 213/91, s. 130 (3).

(4) The person carrying out an inspection shall state in writing whether the scaffold is erected in accordance with the design drawings. O. Reg. 213/91, s. 130 (4).

(5) The constructor shall keep at a project the design drawings and the written statement for a scaffold while the scaffold is erected. O. Reg. 213/91, s. 130 (5).

131. Only a competent worker shall supervise the erection, alteration and dismantling of a scaffold. O. Reg. 213/91, s. 131.

132. (1) A professional engineer shall inspect and give a written opinion as to the structural adequacy of a centre pole scaffold used in silo construction when required by subsection (2). O. Reg. 213/91, s. 132 (1).

(2) An inspection shall be performed on the earlier of,

(a) the twenty-fourth time the scaffold is erected following the most recent inspection; or

(b) for a scaffold used in the construction of,

(i) a monolithic silo, two years after the scaffold is erected or after the most recent inspection, and

(ii) a stave silo, one year after the scaffold is erected or after the most recent inspection. O. Reg. 213/91, s. 132 (2).

(3) The employer responsible for constructing the silo shall keep with a scaffold every written opinion by a professional engineer concerning the scaffold while it is in use on a project. O. Reg. 213/91, s. 132 (3).

(4) The employer responsible for constructing the silo shall record information about the frequency of use of the scaffold in a log book which shall be kept with the scaffold while it is in use on a project. O. Reg. 213/91, s. 132 (4).

133. (1) This section applies with respect to a worker who is installing reinforcing steel on a vertical surface consisting of horizontal reinforcing steel bars. O. Reg. 213/91, s. 133 (1).

(2) A scaffold shall be provided for a worker who is working more than 3.7 metres above the ground or a floor. O. Reg. 213/91, s. 133 (2).

(3) If a scaffold cannot be erected, a worker shall use and wear a work belt. O. Reg. 213/91, s. 133 (3).

(4) No worker who is climbing the vertical surface shall carry reinforcing steel bars. O. Reg. 213/91, s. 133 (4).

134. (1) Every scaffold platform and other work platform shall be designed, constructed and maintained to support or resist, without exceeding the allowable unit stresses for the materials of which it is constructed,

(a) all loads and forces to which it is likely to be subjected; and

(b) at least 2.4 kilonewtons per square metre. O. Reg. 213/91, s. 134 (1).

(2) Each component of a scaffold platform or other work platform shall be capable of supporting a load of at least 2.2 kilonewtons without exceeding the allowable unit stress for each material used. O. Reg. 213/91, s. 134 (2).

(3) No scaffold platform or other work platform shall be loaded in excess of the load that it is designed and constructed to bear. O. Reg. 213/91, s. 134 (3).

135. (1) A scaffold platform or other work platform,

(a) shall be at least 460 millimetres wide;

(b) if it is 2.4 metres or more above a floor, roof or other surface, consist of planks laid tightly side by side for the full width of the scaffold;

(c) shall be provided with a guardrail as required by section 26.3;

(d) shall be provided with a means of access as required by section 70;

(e) shall not have any unguarded openings; and

(f) shall have each component secured against slipping from its supports. O. Reg. 213/91, s. 135 (1); O. Reg. 527/00, s. 4.

(2) A scaffold platform or other work platform made of sawn lumber planks shall have planks of number 1 grade spruce that do not have any defect affecting their load-carrying capacity and,

(a) that bear a legible grade identification stamp or are permanently identified as being number 1 grade spruce;

(b) that are at least forty-eight millimetres thick by 248 millimetres wide;

(c) that are arranged so that their span does not exceed 2.1 metres;

(d) that overhang their supports by not less than 150 millimetres and not more than 300 millimetres; and

(e) that are cleated or otherwise secured against slipping. O. Reg. 213/91, s. 135 (2).

136. (1) Cubes of masonry units on a scaffold platform shall be placed directly over the scaffold frame. O. Reg. 213/91, s. 136 (1).

(2) If it is not practicable to comply with subsection (1), the masonry units shall be placed on the scaffold platform in a manner that conforms with the load capability provisions of the scaffold platform as set out in section 134. O. Reg. 213/91, s. 136 (2).

(3) The surface of an outrigger bracket platform used by a masonry worker shall be not more than one metre below the associated material storage platform. O. Reg. 213/91, s. 136 (3).

(4) Masonry units to be installed in a building or structure shall be distributed along the scaffold platform before being used. O. Reg. 213/91, s. 136 (4).

SUSPENDED PLATFORMS AND SCAFFOLDS AND BOATSWAIN'S CHAIRS

136.1 Sections 137 to 142 do not apply to multi-point suspended scaffolds. O. Reg. 85/04, s. 13.

137. (1) Every suspended platform, suspended scaffold and boatswain's chair shall meet the requirements of this section. O. Reg. 213/91, s. 137 (1).

(2) A suspended platform, suspended scaffold or boatswain's chair shall be attached to a fixed support or outrigger beam in accordance with the manufacturer's instructions. O. Reg. 213/91, s. 137 (2).

(3) A fixed support or outrigger beam shall be capable of supporting at least four times the maximum load to which it may be subjected without exceeding the allowable unit stresses for the materials of which it is constructed and without overturning. O. Reg. 213/91, s. 137 (3).

(4) An outrigger beam shall be tied back to a fixed support with a secondary line, each of which is capable of supporting the weight of the suspended load and the supporting system. O. Reg. 213/91, s. 137 (4).

(5) An outrigger beam shall be secured against horizontal and vertical movement. O. Reg. 213/91, s. 137 (5).

(6) An outrigger beam shall have securely attached counterweights that are designed and manufactured for the purpose. O. Reg. 213/91, s. 137 (6).

(7) Adequate legible instructions for the use of the counterweights shall be affixed to the outrigger beam. O. Reg. 213/91, s. 137 (7).

(8) Every part of the hoisting and rigging system for a suspended platform, suspended scaffold or boatswain's chair shall be capable of supporting at least ten times the maximum load to which the part is likely to be subjected. O. Reg. 213/91, s. 137 (8).

(9) A suspended platform, suspended scaffold or boatswain's chair that is capable of moving either horizontally or vertically shall have,

(a) supporting cables,

(i) that are vertical from the fixed support or outrigger beam,

(ii) that are parallel if there is more than one supporting cable, and

(iii) that extend to the ground or have a positive stop that prevents the suspended platform, suspended scaffold or boatswain's chair from running off the end of the supporting cables; and

(b) rope falls equipped with suitable pulley blocks or a mechanical hoisting device that,

(i) has legible operating and safety instructions affixed to it in a conspicuous location, and

(ii) is equipped with a positive device to prevent the platform, scaffold or boatswain's chair from falling freely. O. Reg. 213/91, s. 137 (9).

(10) A suspended platform, suspended scaffold or boatswain's chair shall have steel wire rope support cables,

(a) if the distance between the platform, scaffold or boatswain's chair and the fixed support exceeds 90 metres;

(b) if a corrosive substance is in the vicinity of the support rope; or

(c) if mechanical grinding or flame-cutting equipment is used in the vicinity of the support rope. O. Reg. 213/91, s. 137 (10).

(11) A competent worker shall inspect a suspended platform, suspended scaffold or boatswain's chair before each day's use if it is operated by mechanical power. O. Reg. 213/91, s. 137 (11).

138. (1) Every suspended platform and suspended scaffold shall meet the requirements of this section. O. Reg. 213/91, s. 138 (1).

(2) A suspended platform or suspended scaffold shall have hangers located at least 150 millimetres but not more than 450 millimetres from the ends of the platform or scaffold that are securely attached to it. O. Reg. 213/91, s. 138 (2).

(3) A suspended platform or suspended scaffold shall be firmly anchored to the building or structure if practicable unless the platform or scaffold is being raised or lowered. O. Reg. 213/91, s. 138 (3).

(4) Wire mesh at least 1.6 millimetres in diameter and capable of rejecting a ball thirty-eight millimetres in diameter shall be securely fastened in place from the toe-board to the top rail of the guardrails of a suspended platform or suspended scaffold. O. Reg. 213/91, s. 138 (4).

139. (1) Every suspended scaffold that consists of more than one platform and every suspended platform that, together with its components, weighs more than 525 kilograms shall meet the requirements of this section. O. Reg. 213/91, s. 139 (1).

(2) A professional engineer shall design a suspended scaffold or suspended platform in accordance with good engineering practice. O. Reg. 213/91, s. 139 (2).

(3) There shall be design drawings for a suspended scaffold or suspended platform that,

(a) set out the size and specification of all components of the scaffold or platform including the type and grade of all materials to be used;

(b) state the maximum live load of the scaffold or platform; and

(c) state that, in the opinion of the professional engineer who designed the scaffold or platform, the design meets the requirements of this section.

(d) REVOKED: O. Reg. 85/04, s. 14.

O. Reg. 213/91, s. 139 (3); O. Reg. 85/04, s. 14.

(4) A suspended scaffold or suspended platform shall be erected in accordance with the design drawings. O. Reg. 213/91, s. 139 (4).

(5) Before a suspended scaffold or suspended platform is used, a professional engineer shall inspect it and state in writing that it has been erected in accordance with the design drawings. O. Reg. 213/91, s. 139 (5).

(6) No person shall use a suspended scaffold or suspended platform until the statement required by subsection (5) has been given. O. Reg. 213/91, s. 139 (6).

(7) The constructor shall keep a copy of the design drawings and the statement required by subsection (5) on a project while the suspended scaffold or suspended platform is on the project. O. Reg. 213/91, s. 139 (7).

(8) If it is stacked or tiered a suspended platform or suspended scaffold shall have at least two independent means of support which shall be so arranged that the failure of one support will not result in the failure of the suspended platform or suspended scaffold. O. Reg. 213/91, s. 139 (8).

140. (1) A boatswain's chair shall be at least 600 millimetres long and 250 millimetres wide. O. Reg. 213/91, s. 140 (1).

(2) A boatswain's chair which is or is to be used by a worker who is using a corrosive substance or mechanical-grinding or flame-cutting equipment shall be supported by a sling consisting of wire rope at least nine millimetres in diameter. O. Reg. 213/91, s. 140 (2).

141. (1) A worker who is on or is getting on or off a suspended platform, suspended scaffold or boatswain's chair shall wear a full body harness connected to a fall arrest system. O. Reg. 213/91, s. 141 (1).

(2) Every lifeline used with a suspended platform, suspended scaffold or boatswain's chair,

(a) shall be suspended independently from the platform, scaffold or boatswain's chair; and

(b) shall be securely attached to a fixed support so that the failure of the platform, scaffold or boatswain's chair or its supporting system will not cause the lifeline to fail. O. Reg. 213/91, s. 141 (2).

(3) Despite clause (2) (a), the fall arrest system shall be securely fastened to the suspended platform or suspended scaffold if,

(a) all or part of the platform or scaffold has more than one means of support or suspension; and

(b) the platform or scaffold is so designed, constructed and maintained that the failure of one means of support or suspension will not cause the collapse of all or part of the platform or scaffold. O. Reg. 213/91, s. 141 (3).

142. (1) The distance between the platform of an outrigger scaffold and the wall beyond which the scaffold extends shall not exceed 75 millimetres. O. Reg. 213/91, s. 142 (1).

(2) The outrigger beams of an outrigger scaffold shall be secured against horizontal and vertical movement. O. Reg. 213/91, s. 142 (2).

MULTI-POINT SUSPENDED SCAFFOLDS

142.1 Sections 142.2 to 142.8 apply to every multi-point suspended scaffold. O. Reg. 85/04, s. 15.

142.2 (1) A multi-point suspended scaffold and all its components shall be designed by a professional engineer in accordance with good engineering practice and with this section. O. Reg. 85/04, s. 15.

(2) A multi-point suspended scaffold shall be designed to support, in addition to its dead load, live loads uniformly distributed over the platform surface of at least,

(a) 2.4 kilonewtons per square metre if the platform is to be used for masonry work;

(b) 3.6 kilonewtons per square metre if the platform is to be used for demolition work or for storage of masonry units or other related material or equipment; or

(c) 1.2 kilonewtons per square metre in any other case. O. Reg. 85/04, s. 15.

(3) In addition to the loads specified in subsection (2), a multi-point suspended scaffold shall be able to support or resist,

(a) 1.1 kilonewtons concentrated on an area measuring 0.3 metres by 0.3 metres that is located on the platform at the position having the most adverse effect on the component under consideration;

(b) the wind load determined in accordance with Table 2.5.1.1. (Design Data for Selected Locations in Ontario) of the Building Code, assuming a probability factor of at least one in ten; and

(c) any other loads likely to be applied to it. O. Reg. 85/04, s. 15.

(4) The wind load referred to in clause (3) (b) may be reduced by 30 per cent if the professional engineer who designs the scaffold determines that it is appropriate to do so and indicates in writing that he or she has made the determination. O. Reg. 85/04, s. 15.

(5) Subject to clause (2) (c) and subsections (3) and (4), the professional engineer who designs the scaffold shall determine the minimum specified loads for erecting, dismantling, traversing, or otherwise moving multi-point suspended scaffolds. O. Reg. 85/04, s. 15.

(6) If a multi-point suspended scaffold is to be used for abrasive blasting operations, there shall be an additional load allowance for the accumulation of grit on the platform to a depth of at least 25 millimetres. O. Reg. 85/04, s. 15.

(7) Subject to subsection (8), in designing a multi-point suspended scaffold and its structural members, the following values of load factors, as described in Section 4.1.3. (Limit States Design) of the Building Code, shall be applied to the load requirements referred to in subsections (2) to (6):

1. Live load factor $\alpha_L = 3.0$.
2. Dead load factor $\alpha_D = 1.5$.
3. Wind load factor $\alpha_W = 1.5$. O. Reg. 85/04, s. 15.

(8) In designing the suspension and anchorage system of a multi-point suspended scaffold,

(a) the value of the live load factor α_L shall be 4.0;

(b) the value of the dead load factor α_D shall be 2.0; and

(c) the value of the wind load factor α_W shall be 2.0. O. Reg. 85/04, s. 15.

(9) Despite subsections (7) and (8), a multi-point suspended scaffold and its components may be designed by working stress design if the safety factors for the scaffold and the structural members are at least equal to what would otherwise be provided under those subsections. O. Reg. 85/04, s. 15.

(10) Despite subsections (7) and (8), if the failure load of a component has been determined by testing, the minimum safety factors shall be,

(a) 3.0 for components of the multi-point suspended scaffold;

(b) 4.0 for components of the suspension and anchorage system; and

(c) 10.0 for wire ropes, cables or chains used for hoisting, traversing or otherwise moving the multi-point suspended scaffold. O. Reg. 85/04, s. 15.

(11) The failure load of a component referred to in subsection (10) shall be verified in writing by a professional engineer. O. Reg. 85/04, s. 15.

(12) A multi-point suspended scaffold shall be designed, constructed and maintained in such a way that,

(a) the failure of one means of support or suspension will not cause any part of the scaffold to collapse or fail, under the most adverse loading condition as determined by the professional engineer who designs the scaffold; and

(b) compliance with subsections (7), (8), (9) and (10) is maintained in all fixed and moving conditions. O. Reg. 85/04, s. 15.

(13) The design of a multi-point suspended scaffold shall include adequate movement-limiting devices to be used when traversing or otherwise moving it. O. Reg. 85/04, s. 15.

(14) Before a multi-point suspended scaffold is erected, the constructor shall ensure that the professional engineer responsible for the structural integrity of the permanent building or structure from which the scaffold is suspended provides a written report approving the design loads imposed on the building or structure by the scaffold. O. Reg. 85/04, s. 15.

(15) Design drawings for a multi-point suspended scaffold shall include,

(a) a statement by the professional engineer that the design meets the requirements of this Regulation;

(b) the size and specifications of all components, including the type and grade of all materials to be used;

(c) the load factors and safety factors for the scaffold and all its components;

(d) all the specified loads, including the loads during erection, dismantling, traversing and otherwise moving; and

(e) the procedures for erection, dismantling, traversing and otherwise moving. O. Reg. 85/04, s. 15.

(16) The design drawings shall be followed, subject to subsection (17). O. Reg. 85/04, s. 15.

(17) A deviation from the design drawings is permitted if the deviation,

(a) is approved, in advance and in writing, by a professional engineer; and

(b) complies with this Regulation. O. Reg. 85/04, s. 15.

142.3 (1) Before erecting or dismantling a multi-point suspended scaffold, the constructor shall give notice, in person, by telephone, by fax or by electronic means, to the Ministry office located nearest the project. O. Reg. 85/04, s. 15.

(2) A multi-point suspended scaffold shall be inspected by a professional engineer to determine whether it complies with the design drawings, or the design drawings subject to any deviations approved under subsection 142.2 (17), as the case may be,

(a) after it is erected but before it is first used; and

(b) if the scaffold is moved to another anchorage position, before it is used there. O. Reg. 85/04, s. 15.

(3) The inspection under subsection (2) shall include a determination of whether all components are in adequate condition. O. Reg. 85/04, s. 15.

(4) The professional engineer who conducts the inspection under subsection (2) shall prepare a written report of the inspection. O. Reg. 85/04, s. 15.

(5) The written report is a positive report if it indicates that,

(a) the multi-point suspended scaffold complies with the design drawings, or the design drawings subject to any deviations approved under subsection 142.2 (17), as the case may be; and

(b) all components are in adequate condition. O. Reg. 85/04, s. 15.

(6) Subsections (1), (2), (3), (4) and (5) do not apply to a multi-point suspended scaffold whose platform area is six square metres or less. O. Reg. 85/04, s. 15.

(7) A competent worker shall inspect a multi-point suspended scaffold each day before it is used. O. Reg. 85/04, s. 15.

142.4 The constructor shall keep at the project a copy of,

(a) the written report under subsection 142.2 (14);

(b) the design drawings under subsection 142.2 (15);

(c) any written approvals under subsection 142.2 (17); and

(d) the written reports under subsection 142.3 (4). O. Reg. 85/04, s. 15.

142.5 (1) A multi-point suspended scaffold shall be erected, dismantled, traversed or otherwise moved only by a competent worker under the supervision of a competent person and in accordance with the design drawings, or the design drawings subject to any deviations approved under subsection 142.2 (17), as the case may be. O. Reg. 85/04, s. 15.

(2) Before a worker is on a multi-point suspended scaffold for the first time, the employer shall provide the worker with adequate oral and written instructions for using the scaffold, including,

(a) the manufacturer's instructions or a professional engineer's instructions;

(b) instructions on the load limitations;

(c) instructions in, and a hands-on demonstration of, the proper operation of the scaffold. O. Reg. 85/04, s. 15.

(3) A worker who is to erect, dismantle, traverse or otherwise move a multi-point suspended scaffold shall, in addition to the instructions set out in subsection (2), be given instructions in the procedures described in clause 142.2 (15) (e). O. Reg. 85/04, s. 15.

(4) No person shall use a multi-point suspended scaffold until the design drawings described in subsection 142.2 (15) have been given to the constructor and the following documents have been prepared and given to the constructor:

1. The report described in subsection 142.2 (14).

2. A positive report described in subsections 142.3 (4) and (5), if applicable.

3. Any approval described in subsection 142.2 (17), if applicable. O. Reg. 85/04, s. 15.

142.6 (1) A multi-point suspended scaffold shall not be loaded in excess of the specified loads indicated on the design drawings for the scaffold. O. Reg. 85/04, s. 15.

(2) Signs indicating the specified live loads shall be posted in conspicuous places on the scaffold. O. Reg. 85/04, s. 15.

142.7 (1) A worker who is on a multi-point suspended scaffold while it is being erected, dismantled, traversed or otherwise moved shall use a fall arrest system that is,

(a) connected to a fixed support independent from the scaffold; and

(b) designed, constructed and maintained in accordance with this Regulation. O. Reg. 85/04, s. 15.

(2) Despite subsection (1), a worker is not required to use a fall arrest system while the scaffold is stationary if guardrails are installed in accordance with section 26.3. O. Reg. 85/04, s. 15.

142.8 (1) The constructor of a project where a multi-point suspended scaffold is used shall keep a written record of all inspections, tests, repairs, modifications and maintenance performed on the scaffold and make copies of the record available to an inspector upon request. O. Reg. 85/04, s. 15.

(2) The record referred to in subsection (1) shall,

(a) be kept up to date;

(b) include the signature, name and business address of each person who performs an inspection, test, repair, modification or maintenance; and

(c) be kept at the project while the scaffold is there. O. Reg. 85/04, s. 15.

ELEVATING WORK PLATFORMS

143. (1) Subject to subsection (2), every elevating work platform, including elevating rolling work platforms, self-propelled elevating work platforms, boom-type elevating work platforms and vehicle-mounted aerial devices shall comply with section 144. O. Reg. 213/91, s. 143 (1).

(2) Subsection (1) does not apply to,

(a) suspended scaffolds or suspended work platforms; and

(b) buckets or baskets suspended from or attached to the boom of a crane. O. Reg. 213/91, s. 143 (2).

144. (1) An elevating work platform shall be designed by a professional engineer in accordance with good engineering practice,

(a) to meet the requirements of the applicable National Standards of Canada standard, set out in the Table to subsection (6); and

(b) to support a minimum of 1.3 kilonewtons rated working load as determined in accordance with the applicable National Standards of Canada standard set out in the Table to subsection (6). O. Reg. 213/91, s. 144 (1).

(2) An elevating work platform shall be manufactured in accordance with the design referred to in subsection (1). O. Reg. 213/91, s. 144 (2).

(3) An elevating work platform,

(a) shall be tested in accordance with the National Standards of Canada standard set out in the Table to subsection (6); and

(b) shall be inspected each day before use, in accordance with the manufacturer's instructions by a worker trained in accordance with section 147. O. Reg. 213/91, s. 144 (3).

(4) An elevating work platform shall only be used if a professional engineer has certified in writing that it complies with the National Standards of Canada standard set out in the Table to subsection (6). O. Reg. 213/91, s. 144 (4).

(5) The certification required by subsection (4) shall include the details of testing. O. Reg. 213/91, s. 144 (5).

(6) The National Standards of Canada standard applicable to the type of elevating work platform listed in Column 1 of the Table to this subsection are the standards set out opposite it in Column 2:

TABLE

Column 1	Column 2
Elevating Work Platform	National Standards of Canada standard
Elevating Rolling Work Platform	CAN3-B354.1-M82
Self-Propelled Elevating Work Platform	CAN3-B354.2-M82 and CAN3-B354.3-M82
Boom-Type Elevating Work Platform	CAN3-B354.4-M82
Vehicle-Mounted Aerial Device	CAN-CSA-C225-M88

O. Reg. 213/91, s. 144 (6).

(7) An elevating work platform shall be equipped with guardrails. O. Reg. 213/91, s. 144 (7).

(8) An elevating work platform shall have signs that are clearly visible to an operator at its controls indicating,

(a) the rated working load;

(b) all limiting operating conditions including the use of outriggers, stabilizers and extendable axles;

(c) the specific firm level surface conditions required for use in the elevated position;

(d) such warnings as may be specified by the manufacturer;

(e) other than for a boom-type elevating work platform, the direction of machine movement for each operating control;

(f) the name and number of the National Standards of Canada standard to which it was designed; and

(g) the name and address of the owner. O. Reg. 213/91, s. 144 (8).

145. (1) The owner of an elevating work platform shall maintain it such that the safety factors of the original design are maintained. O. Reg. 213/91, s. 145 (1).

(2) The owner of an elevating work platform shall keep a permanent record of all inspections, tests, repairs, modifications and maintenance performed on it. O. Reg. 213/91, s. 145 (2).

(3) The permanent record required by subsection (2),

(a) shall be kept up-to-date;

(b) shall include complete records from the more recent of,

(i) the date of purchase, or

(ii) the date this Regulation is filed; and

(c) shall include the signature and name of the person who performed the inspection, test, repair, modification or maintenance. O. Reg. 213/91, s. 145 (3).

146. A maintenance and inspection record tag,

(a) shall be provided and attached to the elevating work platform near the operator's station; and

(b) shall include,

(i) the date of the last maintenance and inspection,

(ii) the signature and name of the person who performed the maintenance and inspection, and

(iii) an indication that the maintenance has been carried out in accordance with the manufacturer's recommendations. O. Reg. 213/91, s. 146.

147. (1) A worker who operates an elevating work platform shall, before using it for the first time, be given oral and written instruction on the operation and be trained to operate that class of elevating work platform. O. Reg. 213/91, s. 147 (1).

(2) The instruction and training required by subsection (1) shall include,

(a) the manufacturer's instruction;

(b) instruction in the load limitations;

(c) instruction in and a hands-on demonstration of the proper use of all controls; and

(d) instruction in the limitations on the kinds of surfaces on which it is designed to be used. O. Reg. 213/91, s. 147 (2).

148. An elevating work platform,

(a) shall not be loaded in excess of its rated working load;

(b) shall be used only on a firm level surface;

(c) shall be used only in accordance with the written instructions of the manufacturer;

(d) shall not be loaded and used in such a manner as to affect its stability or endanger a worker; and

(e) shall not be moved unless all workers on it are protected against falling by a safety belt attached to the platform. O. Reg. 213/91, s. 148.

149. An operator's manual for an elevating work platform shall be kept with it while it is on a project. O. Reg. 213/91, s. 149.

CRANES, HOISTING AND RIGGING

150. (1) Subject to subsection (2), no worker shall operate a crane or similar hoisting device unless the worker holds a certificate of qualification issued under the *Ontario College of Trades and Apprenticeship Act, 2009*, that is not suspended, or the worker is an apprentice and is working pursuant to a training agreement registered under that Act, that is not suspended, in the trade of,

(a) hoisting engineer — mobile crane operator 1, if the worker is operating a crane or similar hoisting device capable of raising, lowering or moving any material that weighs more than 30,000 pounds;

(b) hoisting engineer — mobile crane operator 1 or hoisting engineer — mobile crane operator 2, if the worker is operating a crane or similar hoisting device capable of raising, lowering or moving only material that weighs more than 16,000 pounds but no more than 30,000 pounds; or

(c) hoisting engineer — tower crane operator, if the worker is operating a tower crane. O. Reg. 88/13, s. 1.

(1.1) Subsection (1) does not apply when a worker is using excavation equipment to place pipes into a trench. O. Reg. 631/94, s. 3.

(2) No worker shall operate a crane or similar hoisting device, other than one described in subsection (1), unless,

(a) the worker has written proof of training indicating that he or she is trained in the safe operation of the crane or similar hoisting device; or

(b) the worker is being instructed in the operation of the crane or similar hoisting device and is accompanied by a person who meets the requirements of clause (a). O. Reg. 213/91, s. 150 (2).

(3) A worker shall carry his or her proof of training while operating a crane or similar hoisting device. O. Reg. 213/91, s. 150 (3).

151. (1) No crane or similar hoisting device shall be subjected to a load greater than its rated load-carrying capacity. O. Reg. 213/91, s. 151 (1).

(2) The manufacturer of a crane or similar hoisting device or a professional engineer shall determine its rated load-carrying capacity in accordance with,

(a) for a mobile crane, Canadian Standards Association Standard Z150-1974 Safety Code for Mobile Cranes; and

(b) for a tower crane, Canadian Standards Association Standard Z248-1976 Code for Tower Cranes. O. Reg. 213/91, s. 151 (2).

(3) Every crane or similar hoisting device shall have affixed to it a load rating plate,

(a) that the operator can read while at the controls; and

(b) that contains enough information for the operator to determine the load that can be lifted for each configuration of the crane. O. Reg. 213/91, s. 151 (3).

(4) A luffing boom crane, other than a tower crane, shall have affixed to it a boom angle indicator that the operator can read while at the controls. O. Reg. 213/91, s. 151 (4).

152. (1) The owner of a crane or similar hoisting device shall keep a permanent record of all inspections of, tests of, repairs to, modifications to and maintenance of the crane or similar hoisting device. O. Reg. 213/91, s. 152 (1).

(2) The owner of a crane or similar hoisting device shall prepare a log book for it for use at a project that shall include the record referred to in subsection (1) covering the period that is the greater of,

(a) the immediately preceding twelve months; and

(b) the period the crane or similar hoisting device is on the project. O. Reg. 213/91, s. 152 (2).

(3) The log book shall be kept with the crane or similar hoisting device. O. Reg. 213/91, s. 152 (3).

(4) The owner of a crane or similar hoisting device shall retain and make available to the constructor on request copies of all log books and records for the crane or similar hoisting device. O. Reg. 213/91, s. 152 (4).

153. (1) No worker shall use as a workplace a platform, bucket, basket, load, hook, sling or similar device that is capable of moving and is supported by a cable attached to the boom of a crane or similar hoisting device, except in accordance with this section. O. Reg. 631/94, s. 4.

(2) A crane may be used to raise, support or lower a worker only if,

(a) conventional access equipment cannot be used;

(b) the platform that the worker is on,

(i) is designed by a professional engineer in accordance with good engineering practice,

(ii) is constructed in accordance with the design drawings,

(iii) is equipped with more than one means of suspension or support,

(iv) is equipped with anchor points for the attachment of the worker's fall arrest systems,

(v) is equipped with a guardrail in accordance with section 26.3,

(vi) is suspended from, or supported by, a direct attachment to the boom of the crane,

(vii) is designed, constructed and maintained so that the failure of one means of support or suspension will not cause the collapse of all or part of the platform, and

(viii) has its maximum rated load capacity legibly and permanently marked in a conspicuous place on it; and

(c) the crane,

(i) is equipped with fail-safe mechanisms that will prevent the boom and the suspended platform from free falling in the event of a power source or system failure or the inadvertent release of any operating controls,

(ii) is not used to hoist material while the platform is being used to support a worker,

(iii) is not loaded in excess of 25 per cent of its maximum rated load,

(iv) has a revised load rating chart prepared by a professional engineer in accordance with good engineering practice and affixed in a conspicuous place on the crane,

(v) has, on its hoist line, hooks equipped with self-closing safety catches at the point where the platform is suspended, and

(vi) is equipped with an automatic limit switch that prevents the platform and load from reaching beyond the highest permissible position specified by the crane manufacturer. O. Reg. 631/94, s. 4; O. Reg. 527/00, s. 5.

(3) Any modifications or repairs to the boom of the crane shall be made in accordance with the instructions of the crane manufacturer or a professional engineer. O. Reg. 631/94, s. 4.

(4) Every worker on the platform shall wear a full body harness connected independently to anchor points on the platform and used in conjunction with a lanyard fitted with a shock absorber. O. Reg. 631/94, s. 4.

(5) The design drawings of the platform shall,

(a) set out the size and specifications of all components of the platform, including the type and grade of materials used for it;

(b) state the maximum live load of the platform;

(c) specify the model and type of crane to be used in conjunction with the platform; and

(d) include a statement that, in the opinion of the professional engineer who designed the platform, the design meets the requirements of clauses (a), (b) and (c).

(e) REVOKED: O. Reg. 85/04, s. 16.

O. Reg. 631/94, s. 4; O. Reg. 85/04, s. 16.

(6) Before the platform is used, a competent worker shall inspect it and verify in writing that it has been constructed in accordance with the design drawings. O. Reg. 631/94, s. 4.

(7) No person shall use the platform until the verification required under subsection (6) is given. O. Reg. 631/94, s. 4.

(8) A professional engineer or a competent worker designated by the professional engineer shall inspect the crane to ensure its structural integrity using non-destructive testing methods approved by the Canadian General Standards Board before the crane is used to lift persons and then at least once every 12 months after that. O. Reg. 631/94, s. 4.

(9) A competent worker shall visually inspect the crane's structural elements and the rigging equipment for defects before each use of the crane. O. Reg. 631/94, s. 4.

(10) The employer shall ensure that an adequate means of communication between the worker on the platform and the crane operator is established, maintained and used. O. Reg. 631/94, s. 4.

(11) Before beginning any hoisting operation under this section, the constructor shall notify by telephone an inspector in the office of the Ministry of Labour nearest to the project. O. Reg. 631/94, s. 4.

(12) The employer shall ensure that every worker involved with the hoisting operation receives adequate instructions about the requirements, restrictions and hazards associated with the hoisting operation. O. Reg. 631/94, s. 4.

(13) The employer shall develop adequate emergency rescue procedures and communicate these in writing to all workers involved with the hoisting operation. O. Reg. 631/94, s. 4.

(14) The constructor shall keep all design drawings, test reports, written statements and certification documents required under this section with the crane at all times during the hoisting operation. O. Reg. 631/94, s. 4.

(15) On request, the constructor shall provide an inspector with copies of any document described in subsection (14). O. Reg. 631/94, s. 4.

154. (1) A crane or similar hoisting device shall be set up, assembled, extended and dismantled only by a competent worker acting in accordance with the written instructions of the manufacturer and in such a manner as to not endanger any person or property. O. Reg. 213/91, s. 154 (1).

(2) No crane or similar hoisting device shall include sections that are not designed for it or that are damaged. O. Reg. 213/91, s. 154 (2).

(3) No crane or similar hoisting device shall include nuts, bolts, pins or fastenings that are not the size and quality specified by the manufacturer. O. Reg. 213/91, s. 154 (3).

155. Unless otherwise specified by its manufacturer, a crane or similar hoisting device,

(a) shall be equipped with a device to indicate whether its turntable is level; and

(b) shall be operated with its turntable level. O. Reg. 213/91, s. 155.

156. An outrigger or stabilizing device used on a crane or similar hoisting device,

(a) shall be extended to meet load capacity chart requirements; and

(b) shall rest on blocking able to support the crane or similar hoisting device and its maximum load without failure or without deformation or settlement which affects its stability. O. Reg. 213/91, s. 156.

TOWER CRANES

157. (1) No tower crane shall be erected at a project except in accordance with this section. O. Reg. 213/91, s. 157 (1).

(2) The foundations supporting a tower crane shall be designed by a professional engineer in accordance with the crane manufacturer's specifications and shall be constructed in accordance with the design. O. Reg. 213/91, s. 157 (2).

(3) The shoring and bracing that support a tower crane or tie it in place shall be designed by a professional engineer in accordance with the crane manufacturer's specifications and shall be installed in accordance with the design. O. Reg. 213/91, s. 157 (3).

(4) The structural engineer responsible for the structural integrity of the building or structure shall review the design drawings for the foundation, shoring and bracing for a tower crane before the crane is erected at a project to ensure the structural integrity of the building or structure. O. Reg. 213/91, s. 157 (4).

(5) The structural engineer who reviews the design drawings shall sign the drawings upon approving them. O. Reg. 213/91, s. 157 (5).

(6) The constructor shall keep at the project while a tower crane is erected a copy of the signed design drawings for its foundation, shoring and bracing and any written opinion about the drawings by a structural engineer. O. Reg. 213/91, s. 157 (6).

158. (1) Before a tower crane is erected at a project, a professional engineer or a competent worker designated by a professional engineer shall inspect its structural elements and components using methods of non-destructive testing approved by the Canadian General Standards Board to determine their structural integrity. O. Reg. 213/91, s. 158 (1); O. Reg. 631/94, s. 5.

(2) The professional engineer conducting an inspection or under whose direction an inspection is done shall prepare a written report of the test results. O. Reg. 213/91, s. 158 (2); O. Reg. 85/04, s. 17.

(3) The constructor shall keep the report at the project while the crane is erected. O. Reg. 213/91, s. 158 (3).

159. (1) A professional engineer or a competent worker designated by a professional engineer shall visually inspect for defects the structural elements and components of a tower crane,

(a) after the crane is erected and before it is used; and

(b) after the inspection under clause (a), at intervals not greater than twelve months. O. Reg. 213/91, s. 159 (1).

(2) No tower crane shall be used until any defects found during an inspection are repaired in accordance with the instructions of the crane's manufacturer or a professional engineer. O. Reg. 213/91, s. 159 (2).

(3) A professional engineer or a competent worker designated by a professional engineer shall inspect a tower crane that has been repaired to ensure that the defects are corrected. O. Reg. 213/91, s. 159 (3).

(4) The professional engineer conducting an inspection or under whose direction the inspection is done shall prepare a written report of the test results. O. Reg. 213/91, s. 159 (4); O. Reg. 85/04, s. 18.

(5) The constructor shall keep the report at a project while the crane is erected. O. Reg. 213/91, s. 159 (5).

160. (1) A tower crane shall have automatic limit switches and automatic overload limit devices that prevent,

(a) overloading at relative radii;

(b) a load on the crane from reaching beyond the highest permissible position specified by the manufacturer; and

(c) the trolley from reaching beyond the permissible travel limit specified by the manufacturer. O. Reg. 213/91, s. 160 (1).

(2) In addition to automatic limit switches and overload limit devices, a tower crane shall have such other switches and devices as the manufacturer specifies. O. Reg. 213/91, s. 160 (2).

161. (1) A competent worker shall perform operational tests on a tower crane to ensure that its automatic limit switches and overload limit devices are installed and functioning in accordance with the manufacturer's specifications, if any. O. Reg. 213/91, s. 161 (1).

(2) Operational tests shall be done,

(a) after the tower crane is erected on the project and before it is used; and

(b) at one-week intervals after the test under clause (a) while the crane is erected on the project. O. Reg. 213/91, s. 161 (2).

(3) Overload limit devices for a tower crane shall be tested using test blocks designed for the purpose that have their weight clearly marked on them. O. Reg. 213/91, s. 161 (3).

(4) The test blocks shall be kept on the project while the crane is erected. O. Reg. 213/91, s. 161 (4).

162. (1) A tower crane boom shall be able to slew freely when the crane is unattended except when,

(a) the boom may collide with another crane, a structure or another object; or

(b) to slew freely would be contrary to the written procedures of the crane's manufacturer. O. Reg. 213/91, s. 162 (1).

(2) When a tower crane boom is not permitted to slew freely it shall be secured in accordance with the written procedures of the crane's manufacturer. O. Reg. 213/91, s. 162 (2).

163. (1) Subject to subsection (2), the operator's cabin of a tower crane shall be located on and attached to or positioned on the crane in accordance with the instructions of the crane's manufacturer for the specific model and configuration of the crane and in such a manner that in the event of a failure of the boom, the cabin will not be crushed against the mast. O. Reg. 213/91, s. 163 (1).

(2) The operator's cabin shall not be located on or attached to the boom unless,

(a) the cabin and its attachments have been specifically designed and fabricated for that purpose by the original manufacturer of the crane in accordance with good engineering practice;

(b) the boom of the crane cannot affect or be affected by the operation of another crane or make contact with a structure or equipment;

(c) the crane is not overlapped by any part of another crane;

(d) because of specific site conditions, the location of the cabin on the boom provides greater visibility for the operator than does the manufacturer's standard cabin location;

(e) the means of access to the cabin or other locations on the boom is by a catwalk constructed of skid resistant expanded metal or similar material and fitted with solidly constructed guardrails and devices which provide fall protection for the operator;

(f) the structural, environmental and ergonomic design of the cabin is equal to or greater than that of the crane's manufacturer's standard cabin design; and

(g) the proposed location and attachment method provide a structural and mechanical safety factor equal to or greater than that of a cabin located on the crane mast or attached to the slewing ring. O. Reg. 213/91, s. 163 (2).

(3) If the crane manufacturer specifies the location of the operator's cabin to be on the boom of a tower crane, the crane manufacturer shall provide to the owner of the crane a report for the specific model and specific configuration of crane on a project. O. Reg. 213/91, s. 163 (3).

(4) The crane manufacturer's report shall include,

(a) the crane load restrictions, reductions or modifications resulting from the effect of the cabin weight and its offset from the boom centreline;

(b) the crane configuration and operating restrictions resulting from the effect of the cabin location and attachment method; and

(c) engineering design drawings that include,

(i) the structural and ergonomic design of the cabin,

(ii) the location of the cabin on the boom,

(iii) the attachment method including all fittings and hardware, and

(iv) all means of access. O. Reg. 213/91, s. 163 (4).

164. A load block of an unattended tower crane shall be left empty, at the top position and located at minimum radius. O. Reg. 213/91, s. 164.

165. (1) The track bed of a rail-mounted tower crane shall have a sound and rigid base capable of carrying all loads to which it is likely to be subjected without deformation or settlement which affects the stability of the crane. O. Reg. 213/91, s. 165 (1).

(2) The undercarriage of a rail-mounted tower crane shall be fitted with rail clamps that can be firmly attached to the rails to lock the crane in position. O. Reg. 213/91, s. 165 (2).

(3) A rail-mounted tower crane shall be locked in position on the rails when not in use. O. Reg. 213/91, s. 165 (3).

(4) A rail-mounted tower crane shall have rail stops or bumpers that extend at least as high as the centre of the undercarriage wheels and that are securely attached to the rail at both ends. O. Reg. 213/91, s. 165 (4).

Derricks, Stiff-Leg Derricks and Similar Hoisting Devices

166. (1) No derrick, stiff-leg derrick or similar hoisting device shall be attached to a building or structure unless this section is complied with. O. Reg. 213/91, s. 166 (1).

(2) A professional engineer shall prepare design drawings and specifications for the attachment of a derrick, stiff-leg derrick or similar hoisting device to a building or structure. O. Reg. 213/91, s. 166 (2).

(3) The design drawings and specifications shall include,

(a) the location of the derrick, stiff-leg derrick or similar hoisting device on the building or structure;

(b) the location of anchor bolts, guy wires, supports and shoring for it;

(c) particulars of the weight of the loads and the radius at which the loads are to be lifted; and

(d) particulars of the loads and forces on the building or structure imposed by the derrick, stiff-leg derrick or similar hoisting device. O. Reg. 213/91, s. 166 (3).

(4) The constructor shall ensure that the structural engineer responsible for the structural integrity of a building or structure reviews and approves in writing the design drawings and specifications for a derrick, stiff-leg derrick or similar hoisting device before it is installed. O. Reg. 213/91, s. 166 (4).

(5) A professional engineer shall inspect a derrick, stiff-leg derrick or similar hoisting device before it is first used on a building or structure to ensure that it is installed in accordance with the design drawings and specifications. O. Reg. 213/91, s. 166 (5).

(6) The professional engineer conducting the inspection shall prepare a written report of the inspection. O. Reg. 213/91, s. 166 (6); O. Reg. 85/04, s. 19.

(7) The constructor shall keep a copy of the design drawings and specifications for a derrick, stiff-leg derrick or similar hoisting device and the report prepared under subsection (6) at a project while the derrick, stiff-leg derrick or similar hoisting device is on the project. O. Reg. 213/91, s. 166 (7).

167. (1) The pilot of a helicopter that is hoisting materials shall be competent to fly an externally-loaded helicopter. O. Reg. 213/91, s. 167 (1).

(2) The pilot shall be in charge of the hoisting operation and shall determine the size and weight of loads to be hoisted and the method by which they are attached to the helicopter. O. Reg. 213/91, s. 167 (2).

(3) Ground personnel including signallers for a helicopter being used to hoist materials shall be competent workers. O. Reg. 213/91, s. 167 (3).

(4) The constructor shall take precautions against hazards caused by helicopter rotor downwash. O. Reg. 213/91, s. 167 (4).

CABLES, SLINGS, RIGGING

168. (1) A cable used by a crane or similar hoisting device,

(a) shall be steel wire rope of the type, size, grade and construction recommended by the manufacturer of the crane or similar hoisting device;

(b) shall be compatible with the sheaves and the drum of the crane or similar hoisting device;

(c) shall be lubricated to prevent corrosion and wear;

(d) shall not be spliced; and

(e) shall have its end connections securely fastened and shall be kept with at least three full turns on the drum. O. Reg. 213/91, s. 168 (1).

(2) No cable used by a crane or similar hoisting device,

(a) subject to subsection (3), shall contain six randomly-distributed wires that are broken in one rope lay or three or more wires that are broken in one strand in a rope lay;

(b) shall be smaller than its nominal rope diameter by more than,

(i) one millimetre for a diameter up to and including nineteen millimetres,

(ii) two millimetres for a diameter greater than nineteen millimetres up to and including twenty-nine millimetres, and

(iii) three millimetres for a diameter greater than twenty-nine millimetres;

(c) shall be worn by more than one-third of the original diameter of its outside individual wires;

(d) shall show evidence of kinking, bird-caging, corrosion or other damage resulting in distortion of the rope structure; or

(e) shall show evidence of possible rope failure including rope damage caused by contact with electricity. O. Reg. 213/91, s. 168 (2).

(3) No cable that is static or is used for pendants,

(a) shall contain three or more broken wires in one lay or in a section between end connectors; or

(b) shall have more than one broken wire at an end connector. O. Reg. 213/91, s. 168 (3).

(4) Rotation-resistant wire rope shall not be used for a cable for boom hoist reeving and pendants. O. Reg. 213/91, s. 168 (4).

(5) Rotation-resistant wire rope shall not be used where an inner wire or strand for a cable is damaged or broken. O. Reg. 213/91, s. 168 (5).

169. A cable used by a crane or similar hoisting device shall be capable of supporting at least,

(a) three and one-half times the maximum load to which it is likely to be subjected if it is used on a device other than a tower crane and it winds on a drum or passes over a sheave;

(b) five times the maximum load to which it is likely to be subjected if it is used on a tower crane and it winds on a drum or passes over a sheave;

(c) three times the maximum load to which it is likely to be subjected if it is a pendant or is not subject to winding or bending; and

(d) ten times the maximum load to which it is likely to be subjected if the crane or similar hoisting device is used for supporting persons. O. Reg. 213/91, s. 169.

170. (1) All cable used by a crane or similar hoisting device shall be visually inspected by a competent worker at least once a week when the crane or similar hoisting device is being used. O. Reg. 213/91, s. 170 (1).

(2) The worker performing an inspection shall record the condition of the rope or cable inspected in the log book for the crane or similar hoisting device. O. Reg. 213/91, s. 170 (2).

171. (1) A cable used by a crane or similar hoisting device shall be securely attached,

(a) by binding and fastening the cable around an oval thimble in a way that is strong enough to prevent the cable thimble from separating; or

(b) by fastening the cable within either a tapered socket by means of virgin zinc or a wedge-type socket fitted with a wire rope clip at the dead end to prevent the accidental release or loosening of the wedge. O. Reg. 213/91, s. 171 (1).

(2) The dead end cable of a wedge socket assembly on a hoisting line shall extend between 100 millimetres and 300 millimetres out of the socket. O. Reg. 213/91, s. 171 (2).

172. (1) A container, sling or similar device for rigging or hoisting an object, including its fittings and attachments,

(a) shall be suitable for its intended use;

(b) shall be suitable for and capable of supporting the object being rigged or hoisted;

(c) shall be so arranged as to prevent the object or any part of the object from slipping or falling;

(d) shall be capable of supporting at least five times the maximum load to which it may be subjected; and

(e) shall be capable of supporting at least ten times the load to which it may be subjected if it is to be used to support a person. O. Reg. 213/91, s. 172 (1).

(2) A sling or similar device made of web-type fabric or nylon shall be labelled to indicate its load rating capacity. O. Reg. 213/91, s. 172 (2).

(3) No sling or similar device for rigging or hoisting made of web-type fabric or nylon shall be used if it may be cut. O. Reg. 213/91, s. 172 (3).

173. (1) Every hoisting hook shall be equipped with a safety catch. O. Reg. 213/91, s. 173 (1).

(2) No safety catch is required on a hoisting hook used in placing structural members if the method of placing protects workers to the same standard as a safety catch does. O. Reg. 213/91, s. 173 (2).

(3) A hoisting hook shall have its load rating legibly cast or stamped on it in a location where the person using the hook can readily see it. O. Reg. 213/91, s. 173 (3).

(4) A hoisting hook shall not be used if it is cracked, has a throat opening that is greater than as manufactured or is twisted from the plane of the unbent hook. O. Reg. 213/91, s. 173 (4).

174. A hook block shall have its load rating and weight legibly cast or stamped on it in a conspicuous location. O. Reg. 213/91, s. 174.

175. (1) An overhauling weight used on the cable of a crane or similar hoisting device,

(a) shall be prevented from sliding up or down the cable; and

(b) shall be securely attached to the load hook and the cable. O. Reg. 213/91, s. 175 (1).

(2) No overhauling weight used on the cable of a crane or similar hoisting device shall be split. O. Reg. 213/91, s. 175 (2).

176. Only an alloy steel chain or a chain manufactured for the purpose shall be used for hoisting. O. Reg. 213/91, s. 176.

177. (1) No alloy chain shall be annealed or welded. O. Reg. 213/91, s. 177 (1).

(2) A chain used for hoisting shall be selected, annealed, normalized and repaired in accordance with the specifications of its manufacturer. O. Reg. 213/91, s. 177 (2).

178. A friction-type clamp used in hoisting materials shall be constructed so that an accidental slackening of the hoisting cable does not release the clamp. O. Reg. 213/91, s. 178.

179. (1) If a worker may be endangered by the rotation or uncontrolled motion of a load being hoisted by a crane or similar hoisting device, one or more guide ropes or tag lines shall be used to prevent the rotation or uncontrolled motion. O. Reg. 213/91, s. 179 (1).

(2) No guide rope or tag line shall be removed from a load referred to in subsection (1) until the load is landed and there is no danger of it tipping, collapsing or rolling. O. Reg. 213/91, s. 179 (2).

180. (1) Piles and sheet-piling shall be adequately supported to prevent their uncontrolled movement while they are being hoisted, placed, removed or withdrawn. O. Reg. 213/91, s. 180 (1).

(2) No worker shall be in an area where piles or sheet-piling are being hoisted, placed, removed or withdrawn unless the worker is directly engaged in the operation. O. Reg. 213/91, s. 180 (2).

ELECTRICAL HAZARDS

181. (1) Except where otherwise required by this Regulation, electrical work performed on or near electrical transmission or distribution systems shall be performed in accordance with the document entitled “Electrical Utility Safety Rules” published by the Electrical and Utilities Safety Association of Ontario Incorporated and revised January, 2009. O. Reg. 627/05, s. 4; O. Reg. 443/09, s. 5.

(2) Sections 182, 187, 188, 189, 190, 191 and 193 do not apply to electrical work that is performed on or near electrical transmission or distribution systems if the work is performed in accordance with the document referred to in subsection (1). O. Reg. 627/05, s. 4.

182. (1) No worker shall connect, maintain or modify electrical equipment or installations unless,

(a) the worker holds a certificate of qualification issued under the *Ontario College of Trades and Apprenticeship Act, 2009*, that is not suspended, in the trade of,

(i) electrician — construction and maintenance, or

(ii) electrician — domestic and rural, if the worker is performing work that is limited to the scope of practice for that trade; or

(b) the worker is otherwise permitted to connect, maintain or modify electrical equipment or installations under the *Ontario College of Trades and Apprenticeship Act, 2009* or the *Technical Standards and Safety Act, 2000*. O. Reg. 627/05, s. 4; O. Reg. 88/13, s. 2.

(2) A worker who does not meet the requirements of clause (1) (a) or (b) may insert an attachment plug cap on the cord of electrical equipment or an electrical tool into, or remove it from, a convenience receptacle. O. Reg. 627/05, s. 4.

183. Every reasonable precaution shall be taken to prevent hazards to workers from energized electrical equipment, installations and conductors. O. Reg. 627/05, s. 6.

184. (1) No person, other than a person authorized to do so by the supervisor in charge of the project, shall enter or be permitted to enter a room or other enclosure containing exposed energized electrical parts. O. Reg. 627/05, s. 7.

(2) The entrance to a room or other enclosure containing exposed energized electrical parts shall be marked by conspicuous warning signs stating that entry by unauthorized persons is prohibited. O. Reg. 627/05, s. 7.

185. (1) Electrical equipment, installations, conductors and insulating materials shall be suitable for their intended use and shall be installed, maintained, modified and operated so as not to pose a hazard to a worker. O. Reg. 627/05, s. 7.

(2) For greater certainty, the regulations made under section 113 of the *Electricity Act, 1998* apply to electrical equipment, installations, conductors and insulating materials and to temporary wiring installations on projects. O. Reg. 627/05, s. 7.

186. Electrical equipment, installations and conductors that are not to be used for the purpose for which they were designed shall be,

(a) removed; or

(b) left in an electrically non-hazardous condition by being disconnected, de-energized, tagged and,

(i) grounded, in the case of power lines,

(ii) locked out, in the case of electrical equipment. O. Reg. 627/05, s. 7.

187. Tools, ladders, scaffolding and other equipment or materials capable of conducting electricity shall not be stored or used so close to energized electrical equipment, installations or conductors that they can make electrical contact. O. Reg. 627/05, s. 7.

188. (1) This section applies unless the conditions set out in clauses 189 (a) and (b) are satisfied. O. Reg. 627/05, s. 7.

(2) No object shall be brought closer to an energized overhead electrical conductor with a nominal phase-to-phase voltage rating set out in Column 1 of the Table to this subsection than the distance specified opposite to it in Column 2.

TABLE

Column 1	Column 2
Nominal phase-to-phase voltage rating	Minimum distance
750 or more volts, but no more than 150,000 volts	3 metres
more than 150,000 volts, but no more than 250,000 volts	4.5 metres
more than 250,000 volts	6 metres

O. Reg. 627/05, s. 7.

(3) Subsections (4) to (9) apply if a crane, similar hoisting device, backhoe, power shovel or other vehicle or equipment is operated near an energized overhead electrical conductor and it is possible for a part of the vehicle or equipment or its load to encroach on the minimum distance permitted under subsection (2). O. Reg. 627/05, s. 7.

(4) A constructor shall,

(a) establish and implement written measures and procedures adequate to ensure that no part of a vehicle or equipment or its load encroaches on the minimum distance permitted by subsection (2); and

(b) make a copy of the written measures and procedures available to every employer on the project. O. Reg. 627/05, s. 7.

(5) The written measures and procedures shall include taking the following precautions to protect workers:

1. Adequate warning devices, visible to the operator and warning of the electrical hazard, shall be positioned in the vicinity of the hazard.
2. The operator shall be provided with written notification of the electrical hazard before beginning the work.
3. A legible sign, visible to the operator and warning of the potential electrical hazard, shall be posted at the operator's station. O. Reg. 627/05, s. 7.

(6) Before a worker begins work that includes an activity described in subsection (3), the employer shall provide a copy of the written measures and procedures to the worker and explain them to him or her. O. Reg. 627/05, s. 7.

(7) The worker shall follow the written measures and procedures. O. Reg. 627/05, s. 7.

(8) A competent worker, designated as a signaller, shall be stationed so that he or she is in full view of the operator and has a clear view of the electrical conductor and of the vehicle or equipment, and shall warn the operator each time any part of the vehicle or equipment or its load may approach the minimum distance. O. Reg. 627/05, s. 7.

(9) Section 106 also applies with respect to the signaller designated under subsection (8). O. Reg. 627/05, s. 7.

189. Section 188 does not apply if,

(a) under the authority of the owner of the electrical conductor, protective devices and equipment are installed, and written measures and procedures are established and implemented, that are adequate to protect workers from electrical shock and burn; and

(b) the workers involved in the work use protective devices and equipment, including personal protective equipment, and follow written measures and procedures that are adequate to protect workers from electrical shock and burn. O. Reg. 627/05, s. 7.

190. (1) This section applies if work is to be done on or near energized exposed parts of electrical equipment or of an electrical installation or conductor. O. Reg. 627/05, s. 7.

(2) An employer shall,

(a) establish and implement written measures and procedures for complying with this section to ensure that workers are adequately protected from electrical shock and burn; and

(b) make a copy of the written measures and procedures available to every worker on the project. O. Reg. 627/05, s. 7.

(3) The worker shall follow the written measures and procedures. O. Reg. 627/05, s. 7.

(4) Subject to subsection (9), the power supply to the electrical equipment, installation or conductor shall be disconnected, locked out of service and tagged in accordance with subsection (6) before the work begins, and kept disconnected, locked out of service and tagged while the work continues. O. Reg. 627/05, s. 7.

(5) Hazardous stored electrical energy shall be adequately discharged or contained before the work begins and shall be kept discharged or contained while the work continues. O. Reg. 627/05, s. 7.

(6) The following rules apply to the tagging of the power supply under subsection (4):

1. The tag shall be made of non-conducting material and shall be installed so as not to become energized.
2. The tag shall be placed in a conspicuous location and shall be secured to prevent its inadvertent removal.
3. The tag shall indicate,
   i. why the equipment, installation or conductor is disconnected,
   ii. the name of the person who disconnected the equipment, installation or conductor,
   iii. the name of the person's employer, and
   iv. the date on which the equipment, installation or conductor was disconnected.
4. The tag shall not be removed unless it is safe to do so. O. Reg. 627/05, s. 7.

(7) A worker, before beginning work to which this section applies, shall verify that subsections (4) and (5) have been complied with. O. Reg. 627/05, s. 7.

(8) If more than one worker is involved in work to which this section applies, a means shall be provided to communicate the purpose and status of,

(a) the disconnecting, locking out and tagging of the electrical equipment, installation or conductor; and

(b) the discharging and containment of any hazardous stored electrical energy. O. Reg. 627/05, s. 7.

(9) Locking out is not required under subsection (4) if,

(a) in the case of a conductor, it is adequately grounded with a visible grounding mechanism;

(b) in the case of equipment or an installation,

(i) the power supply is less than 300 volts, the equipment or installation was not manufactured with provision for a locking device for the circuit breakers or fuses, and a written procedure has been implemented that is adequate to ensure that the circuit is not inadvertently energized, or

(ii) the power supply is 300 or more volts but not more than 600 volts, the equipment or installation was not manufactured with provision for a locking device for the circuit breakers or fuses, a written procedure as to how work is to be done has been implemented and the work is supervised by a competent worker to ensure that the circuit is not inadvertently energized. O. Reg. 627/05, s. 7.

191. (1) This section applies instead of section 190 if work is to be done on or near energized exposed parts of electrical equipment or of an electrical installation or conductor and,

(a) it is not reasonably possible to disconnect the equipment, installation or conductor from the power supply before working on or near the energized exposed parts;

(b) the equipment, installation or conductor is rated at a nominal voltage of 600 volts or less, and disconnecting the equipment, installation or conductor would create a greater hazard to a worker than proceeding without disconnecting it; or

(c) the work consists only of diagnostic testing of the equipment, installation or conductor. O. Reg. 627/05, s. 7.

(2) Subsection (10) applies, in addition to subsections (3) to (9), if the equipment, installation or conductor is nominally rated at,

(a) greater than 400 amperes and greater than 200 volts; or

(b) greater than 200 amperes and greater than 300 volts. O. Reg. 627/05, s. 7.

(3) Only a worker who meets the requirements of clause 182 (1) (a) or (b) shall perform the work. O. Reg. 627/05, s. 7.

(4) The constructor shall,

(a) ensure that written measures and procedures for complying with this section are established and implemented, so that workers are adequately protected from electrical shock and burn; and

(b) make a copy of the written measures and procedures available to every employer on the project. O. Reg. 627/05, s. 7.

(5) Before a worker begins work to which this section applies, the employer shall provide a copy of the written measures and procedures to the worker and explain them to him or her. O. Reg. 627/05, s. 7.

(6) The worker shall follow the written procedures. O. Reg. 627/05, s. 7.

(7) A worker shall use mats, shields or other protective devices or equipment, including personal protective equipment, adequate to protect the worker from electrical shock and burn. O. Reg. 627/05, s. 7.

(8) If the electrical equipment, installation or conductor is rated at a nominal voltage of 300 volts or more, an adequately equipped competent worker who can perform rescue operations, including cardiopulmonary resuscitation, shall be stationed so that he or she can see the worker who is performing the work. O. Reg. 627/05, s. 7.

(9) Subsection (8) does not apply if the work consists only of diagnostic testing of the equipment, installation or conductors. O. Reg. 627/05, s. 7.

(10) In the case of equipment or of an installation or conductor described in subsection (2), a worker shall not perform the work unless the following additional conditions are satisfied:

1. The owner of the equipment, installation or conductor has provided the employer and the constructor with a record showing that it has been maintained according to the manufacturer's specifications.
2. A copy of the maintenance record is readily available at the project.
3. The employer has determined from the maintenance record that the work on the equipment, installation or conductor can be performed safely without disconnecting it.
4. Before beginning the work, the worker has verified that paragraphs 1, 2 and 3 have been complied with. O. Reg. 627/05, s. 7.

192. All tools, devices and equipment, including personal protective equipment, that are used for working on or near energized exposed parts of electrical equipment, installations or conductors shall be designed, tested, maintained and used so as to provide adequate protection to workers. O. Reg. 627/05, s. 7.

193. (1) A worker who may be exposed to the hazard of electrical shock or burn while performing work shall use rubber gloves,

(a) that are adequate to protect him or her against electrical shock and burn;

(b) that have been tested and certified in accordance with subsection (2), if applicable; and

(c) that have been air tested and visually inspected for damage and adequacy immediately before each use. O. Reg. 627/05, s. 7.

(2) Rubber gloves rated for use with voltages above 5,000 volts AC shall be tested and certified to ensure that they can withstand the voltages for which they are rated,

(a) at least once every three months, if they are in service;

(b) at least once every six months, if they are not in service. O. Reg. 627/05, s. 7.

(3) Rubber gloves shall be worn with adequate leather protectors and shall not be worn inside out. O. Reg. 627/05, s. 7.

(4) Leather protectors shall be visually inspected for damage and adequacy immediately before each use. O. Reg. 627/05, s. 7.

(5) Rubber gloves or leather protectors that are damaged or not adequate to protect workers from electrical shock and burn shall not be used. O. Reg. 627/05, s. 7.

(6) Workers shall be trained in the proper use, care and storage of rubber gloves and leather protectors. O. Reg. 627/05, s. 7.

194. (1) A switch and panel board controlling a service entrance, service feeder or branch circuit shall meet the requirements of this section. O. Reg. 627/05, s. 7.

(2) A switch and panel board shall be securely mounted on a soundly constructed vertical surface and shall have a cover over uninsulated parts carrying current. O. Reg. 627/05, s. 7.

(3) A switch and panel board shall be located,

(a) in an area where water will not accumulate; and

(b) within easy reach of workers and readily accessible to them. O. Reg. 627/05, s. 7.

(4) The area in front of a panel board shall be kept clear of obstructions. O. Reg. 627/05, s. 7.

(5) A switch that controls a service entrance, service feeder or branch circuit providing temporary power,

(a) shall not be locked in the energized position; and

(b) shall be housed in an enclosure that can be locked and is provided with a locking device. O. Reg. 627/05, s. 7.

195. All electrical extension cords used at a project shall have a grounding conductor and at least two other conductors. O. Reg. 627/05, s. 7.

195.1 (1) Cord-connected electrical equipment or tools shall have a casing that is adequately grounded. O. Reg. 627/05, s. 7.

(2) All cord connections to electrical equipment or tools shall be polarized. O. Reg. 627/05, s. 7.

(3) Subsections (1) and (2) do not apply to cord-connected electrical equipment or tools that are adequately double-insulated and whose insulated casing shows no evidence of cracks or defects. O. Reg. 627/05, s. 7.

(4) Subsection (1) does not apply to a portable electrical generator in which the electrical equipment or tools are not exposed to an external electric power source if the casing of portable electrical equipment or tools connected to the generator is bonded to a non-current-carrying part of the generator. O. Reg. 627/05, s. 7.

195.2 When a portable electrical tool is used outdoors or in a wet location,

(a) if the source of power is an ungrounded portable generator having a maximum output of 1.8 kilowatts or less, a ground fault circuit interrupter of the Class A type shall be located in the cord feeding the tool, as close to the tool as possible;

(b) in all other cases, the tool shall be plugged into a receptacle protected by a ground fault circuit interrupter of the Class A type. O. Reg. 627/05, s. 7.

195.3 (1) Defective electrical equipment and tools that may pose a hazard shall be immediately disconnected, removed from service and tagged as being defective. O. Reg. 627/05, s. 7.

(2) The cause of a ground fault or the tripping of a ground fault circuit interrupter shall be immediately investigated to determine the hazard and corrective action shall be taken immediately. O. Reg. 627/05, s. 7.

EXPLOSIVES

196. (1) If explosives are to be used on a project, the employer responsible for blasting shall designate a competent worker to be in charge of blasting operations. O. Reg. 213/91, s. 196 (1).

(2) The employer shall post the name of the worker in charge of blasting operations for a project in a conspicuous place on the project and in every magazine. O. Reg. 213/91, s. 196 (2).

(3) The worker in charge of blasting operations for a project shall personally supervise blasting operations at the project, including the loading, priming and initiating of all charges. O. Reg. 213/91, s. 196 (3).

(4) The worker in charge of blasting operations for a project,

(a) shall inspect for hazardous conditions explosives and the magazines in which they are stored,

(i) at least once a month, and

(ii) on the day they are to be used;

(b) shall promptly report the results of inspections under clause (a) to the supervisor in charge of the project;

(c) shall take immediate steps to correct any hazardous condition; and

(d) shall dispose of all deteriorated explosives. O. Reg. 213/91, s. 196 (4).

(5) If an act of careless placing or handling of explosives on the project is discovered by, or reported to the worker in charge of blasting operations, the worker shall promptly investigate the circumstances and report the results of the investigation to the supervisor in charge of the project. O. Reg. 213/91, s. 196 (5).

197. Only a competent worker or a worker who is working under the direct personal supervision of a competent worker shall handle, transport, prepare and use explosives on a project. O. Reg. 213/91, s. 197.

198. (1) A magazine containing an explosive shall be securely locked at all times when the competent worker described in section 197 is not present. O. Reg. 213/91, s. 198 (1).

(2) No explosive shall be outside a magazine unless the explosive is required for immediate use. O. Reg. 213/91, s. 198 (2).

(3) An explosive outside a magazine shall be attended at all times. O. Reg. 213/91, s. 198 (3).

199. An explosive shall remain in its original wrapper unless it is manufactured and intended for use other than in its original wrapper. O. Reg. 213/91, s. 199.

200. (1) No fire or other naked flame shall be located in a magazine or within eight metres of any explosive. O. Reg. 213/91, s. 200 (1).

(2) No person shall smoke in a magazine or within eight metres of any explosive. O. Reg. 213/91, s. 200 (2).

201. Blasting mats shall be used to prevent flying objects caused by blasting operations from endangering persons and property located on or adjacent to a project. O. Reg. 213/91, s. 201.

202. (1) This section applies if electric blasting caps are used on a project. O. Reg. 213/91, s. 202 (1).

(2) The protective shunt shall not be removed from the leg wire until connections are made. O. Reg. 213/91, s. 202 (2).

(3) The firing circuit shall be short-circuited while the leads from the blasting caps are being connected to each other and to the firing cables. O. Reg. 213/91, s. 202 (3).

(4) The short circuit shall not be removed until immediately before blasting and until all workers have left the area affected by the blasting operations. O. Reg. 213/91, s. 202 (4).

(5) The source of energy for a blasting operation shall be disconnected from the firing circuit immediately after firing. O. Reg. 213/91, s. 202 (5).

203. (1) Before blasting begins, the worker in charge of blasting operations shall post workers at the approaches to the affected area in order to prevent access to it. O. Reg. 213/91, s. 203 (1).

(2) Before blasting begins, the worker in charge of blasting operations shall ensure,

(a) that only workers required to carry out the blasting are located in the affected area;

(b) that no workers remain in an area whose means of egress passes the affected area; and

(c) that a warning that is clearly audible within a radius of one kilometre of the blast is given by siren. O. Reg. 213/91, s. 203 (2).

204. (1) Before a drill hole for loading explosives is drilled, the exposed surface shall be examined for drill holes or remnants of drill holes that may contain explosives and any explosive found shall be removed if practicable. O. Reg. 213/91, s. 204 (1).

(2) No drill hole shall be drilled,

(a) within 7.5 metres of another hole that is being loaded with or contains explosives; and

(b) within 150 millimetres of another hole or remnant of a hole that has been charged or blasted unless adequate precautions have been taken to ensure that the other hole is free from explosives. O. Reg. 213/91, s. 204 (2).

(3) Clause (2) (a) does not apply to a hole being drilled adjacent to another hole that is being loaded with explosives,

(a) if a professional engineer prepares a specification showing the location of the drill hole and the adjacent hole and describing the precautions to be taken to prevent the accidental detonation by the drilling operation of the explosives in the adjacent hole; and

(b) if the drilling is done as described in the specification referred to in clause (a). O. Reg. 213/91, s. 204 (3).

(4) No drill hole permitted under subsection (3) shall be drilled within one metre of another hole containing explosives. O. Reg. 213/91, s. 204 (4).

(5) The professional engineer's specification shall be in writing. O. Reg. 213/91, s. 204 (5); O. Reg. 85/04, s. 20.

(6) The employer responsible for blasting shall keep a copy of the specification at the project until the blasting to which the specification refers is completed. O. Reg. 213/91, s. 204 (6).

205. (1) If cartridges of explosives are to be used in a drill hole, the hole shall be made large enough that a cartridge can be inserted easily to the bottom of the hole. O. Reg. 213/91, s. 205 (1).

(2) No drill hole shall be charged with explosives unless a properly prepared detonation agent is placed in the charge. O. Reg. 213/91, s. 205 (2).

(3) Drill holes charged with explosives in one loading operation shall be fired in one operation. O. Reg. 213/91, s. 205 (3).

(4) No drill hole that is charged with explosives shall be left unfired for any longer than is required in a continuing operation to complete the charging and blasting of adjacent holes. O. Reg. 213/91, s. 205 (4).

206. Only a non-sparking tool or rod shall be used in the charging of a drill hole or in a drill hole containing explosives. O. Reg. 213/91, s. 206.

ROOFING

207. (1) If a built-up roof is being constructed, repaired or resurfaced, a barrier shall be placed in the immediate work area at least two metres from the perimeter of the roof. O. Reg. 213/91, s. 207 (1).

(2) The barrier shall consist of portable weighted posts supporting a taut chain, cable or rope that is located 1.1 metres above the roof level. O. Reg. 213/91, s. 207 (2).

208. (1) A pipe that supplies hot tar or bitumen to a roof shall be securely fixed and supported to prevent its deflection. O. Reg. 213/91, s. 208 (1).

(2) If a pipe discharges hot tar or bitumen within two metres of the edge of a roof, a guardrail shall be provided at the edge of the roof. O. Reg. 213/91, s. 208 (2).

209. (1) A hoist used on a roof,

(a) shall have a guardrail installed on both sides of the frame at the edge of the roof; and

(b) shall be positioned in such a way that the hoist cable is vertical at all times while a load is being hoisted. O. Reg. 213/91, s. 209 (1).

(2) Only a competent worker shall operate a hoist used on a roof. O. Reg. 213/91, s. 209 (2).

210. The counterweights on a roofer's hoist,

(a) shall be suitable for the purpose;

(b) shall not consist of roofing or other construction material;

(c) shall be securely attached to the hoist; and

(d) shall provide a safety factor against overturning of not less than three. O. Reg. 213/91, s. 210.

HOT TAR OR BITUMEN ROADTANKERS

211. (1) Only a competent worker shall operate a hot tar or bitumen roadtanker or kettle. O. Reg. 213/91, s. 211 (1).

(2) If a hot tar or bitumen roadtanker or kettle is fitted with a propane-fuelled heater,

(a) the storage cylinder for propane shall not be placed closer than three metres to a source of fire or ignition;

(b) the lines connecting the storage cylinder for propane to the heating device shall be located so that they do not come into contact with the hot tar or bitumen in the case of a spill or a failure of a component of the system; and

(c) a fire extinguisher with an Underwriters' Laboratories of Canada rating of at least 4A40BC shall be provided with the roadtanker or kettle. O. Reg. 213/91, s. 211 (2).

(3) A propane burner used on a bitumen roadtanker or kettle,

(a) shall have a thermal rating no greater than that recommended by the manufacturer of the roadtanker or kettle; and

(b) shall consist of components that are adequate for their intended use. O. Reg. 213/91, s. 211 (3).

(4) Hot tar or bitumen shall be transferred from a roadtanker to a kettle through enclosed piping. O. Reg. 213/91, s. 211 (4).

DEMOLITION AND DAMAGED STRUCTURES

212. (1) If a structure is so damaged that a worker is likely to be endangered by its partial or complete collapse,

(a) the structure shall be braced and shored; and

(b) safeguards appropriate in the circumstances shall be provided to prevent injury to a worker. O. Reg. 213/91, s. 212 (1).

(2) Safeguards shall be installed progressively from a safe area towards the hazard so that the workers installing the safeguards are not endangered. O. Reg. 213/91, s. 212 (2).

213. (1) Only a worker who is directly engaged in the demolition, dismantling or moving of a building or structure shall be in, on or near it. O. Reg. 213/91, s. 213 (1).

(2) If the demolition or dismantling of a building or structure is discontinued, barriers shall be erected to prevent access by people to the remaining part of the building or structure. O. Reg. 213/91, s. 213 (2).

(3) A worker shall enter only the part of a building or structure being demolished that will safely support the worker. O. Reg. 213/91, s. 213 (3).

214. (1) No building or structure shall be demolished, dismantled or moved until this section is complied with. O. Reg. 213/91, s. 214 (1).

(2) Precautions shall be taken to prevent injury to a person on or near the project or the adjoining property that may result from the demolition, dismantling or moving of a building or structure. O. Reg. 213/91, s. 214 (2).

(3) All gas, electrical and other services that may endanger persons who have access to a building or structure shall be shut off and disconnected before, and shall remain shut off and disconnected during, the demolition, dismantling or moving of the building or structure. O. Reg. 213/91, s. 214 (3).

(4) All toxic, flammable or explosive substances shall be removed from a building or structure that is to be demolished, dismantled or moved. O. Reg. 213/91, s. 214 (4).

215. (1) Sections 216, 217, 218 and 220 do not apply with respect to a building or structure that is being demolished by,

(a) a heavy weight suspended by cable from a crane or similar hoisting device;

(b) a power shovel, bulldozer or other vehicle;

(c) the use of explosives; or

(d) a combination of methods described in clauses (a) to (c). O. Reg. 213/91, s. 215 (1).

(2) The controls of a mechanical device used to demolish a building or structure shall be operated from a location that is as remote as is practicable from the building or structure. O. Reg. 213/91, s. 215 (2).

(3) If a swinging weight is used to demolish a building or structure, the supporting cable of the weight shall be short enough or shall be so restrained that the weight does not swing against another building or structure. O. Reg. 213/91, s. 215 (3).

216. (1) Demolition and dismantling of a building or structure shall proceed systematically and continuously from the highest to the lowest point unless a worker is endangered by this procedure. O. Reg. 213/91, s. 216 (1).

(2) Despite subsection (1), the skeleton structural frame in a skeleton structural frame building may be left in place during the demolition or dismantling of the masonry if the masonry and any loose material are removed from the frame systematically and continuously from the highest to the lowest point. O. Reg. 213/91, s. 216 (2).

(3) The work above a tier or floor of a building or structure shall be completed before the support of the tier or floor is affected by demolition or dismantling operations. O. Reg. 213/91, s. 216 (3).

217. No exterior wall of a building or structure shall be demolished until all glass is removed from windows, doors, interior partitions and components containing glass or is protected to prevent the glass from breaking during the demolition. O. Reg. 213/91, s. 217.

218. (1) Masonry walls of a building or structure being demolished or dismantled shall be removed in reasonably level courses. O. Reg. 213/91, s. 218 (1).

(2) No materials in a masonry wall of a building or structure being demolished or dismantled shall be loosened or permitted to fall in masses that are likely to endanger,

(a) a person; or

(b) the structural stability of a scaffold or of a floor or other support of the building or structure. O. Reg. 213/91, s. 218 (2).

219. No worker shall stand on top of a wall, pier or chimney to remove material from it unless flooring, scaffolding or staging is provided on all sides of it not more than 2.4 metres below the place where the worker is working. O. Reg. 213/91, s. 219.

220. No truss, girder or other structural member of a building or structure being demolished or dismantled shall be disconnected until,

(a) it is relieved of all loads other than its own weight; and

(b) it has temporary support. O. Reg. 213/91, s. 220.

221. (1) A basement, cellar or excavation left after a building or structure is demolished, dismantled or moved,

(a) shall be backfilled to grade level; or

(b) shall have fencing along its open sides. O. Reg. 213/91, s. 221 (1).

(2) Subsection (1) does not apply to a basement or cellar that is enclosed by a roof, floor or other solid covering if all openings in the roof, floor or covering are covered with securely fastened planks. O. Reg. 213/91, s. 221 (2).

PART II.1 (ss. 221.1-221.19) REVOKED: O. Reg. 96/11, s. 1.

PART III
EXCAVATIONS

INTERPRETATION AND APPLICATION

222. In this Part,

"engineered support system" means an excavation or trench shoring system, designed for a specific project or location, assembled in place and which cannot be moved as a unit;

"hydraulic support system" means a system capable of being moved as a unit, designed to resist the earth pressure from the walls of an excavation by applying a hydraulic counterpressure through the struts;

"prefabricated support system" means a trench box, trench shield or similar structure, composed of members connected to each other and capable of being moved as a unit, and designed to resist the pressure from the walls of an excavation but does not include a hydraulic support system;

"pressure", in relation to a wall of an excavation, means the lateral pressure of the earth on the wall calculated in accordance with generally accepted engineering principles and includes hydrostatic pressure and pressure due to surcharge. O. Reg. 213/91, s. 222.

223. This Part applies to all excavating and trenching operations. O. Reg. 213/91, s. 223.

ENTRY AND WORKING ALONE

224. No person shall enter or be permitted to enter an excavation that does not comply with this Part. O. Reg. 213/91, s. 224.

225. Work shall not be performed in a trench unless another worker is working above ground in close proximity to the trench or to the means of access to it. O. Reg. 213/91, s. 225.

SOIL TYPES

226. (1) For the purposes of this Part, soil shall be classified as Type 1, 2, 3 or 4 in accordance with the descriptions set out in this section. O. Reg. 213/91, s. 226 (1).

(2) Type 1 soil,

(a) is hard, very dense and only able to be penetrated with difficulty by a small sharp object;

(b) has a low natural moisture content and a high degree of internal strength;

(c) has no signs of water seepage; and

(d) can be excavated only by mechanical equipment. O. Reg. 213/91, s. 226 (2).

(3) Type 2 soil,

(a) is very stiff, dense and can be penetrated with moderate difficulty by a small sharp object;

(b) has a low to medium natural moisture content and a medium degree of internal strength; and

(c) has a damp appearance after it is excavated. O. Reg. 213/91, s. 226 (3).

(4) Type 3 soil,

(a) is stiff to firm and compact to loose in consistency or is previously-excavated soil;

(b) exhibits signs of surface cracking;

(c) exhibits signs of water seepage;

(d) if it is dry, may run easily into a well-defined conical pile; and

(e) has a low degree of internal strength. O. Reg. 213/91, s. 226 (4).

(5) Type 4 soil,

(a) is soft to very soft and very loose in consistency, very sensitive and upon disturbance is significantly reduced in natural strength;

(b) runs easily or flows, unless it is completely supported before excavating procedures;

(c) has almost no internal strength;

(d) is wet or muddy; and

(e) exerts substantial fluid pressure on its supporting system. O. Reg. 213/91, s. 226 (5).

227. (1) The type of soil in which an excavation is made shall be determined by visual and physical examination of the soil,

(a) at the walls of the excavation; and

(b) within a horizontal distance from each wall equal to the depth of the excavation measured away from the excavation. O. Reg. 213/91, s. 227 (1).

(2) The soil in which an excavation is made shall be classified as the type described in section 226 that the soil most closely resembles. O. Reg. 213/91, s. 227 (2).

(3) If an excavation contains more than one type of soil, the soil shall be classified as the type with the highest number as described in section 226 among the types present. O. Reg. 213/91, s. 227 (3).

PRECAUTIONS CONCERNING SERVICES

228. (1) Before an excavation is begun,

(a) the employer excavating shall ensure that all gas, electrical and other services in and near the area to be excavated are located and marked;

(b) the employer and worker locating and marking the services described in clause (a) shall ensure that they are accurately located and marked; and

(c) if a service may pose a hazard, the service shall be shut off and disconnected. O. Reg. 443/09, s. 6.

(2) If a service may pose a hazard and it cannot be shut off or disconnected, the owner of the service shall be requested to supervise the uncovering of the service during the excavation. O. Reg. 443/09, s. 6.

(3) Pipes, conduits and cables for gas, electrical and other services in an excavation shall be supported to prevent their failure or breakage. O. Reg. 443/09, s. 6.

PROTECTION OF ADJACENT STRUCTURES

229. (1) If an excavation may affect the stability of an adjacent building or structure, the constructor shall take precautions to prevent damage to the adjacent building or structure. O. Reg. 213/91, s. 229 (1).

(2) A professional engineer shall specify in writing the precautions required under subsection (1). O. Reg. 213/91, s. 229 (2).

(3) Such precautions as the professional engineer specifies shall be taken. O. Reg. 213/91, s. 229 (3).

GENERAL REQUIREMENTS

230. Every excavation that a worker may be required to enter shall be kept reasonably free of water. O. Reg. 213/91, s. 230.

231. An excavation in which a worker may work shall have a clear work space of at least 450 millimetres between the wall of the excavation and any formwork or masonry or similar wall. O. Reg. 213/91, s. 231.

232. (1) The walls of an excavation shall be stripped of loose rock or other material that may slide, roll or fall upon a worker. O. Reg. 213/91, s. 232 (1).

(2) The walls of an excavation cut in rock shall be supported by rock anchors or wire mesh if support is necessary to prevent the spalling of loose rock. O. Reg. 213/91, s. 232 (2).

233. (1) A level area extending at least one metre from the upper edge of each wall of an excavation shall be kept clear of equipment, excavated soil, rock and construction material. O. Reg. 213/91, s. 233 (1).

(2) The stability of a wall of an excavation shall be maintained where it may be affected by stockpiling excavated soil or rock or construction materials. O. Reg. 213/91, s. 233 (2).

(3) No person shall operate a vehicle or other machine and no vehicle or other machine shall be located in such a way as to affect the stability of a wall of an excavation. O. Reg. 213/91, s. 233 (3).

(4) If a person could fall into an excavation that is more than 2.4 metres deep, a barrier at least 1.1 metres high shall be provided at the top of every wall of the excavation that is not sloped as described in clauses 234 (2) (e), (f) and (g). O. Reg. 213/91, s. 233 (4).

SUPPORT SYSTEMS

234. (1) The walls of an excavation shall be supported by a support system that complies with sections 235, 236, 237, 238, 239 and 241. O. Reg. 213/91, s. 234 (1).

(2) Subsection (1) does not apply with respect to an excavation,

(a) that is less than 1.2 metres deep;

(b) that no worker is required to enter;

(c) that is not a trench and with respect to which no worker is required to be closer to a wall than the height of the wall;

(d) that is cut in sound and stable rock;

(e) made in Type 1 or Type 2 soil and whose walls are sloped to within 1.2 metres of its bottom with a slope having a minimum gradient of one horizontal to one vertical;

(f) made in Type 3 soil and whose walls are sloped from its bottom with a slope having a minimum gradient of one horizontal to one vertical;

(g) made in Type 4 soil and whose walls are sloped from its bottom with a slope having a minimum gradient of three horizontal to one vertical; or

(h) that is not a trench and is not made in Type 4 soil and with respect to which a professional engineer has given a written opinion that the walls of the excavation are sufficiently stable that no worker will be endangered if no support system is used. O. Reg. 213/91, s. 234 (2).

(3) The opinion in clause (2) (h) shall include details of,

(a) the specific project and the location thereon;

(b) any specific condition for which the opinion applies; and

(c) the frequency of inspections. O. Reg. 213/91, s. 234 (3).

(4) The constructor shall keep on the project a copy of every opinion given by a professional engineer for the purpose of clause (2) (h) while the project is in progress. O. Reg. 213/91, s. 234 (4).

(5) The professional engineer who gives an opinion described in clause (2) (h), or a competent worker designated by him or her, shall inspect the excavation to which the opinion relates as frequently as the opinion specifies. O. Reg. 213/91, s. 234 (5).

235. (1) Subject to subsection (2), a support system shall consist of,

(a) timbering and shoring that meets the requirements of subsection 238 (2), if no hydrostatic pressure is present in the soil, and if the width and depth of the excavation are equal to or less than the width and depth indicated in the Table to section 238;

(b) a prefabricated support system that complies with sections 236 and 237;

(c) a hydraulic support system that complies with sections 236 and 237; or

(d) an engineered support system that complies with section 236. O. Reg. 213/91, s. 235 (1).

(2) Where the excavation is a trench and the depth exceeds six metres or the width exceeds 3.6 metres, the support system shall consist of an engineered support system designed for the specific location and project. O. Reg. 213/91, s. 235 (2); O. Reg. 631/94, s. 7.

236. (1) Every prefabricated, hydraulic or engineered support system shall be designed by a professional engineer. O. Reg. 213/91, s. 236 (1).

(2) Every prefabricated, hydraulic or engineered support system shall be constructed, installed, used and maintained in accordance with its design drawings and specifications. O. Reg. 213/91, s. 236 (2).

(3) The design drawings and specifications for a prefabricated, hydraulic or an engineered support system,

(a) shall indicate the size of the system and the type and grade of materials of which it is to be made;

(b) shall indicate the maximum depth and the types of soil for which it is designed;

(c) shall indicate the proper positioning of the system in the excavation, including the maximum allowable clearance between the walls of the support system and the walls of the excavation; and

(d) shall indicate how to install and remove the system.

(e) REVOKED: O. Reg. 85/04, s. 21.

O. Reg. 213/91, s. 236 (3); O. Reg. 85/04, s. 21.

(4) In addition to the requirements of subsection (3), the design drawings and specifications for a hydraulic support system,

(a) shall indicate the minimum working pressure required for the system; and

(b) shall require the use of a device to ensure the protection of workers if a loss of hydraulic pressure occurs in the system. O. Reg. 213/91, s. 236 (4).

(5) Before a variation from the design drawings and specifications for a prefabricated, hydraulic or an engineered support system is permitted, the variation shall be approved in writing by a professional engineer. O. Reg. 213/91, s. 236 (5).

(6) If the soil conditions on a project differ from those assumed by the professional engineer in designing a prefabricated, hydraulic or an engineered support system, a professional engineer shall modify the design drawings and specifications for the actual soil conditions or shall approve the support system for use in the actual soil conditions. O. Reg. 213/91, s. 236 (6).

(7) The constructor shall keep the design drawings and specifications for a prefabricated, hydraulic or an engineered support system at a project while the system is on the project. O. Reg. 213/91, s. 236 (7).

(8) REVOKED: O. Reg. 443/09, s. 7.

237. (1) Subject to subsection (2),

(a) no prefabricated or hydraulic support system shall be used in type 4 soil;

(b) the space between the walls of a prefabricated support system and the walls of the excavation shall be restricted to the minimum clearance required for the forward progression of the support system; and

(c) the walls of a hydraulic support system shall touch the walls of the excavation. O. Reg. 631/94, s. 8.

(2) A prefabricated or hydraulic support system may be used for repairing underground pipe breaks if the system,

(a) meets the requirements of section 236;

(b) has four side walls;

(c) is designed for a maximum depth of 3.6 metres;

(d) is not used at a greater depth than 3.6 metres;

(e) is designed to resist all hydrostatic and earth pressures found in type 3 and type 4 soils;

(f) is installed so as to extend to the bottom of the excavation;

(g) is installed so that the walls of the system touch the walls of the excavation; and

(h) is not pulled forward after being installed in the excavation. O. Reg. 631/94, s. 8.

(3) Before a support system is used as described in subsection (2), the constructor shall submit two copies of its design drawings and specifications to the office of the Ministry of Labour nearest to the project. O. Reg. 631/94, s. 8.

238. (1) In this section,

"cleat" means a member of shoring that directly resists the downward movement of a wale or strut;

"o/c" means the maximum distance measured from the centre of one member of sheathing, wale or strut to the centre of the adjacent member of sheathing, wale or strut;

"post" means a vertical member of shoring that acts as a spacer between the wales;

"10 millimetres gap" means that the space between two adjacent members of sheathing is a maximum of ten millimetres. O. Reg. 213/91, s. 238 (1).

(2) Timbering and shoring referred to in clause 235 (1) (a) for the walls of an excavation with a depth and located in a soil type described in Column 1 of the Table to this section shall meet the corresponding specifications set out in Columns 2 to 4 of the Table. O. Reg. 213/91, s. 238 (2).

(3) Every piece of sheathing referred to in the Table to this section shall be made of sound Number 1 Grade spruce and,

(a) shall be placed against the side of the excavation so that it is vertical;

(b) shall be secured in place by wales; and

(c) shall be driven into the soil and firmly secured in place if the excavation is made in Type 3 or 4 soil. O. Reg. 213/91, s. 238 (3).

(4) Every strut referred to in the Table to this section shall be made of sound number 1 structural grade spruce and,

(a) shall be placed in the excavation so that it is horizontal and at right angles to the wales;

(b) shall be cut to the proper length and held in place by at least two wedges driven between the strut and the wales; and

(c) shall be cleated with cleats that extend over the top of the strut and rest on the wales or that are attached securely to the wales by spikes or bolts. O. Reg. 213/91, s. 238 (4).

(5) Every wale referred to in the Table to this section shall be made of sound number 1 structural grade spruce and,

(a) shall be placed in the excavation so that it is parallel to the bottom, or proposed bottom, of the excavation; and

(b) shall be supported by either cleats secured to the sheathing or posts set on the wale next below it or, if it is the lowest wale, on the bottom of the excavation. O. Reg. 213/91, s. 238 (5).

TABLE
EXCAVATION SHORING AND TIMBERING (METRIC SIZES)

Column 1		Column 2	Column 3				Column 4
Excavation Depth	Soil Type	Sheathing	Struts				
			Width of Excavation at Strut Location		Strut Spacing		Wales
			1.8 m to 3.6 m	Up to 1.8 m	Vertical	Horizontal	
3.0 m or less	1	50 mm × 200 mm at 1.2 m o/c	200 mm × 200 mm	150 mm × 150 mm	1.2 m	* 2.4 m	*200 mm × 200 mm

	2	50 mm × 200 mm at 1.2 m o/c	200 mm × 200 mm	150 mm × 150 mm	1.2 m	* 2.4 m	*200 mm × 200 mm
	3	50 mm × 200 mm at 10 mm gap	200 mm × 200 mm	200 mm × 200 mm	1.2 m	2.4 m	250 mm × 250 mm
	4	75 mm × 200 mm at 10 mm gap	250 mm × 250 mm	200 mm × 200 mm	1.2 m	2.4 m	300 mm × 300 mm
Over 3.0 m to 4.5 m	1	50 mm × 200 mm with 10 mm gap	200 mm × 200 mm	150 mm × 150 mm	1.2 m	2.4 m	200 mm × 200 mm
	2	50 mm × 200 mm with 10 mm gap	200 mm × 200 mm	200 mm × 200 mm	1.2 m	2.4 m	250 mm × 250 mm
	3	50 mm × 200 mm with 10 mm gap	250 mm × 250 mm	250 mm × 250 mm	1.2 m	2.4 m	250 mm × 250 mm
Over 3.0 m to 4.0 m	4	75 mm × 200 mm with 10 mm gap	300 mm × 300 mm	300 mm × 300 mm	1.2 m	2.4 m	300 mm × 300 mm
Over 4.5 m to 6.0 m	1	50 mm × 200 mm with 10 mm gap	200 mm × 200 mm	200 mm × 200 mm	1.2 m	2.4 m	200 mm × 200 mm
	2	50 mm × 200 mm with 10 mm gap	250 mm × 250 mm	250 mm × 250 mm	1.2 m	2.4 m	250 mm × 250 mm
	3	50 mm × 200 mm with 10 mm gap	300 mm × 300 mm	300 mm × 300 mm	1.2 m	2.4 m	300 mm × 300 mm

* Note: For excavations to 3 m deep in soil types 1 and 2, the wales can be omitted if the struts are used at 1.2 m horizontal spacings.

O. Reg. 213/91, s. 238, Table; O. Reg. 631/94, s. 9.

239. (1) A support system for the walls of an excavation shall be installed,

(a) progressively in an excavation in Type 1, 2 or 3 soil; and

(b) in advance of an excavation in Type 4 soil, if practicable. O. Reg. 213/91, s. 239 (1).

(2) A support system for the walls of an excavation shall provide continuous support for it. O. Reg. 213/91, s. 239 (2).

(3) No support system for the walls of an excavation shall be removed until immediately before the excavation is backfilled. O. Reg. 213/91, s. 239 (3).

(4) A competent person shall supervise the removal of a support system for the walls of an excavation. O. Reg. 213/91, s. 239 (4).

240. If a support system is used for the walls of an excavation, a ladder for access to or egress from the excavation shall be placed within the area protected by the support system. O. Reg. 213/91, s. 240.

241. (1) A support system for the walls of an excavation shall extend at least 0.3 metres above the top of the excavation unless otherwise permitted or required by this section. O. Reg. 213/91, s. 241 (1).

(2) If an excavation is located where there is vehicular or pedestrian traffic and if the excavation will be covered when work on or in it is not in progress, the support system for the walls of the excavation shall extend at least to the top of the excavation. O. Reg. 213/91, s. 241 (2).

(3) If the upper portion of the walls of an excavation are sloped for the soil types as described in clauses 234 (2) (e), (f) and (g) and the lower portion of the walls are vertical or near vertical, the walls shall be supported by a support system which extends at least 0.5 metres above the vertical walls. O. Reg. 213/91, s. 241 (3).

242. (1) A metal trench-jack or trench-brace may be used in place of a timber strut,

(a) if the allowable working load of the trench-jack or trench-brace is equal to or greater than that of the timber strut; and

(b) if the size of the replaced timber strut is shown on the trench-jack or trench-brace. O. Reg. 213/91, s. 242 (1).

(2) The allowable working load of a metal trench-jack or trench-brace shall be determined by a professional engineer in accordance with good engineering practice and shall be legibly cast or stamped on the trench-jack or trench-brace. O. Reg. 213/91, s. 242 (2).

(3) No metal trench-jack or trench-brace shall be extended beyond the length used to establish its maximum allowable working load. O. Reg. 213/91, s. 242 (3).

(4) Every metal trench-jack or trench-brace, when it is used,

(a) shall be placed against the wales in such a way that the load from the wales is applied axially to the trench-jack or trench-brace; and

(b) shall be adequately supported so that it does not move out of position. O. Reg. 213/91, s. 242 (4).

PART IV
TUNNELS, SHAFTS, CAISSONS AND COFFERDAMS

APPLICATION

243. This Part applies with respect to,

(a) tunnels and shafts other than those located at or used in connection with a mine; and

(b) caissons and cofferdams. O. Reg. 213/91, s. 243.

LAND REQUIREMENTS

244. A tunnel or shaft shall be commenced or started only where sufficient land space is available to permit compliance with Parts IV and V. O. Reg. 213/91, s. 244.

NOTICE

245. (1) An employer who will be constructing a tunnel, shaft, caisson or cofferdam shall file a notice with a Director before beginning work on a tunnel, shaft, caisson or cofferdam. O. Reg. 213/91, s. 245 (1); O. Reg. 145/00, s. 33 (1).

(2) The notice shall,

(a) describe the work;

(b) provide specifications and drawings showing profiles, transverse sections and plans for the tunnel, shaft, caisson or cofferdam signed and sealed by the professional engineer who designed the support system for the tunnel, shaft, caisson or cofferdam;

(c) provide complete details of all temporary and permanent ground support;

(d) state the name, mailing address, address for service and telephone number of the constructor, of the owner and of the employer in charge of the work;

(e) state the name of the supervisor in charge of the work and the supervisor's mailing address, address for service and telephone number;

(f) provide the municipal address of the work or include a description of its location relative to the nearest highway such that the Director is able to locate the work;

(g) state the starting date and the anticipated duration of the work;

(h) state the estimated total cost for labour and materials for the work; and

(i) list all designated substances that may be used, handled or disturbed by the work. O. Reg. 213/91, s. 245 (2); O. Reg. 145/00, s. 33 (2).

WORKING ALONE AND ENTRY

246. Work shall not be performed in a shaft, tunnel, caisson or cofferdam unless another worker is working above ground in close proximity to the shaft, tunnel, caisson or cofferdam or to the means of access to it. O. Reg. 213/91, s. 246.

247. (1) No worker shall enter a well or augured caisson where the excavation is deeper than 1.2 metres unless,

(a) a steel liner of adequate capacity is installed in the well or caisson;

(b) the requirements of Ontario Regulation 632/05 (Confined Spaces) made under the Act are complied with; and

(c) the worker is inside the steel liner and is wearing a fall arrest system with a full body harness secured to a fixed support. O. Reg. 213/91, s. 247 (1); O. Reg. 628/05, s. 4; O. Reg. 96/11, s. 2.

(2) A steel liner,

(a) shall extend sixty centimetres above ground level and to within 1.2 metres of the point in the well or caisson where work is being done;

(b) shall be supported on two sides by steel wire rope and steel beams; and

(c) shall have a diameter which is not less than 100 millimetres less than the diameter of the excavation. O. Reg. 213/91, s. 247 (2).

FIRE PROTECTION

248. Notices describing how to sound a fire alarm shall be posted in conspicuous places on a project to which this Part applies. O. Reg. 213/91, s. 248.

249. (1) A means of extinguishing fire shall be provided,

(a) at the top and bottom of every shaft;

(b) if a project consists of or includes a tunnel, at each panel board for electricity, on each electric-powered locomotive and at each battery charging station; and

(c) within thirty metres of each work face of a tunnel and of each location where a fire hazard exists. O. Reg. 213/91, s. 249 (1).

(2) The means of extinguishing fire shall be inspected at least once a week to ensure that it is in working order. O. Reg. 213/91, s. 249 (2).

250. (1) A fire suppression system for equipment that contains flammable hydraulic fluids shall be provided while the equipment is underground. O. Reg. 213/91, s. 250 (1).

(2) A fire suppression system shall include a dry chemical fire extinguisher with an Underwriters' Laboratories of Canada 4A40BC rating. O. Reg. 213/91, s. 250 (2).

251. (1) If the diameter of a tunnel will be equal to or greater than 1.5 metres when it is completed, a standpipe, a fire line and a hose shall be provided in the tunnel. O. Reg. 213/91, s. 251 (1).

(2) A siamese connection shall be provided on the fire line at the surface of the shaft. O. Reg. 213/91, s. 251 (2).

252. (1) Every standpipe in a tunnel,

(a) shall be made of metal pipe that has at least a fifty-one millimetres inside diameter; and

(b) shall have a connection for the use of the local fire department outside the shaft or tunnel to which there is clear and ready access at all times. O. Reg. 213/91, s. 252 (1).

(2) Every standpipe in a shaft shall be installed progressively as the shaft is excavated. O. Reg. 213/91, s. 252 (2).

253. (1) Every fire line in a tunnel,

(a) shall be made of metal pipe that has at least a fifty-one millimetres inside diameter; and

(b) shall have, at intervals of not more than forty-five metres along it, an outlet with a valve. O. Reg. 213/91, s. 253 (1).

(2) Every fire line in a tunnel shall be installed progressively as the tunnel is excavated. O. Reg. 213/91, s. 253 (2).

254. (1) Every hose in a tunnel,

(a) shall have at least a thirty millimetres inside diameter;

(b) shall have a combination straight stream and fog nozzle; and

(c) shall be at least twenty-three metres long. O. Reg. 213/91, s. 254 (1).

(2) A hose shall be provided in a tunnel at forty-six metre intervals horizontally along it. O. Reg. 213/91, s. 254 (2).

(3) Every hose shall be stored on a rack when it is not in use so as to be readily available. O. Reg. 213/91, s. 254 (3).

255. (1) No flammable liquid or gas shall be brought underground except as permitted by this section. O. Reg. 213/91, s. 255 (1).

(2) A compressed gas storage cylinder to which gas welding or flame-cutting equipment is attached may be brought underground. O. Reg. 213/91, s. 255 (2).

(3) Fuel may be brought underground if,

(a) it is in a tank that is supplied with and that forms a part of an engine or heating device; or

(b) it is in a container and is intended for transfer into a tank described in clause (a). O. Reg. 213/91, s. 255 (3).

(4) The maximum amount of fuel that may be brought underground in a container referred to in clause (3) (b) is the amount required for eight hours use of the engine or heating device. O. Reg. 213/91, s. 255 (4).

256. (1) A flammable liquid or gas shall be stored,

(a) as far as is practicable from a shaft; and

(b) in a place from which it is impossible for spilled liquid to flow underground. O. Reg. 213/91, s. 256 (1).

(2) Lubricating oil shall be stored in a suitable building or storage tank located in a place from which spilled liquid cannot run toward any shaft or tunnel. O. Reg. 213/91, s. 256 (2).

257. Oil for use in hydraulic-powered equipment underground shall be of the type that,

(a) is not readily flammable; and

(b) does not readily support combustion. O. Reg. 213/91, s. 257.

258. (1) No combustible equipment, including welding cable and air-hoses, shall be stored underground unless the equipment is required for immediate use. O. Reg. 213/91, s. 258 (1).

(2) No electrical cable or gas hose shall be taken or used underground unless,

(a) it has an armoured casing or jacket made of a material that is not readily flammable and that does not readily support combustion; and

(b) it is marked to indicate that it has the casing or jacket required by clause (a). O. Reg. 213/91, s. 258 (2).

259. (1) No combustible rubbish, used or decayed timber, scrap wood or paper shall be accumulated underground. O. Reg. 213/91, s. 259 (1).

(2) Material described in subsection (1) shall be promptly removed from underground. O. Reg. 213/91, s. 259 (2).

FACILITIES FOR WORKERS

260. (1) A heated room shall be provided for the use of underground workers. O. Reg. 213/91, s. 260 (1).

(2) The wet clothes of workers employed underground shall be dried using sanitary means in a change room on the project. O. Reg. 213/91, s. 260 (2).

(3) A change room,

(a) shall have an open floor area no smaller than the greater of,

(i) ten square metres, and

(ii) one square metre per worker on a shift;

(b) shall be equipped with mechanical ventilation that provides no less than six air changes per hour;

(c) shall have suitable drainage facilities;

(d) shall be kept at a temperature of at least 27 degrees celsius; and

(e) shall have, for every worker employed underground, a locker that locks. O. Reg. 213/91, s. 260 (3).

(4) Every change room shall be scrubbed once every twenty-four hours. O. Reg. 213/91, s. 260 (4).

(5) If workers are employed underground, a change room shall be provided with one shower and one washbasin for each group of ten or fewer workers. O. Reg. 213/91, s. 260 (5).

(6) Showers and washbasins provided in a change room shall be supplied with hot and cold water, soap or hand cleaner and paper towels or individual hand towels. O. Reg. 213/91, s. 260 (6).

FIRST AID

261. The supervisor in charge of a project shall appoint at least one competent worker to be available to give first aid at a shaft or tunnel. O. Reg. 213/91, s. 261.

262. (1) A first aid kit shall be kept in the immediate vicinity of the above-ground entrance to every shaft, tunnel, caisson or cofferdam. O. Reg. 213/91, s. 262 (1).

(2) At least one first aid kit shall be kept underground in every shaft and tunnel. O. Reg. 213/91, s. 262 (2).

263. (1) At least one stretcher for each group of twenty-five or fewer workers who are underground shall be kept at every tunnel, shaft or cofferdam. O. Reg. 213/91, s. 263 (1).

(2) Every stretcher shall be a wire-basket type and shall be designed and equipped to permit the safe hoisting and transport of a worker. O. Reg. 213/91, s. 263 (2).

RESCUE OF WORKERS

264. (1) Before a project begins, an employer shall establish in writing emergency procedures for the rescue of underground workers. O. Reg. 213/91, s. 264 (1).

(2) Copies of the rescue procedures signed by the employer and supervisor of the underground workers shall be posted in conspicuous places on the project. O. Reg. 213/91, s. 264 (2).

(3) The emergency procedures shall be practised in preparation for an emergency and shall be followed in an emergency. O. Reg. 213/91, s. 264 (3).

265. (1) At least four workers at a project or, if fewer than four workers work at the project, all workers shall be trained in and readily available to perform rescues of underground workers. O. Reg. 213/91, s. 265 (1).

(2) Rescue workers shall be provided with suitable equipment to perform rescues. O. Reg. 213/91, s. 265 (2).

(3) Rescue workers shall be trained by a competent person appointed by a Director. O. Reg. 213/91, s. 265 (3); O. Reg. 145/00, s. 34 (1).

(4) A Director who makes an appointment described in subsection (3) shall, in doing so, consider any recommendations of the representatives of labour and of management. O. Reg. 145/00, s. 34 (2).

(5) Rescue workers shall be trained within thirty days before tunnelling operations begin and retrained at least every thirty days after the initial training. O. Reg. 213/91, s. 265 (5).

(6) Before a project begins, the supervisor of the construction of a tunnel shall designate a rescue worker who shall inspect and test all rescue equipment every thirty days. O. Reg. 213/91, s. 265 (6).

266. (1) This section applies if, on a project, there is a tunnel and shaft whose combined length exceeds forty-five metres. O. Reg. 213/91, s. 266 (1).

(2) Every rescue worker shall be provided with a self-contained breathing apparatus that meets the requirements of subsection (5) and subsection (6), (7) or (8), as is appropriate to the length of the underground work place. O. Reg. 213/91, s. 266 (2).

(3) A competent person referred to in subsection 265 (3) shall train rescue workers in the proper operation of the self-contained breathing apparatus. O. Reg. 213/91, s. 266 (3).

(4) The training required by subsection (3) shall be repeated at least every thirty days. O. Reg. 213/91, s. 266 (4).

(5) The self-contained breathing apparatus shall have a full face mask. O. Reg. 213/91, s. 266 (5).

(6) For use in an underground work place that is less than 100 metres long, the minimum rated duration of use for a self-contained breathing apparatus shall be one-half hour. O. Reg. 213/91, s. 266 (6).

(7) For use in an underground work place that is 100 metres or more but less than 150 metres long, the minimum rated duration of use for a self-contained breathing apparatus shall be one hour. O. Reg. 213/91, s. 266 (7).

(8) For use in an underground work place that is 150 metres or more long, the minimum rated duration of use for a self-contained breathing apparatus shall be one and one-half hours. O. Reg. 213/91, s. 266 (8).

(9) All self-contained breathing apparatuses intended for rescue work on a project shall be the same model and made by the same manufacturer. O. Reg. 213/91, s. 266 (9).

(10) All self-contained breathing apparatuses shall be kept in close proximity to the means of access to an underground work place and shall be readily available. O. Reg. 213/91, s. 266 (10).

(11) A sufficient number, four as a minimum, of self-contained breathing apparatuses shall be available on the project to provide for all rescue work that may be required. O. Reg. 213/91, s. 266 (11).

(12) A competent person shall inspect every self-contained breathing apparatus at least once a month or as often as is required by the manufacturer to ensure it is in proper condition. O. Reg. 213/91, s. 266 (12).

267. Every worker who is in, or may be required to enter, a tunnel or a shaft leading to it shall be provided with a self-rescue respirator for the worker's exclusive use which is suitable for protection against hazardous gases. O. Reg. 631/94, s. 10.

268. (1) A worker's self-rescue respirator shall be kept in the vicinity of the worker while he or she is in a tunnel or shaft. O. Reg. 213/91, s. 268 (1).

(2) All workers on a tunnel project shall be instructed in the proper use, care, maintenance and limitations of the self-rescue respirator in accordance with the manufacturer's specifications. O. Reg. 213/91, s. 268 (2).

COMMUNICATIONS

269. (1) Subject to subsection (2), a telephone connected to a public telephone system shall be installed at a project that is to be over fourteen days duration. O. Reg. 213/91, s. 269 (1).

(2) If it is not practicable to install at a project a telephone connected to a public telephone system, a radio telephone shall be available that permits communication with an office of the constructor that has a telephone connected to a public telephone system. O. Reg. 213/91, s. 269 (2).

(3) At a project of fourteen or fewer days duration, before work is begun, a public telephone or a radio telephone shall be installed or shall be arranged for nearby if,

(a) the services of a police or fire department or ambulance are reasonably available; and

(b) prompt direct telephone communication is possible with the police or fire department or ambulance. O. Reg. 213/91, s. 269 (3).

270. (1) A telephone system shall be provided at a tunnel if the work at the face of the tunnel is or will be done twenty-three metres or more from,

(a) the top of the service shaft; or

(b) the opening into the tunnel, if the tunnel is not constructed from a service shaft. O. Reg. 213/91, s. 270 (1).

(2) A telephone system shall be installed before work on the tunnel is begun. O. Reg. 213/91, s. 270 (2).

(3) A telephone system shall consist of telephones that are located,

(a) in the office of the supervisor in charge of the project;

(b) at the top and bottom of the service shaft or at the opening into the tunnel, if the tunnel is not constructed from a service shaft;

(c) at all other means of access to the service shaft, if any; and

(d) at intervals not exceeding thirty metres in every area of the tunnel where work is being performed. O. Reg. 213/91, s. 270 (3).

(4) A notice shall be posted by each telephone,

(a) indicating how to call every other telephone in the system;

(b) describing the emergency signal to be used; and

(c) stating that a worker who hears the emergency signal shall answer the telephone. O. Reg. 213/91, s. 270 (4).

(5) A telephone system shall be installed in such a way that a conversation can be carried on between any two telephones in the system. O. Reg. 213/91, s. 270 (5).

(6) The voice communication circuits used in a telephone system shall be independent from the circuits used to signal from one telephone to another. O. Reg. 213/91, s. 270 (6).

271. During the construction of a shaft, an effective means of communicating between the lowest point of the shaft and the surface shall be provided. O. Reg. 213/91, s. 271.

272. A completed service shaft more than six metres deep shall have a means, other than a telephone, of exchanging distinct and definite signals between the top and bottom of the shaft. O. Reg. 213/91, s. 272.

273. (1) If a person is about to be conveyed by a hoist in a shaft, the pit bottom worker shall notify the hoist operator before the person enters the conveyance. O. Reg. 213/91, s. 273 (1).

(2) A hoist operator shall acknowledge every signal received by repeating the signal. O. Reg. 213/91, s. 273 (2).

(3) A signal to a hoist operator to move a conveyance shall be given only from the landing from which the conveyance is being moved. O. Reg. 213/91, s. 273 (3).

(4) The following signals shall be used to give signals between a hoist operator, the top or bottom of a shaft and all landings in the shaft:

CODE OF SIGNALS

Where the conveyance is in motion – 1 signal	STOP
Where the conveyance is stationary –	

1 signal	HOIST
2 signals together	LOWER
3 signals together (to be given before any person enters the conveyance)	Person will be on conveyance. OPERATE CAREFULLY.

O. Reg. 213/91, s. 273 (4).

(5) The supervisor in charge of a project may establish signals in addition to those set out in subsection (4) if required for the operation of a hoist on the project. O. Reg. 213/91, s. 273 (5).

(6) A notice setting out the signals used for a hoist shall be securely posted,

(a) where it is readily visible to the hoist operator; and

(b) at each landing of the hoistway. O. Reg. 213/91, s. 273 (6).

(7) The notice shall be on a board or a metal plate that is not less than 450 millimetres by 450 millimetres and shall be written in letters that are at least thirteen millimetres high. O. Reg. 213/91, s. 273 (7).

LIGHTING AND ELECTRICITY SUPPLY

274. All electrical circuits of 100 volts or more shall be in an insulated cable that consists of at least two conductors and a grounding conductor. O. Reg. 627/05, s. 8.

275. All electrical pumps and electrical tools shall be either adequately grounded or double-insulated. O. Reg. 213/91, s. 275.

276. (1) An area of a tunnel or shaft that is not adequately lit by natural light shall be electrically illuminated. O. Reg. 213/91, s. 276 (1).

(2) Flashlights shall be readily available at the top and bottom of every shaft and near the work face of a tunnel. O. Reg. 213/91, s. 276 (2).

(3) If electric lighting is used in a tunnel or shaft, an emergency lighting system shall be installed in the tunnel or shaft. O. Reg. 213/91, s. 276 (3).

(4) An emergency lighting system,

(a) shall be connected to the electrical supply so that in the event of the failure of the electrical supply, the system will automatically turn on;

(b) shall be provided with a testing switch, if the system is battery-powered; and

(c) shall be tested at least as frequently as is recommended by its manufacturer to ensure that the system will function in an emergency. O. Reg. 213/91, s. 276 (4).

277. REVOKED: O. Reg. 627/05, s. 9.

SHAFTS

278. (1) Every shaft shall be large enough that its walls can be adequately shored and shall have enough clear space for work to be done. O. Reg. 213/91, s. 278 (1).

(2) In a service shaft that is more than six metres deep or that serves a tunnel more than fifteen metres long,

(a) the minimum inside dimension of the shaft, measured between the wales or other wall supports, shall be 2.4 metres for a cylindrical shaft and 1.5 metres for a shaft that is not cylindrical; and

(b) the minimum transverse cross-sectional area of a shaft that is not cylindrical shall be 5.7 square metres. O. Reg. 213/91, s. 278 (2).

279. (1) The walls of a shaft shall be supported by shoring and bracing adequate to prevent their collapse. O. Reg. 213/91, s. 279 (1).

(2) Subsection (1) does not apply to the walls of a shaft that is less than 1.2 metres deep or is cut in sound rock. O. Reg. 213/91, s. 279 (2).

(3) If a shaft is to be cut in sound rock, the constructor shall obtain a written opinion from a professional engineer as to whether the walls of the shaft need to be supported by rock bolts or wire mesh to prevent the spalling of loose rock. O. Reg. 213/91, s. 279 (3).

(4) The walls of a shaft cut in sound rock shall be supported by rock bolts or wire mesh where necessary in the opinion of the professional engineer. O. Reg. 213/91, s. 279 (4).

280. (1) Shoring and bracing for a shaft that is more than 1.2 metres deep shall be capable of withstanding all loads likely to be applied to them. O. Reg. 213/91, s. 280 (1).

(2) The shoring and bracing,

(a) shall be designed by a professional engineer in accordance with good engineering practice; and

(b) shall be constructed in accordance with the professional engineer's design. O. Reg. 213/91, s. 280 (2).

(3) Design drawings by a professional engineer for the shoring and bracing shall show the size and specifications of the shoring and bracing including the type and grade of all materials to be used in their construction. O. Reg. 213/91, s. 280 (3).

(4) REVOKED: O. Reg. 443/09, s. 8.

(5) The constructor shall keep a copy of design drawings for the shoring and bracing at the project while the shoring and bracing are in use. O. Reg. 213/91, s. 280 (5).

281. (1) If a square or rectangular shaft is not more than six metres deep and has walls that are not more than 3.6 metres wide, the walls,

(a) shall be fully sheathed with Number 1 Grade spruce planks that are at least fifty-one millimetres thick by 152 millimetres wide and are placed side by side; and

(b) shall be supported by wales and struts. O. Reg. 213/91, s. 281 (1); O. Reg. 631/94, s. 11.

(2) Wales and struts,

(a) shall be made of number 1 structural grade spruce planks that are,

(i) at least 152 millimetres by 152 millimetres, for a shaft that is not more than 2.7 metres deep,

(ii) at least 203 millimetres by 203 millimetres, for a shaft that is more than 2.7 metres but not more than 4.3 metres deep, and

(iii) at least 254 millimetres by 254 millimetres, for a shaft that is more than 4.3 metres but not more than six metres deep;

(b) shall be spaced not more than 1.2 metres apart vertically; and

(c) shall be adequately supported by vertical posts that extend to the bottom of the shaft. O. Reg. 213/91, s. 281 (2).

282. (1) An adequate barrier that is at least 1.1 metres high shall be provided around the top of an uncovered shaft. O. Reg. 213/91, s. 282 (1).

(2) A barrier around the top of an uncovered shaft that is more than 2.4 metres deep,

(a) shall consist of a top rail, an intermediate rail and a toe-board; and

(b) shall be made of thirty-eight by 140 millimetres lumber securely fastened to vertical supports that are spaced at intervals of not more than 2.4 metres. O. Reg. 213/91, s. 282 (2).

(3) A barrier shall be kept free of splinters and protruding nails. O. Reg. 213/91, s. 282 (3).

(4) A gate in a barrier around the top of an uncovered shaft shall be kept closed and latched. O. Reg. 213/91, s. 282 (4).

(5) The ground adjacent to a barrier around the top of a shaft shall be sloped away from the barrier. O. Reg. 213/91, s. 282 (5).

283. A shaft shall be kept clear of ice and loose objects that may endanger a worker. O. Reg. 213/91, s. 283.

284. A shaft shall be kept reasonably free of water when a worker is required to be in the shaft. O. Reg. 213/91, s. 284.

285. Every shaft shall have a means of access and egress by stairway, ladder or ladderway for its full depth during its construction and when it is completed. O. Reg. 213/91, s. 285.

286. (1) A stairway, ladder or ladderway for a shaft that is more than six metres deep,

(a) shall have landings or rest platforms spaced at intervals not greater than 4.5 metres;

(b) shall be off-set at each landing or rest platform; and

(c) shall be located in a sheathed compartment that is constructed in such a way that a worker who falls while on the stairway, ladder or ladderway will land on the landing or rest platform below. O. Reg. 213/91, s. 286 (1).

(2) Every landing and rest platform shall be wide enough to permit at least two workers to pass on it safely. O. Reg. 213/91, s. 286 (2).

(3) Every opening and ladderway shall be wide enough to permit the passage of a worker wearing rescue equipment and shall be at least 750 cm by 750 cm. O. Reg. 631/94, s. 12.

287. (1) Every conveyance located in a service shaft that is more than six metres deep shall be separated from a stairway, ladder or ladderway in the shaft by a lining described in subsection (3). O. Reg. 213/91, s. 287 (1).

(2) Subsection (1) does not apply with respect to a conveyance located in a service shaft if the hoisting area is so remote from the stairway, ladder or ladderway that it is not possible for a load, bucket or device being hoisted or lowered to come into contact with the stairway, ladder or ladderway. O. Reg. 213/91, s. 287 (2).

(3) A lining shall consist of solid planks at least fifty-one millimetres thick and spaced not more than ten millimetres apart. O. Reg. 213/91, s. 287 (3).

HOISTWAYS

288. (1) This section applies with respect to a hoistway that is more than six metres deep in which hoisting is carried out by mechanical power. O. Reg. 213/91, s. 288 (1).

(2) Every landing on a hoistway shall have a gate located within 200 millimetres of the hoistway that,

(a) extends the full width of the hoistway from within fifty millimetres of the floor level to a height of at least 1.8 metres;

(b) is constructed without any gaps that would permit the entry of a ball thirty-eight millimetres in diameter; and

(c) is equipped with a light readily visible to the hoist operator indicating when the gate is closed. O. Reg. 213/91, s. 288 (2).

(3) Subsection (2) does not apply to a landing at the bottom of a hoistway if the landing has one or more red lights that,

(a) are located where a person approaching the hoistway from a tunnel or from the lower end of a stair or ladder can see at least one of them; and

(b) are controlled by a switch readily accessible to a shaft attendant. O. Reg. 213/91, s. 288 (3).

(4) A gate required by subsection (2) shall be kept closed unless a conveyance is stopped at the landing. O. Reg. 213/91, s. 288 (4).

(5) The red lights referred to in subsection (3) shall be continuously flashed off and on during a hoisting operation. O. Reg. 213/91, s. 288 (5).

289. (1) All parts of a hoisting apparatus used in a hoistway or shaft shall be able to be conveniently inspected. O. Reg. 213/91, s. 289 (1).

(2) Every hoist drum shall have a flange at each end to keep the hoist rope on the drum. O. Reg. 213/91, s. 289 (2).

290. (1) A hoist operator shall operate and watch over a hoist and all machinery associated with the hoist to detect any hazardous conditions. O. Reg. 213/91, s. 290 (1).

(2) A hoist operator shall report immediately to the supervisor in charge of the project any defects in the hoisting machinery and safety appliances. O. Reg. 213/91, s. 290 (2).

(3) The hoist operator shall test all safety devices on a hoisting apparatus to ensure that they function and shall perform the tests,

(a) before a conveyance is first put into service on a project;

(b) at least once every three months after being put into service on the project; and

(c) daily, if the hoisting apparatus is used to hoist persons. O. Reg. 213/91, s. 290 (3).

(4) The hoist operator shall make a record of tests performed under subsection (3). O. Reg. 213/91, s. 290 (4).

(5) The hoist operator shall keep available for inspection at the project the record of tests performed under subsection (3). O. Reg. 213/91, s. 290 (5).

291. (1) No person other than a competent worker appointed by the supervisor in charge of a project shall operate a hoist in a hoistway or shaft. O. Reg. 213/91, s. 291 (1).

(2) No person, other than a worker required to do so as a part of the worker's job, shall enter or attend the machine room of a hoist. O. Reg. 213/91, s. 291 (2).

292. A hoist operator shall inspect the hoisting machinery and safety appliances connected to it at least once a day and shall make a record of the inspection in a log book. O. Reg. 213/91, s. 292.

293. (1) A hoist operator and all shaft attendants shall understand the signal code established for the hoist. O. Reg. 213/91, s. 293 (1).

(2) No hoist operator shall converse with another person while the hoist is in motion or signals are being given. O. Reg. 213/91, s. 293 (2).

(3) No hoist operator shall turn over the controls of a hoist to another person while a conveyance is in motion. O. Reg. 213/91, s. 293 (3).

(4) No hoist operator shall operate a hoist,

(a) unless it is equipped with,

(i) indicators showing the position of the conveyance on the hoist, and

(ii) brakes and distance markers on the hoisting ropes and cables;

(b) in a compartment of a shaft in which work is being done unless the hoist is being operated for the purpose of work in the compartment. O. Reg. 213/91, s. 293 (4).

(5) After a hoist has been stopped for repairs, a hoist operator shall run an empty conveyance up and down the shaft at least once and shall determine that the hoist is in good working order before carrying a load in it. O. Reg. 213/91, s. 293 (5).

294. (1) The supervisor in charge of a project,

(a) shall establish the maximum speed for a conveyance transporting persons in a hoistway; and

(b) shall determine the maximum number of persons and the maximum weight of material that may be carried safely on a conveyance in a hoistway. O. Reg. 213/91, s. 294 (1).

(2) A notice setting out the maximums referred to in subsection (1) shall be conspicuously posted near each hoistway entrance. O. Reg. 213/91, s. 294 (2).

(3) No person shall load a conveyance in a hoistway beyond the maximum limits established under clause (1) (b). O. Reg. 213/91, s. 294 (3).

(4) A hoist operator shall operate a hoist in accordance with the notice posted under subsection (2). O. Reg. 213/91, s. 294 (4).

295. (1) The supervisor in charge of a project shall appoint shaft attendants for a shaft where a hoist is being used. O. Reg. 213/91, s. 295 (1).

(2) No shaft attendant shall be less than nineteen years of age. O. Reg. 213/91, s. 295 (2).

(3) At least one shaft attendant shall be on duty at the top of a shaft if a hoist, crane or similar hoisting device is being used or if a worker is present in the shaft or in a tunnel connected to the shaft. O. Reg. 213/91, s. 295 (3).

(4) A shaft attendant,

(a) shall give the hoist operator the signals for starting and stopping the hoist;

(b) shall warn workers of hazards in or near the shaft; and

(c) as far as is practicable, shall remove known hazards. O. Reg. 213/91, s. 295 (4).

296. (1) The supervisor in charge of a project shall, before a hoist is used on the project, establish a communication system of signals to be used between a hoist operator, shaft attendants and any other attendants working at a hoist. O. Reg. 213/91, s. 296 (1).

(2) The supervisor in charge of a project shall ensure that all hoist operators, shaft attendants and other attendants working at a hoist know and understand the signals. O. Reg. 213/91, s. 296 (2).

297. (1) The supervisor in charge of a project shall appoint workers to control the movement of materials to and from a conveyance on a hoist at every landing and at the bottom of a shaft. O. Reg. 213/91, s. 297 (1).

(2) A worker appointed under subsection (1) shall control and direct the movement of materials to and from a conveyance. O. Reg. 213/91, s. 297 (2).

298. No worker shall be transported in a conveyance or a hoist while it is being used to carry materials or equipment other than hand tools or similar small objects. O. Reg. 213/91, s. 298.

299. The path of travel of an object being hoisted from or lowered into a shaft by a crane shall not pass over a manway unless the manway has adequate overhead protection. O. Reg. 213/91, s. 299.

300. (1) A service shaft that will be over thirty metres deep when completed shall have a hoist with a conveyance consisting of a cage or car suitable for transporting workers. O. Reg. 213/91, s. 300 (1).

(2) A hoist shall be installed in the service shaft as soon as is practicable. O. Reg. 213/91, s. 300 (2).

(3) A hoist,

(a) shall have a headframe that is grounded for protection against lightning and is designed by a professional engineer;

(b) shall have guides to control the movement of the conveyance;

(c) shall have a device that automatically stops the conveyance when it runs beyond the limit of its normal travel; and

(d) shall have a brake on the hoisting machine that automatically stops and holds the conveyance if the hoist fails or the power to the hoist is interrupted. O. Reg. 213/91, s. 300 (3).

(4) A shaft in sound rock may be excavated to a depth of not more than thirty metres before the headframe and guides are installed on the hoist. O. Reg. 213/91, s. 300 (4).

301. (1) Every conveyance on a hoist used for transporting workers in a shaft shall have a suitable device that, if the cable breaks or becomes slack,

(a) automatically prevents the conveyance from falling; and

(b) is capable of holding the conveyance stationary when it contains the maximum number of passengers it is permitted to carry. O. Reg. 213/91, s. 301 (1).

(2) Subsection (1) does not apply with respect to a bucket or a skip operated in accordance with sections 303 and 305. O. Reg. 213/91, s. 301 (2).

(3) A device shall be installed to warn the hoist operator when a conveyance transporting workers in a shaft has reached the normal limit of its travel. O. Reg. 213/91, s. 301 (3).

302. (1) A cage or car on a hoist used for transporting workers in a shaft,

(a) shall be at least 1.8 metres high;

(b) shall be solidly enclosed, except for openings for access and egress;

(c) shall have a maximum of two openings for access and egress;

(d) shall have a gate at each opening for access and egress; and

(e) shall have a protective cover suitable to protect passengers from falling objects. O. Reg. 213/91, s. 302 (1).

(2) A gate for access and egress,

(a) shall be constructed without any gaps that would permit the entry of a ball thirty-eight millimetres in diameter;

(b) shall extend the full width of the opening and from within fifty millimetres of the floor of the cage or car to a height of at least 1.8 metres; and

(c) shall not open outward. O. Reg. 213/91, s. 302 (2).

(3) A protective cover referred to in clause (1) (e) shall have a trap door for emergency access which measures not less than 600 millimetres by 600 millimetres. O. Reg. 213/91, s. 302 (3).

303. (1) Subject to subsection (2), a bucket or similar conveyance shall not be used to transport a worker in a shaft. O. Reg. 213/91, s. 303 (1).

(2) A bucket or similar conveyance may be used to transport a worker in a shaft for the purpose of inspecting the hoistway if no other method of access to the parts of the hoistway is available. O. Reg. 213/91, s. 303 (2).

(3) A bucket referred to in subsection (2),

(a) shall be at least 1.2 metres deep;

(b) shall have smoothly-contoured outer surfaces to prevent it from tipping or becoming snagged by an obstacle during hoisting or lowering; and

(c) shall not be self-opening. O. Reg. 213/91, s. 303 (3).

(4) If a pivoted bucket that is manually-dumped and is not self-guided is being used to transport a worker, the bucket,

(a) shall be equipped with a lock to prevent tipping; and

(b) shall be pivoted in such a way that it does not automatically invert when the lock is released. O. Reg. 213/91, s. 303 (4).

(5) A bucket that is not controlled by a cross head running in vertical guides shall not be hoisted or lowered at a speed greater than 0.5 metres per second when it is transporting a worker. O. Reg. 213/91, s. 303 (5).

304. (1) A hinged door that opens upward shall be provided over the opening at the top of a shaft. O. Reg. 213/91, s. 304 (1).

(2) The door shall be closed while a worker is entering or leaving a bucket over the opening at the top of the shaft. O. Reg. 213/91, s. 304 (2).

305. A skip shall not be used to transport a worker unless,

(a) the worker is inspecting guiderails or shaft supports; and

(b) the skip is protected by an overwind device to prevent the skip from being hoisted to the dump position. O. Reg. 213/91, s. 305.

TUNNELS

306. (1) A tunnel shall have enough clear space for the passage of vehicles and the movement of workers. O. Reg. 213/91, s. 306 (1).

(2) The diameter of a circular or elliptical tunnel and the width and height of a square or rectangular tunnel shall be at least 760 millimetres. O. Reg. 213/91, s. 306 (2).

(3) A clear space of at least 450 millimetres shall be left between the side of a tunnel and the nearer side of,

(a) all trackless haulage equipment being used; and

(b) all locomotives, haulage cars and machines operating on a track. O. Reg. 213/91, s. 306 (3).

(4) A circular or elliptical tunnel shall have safety platforms at sixty metre intervals along it. O. Reg. 213/91, s. 306 (4).

(5) A safety platform shall be long enough for a crew of workers to stand on, shall be constructed above the tunnel invert and shall be clear of passing equipment. O. Reg. 213/91, s. 306 (5).

307. (1) Except for a tunnel cut in sound rock, the sides and roof of a tunnel shall be supported by timbers set on ribs or beams or by an equivalent system of lining. O. Reg. 213/91, s. 307 (1).

(2) If a tunnel is to be cut in sound rock, the constructor shall obtain a written opinion from a professional engineer as to whether the sides and roof of the tunnel need to be supported by rock bolts or wire mesh to prevent the spalling of loose rock. O. Reg. 213/91, s. 307 (2).

(3) The sides and roof of a tunnel cut in sound rock,

(a) shall be supported, where necessary in the opinion of the professional engineer, by rock bolts or wire mesh;

(b) shall be inspected daily by a competent worker; and

(c) shall have all loose pieces of rock removed. O. Reg. 213/91, s. 307 (3).

(4) If the permanent lining of a tunnel will, when completed, consist of a primary lining and a secondary lining, the primary lining shall be strong enough to support the sides and roof of the tunnel until the secondary lining is installed. O. Reg. 213/91, s. 307 (4).

(5) If the permanent lining of a tunnel consists only of a concrete cast-in-place lining, the tunnel shall not be excavated beyond the leading edge of the permanent lining unless adequate temporary shoring is installed as soon as is practicable. O. Reg. 213/91, s. 307 (5).

(6) The primary supports of a tunnel,

(a) shall be designed by a professional engineer in accordance with good engineering practice to withstand all loads likely to be applied to them; and

(b) shall be constructed in accordance with the design. O. Reg. 213/91, s. 307 (6).

(7) The constructor shall keep available for inspection at a project the design drawings for the primary supports. O. Reg. 213/91, s. 307 (7); O. Reg. 85/04, s. 23.

308. A tunnel shall be kept reasonably free of water when a worker is required to be in the tunnel. O. Reg. 213/91, s. 308.

TUNNEL EQUIPMENT

309. When a haulage locomotive, trackless haulage equipment or a hoist in a shaft or tunnel is left unattended,

(a) its controls shall be left in the neutral position; and

(b) its brakes shall be set or other measures, such as blocking, shall be taken to prevent its moving. O. Reg. 213/91, s. 309.

310. (1) A haulage locomotive shall have suitable brakes, an audible bell and controls that can be operated only by a worker at the driver's station. O. Reg. 213/91, s. 310 (1).

(2) A haulage locomotive shall be designed so that power for its driving mechanism is cut off unless the control regulating the power is continuously operated by a worker at the driver's station. O. Reg. 213/91, s. 310 (2).

(3) The driver of a haulage locomotive shall sound the bell when the locomotive is set in motion or is approaching someone. O. Reg. 213/91, s. 310 (3).

(4) No person other than the driver shall ride on a haulage locomotive. O. Reg. 213/91, s. 310 (4).

311. No worker shall ride on a haulage train except in a car provided to carry passengers. O. Reg. 213/91, s. 311.

312. A haulage car shall have a device to prevent uncontrolled travel by the car. O. Reg. 213/91, s. 312.

313. (1) Track for haulage equipment shall be securely fastened to the ties on which it is laid. O. Reg. 213/91, s. 313 (1).

(2) If the ties interfere with the use of the bottom of the tunnel as a walkway, a solid walkway that is at least 300 millimetres wide shall be provided. O. Reg. 213/91, s. 313 (2).

314. (1) The air inlet to an air compressor shall be located in such a position that fumes or noxious contaminants are not drawn in with the air to be compressed. O. Reg. 213/91, s. 314 (1).

(2) A valve connected to a vessel used for storing compressed air,

(a) shall be connected at the lowest point of the vessel to permit the discharge of the compressed air; and

(b) shall be opened at least once each shift for the purpose of ejecting oil, water and other matter from the vessel. O. Reg. 213/91, s. 314 (2).

315. (1) A project shall have pumping equipment of sufficient capacity to handle the pumping requirements of the project. O. Reg. 213/91, s. 315 (1).

(2) Pumping equipment shall be connected to an adequate source of energy. O. Reg. 213/91, s. 315 (2).

(3) Sufficient spare pumping equipment and an alternative source of energy for it shall be readily available at the project in case of emergency. O. Reg. 213/91, s. 315 (3).

316. No internal combustion engine shall be used in a tunnel on a project without the prior written consent of a Director. O. Reg. 213/91, s. 316; O. Reg. 145/00, s. 36.

EXPLOSIVES

317. Before blasting begins in a shaft, tunnel, caisson or cofferdam that is located within the greater of 4.5 metres and twice the length of the longest drill rod used away from another shaft, tunnel, caisson or cofferdam, the worker in charge of the blasting operations shall determine whether work in the adjacent shaft, tunnel, caisson or cofferdam can safely continue during blasting operations. O. Reg. 213/91, s. 317.

318. (1) No vehicle or conveyance being used to transport explosives or blasting agents shall carry any other cargo or any person other than the vehicle operator. O. Reg. 213/91, s. 318 (1).

(2) No detonator shall be transported in a vehicle or conveyance while it is carrying explosives or other blasting agents. O. Reg. 213/91, s. 318 (2).

(3) Where mechanical track haulage is used in a tunnel, explosives or blasting agents shall not be transported on the locomotive or in the same car as the detonators. O. Reg. 213/91, s. 318 (3).

319. (1) A vehicle or conveyance, including trackless equipment, that is transporting explosives or blasting agents in a tunnel by mechanical haulage,

(a) shall be given an uninterrupted and a clear passage of travel;

(b) shall be conspicuously marked by signs or red flags that are easily visible from the front and the rear;

(c) shall not travel at a speed greater than six kilometres per hour; and

(d) shall not be left unattended. O. Reg. 213/91, s. 319 (1).

(2) Explosives and blasting agents referred to in subsection (1),

(a) shall be in a box made of wood or be separated from every metal part of the vehicle or conveyance in which they are being transported by a lining made of wood; and

(b) shall be arranged or secured so as to prevent any part of an explosive or blasting agent from being dislodged. O. Reg. 213/91, s. 319 (2).

320. If explosives or blasting agents are to be transported in a shaft, the worker in charge of blasting operations shall notify the hoist operator and shaft attendants before the explosives or blasting agents are put in the conveyance. O. Reg. 213/91, s. 320.

321. A flashlight shall be provided to every worker who is engaged in blasting operations in a tunnel or is in an area from which the means of egress passes a place where blasting is to be done. O. Reg. 213/91, s. 321.

322. Drilling or charging operations in a shaft or tunnel shall not be done simultaneously,

(a) above or below one another on the same face; or

(b) within a 7.5 metre horizontal distance from one another. O. Reg. 213/91, s. 322.

323. (1) Explosives and blasting agents shall be fired electrically. O. Reg. 213/91, s. 323 (1).

(2) Despite subsection (1), tape fuse may be used to fire explosives and blasting agents if block holing is to be done. O. Reg. 213/91, s. 323 (2).

324. (1) If a portable direct current battery or a blasting machine is the source of current for blasting, the firing cables or wires,

(a) shall not be connected to the source of current until immediately before the charges are fired; and

(b) shall be disconnected immediately after the charges are fired. O. Reg. 213/91, s. 324 (1).

(2) All firing cables or wires leading to a face shall be short-circuited while the leads from the blasting caps are being connected to one another and to the firing cables. O. Reg. 213/91, s. 324 (2).

(3) No short-circuit of a firing cable or wire shall be removed until all workers have retreated from the face and are so located that, should a premature explosion occur, the workers are not endangered. O. Reg. 213/91, s. 324 (3).

(4) A short-circuit shall be replaced immediately after the firing cables or wires are disconnected from the blasting machine or the blasting switch is opened. O. Reg. 213/91, s. 324 (4).

(5) Separate firing cables or wires for firing charges shall be used for each work location. O. Reg. 213/91, s. 324 (5).

(6) Firing cables or wires,

(a) shall be located as far as is practicable from every other electrical circuit; and

(b) shall not be permitted to come in contact with power, lighting or communication cables, or pipes, rails or other continuous metal grounded surfaces. O. Reg. 213/91, s. 324 (6).

325. (1) Every device, other than a portable hand-operated device, used for firing a charge shall meet the requirements of this section. O. Reg. 213/91, s. 325 (1).

(2) No person other than a competent worker shall use a device used for firing a charge. O. Reg. 213/91, s. 325 (2).

(3) A device used for firing a charge shall have a switch mechanism that automatically returns by gravity to the open position. O. Reg. 213/91, s. 325 (3).

(4) The live side of a device used for firing a charge shall be installed in a fixed locked box which is accessible only to the worker doing the blasting. O. Reg. 213/91, s. 325 (4).

(5) The lock on the box referred to in subsection (4) shall be able to be closed only when the contacts of the device are open and a short-circuiting device is in place. O. Reg. 213/91, s. 325 (5).

(6) The leads to the face shall be short-circuited when the contacts of the device are in the open position. O. Reg. 213/91, s. 325 (6).

326. (1) A circuit used for blasting shall originate from an isolated ungrounded power source and shall be used only for blasting. O. Reg. 213/91, s. 326 (1).

(2) Subsection (1) does not apply with respect to blasting done with a portable hand-operated device. O. Reg. 213/91, s. 326 (2).

327. (1) When a charge is fired and after a shot is heard, every worker in a place of refuge from a blast shall remain there and not return to the blast area for at least ten minutes. O. Reg. 213/91, s. 327 (1).

(2) If a charge is fired and no shot is heard, before the circuit is repaired,

(a) the blasting circuit shall be locked in the open position; and

(b) the lead wires shall be short-circuited. O. Reg. 213/91, s. 327 (2).

(3) A worker who suspects a misfire of an explosive or a blasting agent shall report it to the supervisor in charge of the project. O. Reg. 213/91, s. 327 (3).

(4) A charge of an explosive or a blasting agent that has misfired shall be left in place and blasted as soon as it is discovered. O. Reg. 213/91, s. 327 (4).

328. When a blasting operation is completed, the blasting switch shall be locked in the open position, the lead wires short-circuited and the blasting box locked. O. Reg. 213/91, s. 328.

VENTILATION

329. An adequate supply of fresh air shall be provided and circulated throughout an underground work place. O. Reg. 213/91, s. 329.

330. (1) An underground work place shall be tested regularly for noxious or toxic gases, fumes or dust. O. Reg. 213/91, s. 330 (1).

(2) A competent worker shall regularly test the air and the mechanical ventilation for an underground work place to ensure that the mechanical ventilation is adequate. O. Reg. 213/91, s. 330 (2).

(3) When the results of the tests referred to in subsection (2) indicate there is a need for respiratory protective equipment, the employer shall provide respiratory protective equipment. O. Reg. 213/91, s. 330 (3).

331. (1) Mechanical ventilation shall be provided in a shaft in which an internal combustion engine or other device which emits a noxious gas or fume operates. O. Reg. 213/91, s. 331 (1).

(2) Subsection (1) does not apply if the noxious gas or fume is discharged outside the shaft in such a way that its return to the shaft is prevented. O. Reg. 213/91, s. 331 (2).

PART V
WORK IN COMPRESSED AIR

INTERPRETATION AND APPLICATION

332. In this Part,

"air lock" means a chamber designed for the passage of persons or materials from one place to another place that has a different air pressure from the first;

"compressed air" means air whose pressure is mechanically raised to more than atmospheric pressure;

"decompression sickness", in relation to a worker, means a condition of bodily malfunction caused by a change from a higher to a lower air pressure and includes the condition commonly known as "the bends";

"kilopascals", except in section 376, means kilopascals relative to atmospheric pressure;

"maximum air pressure", in relation to a worker, means the greatest level of air pressure to which a worker is subjected for a period of more than five minutes;

"medical lock" means a chamber in which workers may be subjected to changes in air pressure for medical purposes;

"superintendent" means the person appointed by a constructor to be supervisor over and in charge of work done in compressed air;

"work chamber" means a part of a project that is used for work in compressed air but does not include an air lock or a medical lock. O. Reg. 213/91, s. 332.

333. This Part applies with respect to work done in compressed air, other than work done in diving bells or work done by divers. O. Reg. 213/91, s. 333.

GENERAL REQUIREMENTS

334. (1) No constructor or employer shall begin work at a project where a worker may be subjected to compressed air until the requirements of this section are met. O. Reg. 213/91, s. 334 (1).

(2) The employer of workers who may be subjected to compressed air at a project shall give a Director written notice of the intended use of compressed air on the project at least fourteen days before beginning work on the project. O. Reg. 213/91, s. 334 (2); O. Reg. 145/00, s. 37 (1).

(3) Before work is begun in compressed air, the employer shall obtain written permission from a Director. O. Reg. 213/91, s. 334 (3); O. Reg. 145/00, s. 37 (2).

335. (1) Before work is begun in compressed air at a project, a constructor shall give written notice,

(a) to the local police department and the fire department and public hospital nearest to the project; and

(b) to a Director, together with the names and addresses of those to whom notice is given under clause (a). O. Reg. 213/91, s. 335 (1); O. Reg. 145/00, s. 38.

(2) A notice shall set out,

(a) the location of the project;

(b) the name, address and telephone number of the project physician and the superintendent; and

(c) the location of a medical lock for the project and of every other readily-available medical lock. O. Reg. 213/91, s. 335 (2).

(3) The employer shall give notice of the completion of work in compressed air at the project to those who were given notice under clause (1) (a). O. Reg. 213/91, s. 335 (3).

336. (1) The employer shall appoint a competent person as superintendent of all work in compressed air at a project. O. Reg. 213/91, s. 336 (1).

(2) The superintendent, before a worker is first subjected to compressed air,

(a) shall ensure that the worker is fully instructed,

(i) in the hazards of working in compressed air, and

(ii) in the measures to be taken to safeguard the health and safety of the worker and other workers on the project; and

(b) shall obtain an acknowledgement signed by the worker who is receiving the instruction stating that the worker has been so instructed. O. Reg. 213/91, s. 336 (2).

337. (1) A superintendent at a project shall designate for each shift at least one competent worker as lock tender who shall attend to the controls of an air lock. O. Reg. 213/91, s. 337 (1).

(2) A lock tender must be able to speak, read and write English competently. O. Reg. 213/91, s. 337 (2).

(3) A superintendent at a project shall ensure that at least one competent worker in addition to the lock tender is available in an emergency to perform the duties of the lock tender while a worker is working in compressed air. O. Reg. 213/91, s. 337 (3).

338. (1) The superintendent shall keep available at a project for inspection by an inspector,

(a) all Form 1 reports by a project physician;

(b) all records required under section 373 of air pressure in air locks on the project; and

(c) all records required under section 394 to be kept by a lock tender. O. Reg. 213/91, s. 338 (1).

(2) The superintendent shall send all Form 1 reports to a Director promptly when work in compressed air at the project is finished. O. Reg. 213/91, s. 338 (2); O. Reg. 145/00, s. 39.

339. (1) A worker who works in compressed air shall wear for at least twenty-four hours after working in compressed air a sturdy metal or plastic badge that meets the requirements of subsection (2). O. Reg. 213/91, s. 339 (1).

(2) A badge shall measure at least fifty millimetres in diameter and shall set out,

(a) the name of the constructor of the project;

(b) the name and telephone number of the project physician;

(c) the location of a medical lock at the project; and

(d) the words, “compressed air worker – in case of decompression sickness take immediately to a medical lock”. O. Reg. 213/91, s. 339 (2).

(3) The constructor at a project shall provide workers with the badge required under subsection (1). O. Reg. 213/91, s. 339 (3).

COMMUNICATIONS

340. (1) A telephone system for work in compressed air shall be provided at a project. O. Reg. 213/91, s. 340 (1).

(2) A telephone system shall consist of telephones located,

(a) at a location as close as is practicable to the work face;

(b) in every work chamber near a door that leads to an air lock;

(c) in every air lock;

(d) near every lock tender’s work position;

(e) adjacent to every compressor plant; and

(f) in the superintendent’s office. O. Reg. 213/91, s. 340 (2).

341. (1) An electric buzzer or bell system for work in compressed air shall be provided at a project. O. Reg. 213/91, s. 341 (1).

(2) An electric buzzer or bell system shall consist of a switch and a buzzer or bell located,

(a) in every work chamber near a door that leads to an air lock;

(b) in every air lock; and

(c) near every lock tender's work position. O. Reg. 213/91, s. 341 (2).

(3) The following code shall be used to give signals between a work chamber, an air lock and the lock tender's work position:

1 signal	When no people are in the air lock, MATERIAL IS COMING OUT. When people are in the air lock, STOP COMPRESSING.
3 signals	PEOPLE ARE COMING OUT OF THE AIR LOCK.

O. Reg. 213/91, s. 341 (3).

(4) A copy of the signal code shall be posted near every switch of an electric buzzer or bell system. O. Reg. 213/91, s. 341 (4).

(5) A lock tender shall acknowledge every signal received on an electric buzzer or bell system by returning the same signal. O. Reg. 213/91, s. 341 (5).

FIRE PREVENTION

342. (1) No person shall use acetylene while working in compressed air. O. Reg. 213/91, s. 342 (1).

(2) No person shall smoke or be permitted to smoke in an air lock or work chamber, other than in an area designated as a smoking area by the superintendent. O. Reg. 213/91, s. 342 (2).

343. Before a flame-cutting, gas-welding or similar source of ignition is introduced into a work chamber that is in the vicinity of a combustible material,

(a) a firewatch shall be established and maintained;

(b) a fire hose shall be prepared for use;

(c) the fire hose shall be tested to ensure there is an adequate supply of water and water pressure to extinguish a fire; and

(d) a fire extinguisher suitable for the hazard shall be provided nearby. O. Reg. 213/91, s. 343.

344. As far as practicable, no combustible material shall be installed in or stored in an air lock or work chamber. O. Reg. 213/91, s. 344.

345. (1) A standpipe connected to a source of water or connected to other pipes above ground shall be installed in every air lock and work chamber at a project. O. Reg. 213/91, s. 345 (1).

(2) A standpipe shall have,

(a) valves that isolate the standpipe from the rest of the fire prevention system;

(b) a fitting that is controlled by a valve installed on the standpipe on the work chamber side of the bulkhead and by a valve inside the material lock;

(c) a fitting and valve similar to that described in clause (b) installed at the end of the standpipe nearest to the work face; and

(d) the location of the fittings and valves clearly marked. O. Reg. 213/91, s. 345 (2).

(3) A fitting described in clause (2) (b) shall be such that a fire hose of the local fire department can be connected to it. O. Reg. 213/91, s. 345 (3).

LIGHTING AND ELECTRICAL SUPPLY

346. Electrical wiring passing through an air lock or the bulkheads adjacent to an air lock, other than telephone and signal system wiring, shall be installed in a rigid metal conduit. O. Reg. 213/91, s. 346.

347. (1) A lighting system shall be provided in each work chamber. O. Reg. 213/91, s. 347 (1).

(2) Electric light bulbs used in an air lock shall be enclosed in a glass and metal protective screen cover. O. Reg. 213/91, s. 347 (2).

(3) Flashlights shall be readily available at the entrance to an air lock, on the atmospheric side in an air lock and at every telephone required by section 340. O. Reg. 213/91, s. 347 (3).

348. An auxiliary source of supply of electricity that is not a portable emergency source of supply shall be provided for the lighting system. O. Reg. 213/91, s. 348.

349. (1) An emergency electrical lighting system shall be provided and maintained in each air lock or work chamber. O. Reg. 213/91, s. 349 (1).

(2) An emergency electrical lighting system,

(a) shall be connected to the electrical supply so that it automatically turns on in the event of the failure of the electrical supply; and

(b) shall have a testing switch, if the system is battery-powered. O. Reg. 213/91, s. 349 (2).

(3) An emergency electrical lighting system shall be tested at intervals that are at least as frequent as recommended by the manufacturer and that are adequate to ensure that it will function in an emergency. O. Reg. 213/91, s. 349 (3).

SANITATION

350. A work chamber shall be provided with a reasonable supply of drinking water and at least one chemical toilet. O. Reg. 213/91, s. 350.

MEDICAL REQUIREMENTS

351. (1) An employer who is constructing a tunnel or caisson in which a worker works or will work in compressed air shall employ as project physician at least one legally qualified medical practitioner. O. Reg. 213/91, s. 351 (1).

(2) The project physician shall conduct such medical examinations of workers as in his or her opinion are necessary and shall establish a medical treatment program for the workers. O. Reg. 213/91, s. 351 (2).

(3) A project physician shall be reasonably available to render medical treatment or advice on the treatment of decompression sickness while a worker is working in compressed air. O. Reg. 213/91, s. 351 (3).

(4) The employer shall ensure that the project physician instruct workers on the hazards of working in compressed air and the necessary precautions to be taken to avoid decompression sickness. O. Reg. 213/91, s. 351 (4).

(5) If the pressure in a work chamber at a project may exceed 350 kilopascals for a period of more than five minutes, a project physician shall establish procedures to control decompression sickness including,

(a) the maximum length of work periods for the workers in the chamber;

(b) the minimum length of rest periods for workers in the chamber; and

(c) compression and decompression procedures. O. Reg. 213/91, s. 351 (5).

352. (1) No worker shall work or be permitted to work in compressed air on a project unless,

(a) the project physician has complied with subsection (4); and

(b) the project physician indicates on Form 1 that the worker is physically fit to work in compressed air. O. Reg. 213/91, s. 352 (1).

(2) Subsection (1) does not apply with respect to an inspector or with respect to a worker accompanying an inspector at the inspector's request. O. Reg. 213/91, s. 352 (2).

(3) Every worker working in compressed air at a project shall have a medical examination performed by the project physician before beginning work in compressed air and every two months thereafter while the worker is working in compressed air to determine the worker's fitness for working in compressed air. O. Reg. 213/91, s. 352 (3).

(4) The project physician shall complete Form 1 for the worker, stating whether the worker is physically fit to work in compressed air and ensure that the superintendent receives a copy. O. Reg. 213/91, s. 352 (4).

(5) The medical examination shall include,

(a) a physical examination;

(b) a test under compressed air, if the worker has not previously worked in compressed air; and

(c) such clinical tests as the project physician may require. O. Reg. 213/91, s. 352 (5).

(6) The clinical tests referred to in clause (5) (c) shall include x-rays of the chest and shoulders, and hip and knee joints taken at least once every five years. O. Reg. 213/91, s. 352 (6).

(7) If a worker undergoes a medical examination, the employer shall pay,

(a) the worker's costs for any medical examinations and tests; and

(b) the worker's reasonable travel costs respecting any medical examinations and tests. O. Reg. 213/91, s. 352 (7).

(8) The time the worker spends to undergo medical examinations and tests, including travel time, shall be deemed to be work time for which the worker shall be paid by the employer at the worker's regular or premium rate, as may be proper. O. Reg. 213/91, s. 352 (8).

(9) The project physician conducting the physical examination or clinical tests or under whose supervision the examination or tests are made shall advise the employer whether the worker is fit or is fit with limitations or unfit for work in compressed air, without giving or disclosing to the employer the records or results of the examination or tests. O. Reg. 213/91, s. 352 (9).

(10) The employer shall act on the advice given by the physician under subsection (9). O. Reg. 213/91, s. 352 (10).

(11) Where a project physician advises the employer that a worker, because of a condition resulting from work in compressed air, is fit with limitations or is unfit, the project physician shall forthwith

communicate such advice to the Chief Physician, Occupational Health Medical Service of the Ministry. O. Reg. 213/91, s. 352 (11).

(12) The records of medical examinations, tests, medical treatment and worker exposure to compressed air made or obtained by the project physician under sections 351 and this section shall be kept in a secure place by the project physician who has conducted the examinations and tests or under whose supervision the examinations and tests have been made, for at least six years. O. Reg. 213/91, s. 352 (12).

(13) After six years, the project physician may forward the records to the Chief Physician, Occupational Health Medical Service of the Ministry, or a physician designated by the Chief Physician, and, in any event, the records shall not be destroyed for a period the greater of forty years from the time such records were first made or twenty years from the time the last of such records were made. O. Reg. 213/91, s. 352 (13).

353. (1) A worker who is about to work in compressed air and who does not feel well for any reason shall report the fact as soon as is practicable to the superintendent or a project physician before working in compressed air. O. Reg. 213/91, s. 353 (1).

(2) A worker who is working in compressed air and who does not feel well for any reason shall report the fact as soon as practicable to the superintendent or a project physician. O. Reg. 213/91, s. 353 (2).

354. A worker who is absent for a period of ten or more days from working in compressed air shall not resume work in compressed air until a project physician indicates on Form 1 that the worker is physically fit to resume work in compressed air. O. Reg. 213/91, s. 354.

MEDICAL LOCKS

355. (1) A first aid room shall be provided in close proximity to each medical lock at a project. O. Reg. 213/91, s. 355 (1).

(2) A first aid room shall contain all equipment necessary for first aid for workers working in compressed air and facilities adequate for conducting medical examinations. O. Reg. 213/91, s. 355 (2).

356. (1) A constructor shall supply at least one medical lock at a project where work in compressed air is done and shall maintain it ready for operation while work in compressed air is being done. O. Reg. 213/91, s. 356 (1).

(2) A certificate of inspection issued under the *Boilers and Pressure Vessels Act* for a working pressure of at least 520 kilopascals is required for every medical lock on a project. O. Reg. 213/91, s. 356 (2).

357. (1) A medical lock shall be not less than 1.8 metres high at its centre line. O. Reg. 213/91, s. 357 (1).

(2) A medical lock shall be divided into two pressure compartments. O. Reg. 213/91, s. 357 (2).

(3) Each compartment of a medical lock shall have air valves that are arranged so that the compartment can be pressurized and depressurized from inside and outside the lock. O. Reg. 213/91, s. 357 (3).

(4) An observation window shall be installed in each door and in the rear wall of a medical lock. O. Reg. 213/91, s. 357 (4).

(5) A medical lock shall be equipped with,

(a) a pressure release valve which will automatically blow-off at a pressure not greater than seventy kilopascals more than the operating pressure of the work chamber;

(b) a pressure gauge, a thermometer, a telephone, a cot, seating and a radiant heater; and

(c) a cot mattress, mattress cover and blankets all of which are made of material that is not readily flammable. O. Reg. 213/91, s. 357 (5).

(6) The pressure release valve shall be tested and calibrated before the medical lock is used. O. Reg. 213/91, s. 357 (6).

(7) A medical lock shall be maintained at a temperature of at least 18 degrees celsius, well-lit and well-ventilated and kept clean and sanitary. O. Reg. 213/91, s. 357 (7).

358. (1) A project physician shall control the medical treatment of workers in a medical lock at a project. O. Reg. 213/91, s. 358 (1).

(2) While a worker is working in compressed air and for twenty-four hours afterwards, at least one worker experienced in the decompression of persons suffering from decompression sickness,

(a) shall be present on the project, if the work in compressed air was done at a pressure greater than 100 kilopascals; or

(b) shall be readily available, if the work in compressed air was done at a pressure of 100 kilopascals or less. O. Reg. 213/91, s. 358 (2).

AIR COMPRESSORS

359. (1) The superintendent shall designate at least one competent worker to be in charge of the compressors compressing air for a work chamber and air lock. O. Reg. 213/91, s. 359 (1).

(2) REVOKED: O. Reg. 88/13, s. 3.

(3) A competent worker designated under subsection (1) shall attend to the compressors,

(a) while a person is in compressed air in the work chamber or air lock; and

(b) for twenty-four hours after a person has been in compressed air with a pressure exceeding 100 kilopascals in the work chamber or air lock. O. Reg. 213/91, s. 359 (3).

(4) REVOKED: O. Reg. 88/13, s. 3.

360. (1) At least two air compressors shall be provided for every work chamber and air lock at a project. O. Reg. 213/91, s. 360 (1).

(2) The air compressors for a work chamber or an air lock shall have capacity enough to ensure that, if one compressor is not operating, the remaining compressors are capable of supplying the air required for the work chamber or air lock. O. Reg. 213/91, s. 360 (2).

361. (1) The energy required to furnish compressed air to a work chamber or an air lock shall be readily available at a project from at least two independent sources. O. Reg. 213/91, s. 361 (1).

(2) The two sources of energy shall be arranged so that, should the principal energy source fail, an auxiliary source automatically energizes the compressor. O. Reg. 213/91, s. 361 (2).

(3) An auxiliary source of energy shall be inspected and tested by being operated at regular intervals of not more than seven days to ensure that it works. O. Reg. 213/91, s. 361 (3).

362. (1) A compressor for a work chamber or an air lock shall be constructed so as to ensure that lubricating oil is not discharged with the air that the compressor supplies. O. Reg. 213/91, s. 362 (1).

(2) The air intake for a compressor shall be located so as to prevent the entry of exhaust gases from internal combustion engines or other contaminants. O. Reg. 213/91, s. 362 (2).

363. Air supplied for use in a work chamber or an air lock,

(a) shall be clean and free from excessive moisture, oil or other contaminants; and

(b) shall be kept between 10 degrees and 27 degrees celsius, as far as is practicable. O. Reg. 213/91, s. 363.

AIR LOCKS AND WORK CHAMBERS

364. One air lock shall be provided for each work chamber at a project. O. Reg. 213/91, s. 364.

365. (1) An air lock, including the bulkheads and doors, shall be designed by a professional engineer in accordance with good engineering practice to withstand the pressures to be used in the work chamber and in the air lock. O. Reg. 213/91, s. 365 (1).

(2) An air lock shall be constructed in accordance with the professional engineer's design drawings for it. O. Reg. 213/91, s. 365 (2).

(3) An air lock used for people,

(a) shall measure at least two metres laterally and vertically;

(b) shall be large enough to accommodate the maximum number of people expected to be in the work chamber without them being in cramped positions;

(c) other than an ancillary air lock that complies with section 367, shall contain a functional and accurate electric time piece, thermometer and pressure gauge. O. Reg. 213/91, s. 365 (3).

(4) The constructor shall send to a Director before construction of an air lock begins a copy of the design drawings for the air lock. O. Reg. 213/91, s. 365 (4); O. Reg. 145/00, s. 40; O. Reg. 85/04, s. 24.

(5) The constructor shall keep at a project a copy of the design drawings for an air lock while the air lock is at the project. O. Reg. 213/91, s. 365 (5).

366. Separate air locks shall be used for people and for materials,

(a) if the air lock is in a shaft; or

(b) where practicable, if the air locks are installed in a tunnel and if the air pressure is likely to exceed 100 kilopascals. O. Reg. 213/91, s. 366.

367. (1) Every air lock shall have an ancillary air lock that,

(a) can be pressurized independently of the primary air lock;

(b) has a door into the primary air lock or into the work chamber; and

(c) has a door into air at atmospheric pressure. O. Reg. 213/91, s. 367 (1).

(2) Except in an emergency, a door in an ancillary air lock into air at atmospheric pressure shall be kept open. O. Reg. 213/91, s. 367 (2).

(3) A vertical air lock in a shaft or pneumatic caisson shall not be used to decompress workers unless a separate worker-lock with its own controls for compression and decompression is provided. O. Reg. 213/91, s. 367 (3).

(4) An ancillary air lock shall be used to enter the work chamber only,

(a) when the door between the chamber and the primary air lock is open; and

(b) when it is impossible or impracticable for the door to be closed. O. Reg. 213/91, s. 367 (4).

(5) Except in an emergency, an ancillary air lock shall not be used to decompress people. O. Reg. 213/91, s. 367 (5).

368. (1) At least two pipes shall supply air to each work chamber and each air lock. O. Reg. 213/91, s. 368 (1).

(2) Each of the pipes shall have a valve installed in the vicinity of the compressors to enable one pipe to be disconnected while another pipe remains in service at the work chamber or air lock. O. Reg. 213/91, s. 368 (2).

(3) The outlet end of a pipe supplying air to a work chamber or an air lock shall have a hinged flap valve. O. Reg. 213/91, s. 368 (3).

369. (1) Each work chamber and each air lock, including an ancillary air lock, shall have a means of controlling and of automatically limiting the maximum air pressure in it. O. Reg. 213/91, s. 369 (1).

(2) The air pressure control mechanism shall be set at a level not greater than,

(a) for an air lock, the pressure for which the air lock, bulkheads and doors are designed; and

(b) for a work chamber, seventy kilopascals more than the maximum air pressure to be used in the chamber. O. Reg. 213/91, s. 369 (2).

370. At each set of valves controlling the air supply to and discharge from an air lock, there shall be,

(a) a pressure gauge showing the air pressure in the air lock;

(b) a pressure gauge showing the air pressure in the work chamber;

(c) an electric time piece;

(d) a thermometer showing the temperature in the air lock; and

(e) a legible copy of the procedures governing maximum work periods and minimum decompression times for the air lock. O. Reg. 213/91, s. 370.

371. (1) Separate valves controlling the air supply to and discharge from an air lock shall be provided inside and outside the lock. O. Reg. 213/91, s. 371 (1).

(2) The valves shall be arranged so that a person can enter or leave the air lock or work chamber if no lock tender is attending the air lock. O. Reg. 213/91, s. 371 (2).

372. If an automatic compression and decompression device is installed in an air lock used for people, the air lock shall have a manual means of controlling the air pressure in the lock. O. Reg. 213/91, s. 372.

373. (1) An air lock, other than an ancillary air lock, used for people shall have an automatic recording gauge to permanently record the air pressure in the lock. O. Reg. 213/91, s. 373 (1).

(2) The gauge shall be a rotating dial or strip-chart rectilinear type. O. Reg. 213/91, s. 373 (2).

(3) The gauge,

(a) shall be installed so that the lock tender cannot see it when at the controls of the air lock;

(b) shall indicate the change in air pressure at intervals of not more than five minutes; and

(c) shall be kept locked except when the recording paper is being changed. O. Reg. 213/91, s. 373 (3).

(4) Despite subsection (2) and clause (3) (b), the gauge for an air lock at a work chamber whose air pressure exceeds 100 kilopascals shall be the strip-chart rectilinear type and shall indicate the change in air pressure at intervals of not more than one minute. O. Reg. 213/91, s. 373 (4).

(5) The recording paper used in a gauge shall be changed every seven days and shall be marked to identify the period of time to which it relates. O. Reg. 213/91, s. 373 (5).

374. (1) An air lock shall have a pressure gauge that can be read from the work chamber and that shows the air pressure in the lock. O. Reg. 213/91, s. 374 (1).

(2) A pressure gauge, other than a portable pressure gauge, shall have fittings for attaching test gauges to it and shall be tested daily for accuracy. O. Reg. 213/91, s. 374 (2).

375. A work chamber shall contain, in a protective container within fifteen metres of the work face, a portable pressure gauge and a thermometer. O. Reg. 213/91, s. 375.

376. (1) Only one unit of measuring pressure (either kilopascals or pounds per square inch) shall be used on a project. O. Reg. 213/91, s. 376 (1).

(2) Pressure gauges for decompression equipment and decompression procedures established for a project shall be calibrated using the unit of pressure for the project. O. Reg. 213/91, s. 376 (2).

377. (1) The door between an air lock and a work chamber shall be kept open,

(a) unless the air lock is being used to compress or decompress people or to move materials; or

(b) when people are in the work chamber. O. Reg. 213/91, s. 377 (1).

(2) Clause (1) (a) does not apply with respect to an ancillary air lock. O. Reg. 213/91, s. 377 (2).

378. Every air lock door shall have a transparent observation window. O. Reg. 213/91, s. 378.

379. If practicable, an air lock used for people, other than an ancillary air lock, shall have one seat for each person being decompressed at one time. O. Reg. 213/91, s. 379.

380. (1) An air lock in which people are decompressed shall have a means of radiant heat if the air pressure in the lock exceeds 100 kilopascals. O. Reg. 213/91, s. 380 (1).

(2) The temperature in an air lock used for people shall not exceed 27 degrees celsius. O. Reg. 213/91, s. 380 (2).

381. (1) A smoke line shall be provided from each work face of a work chamber if an air lock or bulkhead is located between the chamber and the surface. O. Reg. 213/91, s. 381 (1).

(2) Each smoke line shall extend to within fifteen metres of a work face. O. Reg. 213/91, s. 381 (2).

(3) Each smoke line shall have two quick opening valves at least 100 millimetres in diameter,

(a) one located within seventeen metres of the work face; and

(b) one located between the air lock closest to the work chamber and the work chamber and within two metres of the air lock. O. Reg. 213/91, s. 381 (3).

(4) Each smoke line shall be at least 100 millimetres in diameter and shall have a readily-accessible outlet above ground,

(a) that has a quick opening valve at least 100 millimetres in diameter;

(b) that is clearly marked with a sign stating “SMOKE LINE – TO BE USED ONLY IN CASE OF EMERGENCY”; and

(c) that is sealed to prevent the inadvertent opening of the valve. O. Reg. 213/91, s. 381 (4).

(5) Each smoke line shall extend from inside the work chamber to above ground and shall pass vertically through either the air lock or the bulkhead between the work chamber and air at atmospheric pressure. O. Reg. 213/91, s. 381 (5).

382. (1) No bulkhead in a work chamber shall interfere with the free passage from the work face to an air lock of people in a tunnel or shaft. O. Reg. 213/91, s. 382 (1).

(2) Subsection (1) does not apply with respect to a partial bulkhead in a sub-aqueous tunnel if the bulkhead is designed and placed to trap air so that workers can escape from the tunnel if it is flooded. O. Reg. 213/91, s. 382 (2).

383. (1) Except when it is necessary to protect people during an emergency, the pressure in a work chamber shall not exceed 350 kilopascals for more than five minutes. O. Reg. 213/91, s. 383 (1).

(2) If the pressure in a work chamber exceeds 350 kilopascals for more than five minutes,

(a) the superintendent shall promptly notify an inspector by telephone, two-way radio or in person; and

(b) the pressure maintained in the work chamber shall be the least possible pressure required to meet the emergency. O. Reg. 213/91, s. 383 (2).

384. (1) Subject to subsection (2), no worker shall work or be permitted to work in a work chamber in which the temperature exceeds the greater of,

(a) 27 degrees celsius; and

(b) the temperature at the entrance to the service shaft above ground. O. Reg. 213/91, s. 384 (1).

(2) No worker shall work or be permitted to work in a work chamber in which the temperature exceeds 38 degrees celsius. O. Reg. 213/91, s. 384 (2).

385. (1) Water on the floor of a work chamber or an air lock shall be drained by a pipe or mop line and, if necessary, a pump. O. Reg. 213/91, s. 385 (1).

(2) A pipe or mop line shall have an inside diameter of at least fifty-one millimetres. O. Reg. 213/91, s. 385 (2).

(3) At least one inlet with a valve to a pipe or mop line for an air lock and work chamber shall be located,

(a) in the air lock;

(b) within fifteen metres of the work face; and

(c) at intervals of not more than thirty metres along the length of the work chamber. O. Reg. 213/91, s. 385 (3).

(4) An inlet shall be diverted downward. O. Reg. 213/91, s. 385 (4).

(5) An outlet from an air lock shall discharge downward under atmospheric air pressure. O. Reg. 213/91, s. 385 (5).

WORK PERIODS AND REST PERIODS

386. (1) Subject to subsection (2), no worker shall,

(a) work for more than two working periods in any consecutive twenty-four hour period where the maximum air pressure is not greater than 100 kilopascals; or

(b) work for more than one working period in any consecutive twenty-four hour period where the maximum air pressure is more than 100 kilopascals. O. Reg. 213/91, s. 386 (1).

(2) No worker shall work or be permitted to work more than eight hours in a period of twenty-four hours. O. Reg. 213/91, s. 386 (2).

(3) No lock tender shall work or be permitted to work more than nine hours in a period of twenty-four hours. O. Reg. 213/91, s. 386 (3).

(4) The period between the end of one work period and the beginning of the next for a worker doing manual work under compressed air where the maximum air pressure exceeds 100 kilopascals shall be at least twelve hours. O. Reg. 213/91, s. 386 (4).

387. (1) A worker who is working in compressed air shall have a rest period of at least,

(a) ¼ hour, if the worker was working in pressure of 100 kilopascals or less;

(b) ¾ hour, if the worker was working in pressure greater than 100 kilopascals up to and including 140 kilopascals;

(c) 1½ hours, if the worker was working in pressure greater than 140 kilopascals up to and including 220 kilopascals; or

(d) two hours, if the worker was working in pressure greater than 220 kilopascals. O. Reg. 213/91, s. 387 (1).

(2) No worker shall be permitted to perform manual work or engage in physical exertion during a rest period. O. Reg. 213/91, s. 387 (2).

(3) No worker shall be permitted to leave a project during a rest period. O. Reg. 213/91, s. 387 (3).

388. (1) The employer shall provide, free of charge, sugar and hot beverages for workers working in compressed air to consume during their rest periods. O. Reg. 213/91, s. 388 (1).

(2) An employer shall keep containers and cups for beverages in a sanitary condition and shall store them in a closed container. O. Reg. 213/91, s. 388 (2).

LOCK TENDERS

389. (1) A lock tender shall supervise the controls of an air lock when a worker is about to be, or is being, subjected to compressed air in the air lock or work chamber. O. Reg. 213/91, s. 389 (1).

(2) Subject to subsection (3), a lock tender shall tend only one air lock at a time. O. Reg. 213/91, s. 389 (2).

(3) A lock tender may tend two locks if,

(a) they are in close proximity;

(b) the pressure in each work chamber does not exceed 100 kilopascals; and

(c) only one of the locks is being used to compress or decompress a worker. O. Reg. 213/91, s. 389 (3).

390. (1) A lock tender shall ensure that the requirements of this section are met before a worker enters an air lock. O. Reg. 213/91, s. 390 (1).

(2) A worker shall be examined by a project physician before the worker enters an air lock in preparation for working in compressed air. O. Reg. 213/91, s. 390 (2).

(3) A lock tender shall ensure that any worker who enters the air lock in preparation for working in compressed air has been examined by a physician in accordance with subsection (2). O. Reg. 213/91, s. 390 (3).

(4) The means of air supply, air pressure gauges and controls, lock equipment and other devices necessary for the safe operation of an air lock and the protection of workers shall be in working order. O. Reg. 213/91, s. 390 (4).

391. (1) A lock tender shall increase the air pressure on a worker in an air lock in accordance with this section. O. Reg. 213/91, s. 391 (1).

(2) Air pressure shall be increased uniformly and to no more than thirty-five kilopascals in the first two minutes of application of compressed air. O. Reg. 213/91, s. 391 (2).

(3) Air pressure shall not be increased to more than thirty-five kilopascals until the lock tender ensures that every worker in the air lock is free from discomfort due to air pressure. O. Reg. 213/91, s. 391 (3).

(4) Air pressure shall be increased above thirty-five kilopascals at a uniform rate of not greater than thirty-five kilopascals per minute. O. Reg. 213/91, s. 391 (4).

(5) A lock tender shall observe a worker in an air lock while increasing the air pressure on the worker and, if the worker shows signs of discomfort and the discomfort does not quickly disappear, the lock tender shall gradually decrease the air pressure until the worker reports that the discomfort has ceased or until the air pressure reaches atmospheric pressure. O. Reg. 213/91, s. 391 (5).

392. (1) A lock tender shall decrease the air pressure on a worker in an air lock in accordance with this section and section 395. O. Reg. 213/91, s. 392 (1).

(2) Air pressure shall be decreased uniformly in each of the stages of decompression referred to in section 395. O. Reg. 213/91, s. 392 (2).

(3) A lock tender shall constantly observe a worker in an air lock while decreasing the air pressure on the worker and, if the worker shows signs of discomfort and the discomfort does not quickly disappear, the lock tender shall gradually increase the air pressure until the worker reports that the discomfort has ceased or until the air pressure equals the pressure in the work chamber. O. Reg. 213/91, s. 392 (3).

393. (1) If a worker in an air lock appears to be suffering from decompression sickness, a lock tender shall notify, and follow the instructions of, a project physician, the superintendent or a person designated by the superintendent. O. Reg. 213/91, s. 393 (1).

(2) If a worker in an air lock appears to be injured or to be unwell from a cause unrelated to air pressure, a lock tender shall notify, and follow the instructions of, a project physician. O. Reg. 213/91, s. 393 (2).

(3) In the circumstances described in subsection (2), a lock tender shall decompress the worker unless otherwise instructed by the project physician. O. Reg. 213/91, s. 393 (3).

394. (1) A lock tender shall record information about the compression and decompression of a worker in an air lock. O. Reg. 213/91, s. 394 (1).

(2) A separate record shall be kept for each air lock and each compression and decompression of a worker. O. Reg. 213/91, s. 394 (2).

(3) The information to be recorded is,

(a) the description of the air lock;

(b) the worker's name;

(c) the time of the beginning and end of each compression or decompression to which the worker is subjected;

(d) the pressure and temperature in the air lock before and after each compression or decompression to which the worker is subjected; and

(e) a description of any unusual occurrence respecting the worker, the air lock or any related matter. O. Reg. 213/91, s. 394 (3).

(4) A lock tender shall give the record to the superintendent. O. Reg. 213/91, s. 394 (4).

DECOMPRESSION PROCEDURES

395. (1) A worker who has been in air pressure greater than atmospheric air pressure for more than five minutes shall be decompressed down to atmospheric pressure in accordance with this section. O. Reg. 213/91, s. 395 (1).

(2) Subject to subsection (3), decompression shall be done in accordance with the Tables to this Regulation. O. Reg. 213/91, s. 395 (2).

(3) The rate of decompression required by subsection (2) may be doubled with respect to a worker if, while performing the work in compressed air, the worker,

(a) has not been exposed to air pressure greater than 220 kilopascals;

(b) has remained under compressed air for a maximum of thirty minutes; and

(c) has not done manual work. O. Reg. 213/91, s. 395 (3).

(4) Subsection (3) applies only if every worker who is in the air lock,

(a) meets the requirements of clauses 3 (a), (b) and (c); and

(b) has previously experienced decompression. O. Reg. 213/91, s. 395 (4).

(5) A copy of the Tables to this Regulation shall be kept posted at a project,

(a) in each air lock;

(b) at the controls outside each air lock; and

(c) in each change room. O. Reg. 213/91, s. 395 (5).

396. A worker who believes he or she has decompression sickness shall promptly notify,

(a) the superintendent or a project physician; or

(b) the lock tender, if the worker is under compressed air. O. Reg. 213/91, s. 396.

397. (1) The superintendent shall make a report at least once a week to a Director concerning every case of decompression sickness at a project occurring since the previous report, if any. O. Reg. 213/91, s. 397 (1); O. Reg. 145/00, s. 41 (1).

(2) The superintendent shall promptly make a report by telephone, two-way radio or other direct means to a Director concerning a case of decompression sickness that does not respond to first-aid treatment. O. Reg. 213/91, s. 397 (2); O. Reg. 145/00, s. 41 (2).

(3) A report under this section shall indicate, for each case of decompression sickness,

(a) the air pressure to which the worker was subjected;

(b) the length of time the worker was subjected to the air pressure;

(c) the nature of the medical treatment given to the worker; and

(d) the extent of the worker's recovery. O. Reg. 213/91, s. 397 (3).

398. OMITTED (REVOKES OTHER REGULATIONS). O. Reg. 213/91, s. 398.

399. OMITTED (PROVIDES FOR COMING INTO FORCE OF PROVISIONS OF THIS REGULATION). O. Reg. 213/91, s. 399.
